CITY HALL  
595 Harbor Street  
Morro Bay, CA 93442

### **CONSTRUCTION NOTICE: QUINTANA ROAD BETWEEN KENNEDY WAY AND MORRO BAY BOULEVARD**

July 9, 2021

During the week of July 12, construction crews will move to a new segment on Quintana Road – Kennedy Way to Morro Bay Boulevard – as part of the City of Morro Bay Water Reclamation Facility (WRF) Pipelines. The WRF Program is the largest-ever City infrastructure program, and will meet state water and wastewater regulations, protect the environment and contribute a safe and reliable water source for Morro Bay's residents and businesses.

**What To Expect:** Construction will be completed in segments on Quintana Road moving southeast within the public right-of-way. The southbound lane on Quintana Road will remain open, but northbound traffic on Quintana Road will be detoured at the roundabout via Morro Bay Boulevard, Shasta Street and Kennedy Way.

Businesses will remain open, and access will be maintained for businesses, residences, emergency vehicles, pedestrians and cyclists. **Traffic to Quintana Road properties between Main Street and Morro Bay Boulevard is asked to access from the north (via Main Street or Kennedy Way).** For the safety of the community and construction crews, traffic control will be in place. Please plan for potential traffic delays near the roundabout and Kennedy Way.

The WRF Pipelines include two wastewater pipelines, one pipeline for the water treatment process discharge, and one purified water pipeline. Construction will include trenching, pipe installation, soil backfilling and offhauling, and road restoration.

**When:** Construction is scheduled on weekdays from 7 a.m. to 5:30 p.m. Work in this area is expected to last until September 2021. Weekend or night work may be scheduled, as needed, but neighboring properties will be informed in advance of schedule changes.

**Why:** The City of Morro Bay is investing in the construction of the WRF Program that will protect our environment, and provide a safe, clean and reliable water supply for our community, both current and future generations. The WRF Program involves replacing the City's existing wastewater treatment plant with an advanced water purification facility that will create a drought buffer and will be capable of providing up to 80 percent of the City's water needs in the future.

The City is committed to clear communication and providing up-to-date information about construction activities. Construction notices will be regularly posted on [morrobaywrf.com](http://morrobaywrf.com). Please contact [wrfinfo@morrobayca.gov](mailto:wrfinfo@morrobayca.gov) or **877-MORROBAYH2O** with questions about the City's WRF Program, and a team member will get back to you within one business day.
