CITY HALL
595 Harbor Street
Morro Bay, CA 93442

CONSTRUCTION NOTICE:

CONSTRUCTION BEGINS ON WATER RECLAMATION FACILITY PIPELINES ON QUINTANA ROAD

May 5, 2021

Pipeline construction is scheduled to begin on **Monday, May 10**, on the City of Morro Bay Water Reclamation Facility (WRF) Pipelines on Quintana Road. The WRF Program is the largest-ever City infrastructure program, and will meet state water and wastewater regulations, protect the environment and contribute a safe and reliable water source for Morro Bay's residents and businesses.

What To Expect: The WRF Pipelines include two wastewater pipelines, one pipeline for the water treatment process discharge, and one purified water pipeline. Construction will include trenching, pipe installation, soil backfilling and offhauling, and road restoration.

Construction will be completed in segments starting on Quintana Road southeast of Main Street and moving southeast within the public right-of-way. Northbound traffic on Quintana Road will be detoured at Kennedy Way to Dunes Street and Main Street. Southbound traffic on Quintana Road will remain open.

Access will be maintained for businesses, residences, emergency vehicles, pedestrians and cyclists. Driveways to businesses will remain accessible, and the project team will coordinate with businesses on an individual basis to accommodate deliveries and traffic. For the safety of the community and construction crews, traffic control, such as signage and barricades, will be in place. Please follow all posted signage near the work zone.

When: Construction is scheduled on weekdays from 7 a.m. to 5:30 p.m., and work on Quintana Road is scheduled to begin on **Monday, May 10**. Weekend or night work may be scheduled, as needed, but neighboring properties will be informed in advance of schedule changes.

Why: The City of Morro Bay is investing in the construction of the WRF Program that will protect our environment, and provide a safe, clean and reliable water supply for our community, both current and future generations. The WRF Program involves replacing the City's existing wastewater treatment plant with an advanced water purification facility that will create a drought buffer and will be capable of providing up to 80 percent of the City's water needs in the future.

The City is committed to clear communication and providing up-to-date information about construction activities. Construction notices will be regularly posted on morrobaywrf.com. Please contact wrfinfo@morrobayca.gov or **877-MORROBAYH2O** with questions about the City's WRF Program, and a team member will get back to you within one business day. Thank you for your patience.
