3. Other names under which the applicant does business: \_\_\_\_\_
4. Employer/taxpayer identification number (EIN/TIN): \_\_\_\_\_
5. Dun and Bradstreet Data Universal Number System (DUNS) number: \_\_\_\_\_
6. Department and division name: \_\_\_\_\_
7. Business street address, city, state, zip: \_\_\_\_\_  
\_\_\_\_\_
8. Mailing street address (if different from above): \_\_\_\_\_  
\_\_\_\_\_
9. Applicant website: \_\_\_\_\_

## CERTIFICATIONS

1. *National Environmental Policy Act:* The applicant acknowledges that any project receiving credit assistance under this program must comply with all provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.)
2. *American Iron and Steel:* The applicant acknowledges that any project receiving credit assistance under this program for the construction, alteration, maintenance, or repair of a project may only use iron and steel products produced in the United States and must comply with all applicable guidance.
3. *Prevailing Wages:* The applicant acknowledges that all laborers and mechanics employed by contractors or subcontractors on projects receiving credit assistance under this program shall be paid wages at rates not less than those prevailing for the same type of work on similar construction in the immediate locality, as determined by the Secretary of Labor, in accordance with sections 3141-3144, 3146, and 3147 of Title 40 (Davis-Bacon wage rules).
4. *Credit Ratings:* This applicant has received a preliminary rating opinion letter(s) on the project's senior debt instrument, from one or more rating agencies. These letters or ratings are attached as Exhibit XII.
5. *Credit Processing Fees:* The undersigned certifies that it will reimburse EPA for its costs incurred in negotiating the credit agreement, irrespective of whether the credit agreement is executed.
6. *Lobbying:* Section 1352 of Title 31, United States Code provides that none of the funds appropriated by any Act of Congress may be expended by a recipient of a contract, grant, loan, or cooperative agreement to pay any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, or an employee of a Member of Congress in connection with the award or making of a Federal contract, grant, loan, or cooperative agreement or the modification thereof. EPA interprets this provision to include the use of appropriated funds to influence or attempt to influence the selection for assistance under the WIFIA program.

WIFIA applicants must file a declaration: (a) with the submission of an application for WIFIA credit assistance; (b) upon receipt of WIFIA credit assistance (unless the information contained in the declaration accompanying the WIFIA application has not materially changed); and (c) at the end of each calendar quarter in which there occurs any event that materially affects the accuracy of the information contained in any declaration previously filed in connection with the WIFIA credit assistance.

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

US Environmental Protection Agency  
WIFIA Program  
Application

OMB Control No. 2040-0292  
Approval expires 12/31/2019

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.  
This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.
7. *Debarment:* The undersigned further certifies that it is not currently, nor has it been in the preceding three years: 1) debarred, suspended, or declared ineligible from participating in any Federal program; 2) formally proposed for debarment, with a final determination still pending; 3) voluntarily excluded from participation in a Federal transaction; or 4) indicted, convicted, or had a civil judgment rendered against it for any of the offenses listed in the Regulations Governing Debarment and Suspension (Governmentwide Nonprocurement Debarment and Suspension Regulations: 2 C.F.R. Part 180 and Part 1532.
8. *Default/Delinquency:* The undersigned further certifies that neither it nor any of its subsidiaries or affiliates are currently in default or delinquent on any debt or loans provided or guaranteed by the Federal Government.
9. *Other Federal Requirements:* The applicant acknowledges that it must comply with all other federal statutes and regulations, as applicable. A non-exhaustive list of federal cross-cutting statutes and regulations can be found at: [www.epa.gov/wifia](http://www.epa.gov/wifia).
10. *Signature:* By submitting this application, the undersigned certifies that the facts stated and the certifications and representations made in this application are true, to the best of the applicant's knowledge and belief after due inquiry, and that the applicant has not omitted any material facts. The undersigned is an authorized representative of the applicant.

### 1. Background

#### *a. Applicant's history, ownership, and legal structure*

##### The City of Morro Bay, San Luis Obispo County, California

The City of Morro Bay (population 10,635) is equidistant from Los Angeles and San Francisco on the coast of California. The City is adjacent to both the Pacific Ocean and Morro Bay—a marine protected area designated as a state and national bird sanctuary, and a national estuary. Founded in 1870 as a fishing port, Morro Bay's economy today is based on small businesses and tourism. It still has a vital working waterfront and commercial fishing port.

Protecting and efficiently managing water resources is essential to maintaining a strong, vibrant economy in Morro Bay and the surrounding region. City-owned sewer and water utilities serve residential and commercial customers within City limits and a few outlying areas. The City's wastewater treatment plant does not meet current regulatory standards for secondary treatment and discharge. The need to replace this facility drives the need for this project. The Regional Water Quality Control Board previously issued a waiver to the City for meeting secondary discharge standards. That waiver has expired, and the City of Morro Bay is now under a time schedule order to bring wastewater treatment facilities into compliance with the National Pollution Discharge Elimination System (NPDES) permit requirements by February 28, 2023.

The City of Morro Bay currently purchases most of its water supply from outside the region, importing water from the State Water Project. This water originates hundreds of miles away, in the Sierra Nevada mountains and the Bay-Delta. By purchasing water from an external supplier, residents and businesses in Morro Bay face considerable uncertainty about future costs and reliability. It follows that diversification of its water supply and decreasing reliance on imported water provides economic benefits to residents and businesses by creating more certainty in the water supply. A new local water supply, derived from advanced treated recycled water produced at a new Water Reclamation Facility, will greatly reduce the risk of supply disruptions due to earthquakes, droughts, curtailments in State Water Project deliveries, or shortages for other reasons. A local water supply will also improve the community's ability to adapt to climate change and will free up more State Water for other potential users.

The Water Reclamation Facility Project is regionally significant. Economic benefits are created by improvements to water supply reliability, and improvement to environmental water quality in Morro Bay. Public health benefits arise from improved water quality in Morro Bay.

##### Legal Structure

The City of Morro Bay was incorporated in 1964 and is governed by a five-member City Council which includes a directly-elected Mayor. The City Council is the legislative authority and sets the policies under which the City operates. As such, the City Council has the power to adopt ordinances and resolutions, make appointments to the City's advisory bodies, establish policies and approve programs, appropriate funds, adopt budgets, and approve contracts. A copy of the statutory authority under which the City was created is included in **Exhibit I**.

b. *Applicant’s legal authority*

The City has the legal statutory authority, as an incorporated city, to carry out proposed Project activities described in the application packet, including levying taxes, issuing debt, charging fees, and/or receiving dedicated funding from another entity.

c. *Approvals*

The City Council approved the submission of this application packet and approved the funding and carrying out of the activities in the application. Per the included Certifications, Public Works Director Rob Livick has signatory authority as the authorized representative.

**2. Organizational Structure**

a. *Applicant’s organizational structure*

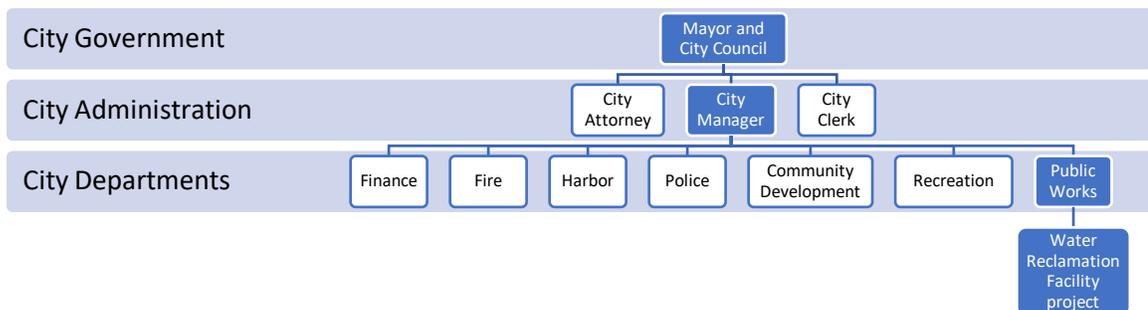

City Structure

The City of Morro Bay is governed by an elected City Council, which includes Mayor Jamie L. Irons and four additional members. As part of the City Administration, City Manager Scott Collins works closely with the City Attorney and City Clerk. Mr. Collins oversees day-to-day operations of the City and administers its budget. Mr. Collins also supervises the duties of the City’s nine departments including the Department of Public Works.

Public Works Director and City Engineer Rob Livick oversees the Engineering Division, Water Division and Wastewater Collections Division which strive to maintain safe and reliable water deliveries, including waste water collection and treatment, and provide a safe and accessible street system and pavement management systems.

The City often utilizes consultants for technical support, engineering services and program management.

**Figure A.1 - Organizational Chart for the City of Morro Bay**

b. *Project Structure*

The Water Reclamation Facility will be solely owned and operated by the City of Morro Bay.

A robust project team has been assembled, led by City Manager Scott Collins. Mr. Collins has overseen and/or managed several large capital projects and department budgets. In addition to shepherding the planning, design and construction of the Water Reclamation Facility, Mr. Collins

oversees day-to-day operations of the City and administers its budget, with a total combined annual operations and capital budget of \$42 million and 100 full-time employees.

The program manager, Eric Casares, of Carollo Engineers, will lead administration on this large project. Carollo Engineers has a strong reputation and demonstrated experience in large water and wastewater projects. The program manager will be accountable to the City Council, through City Manager Scott Collins, for overall program schedule, budget, and quality. The Program Manager will spend significant time and effort integrating the various complex activities and sub-projects associated with the new facility, communicating to stakeholders, and negotiating plan changes related to the work.

Engineering and technical support was provided by MKN & Associates, Inc. as the “owner’s representative” during procurement and management of the initial contracts. Additional duties provided by MKN included managing the environmental, permitting, and master plan consultants and providing leadership and direction for these professionals; managing the outreach program; and managing scheduling, staff report preparation, and financial tracking of program budgets.

A detailed Project Organizational Chart and City Organizational Chart are provided in **Exhibit II**.

### 3. Litigation and/or Conflicts

The City of Morro Bay has no current, threatened, or pending litigation related to permitting, public involvement, environmental irregularities, construction defects, securities fraud, conflict of interest, failure to perform under a State or Federal contract, or other charges.

### 4. Customer Concentration Analysis

The City of Morro Bay/Cayucos Sanitary District jointly-owned Waste Water Treatment Plant annual revenues in 2016/2017 were \$5,608,000, with the City accounting for a majority of the revenues as shown in Table A.1.<sup>1</sup>

| Table A.1 - Distribution of Sewer Revenues for Morro Bay-Cayucos Wastewater Treatment Plant in 2016/2017 |                |                              |
|----------------------------------------------------------------------------------------------------------|----------------|------------------------------|
| Customer                                                                                                 | Annual Revenue | Percentage of Total Revenues |
| City of Morro Bay                                                                                        | \$3,483,900    | 62%                          |
| Cayucos Sanitary District                                                                                | \$2,077,000    | 37%                          |

<sup>1</sup> City of Morro Bay Adopted Operating and Capital Budgets Fiscal Year 2017/18, Sewer Revenue Fund, page 92.

Table A.2 illustrates a breakdown of the City’s top 10 non-residential customers, which account for 4% of the total revenues from the Waste Water Treatment Plant.

| <b>Table A.2 - Top 10 Non-Residential Sewer Customers</b> |                       |                                     |
|-----------------------------------------------------------|-----------------------|-------------------------------------|
| <b>Customer</b>                                           | <b>Annual Revenue</b> | <b>Percentage of Total Revenues</b> |
| Mission Linen Supply                                      | \$78,058              | <1% minus CSD percentage            |
| Silver City RV Resort                                     | \$23,603              | <1% minus CSD percentage            |
| Morro Bay Marina                                          | \$23,301              | <1% minus CSD percentage            |
| G6 Hospitality LLC                                        | \$22,652              | <1% minus CSD percentage            |
| La Serena Inn                                             | \$19,604              | <1% minus CSD percentage            |
| Morro Dunes Trailer Park                                  | \$18,257              | <1% minus CSD percentage            |
| Embarcadero Inn                                           | \$18,110              | <1% minus CSD percentage            |
| Best Western San Marcos                                   | \$16,402              | <1% minus CSD percentage            |
| Harbor House                                              | \$14,777              | <1% minus CSD percentage            |
| ABC Investments, LLC                                      | \$13,769              | <1% minus CSD percentage            |
| <b>Total</b>                                              | <b>\$248,533</b>      | <b>4%</b>                           |

Annual water revenues for 2016/2017 were budgeted at \$5,137,800.<sup>2</sup> The City of Morro Bay receives over 24% of water services revenues from the top ten water customers, as listed in Table A.3.

| <b>Table A.3 - City of Morro Bay Top 10 Water Customers</b> |                       |                                     |
|-------------------------------------------------------------|-----------------------|-------------------------------------|
| <b>Customer</b>                                             | <b>Annual Payment</b> | <b>Percentage of Total Revenues</b> |
| City of Morro Bay                                           | \$369,855             | 7%                                  |

## SECTION B: DETAILED PROJECT INFORMATION

### 1. Project Description

#### Overview

The City of Morro Bay (City) plans a major capital improvement project to replace the 62-year-old Morro Bay-Cayucos Wastewater Treatment Plant with a new Water Reclamation Facility (WRF) that will turn the City's wastewater into a sustainable water source for groundwater replenishment. This project is critical to securing a reliable long-term water supply for the City, and protecting water quality. Morro Bay is located on California's Central Coast which has both fragile natural environments and constrained water supplies.

The Water Reclamation Facility project includes: demolishing the existing wastewater treatment plant which is located on a beach and replacing it with a new treatment plant and water reclamation facility at an inland location; constructing a new sewage pump station and pipeline; constructing new injection wells for groundwater storage, constructing a recycled water pipeline, and constructing a waste discharge (brine) pipeline. The WRF will be owned and operated by the City of Morro Bay, and it will primarily serve residents of the City. A goal set by the community for the project is to build a cost-effective wastewater treatment facility with capacity for water reclamation. The WRF will have capacity to produce approximately 800 acre-feet per year of highly purified recycled water utilizing full advanced treatment technologies. The highly purified water will be injected into the Morro Valley aquifer and recovered at the City's existing drinking water wells. Injecting treated water into the Morro Valley aquifer is expected to have a beneficial effect on groundwater quality, as the aquifer currently has levels of nitrate that exceed the primary drinking water maximum contaminant load (MCL), largely attributed to historic agricultural impacts.

#### Need for the Project

The existing wastewater treatment plant does not have the ability to meet modern standards for secondary treatment. It was constructed in the 1950's, relies on a trickling filter and open-air sludge beds, sits on 26 prime oceanfront acres threatened by coastal hazards, and discharges approximately 1 million gallons of treated water into the ocean every day. Since it was last upgraded in 1985, the plant has operated under a 301(h) waiver from the EPA—one of only two still existing in California, allowing the City to discharge some wastewater that does not receive secondary treatment. The Regional Water Quality Control Board is requiring that the City meet the new limits in their NPDES permit and the California Coastal Commission has directed the City to relocate the facility inland.

In addition to solving the wastewater treatment problem, this project has potential to significantly reduce the City's need for imported potable water supplies. The City of Morro Bay currently purchases 87% of its water supply from outside the region, importing water from the California State Water Project. This water originates hundreds of miles away, in the Sierra Nevada mountains and the Bay-Delta. By purchasing water from an external supplier, the City of Morro Bay faces considerable uncertainty about the future cost and reliability of that water. There are many, many externalities beyond the City's control in this situation. These are exacerbated by increased demands expected in the future, and by climate change. It follows that decreasing reliance on imported water provides economic benefits to residents and businesses by creating more certainty in the water supply. A new local water supply derived from advanced treated recycled water from a new Water Reclamation Facility will greatly reduce the risk of supply disruption due to earthquakes, droughts, or shortages for other reasons.

The Water Reclamation Facility will be capable of producing advanced treated recycled water that meets or exceeds requirements for indirect potable reuse, as defined in the California Code of Regulations Title 22 recycled water requirements. Accordingly, the Project will allow the City to meet the minimum requirements and timeline set by the Regional Water Quality Control Board for upgrading the wastewater treatment to full secondary treatment.

Progress Since the Letter of Interest

The Water Reclamation Facility Project is consistent with what was described in the letter of interest. Since that submittal, significant progress has been made to advance this project. The City completed the master planning process resulting in the **Draft Water Reclamation Facility Master Plan**. The Draft Environmental Impact Report was completed in March 2018, circulated for public comment, and will be certified in August 2018. The permitting process with the County of San Luis Obispo has been initiated. A competitive procurement process to select a Program Manager consultant was completed, and in March 2018 the City executed a contract with Carollo Engineers for this purpose. A two-stage, best value procurement process to select a design-build contractor has also been completed, and on June 13, 2018, the Morro Bay City Council unanimously accepted the selection committee’s recommendation of the Filanc/Black & Veatch team as the preferred design-build contractor. Following contract negotiations, it is expected that the City Council will issue a Notice to Proceed in August 2018. The public has been kept informed and engaged throughout with monthly updates presented at City Council meetings, at WRF Citizen’s Advisory Committee meetings, at public workshops and via the project website.

Project Details

The project facilities are described in the most detail in the Water Reclamation Facility Master Plan (Black & Veatch, November 2016) and Master Water Reclamation Plan (MKN & Associates, March 2017). These can be found on the project web site: <http://morrobaywrf.com/>

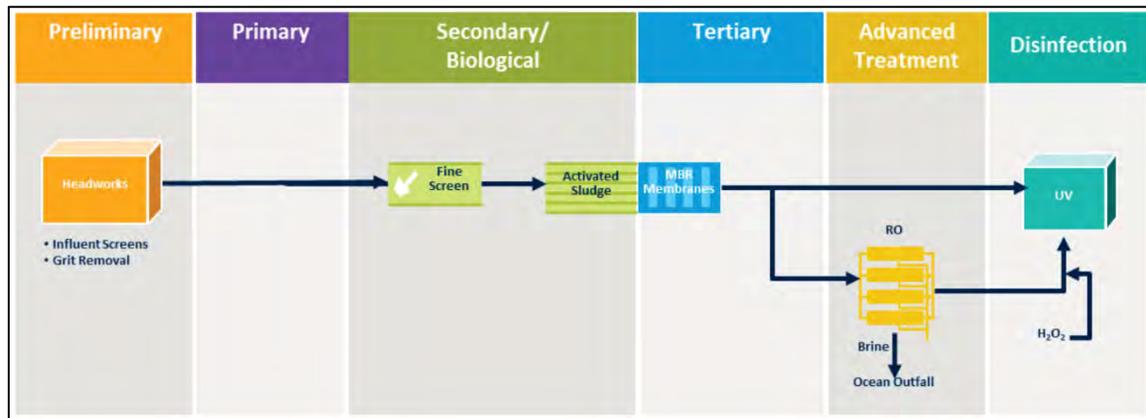

Table B.1 provides a list of the planned WRF facilities. All treatment processes will be covered or housed in one of the WRF buildings.

| <b>Table B.1 - WRF Facilities</b>                     |                                 |
|-------------------------------------------------------|---------------------------------|
|                                                       | <b>Approx. Square Feet (SF)</b> |
| Headworks                                             | 3,500                           |
| Odor Control                                          | 1,750                           |
| Equalization Basin                                    | 20,910                          |
| Sequencing Batch Reactor or Membrane Bioreactor Basin | 13,280                          |
| Dewatering Basin                                      | 3,850                           |
| Sludge Storage Tank                                   | 530                             |
| Standby/Emergency Power                               | 1,140                           |
| Electric Building                                     | 1,860                           |
| Secondary Equalization Tank                           | 1,260                           |
| Microfiltration, Reverse Osmosis, UV Building         | 6,720                           |
| Effluent Pump Station                                 | 2,630                           |
| Waste Discharge Pump Station                          | 1,800                           |

| <b>Total</b>                                          | <b>65,260 SF</b>                |

Treatment Processes

The Water Reclamation Facility design includes a Combined Secondary/Tertiary treatment process and tertiary disinfection. The treatment train consists of several stages including preliminary treatment, biological (secondary) treatment, tertiary treatment, and disinfection. Primary treatment was determined to not be cost effective.

**Figure B.1 - Example Treatment Train with Combined Secondary/Tertiary Treatment**

The planned treatment processes include: a membrane bioreactor; advanced water treatment including reverse osmosis; ultraviolet (UV) radiation disinfection; and solids dewatering with off-site solids disposal.

*Preliminary Treatment (Headworks)*

Raw influent will undergo preliminary treatment in the headworks facilities, designed to screen and remove grit. The influent flow will then be sent to a concrete equalization basin.

*Secondary and Tertiary Treatment (Membrane Bioreactor Process)*

Secondary or biological treatment aims to remove biodegradable organic material and nutrients using an aerobic process where microorganisms oxidize organic matter into simpler products. The Membrane Bioreactor Process includes both a biological treatment process and a filtration process. The biological treatment involves activated sludge and membranes accomplish solids separation. Subsequent filtration and disinfection processes are required to provide tertiary treatment.

*Advanced Treatment*

Advanced treatment is used to remove dissolved salts, pathogens (viruses), total organic carbon, specific organic and inorganic chemicals, and contaminants of emerging concern (prescription drugs, etc.). Reverse osmosis (RO) is the preferred technology to remove dissolved salts. RO systems apply water under pressure to semi-permeable membranes. Product water passes through the membrane, and contaminants are retained. The contaminated stream, or brine stream, will be disposed of in the ocean through the existing ocean outfall. An Advanced Oxidation Process (AOP) will achieve the required pathogen and chemical contaminant removal per Title 22 regulations. AOP involves the generation and application of highly reactive free radical intermediates for the destruction of various contaminants. The UV disinfection process will be coupled with dosing sodium hypochlorite to provide an AOP.

The project also includes associated infrastructure to convey advanced-treated recycled water to the ultimate end use. This includes recycled water pipelines to deliver advanced treated water to new

groundwater injection wells for groundwater replenishment, then utilizing existing City wells to extract groundwater for treatment at the City's water treatment plant.

### Other Facility Components

#### *Odor Treatment Facilities and Technology*

The Water Reclamation Facility will be equipped with odor control facilities to capture and treat foul smelling gases produced by raw wastewater before it is exhausted from channels and tanks. The odor treatment facilities include an Influent Scrubber Complex located near the head of the WRF to process exhaust air from the headworks. Odor control for the solids dewatering facility will be provided by enclosing the dewatering system in a building with provisions for a future passive or active filtration system.

#### *Solids Management*

Sludge dewatering will occur within the Dewatering Basin building via a belt press, screw press, or centrifuge. The City will contract with a third-party to haul biosolids to offsite facilities for composting. Land application will involve applying the biosolids to nonpublic contact sites (e.g., agricultural land and forests) or public parks, plant nurseries or roadsides to condition soil or fertilize crops.

#### *Clean in Place Chemical Storage Facility*

A Clean in Place chemical storage facility will be constructed for hazardous materials containment and handling. The facility will include a metal canopy to cover chemical tanks, bins, and/or totes in a concrete containment area. Hazardous materials associated with the treatment process include membrane cleaning chemicals, disinfection chemicals, and other treatment-related chemicals. All bulk chemicals will be stored in containment areas fitted to contain chemical spills. Spills will be conveyed to blind sumps for manual pumping and disposal.

#### *Storm Water Management*

Pavement, roofs, and other impervious areas at the Water Reclamation Facility will drain to a new onsite stormwater basin. A detention pond or multiple ponds are a requirement for the Coastal Development Permit. Unlined ponds will be located around the site to retain and percolate stormwater.

#### *Recycled Water Storage and Pumps*

A 500,000-gallon coated steel storage tank will provide recycled water storage to support operational flexibility. Two 15 or 30 HP recycled water pumps (one on standby) will convey water to offsite injection wells.

#### *WRF Operations Building*

The Operations Building will be an approximately 7,000 SF single-story building located in the southernmost portion of the site. It will include WRF employee offices, a reception area, conference room, break room, copy room, janitorial room, sample storage room, operations center, restrooms, uniform storage and wash room, map room, server/electrical room, and an outside boot wash.

#### *Maintenance Building*

The Maintenance Building will be approximately 5,600 SF and constructed as a single-story building with a single occupancy restroom, operations room, and an electronics workshop.

### *Buildings and Vehicle Storage*

Building and vehicle storage facilities will include parking and circulation driveways, collections pump and fitting storage, water pump and fitting storage, water vehicle equipment storage, collection vehicle equipment storage, wash rack, outdoor storage aisles, and a general laydown area.

### *Site Access, Security and Lighting*

Access to the WRF site will be provided via South Bay Boulevard off State Highway 1. The City is currently developing easements for access from South Bay Boulevard. The main access road that will run along the east edge of the property will have a 60-foot wide easement with two 12-foot wide lanes and unpaved shoulders. All other access roads will be 16 to 22 feet wide. The 10- to 15-acre WRF site will be secured by a fence. An electrical gate located near the front of the property and controlled by a key from the operations and maintenance buildings, will be monitored by a video surveillance camera. The WRF will be equipped with nighttime lighting sufficient to enable operations. Lighting will be controlled to prevent nighttime glare or direct light shining offsite.

### *Collection System Facilities*

Offsite facilities include connections to the existing collection system, a new lift station and force main to pump wastewater to the WRF, and a waste discharge pipeline. The lift station will be located adjacent to the existing WWTP and multiple pipelines will run along an alignment between the lift station and WRF site. The alignment will include a force main pipeline to convey raw wastewater from the lift station to the WRF site; and a waste discharge pipeline to convey brine or extreme wet weather flows to the ocean outfall. A separate control building will house electrical equipment, a motor control center, switchgear, and controls for the submersible pump facilities. A building power roof ventilator will provide room ventilation.

## **2. Location**

The Water Reclamation Facility Project is located within the City of Morro Bay and in an unincorporated area of San Luis Obispo County, adjacent to the City boundaries, as shown in **Exhibit IV**. More specifically, the WRF will be constructed on a 10- to 15-acre area within a 396-acre parcel that is located along Highway 1, north of South Bay Boulevard. The City of Morro Bay owns the property and intends to annex this site prior to construction. The lift station and pipelines will be located within existing City limits. The project will serve residents in the County of San Luis Obispo, California.

## **3. Construction Plans and Specifications**

The City will use a design-build contract for this project, which will allow the City to assume minimal budget and schedule risks. The design-build contractor will be accountable for delivering a successful construction project within a fixed-price contract amount and according to an agreed-upon timeline. The Request for Proposals, the selected proposal, and presentation to council are included in **Exhibit V**.

The design-build contractor will be required to comply with: all mitigation measures in environmental documents and permits, American Iron & Steel requirements, Davis-Bacon Wage Compliance, and all other requirements associated with financing from WIFIA or the Clean Water State Revolving Fund. The design-build contractor will be responsible for all design materials including calculations,

drawings, samples, sketches, illustrations, descriptions and models including a Final Concept Design Report. Following the Notice to Proceed, the design-build contractor will meet with the City on a weekly basis, and prepare 30, 60, and 90% design submittals.

Selected design-build contractor Filanc/Black & Veatch received a higher score for their proposal compared to the other proposer. The design-build team consists of an experienced, cohesive, and balanced team comprised of both design engineers and contractors. The Filanc/Black & Veatch team provided a thoughtful, effective approach to project sequencing and proposed a schedule with an anticipated early project completion date of approximately six months before the proposed completion date in the Request for Proposals. The Filanc/Black & Veatch proposal demonstrated thorough due diligence for cost certainty and focused on co-location of the design-build team in the City for the duration of design and construction. The team's proposed design provided a high level of detail, a process design that better supports effective operations, and flexibility for expansion.

#### 4. Estimated Project Cost

##### a. Detailed cost estimate

| <b>Table B.2 - Total Estimated Project Costs</b> |                      |                      |
|--------------------------------------------------|----------------------|----------------------|
|                                                  | <b>Total Cost</b>    | <b>Eligible Cost</b> |
| <b>Construction Costs</b>                        |                      |                      |
| WRF Onsite Facilities                            | \$62,616,335         | \$62,616,335         |
| Conveyance Facilities                            | \$21,086,013         | \$21,086,013         |
| Recycled Water Offsite Facilities                | \$8,592,314          | \$8,592,314          |
| <b>Contingency</b>                               | \$9,463,755          | \$9,463,755          |
| <b>Soft Costs</b>                                |                      |                      |
| Planning/Environmental                           | \$5,063,150          | \$5,063,150          |
| Design                                           | \$6,224,580          | \$6,224,580          |
| Program Administration                           | \$6,360,873          | \$6,360,873          |
| Construction Management                          | \$3,750,000          | \$3,750,000          |
| Property Acquisition                             | \$2,050,000          | \$2,050,000          |
| Permitting                                       | \$730,833            | \$730,833            |
| <b>Total Estimated Cost</b>                      | <b>\$125,937,851</b> | <b>\$125,937,851</b> |

b. *Activity breakdown for eligible project costs*

| <b>Table B.3 - Eligible Project Costs</b> |                      |                                     |
|-------------------------------------------|----------------------|-------------------------------------|
|                                           | <b>Eligible Cost</b> | <b>WIFIA portion (49% of Total)</b> |
| Development-Phase Activities              | \$5,063,150          | \$2,480,944                         |
| Replacement Activities                    | \$-                  | \$-                                 |
| Construction                              | \$91,294,661         | \$44,734,384                        |
| Property Acquisition                      | \$2,050,000          | \$1,004,500                         |
| Environmental Mitigation                  | \$1,000,000          | \$490,000                           |
| Construction Contingencies                | \$9,463,755          | \$4,637,240                         |
| Administration/Construction Management    | \$17,066,285         | \$8,362,480                         |
| <b>Total Eligible Project Costs</b>       | <b>\$125,937,851</b> | <b>\$61,709,547</b>                 |

5. **Project Schedule**

| <b>Table B.4 - Project Schedule</b>                                  |                 |
|----------------------------------------------------------------------|-----------------|
| <b>Major Milestones</b>                                              | <b>Timeline</b> |

| Performance Testing                                                  | November 2021   |
| Project Close-out                                                    | January 2022    |

6. **Alternatives Analysis**

a., b., c. *Alternatives analysis and description*

An alternatives analysis was presented in the letter of interest and is included in the Water Reclamation Plan.

A 2016-17 Facility Master Plan explored water and solids treatment alternatives and provided recommendations. A Master Water Reclamation Plan prepared in 2016-17 identified alternatives for both treatment and uses of recycled water. The feasible Recycled Water Alternatives that were considered are summarized in Table 7-1 of the Master Water Reclamation Plan, provided below in Table B.5 for reference.

| Table B.5 - Summary of Project Alternatives |                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alternative #                               | Title                                                                                                                                                 | Brief Description                                                                                                                                                                                                                                                                                               |
| 0                                           | No Recycled Water Project (Discharge to existing ocean outfall)                                                                                       | With no recycled water project, the City would continue discharging treated effluent to the existing ocean outfall.                                                                                                                                                                                             |
| 1                                           | Urban Reuse                                                                                                                                           | Recycled water pipeline from WRF to City with turnouts to various urban commercial and landscape irrigation users for potential potable water offset, and recycled water to Morro Bay Golf Course.                                                                                                              |
| 2                                           | Delivery of recycled water to agricultural users in exchange for pumped groundwater delivered to the City – “Agricultural Exchange”                   | Recycled water pipeline to properties in the Morro Valley along Hwy 41 to deliver recycled water for agricultural irrigation in exchange for groundwater sent back to the City. Alternative would include potable water pipeline from upper Morro Valley to City.                                               |
| 3                                           | Indirect potable reuse: Groundwater replenishment using subsurface application at the Narrows (injection wells) – “Indirect Potable Reuse – East”     | Recycled water pipeline to new groundwater injection wells east of Hwy 1 and south of Hwy 41, near the Narrows, for groundwater replenishment. Groundwater extracted from existing City wells in the Morro Valley would be treated at the City’s existing water treatment plant.                                |
| 4                                           | Indirect potable reuse: Groundwater replenishment using subsurface application near the bike path (injection wells) – “Indirect Potable Reuse – West” | Recycled water pipeline to new groundwater injection wells west of Hwy 1 and south of Hwy 41, near the bike path adjacent to Lila Keiser Park, for groundwater replenishment. Groundwater extracted from existing City wells in the Morro Valley would be treated at the City’s existing water treatment plant. |

*d., e. Rationale for the selected alternative*

The alternatives analysis resulted in the following main conclusions:

- The highest water supply benefit will be realized through indirect potable reuse (Alternatives 3 and 4). Based on preliminary modeling, it appears the estimated 1000 acre-feet per year water supply benefit of Alternative 4 could meet the majority, if not all, of the City’s current water demand. This could significantly reduce or eliminate reliance on imported water.
- Capital costs for agricultural exchange (Alternative 2) and indirect potable reuse (Alternatives 3 and 4) are similar, but indirect potable reuse has a significantly higher water supply benefit. Agricultural exchange relies on successful contract negotiations with landowners, adding some uncertainty.

Therefore, the recommended recycled water project was indirect potable reuse, Alternative 3 or 4, with the main difference consisting of the locations for injection and extraction wells. The indirect potable reuse alternative provided the highest potential water supply benefit. Supplementing the potable water supply with highly treated recycled water was the highest form of allowable beneficial reuse and will allow the City to reduce or eliminate dependence on imported water.

An alternatives analysis was presented in the letter of interest and is included in the Water Reclamation Plan, **Exhibit VI**.

## 7. System's Engineer Report(s)

The City has engaged in planning for the Water Reclamation Facility for the past five years. The project will be executed using a design-build contract, and the Systems Engineer Report will be produced by the design-build contractor. Most of the planning efforts to-date contain some discussion of engineering or engineering related-considerations. The most relevant plans are:

### The Master Water Reclamation Plan (MKN & Associates, Draft – Mar. 2017)

This plan, paid in part by a State grant, was developed to consider recycled water opportunities in light of the adopted Community goals for the new WRF and to identify and evaluate the feasibility of recycled water projects. The plan used relevant information from previous reports and current hydrogeological studies and permitting evaluations; refreshed previous recycled water market assessments; included outreach to the community and potential users; and developed updated cost opinions for alternatives.

*Included in the letter of interest and available at:* <http://morrobaywrf.com/draft-master-water-reclamation-plan-march-2017/>

### Water Reclamation Facility Master Plan (Black & Veatch, Draft – Nov. 2016)

This plan was a major milestone in the planning process. The Facilities Master Plan was developed from nine Technical Memoranda that each addressed different technical aspects of the project. Input from the Water Reclamation Facility Citizens Advisory Committee, City staff, and City Council was considered, in addition to public comments.

*Available at:* <http://morrobaywrf.com/draft-water-reclamation-facility-master-plan-nov-2016/>

### Sewer System Management Plan (City of Morro Bay, 2014)

The City developed and maintains a Sewer System Management Plan (SSMP) to satisfy the requirements of State General Waste Discharge Requirements for Sanitary Sewer Systems (WDR). The SSMP was originally adopted by the City Council on June 08, 2009. Per the requirements of the WDR, the City has performed two audits of the SSMP (June 2011 and June 2013) which focused on the effectiveness of the SSMP, the City's compliance with permit requirements, identification of deficiencies, and steps to correct them.

*Available at:* <http://morrobayca.gov/DocumentCenter/View/7409/Sewer-System-Management-Plan-2014-re-certification->

### OneWater Plan (Carollo Engineers, 2018)

The OneWater Plan, currently in draft form, addresses all of the City's water-related infrastructure including the potable water distribution system, sanitary sewer collection system, and stormwater collection system and evaluates future water supplies. When completed, the OneWater Plan will identify deficiencies in the infrastructure, projects required to correct those deficiencies, and associated costs. The OneWater Plan recognizes and supports the importance of the Water Reclamation Facility as a drought-proof water supply for the City. The Draft OneWater Plan will be completed in August 2018.

## 8. Environmental Review

The City prepared an Environmental Impact Report (EIR) for the entire project, including the demolition of the existing wastewater treatment plant, construction of the new Water Reclamation Facility and related structures, and construction of a lift station, sewer pipelines, and a discharge pipeline. A few cultural resource sites were identified along the proposed pipeline alignment. Impacts to these will be avoided and/or mitigated with the design of the project. Mitigation plans were included in the EIR. The draft was released for public comment in March 2018. The City hosted a public meeting on the Draft EIR on May 1, 2018 and received all written public comments on May 18, 2018. Comments were addressed in June 2018. The EIR will be finalized in July 2018 and the City Council is expected to adopt and certify the EIR in August 2018. The final EIR will be registered with the State Clearing House and will be available on the project website.

## 9. Floodplain Management Plan

The Water Reclamation Facility is not located within the 100-year Flood Zone, according to flood zone mapping compiled by the Federal Emergency Management Agency’s Flood Insurance Rate Maps (FIRMs).

A related lift station is located within “Flood Zone AE” where the flood zone elevation occurs at approximately 20 feet above sea level (FEMA, 2017). The lift station will be designed with flood-proofing measures. Submersible pumps, elevated structures and electric panels, and sealed conduits are being considered.

## 10. Other Permits and Approval

The City has not yet applied for permits, as the environmental review process is still underway. However, the project is being developed with discussion and input from many regulators, including the State Water Board Division of Drinking Water, which regulates recycled water projects in California. The anticipated permits are provided in Table B.6.

| Table B.6 - Anticipated Permits                                                      |                                                        |                |
|--------------------------------------------------------------------------------------|--------------------------------------------------------|----------------|
| Permit                                                                               | Issued By                                              | Projected Date |
| National Pollution Discharge Elimination System, Waste Discharge Requirements Permit | Central Coast Regional Water Quality Control Board     | February 2020  |
| Coastal Development Permit                                                           | California Coastal Commission                          | March 2019     |
| Encroachment Permit                                                                  | California Department of Transportation                | July 2019      |
| Streambed alteration permit (for pipelines and lift station)                         | California Department of Fish and Wildlife             | May 2019       |
| Permit to operate generator                                                          | San Luis Obispo Air Pollution Control District         | June 2020      |
| Building, grading and stormwater management permits                                  | City of Morro Bay and/or the County of San Luis Obispo | August 2019    |
| Title 22 Permit and Approved Engineering Report                                      | State Water Board, Division of Drinking Water          | February 2020  |

Consultation with the following agencies will occur:

| <b>Table B.7 - Agencies</b>                                                        |                                                                                  |                          |

| Regional Water Quality Control Board                                               | NPDES permit; meeting Porter-Cologne Act requirements; Section 401 certification | August 2018 – March 2019 |
| California Department of Fish and Wildlife                                         | Streambed Alteration Agreement                                                   | August 2018 – March 2019 |
| California Environmental Protection Agency, Department of Toxic Substances Control | Site Assessment / Remedial Action Plan                                           | August 2018 – March 2019 |

## 11. Project Management and Compliance Monitoring Plan

The City confirms it has the ability to deliver the project as planned, fulfill all project commitments, and ensure compliance with all terms of the credit agreement, including all applicable regulations and provision of law. Per the included Certifications, Public Works Director Rob Livick has signatory authority as the authorized representative. Table B.8 describes key project roles and responsibilities.

| <b>Table B.8 - Roles and Responsibilities</b>                 |                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

### Project Management

The design-build contractor will employ a competent, on-site project team including a project manager/company representative who will be on-site during construction. The design-build contractor will confirm all communications in writing and provide a matrix of signature authority limitations.

### Progress Reports and Status Updates

Once a week, or at such intervals as mutually agreed by the parties, the City will meet with the design-build contractor to review the overall project progress, the status of the design and/or construction, and to discuss any problems that may arise. The design-build contractor will prepare and submit written progress reports to be presented at these weekly meetings.

The design-build contractor will prepare monthly reports on the work accomplished during the prior monthly period. The monthly report will also set forth the projected progress for the forthcoming month.

### Coordination Processes

The project manager will work closely with the engineering team, City Council and other stakeholders to ensure timely and transparent project communication. This includes providing advance notification of potential issues to all appropriate agencies and timely resolution. Prior to commencing work, the design-build contractor will attend a project kickoff meeting to discuss procedures, review contract provisions and any address other items pertaining to the administration of the project.

Conflicts, omissions, errors, interpretation or clarification, insufficiency of detail or explanation in the design-build contract documents relative to the timely or material execution of the work shall be immediately brought to the attention of the City in writing and request interpretation, clarification, or furnishing of additional detailed instructions. Such questions shall be resolved and instructions to the design-build contractor issued within a reasonable time by the City, whose decision shall be final and conclusive.

### Informing the Community

Public involvement has been integral to this project since its inception. The City has held eleven public workshops since 2013 to inform the public and answer questions. Given the complexity of the WRF program and the desire to enhance civic engagement, the City Council has also convened two citizen advisory groups, including the Water Reclamation Facility Citizens Action Committee (WRFCAC) and the Blue Ribbon Commission. In June 2018, the City held two public information sessions about the upcoming WRF activities. Recent advisory group activities include reviewing proposals for the design-build team and evaluating potential rate increase structures.

The City has created a website <http://morrobaywrf.com/> with information about the project, frequently asked questions, a schedule, and all publicly released documents including the bid/procurement documents, environmental reports, and technical studies.

## 12. Risks and Mitigation Strategies

This project has all the normal risks of any construction project, including construction schedules, cost escalation, approvals, and litigation. The City has mitigated these risks by using a fixed-price design-build project delivery. This helps to ensure the project will be on-time, on-budget, and built to the agreed-upon specifications.

MKN & Associates identified twelve potential risks of the Water Reclamation Facility Project. All of these risks include mitigation measures. These risks and mitigation strategies are outlined in Table B.9. Additionally, as part of the Request for Proposals (RFP) process, the design-build team was required to provide a Risk Register including mitigation strategies for the Top 5 Risks to the Owner's Goals and Objectives as identified by the Proposer.

**Table B.9 – Risks and Mitigation Strategies**

| Morro Bay Water Reclamation Facility Project - Risks and Mitigation Strategies |                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Updated by: E. | 1                                                                              | Unanticipated increase in project costs due to bid climate and other factors | Relative cost opinions were developed for the WRF & Recycled Water project components using a range of anticipated costs prior to development of a facility master plan to assist with the site comparison and planning. The City's Rate Study and user rates are based on these early budgetary costs. Additional design development could identify unanticipated costs, which would lead to another proposed user rate increase.                                                 | Cost                            | Medium                        | Include 25% contingency and conservative soft cost assumptions in master planning. Adjust accordingly as project proceeds and uncertainty is reduced. Assume conservative loan rates (+ 0.25% above historical rates).                                                                         |
| 2                                                                              | Delay in Project schedule                                                    | City Council set a goal for an operational reclamation-ready WRF in 5 years. The Program Management Team developed an aggressive schedule based on this goal. During design and construction, unanticipated factors could cause schedule delays.                                                                                                                                                                                                                                   | Schedule                        | High                          | Provide schedule updates as soon as major project decisions are made. Expedite efforts where cost and quality are not at risk. Require final completion 6 months in advance of goal date.                                                                                                      |
| 3                                                                              | Change in City Council Members                                               | Based on the current schedule, the program will be ongoing through at least two City Council election cycles (Nov 2018 and Nov 2020). A substantial change in City Council members could result in a change in goals and direction for the project.                                                                                                                                                                                                                                | Schedule, Cost, Quality         | High                          | Continually present project goals and provide opportunities for refinement by Council as project proceeds. Work closely to educate Council members on design, construction, and design-build procurement processes and typical project challenges.                                             |
| 4                                                                              | Public Opposition                                                            | Public opposition can arise due to project costs, neighborhood concerns, and organized misinformation campaigns arising from those factors.                                                                                                                                                                                                                                                                                                                                        | Schedule, Cost                  | High                          | Work closely with project team to identify outreach strategies to counter misinformation. PM team to implement and advise on strategies. Work closely with Council members to educate them and reduce risk they may inadvertently say something incorrect or that puts City at risk.           |
| 5                                                                              | City and CSD disagree on shared facilities                                   | The City and the Cayucos Sanitary District (CSD) co-own the existing WWTP and outfall, and each is pursuing a separate treatment facility. The existing WWTP will need to be decommissioned in a mutually agreeable way. The details and agreement need to be worked through. Both agencies will likely want to use the existing ocean outfall for discharge from the two future facilities. The details for continued, shared use of the ocean outfall need to be worked through. | Schedule                        | Low                           | Include specifications for plant decommissioning in performance criteria and acquire cost opinion as an additive bid item for preliminary discussions with CSD. Develop Outfall Management Plan for review by City and CSD prior to design/construction of outfall connection and improvements |
| 8                                                                              | Land and Easement Acquisition                                                | Project will require land for WRF and for pipeline easements.                                                                                                                                                                                                                                                                                                                                                                                                                      | Schedule                        | Low                           | Obtain easements and execute MOU for property acquisition early in process. Install pipeline in rights-of-way where possible                                                                                                                                                                   |
| 9                                                                              | Financial capability of Design/Build firm                                    | If DB entity faces business stresses that result in project failure, City will need to pay for remediation of problems and to solicit new DB entity to finish the work.                                                                                                                                                                                                                                                                                                            | Cost, Schedule                  | Low                           | Develop RFQ process that applies financial capability as one of the evaluation criteria                                                                                                                                                                                                        |
| 10                                                                             | Project Requirements and Objectives                                          | City will want a high-quality, energy-efficient system with relatively low operation/maintenance costs.                                                                                                                                                                                                                                                                                                                                                                            | Quality                         | Low                           | Develop performance criteria that prioritize specific needs or desires of City                                                                                                                                                                                                                 |
| 11                                                                             | Land Use Permitting                                                          | Land use permitting will likely be through San Luis Obispo County per the Local Coastal Plan. Permitting will be appealable to the Coastal Commission, which could delay final permits.                                                                                                                                                                                                                                                                                            | Cost, Schedule                  | Low                           | JFR to take lead on permitting development and coordinate with County permitting and CA Coastal Commission staff early to determine if permitting directly through Coastal Commission could reduce processing and appeal time.                                                                 |
| 12                                                                             | CEQA                                                                         | EIR is under development by ESA as primary author and City as lead agency. If EIR is not certified, due to project opposition or legal challenges, funding and project development cannot proceed                                                                                                                                                                                                                                                                                  | Cost, Schedule                  | Low                           | EIR development strategy will require input from ESA depending on final site chosen by City. One strategy could be to develop an analysis for two sites that would allow the City to change sites quickly if one is not politically achievable.                                                |

## SECTION C: OPERATIONS AND MAINTENANCE PLAN

### 1. Operation and Maintenance Plan

The final Operation and Maintenance Plan will be available for review prior to the obligation of the loan. The design-build contractor will be responsible for developing this plan.

#### Contractual Arrangements

The City of Morro Bay will own and operate the Water Reclamation Facility. The design-build contractor will develop operations and maintenance procedures, which will be transferred to the City upon completion of performance testing.

#### Cost Estimates

The design-build contractor will be responsible for providing estimates for operations and maintenance costs, as part of the design process. The City estimates the cost of operating and maintaining the new WRF to be approximately \$2.7 million per year.

#### Key Performance Indicators

The design-build contractor will be held accountable for performance indicators during the contract period and will be responsible for meeting minimum design requirements specified by the City. Key performance indicators include, but are not limited to: Title 22 Report, Engineering and Design Activities including treatment systems, recycled water production, stormwater facilities, structural construction activities, system integration, decommissioning of the old wastewater treatment plant, operation and maintenance manuals and training, performance testing, 6-months of transitional operation including staffing and training support. The design-build contractor will be responsible for meeting influent flows and water quality standards, incorporating energy savings where appropriate, and meeting the minimum treatment capacity. The WRF will be designed and constructed to produce a volume of recycled water for indirect potable reuse groundwater injection equal to 76% of the influent flow, which is estimated to be 825 acre-feet per year. The minimum design life requirement for the facility is 30 years.

#### Insurance Policies

The fixed-price design-build contract will specify all necessary insurance policies to ensure that the City holds minimal risk before transfer of ownership. The design-build contractor shall provide General Liability Insurance, Business Auto Coverage or ISO Business Auto Coverage, Property Damage Insurance, Workers Compensation, Excess or Umbrella Liability Insurance, Professional Liability or Errors and Omissions Insurance. The City will assume all necessary insurance liability after transfer of ownership in 2022.

#### Reserves for maintenance

An operations and maintenance reserve fund of approximately \$2.7 million per year will be established from water and sewer enterprise funds.

## 2. Management Experience

### Contractor/Management Team

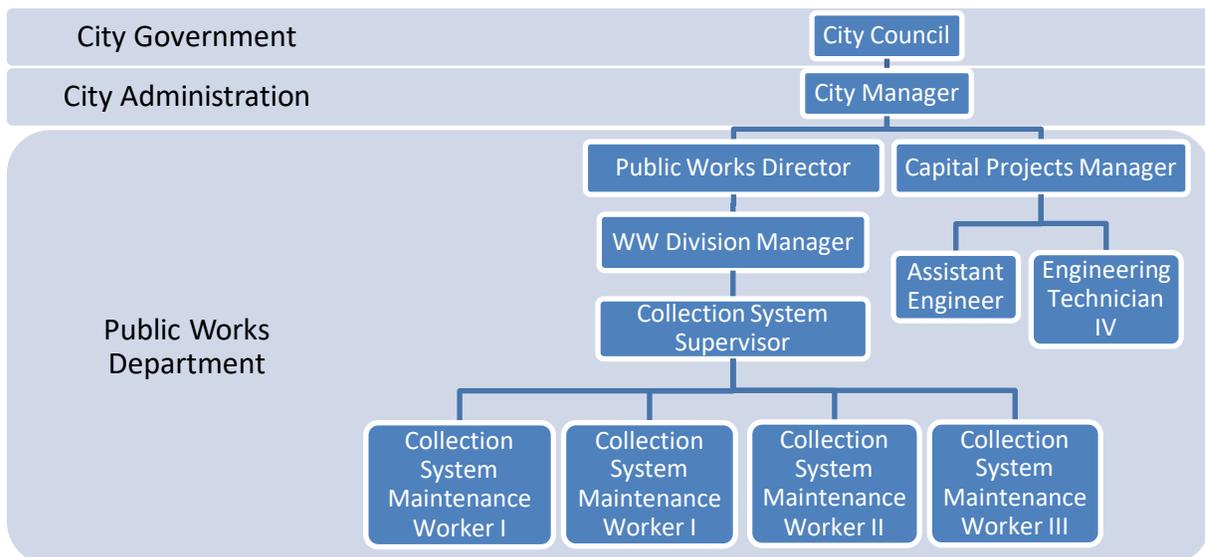

The design-build team includes a designer, construction team, and an operator. The operator will be responsible for developing operations and maintenance procedures and will operate the facility during the transitional operation period. The Performance and Operational Testing period shall be 6 months in duration. The City may extend the performance and operation testing period if desired.

The design-build team from Filanc/Black and Veatch is a world-class team with a robust Management Approach and Quality Control Program. The Filanc/Black & Veatch team’s Management Approach is based on taking full advantage of their combined talents and working side-by-side with the City and its consultants to collaboratively deliver a new WRF that provides robust and reliable performance at the lowest achievable cost. The team has an established Quality Control Program to address all aspects of quality from design through construction and startup. Documentation of quality reviews, inspections, and corrective actions are recorded and maintained in a cloud-based project management system, and available to City representatives for review.

### City’s Management Team

After the transitional operation period, the City of Morro Bay will assume responsibility for operating the Water Reclamation Facility. The City’s management team will include the City Manager, Public Works Director, Utilities Operations Manager, and the City Finance Director as needed. The Wastewater Division of Public Works will be responsible for administration, day to day operations and collections. Collections Operators are responsible for daily maintenance of the facility and response to emergencies such as spills, during regular work hours and after hours and weekends on standby.

**Figure C.1 - Organization Chart**

### 3. Operational Risks and Mitigation Strategies

The operational risks to the Water Reclamation Facility Project have been closely analyzed. The City has identified the following risks to the project: unanticipated increase in projects costs due to economic climate and other factors, delay in project schedule, change in City Council members, public opposition to the project, financial capability of the design/build firm, project requirements and objectives, permitting, and CEQA.

Relative cost opinions were developed for the project using a wide range of anticipated costs. This information was considered in the Master Water Reclamation Plan. The City's Rate Study and user rates are based on these early budget estimates. Additional design development could identify unanticipated costs, which would lead to proposing another water/sewer rate increase. The level of risk is considered medium. The City's mitigation strategy includes a 25% contingency and conservative assumptions for soft costs and loan rates. The City will adjust accordingly as the project proceeds and uncertainty is reduced.

The City Council set a goal for an operational Water Reclamation Facility in 5 years. The Project Management team has developed an aggressive schedule based on this goal. During design and construction, unanticipated factors could cause schedule delays. The level of risk is high, given the time constraints. The City plans to mitigate project delays by providing schedule updates as soon as major project decisions are made and will expedite efforts where cost and quality are not at risk. The City will require final completion of the project months in advance of the goal date.

The program will be ongoing through at least two City Council election cycles (November 2018 and November 2020). A substantial change in City Council members could result in a change in goals or direction for the project. There is a high level of risk, however, it will be mitigated by continually presenting project goals and providing opportunities for refinement by Council. The Project Management team and consultants will work closely to educate Council members on design, construction, and typical project challenges.

Public opposition can arise due to project costs, neighborhood concerns, and organized misinformation campaigns arising from these factors. The City will work with the project team to identify outreach strategies to counter misinformation. The Project Management Team will implement and advise on strategies and work closely with Council members to educate them and reduce the risk of spreading misinformation.

The City and Cayucos Sanitary District (CSD) currently own and operate the existing wastewater facility. Each entity is now pursuing their own separate treatment facility. The existing wastewater treatment plant will be decommissioned in a mutually agreeable way. The details and agreement still need to be worked out. Both agencies will likely want to continue to use the existing ocean outfall for discharge. The details of shared ocean outfall use will need to be worked through. The level of risk is low. The City will mitigate this risk by including specifications for plant decommissioning in performance criteria and using cost opinions in preliminary discussions with CSD. The design-build contractor will develop an Outfall Management Plan for review by the City and CSD prior to design and construction of the outfall connection and improvements.

The project will require land for WRF and for pipeline easements. The City has already purchased the property and is obtaining easements and executed a Memorandum of Understand for property acquisition early in the process. The City will install pipelines in rights-of-way wherever possible.

Land use permitting will likely be through San Luis Obispo County per the City's Local Coastal Plan. The level of risk is low, but the City will utilize the permitting consultant to determine permitting needs and ensure that there are minimal delays.

Another low risk faced by this project is if the design-build contractor faces business stresses that result in project failure. The City established "financial capability" as one of the evaluation criteria for contractor selection.

The City will also want a high-quality, energy-efficient treatment system with relatively low operation and maintenance costs. The City will balance project requirements and objectives with performance criteria that reflect the budget.

Lastly, if the EIR is not certified due to project opposition or legal challenges during the public comment period, funding and project development cannot proceed. The City is mitigating this risk by requiring input from the EIR lead author.

## SECTION D: FINANCING PLAN

### 1. Cash Flow Pro Forma

The cash flow pro forma for the Water Reclamation Facility Project is included as **Exhibit IX**. It includes sources and uses of funds, a projection of quarterly cash flows during the construction period and annual cash flows thereafter. The estimated debt service coverage, amortization schedule and anticipated repayment schedule are also included.

### 2. Sources and Uses of Funds

Since 2014, the City of Morro Bay has engaged with the State Water Resources Control Board about funding for this project. In 2016, the SWRCB awarded a \$75,000 planning grant and a \$10 million planning loan from the Clean Water State Revolving Fund (CWSRF) to support Morro Bay’s Water Reclamation Facility Project. The City has initiated an application for a CWSRF loan for 51% of project costs. This application is in process and the State Water Board Project Manager, Jody Hack, has been in regular communication. The SWRCB has initiated the environmental review, and a signed loan agreement is expected by March 2019. However, in light of the fact that the CWSRF loan is not secured, financing projections have been based on 49% of the project being funded by WIFIA, 20% of the project being funded with bond financing—assuming a 4.75% interest rate—and the remainder of the project financed with cash on a pay-go basis. Financing projections are conservative to ensure that sufficient funds are available to finance the project, though the CWSRF loan is preferred. A table outlining sources of funds for the WRF project is included in the cash flow pro forma and as **Exhibit X**.

| Table D.1                                 |                       |           |
|-------------------------------------------|-----------------------|-----------|
| Sources of Funds                          | Amount                | Status    |
| CWSRF Planning Loan                       | \$ 10,300,000         | Awarded   |
| CWSRF Construction Loan OR Bond Financing | \$ 50,399,851         | Requested |
| WIFIA                                     | \$ 60,175,000         | Requested |
| Cash Expenditures through May 31, 2018    | \$ 5,063,000          | Expensed  |
| <b>Total Project Funds</b>                | <b>\$ 125,937,851</b> |           |

| Table D.2                              |                       |
|----------------------------------------|-----------------------|
| Use of Funds                           | Cost                  |
| Development-phase Activities           | \$ 5,063,150          |
| Replacement Activities                 | \$ 0                  |
| Construction                           | \$ 91,294,661         |
| Property Acquisition                   | \$ 2,050,000          |
| Environmental Mitigation               | \$ 1,000,000          |
| Construction Contingencies             | \$ 9,463,755          |
| Administration/Construction Management | \$ 17,066,285         |
| <b>Total Project Costs</b>             | <b>\$ 125,937,851</b> |

### 3. Dedicated Sources of Income for Repayment

Sewer and water enterprise revenues, consisting primarily of sewer and water service charges and fees, will be used to repay the WIFIA assistance. The City proposes to repay the assistance with 71% sewer revenues and 29% water revenues, reflecting the focus on recycled water. Effective in 2019, the City proposes to utilize an already-approved Water Reclamation Facility (WRF) surcharge of \$41.00 per month (\$25.00 per month for sewer and \$16.00 per month for water). This surcharge was approved with the last rate increase in 2015. The City intends to impose the already approved maximum sewer and water rates effective in fiscal year 2019/20.

In order to fully fund the Project and all other wastewater enterprise operations and capital projects, sewer rate revenues of \$9 million per year and water service revenues of \$7.6 million are planned beginning in fiscal year 2020/21. From these revenues, \$5.6 million will be allocated annually for debt service. The City will utilize its CWSRF planning loan in fiscal year 2018/19.

The City is assuming a 35-year repayment term with the first debt service payment due fiscal year 2022/23 (e.g., February 1, 2023), the year after the project is complete, and the final debt service payment due fiscal year 2057/58 (e.g., February 1, 2058). The proposed rate structure includes \$5.6 million in annual debt service (both interest and principal, split between the water and sewer funds) for the CWSRF planning loan, WIFIA loan and revenue bonds. The City is assuming level annual debt service in the rate structure.

An example of the rate structure is provided in Table D.3 and is based on an average consumer utilizing 5 units of water per month.

| <b>Table D.3 - Example Rate Structure</b> |                |                |                |                |                |
|-------------------------------------------|----------------|----------------|----------------|----------------|----------------|
|                                           | <b>2018/19</b> | <b>2019/20</b> | <b>2020/21</b> | <b>2021/22</b> | <b>2022/23</b> |
| <b>Monthly Utility Bill</b>               |                |                |                |                |                |
| Sewer Monthly Charge                      | \$77.00        | \$83.00        | \$83.00        | \$83.00        | \$83.00        |
| Water Monthly Charge                      | 62.50          | 67.00          | 67.00          | 67.00          | 67.00          |
| Subtotal Monthly Bill                     | 139.50         | 150.00         | 150.00         | 150.00         | 150.00         |
| <b>WRF Facility Surcharges</b>            |                |                |                |                |                |
| Sewer WRF Facility Surcharge              | -              | 25.00          | 25.00          | 25.00          | 25.00          |
| Water WRF Facility Surcharge              | -              | 16.00          | 16.00          | 16.00          | 16.00          |
| Subtotal Monthly Bill                     |                | 41.00          | 41.00          | 41.00          | 41.00          |
| <b>Total Monthly Charges</b>              | <b>139.50</b>  | <b>191.00</b>  | <b>191.00</b>  | <b>191.00</b>  | <b>191.00</b>  |

The City has contracted with Bartle Wells Associates, a municipal advisory firm, to complete a Water and Sewer Rate update to establish new rates to support the WRF project and other needs. This process is well underway. Public notices of the new rates will be mailed July 13, 2018. The mandatory public hearing is tentatively scheduled for August 28, 2018. Tables outlining projected revenues for sewer and water are included in the cash flow pro forma and as **Exhibit XI**.

#### 4. Financial Condition

The City is current on all debt service and is not in risk of imminent default, not in technical default, and not in bankruptcy proceedings. The City has excellent financial status and has financed most of the planning efforts through the general fund. The City is in excellent financial shape to take on debt for the WRF project. See **Exhibit III** for the City's Financial Statements from fiscal year 2014-2015, 2015-2016 and 2016-2017.

#### 5. Available Sources of Security

The Water Reclamation Facility project will be financed with WIFIA and Clean Water State Revolving Fund loans. WIFIA will cover 49% of the total projects costs, up to \$60,175,000, and the CWSRF will cover 51% of the total projects, up to \$60,699,851, including the CWSRF planning loan already awarded. If for some reason, the CWSRF loan is not available, the City has a contingency plan to use bond financing and pay-go.

#### 6. Preliminary Rating Letter

The preliminary rating letter from Standard & Poor's is included as **Exhibit XII**.

#### 7. Proposed Terms for the WIFIA assistance

The City is assuming a 35-year repayment term with the first debt service payment due fiscal year 2022/23 (e.g. February 1, 2023), the year after the project is complete, and the final debt service payment due fiscal year 2057/58 (e.g. February 1, 2058). The proposed rate structure includes \$5.6 million in debt service (both interest and principal, split between the water and sewer funds) for the CWSRF planning loan, WIFIA loan and revenue bonds. The City is assuming level annual debt service in the rate structure. A table illustrating the Draft WIFIA Loan Repayment Schedule, assuming an interest rate of 3.25%, is provided in **Exhibit XIII**.

Loan disbursements will be requested as project activities and initially paid by the City, then invoiced to the State Water Resources Control Board and/or USEPA.

#### 8. Financing Restrictions

There are no financing restrictions that would limit the City's ability to pursue additional funding for this project.

#### 9. Rate

##### Proposition 218 Process

Proposition 218 was adopted by the California voters on November 5, 1996. It governs how municipalities, counties and special districts establish fees and charges (rates) for certain services. Among other things, the proposition added Article XIID, Section 6, to the California Constitution,

which requires the City Council to consider written protests to certain proposed increases to rates for sewer (wastewater), water or refuse collection services. Government Code section 53750 *et seq.*, known as the Proposition 218 Omnibus Implementation Act (Act), was adopted to assist local governments and citizens with the implementation of that constitutional provision.

On June 13, 2018, Morro Bay’s City Council passed Resolution No 44-18 to guide the Proposition 218 process and help ensure that all utility customers and property owners are aware of the process prior to it being initiated. This resolution is provided in **Exhibit XIV**.

Resolution 44-18 guides how the Proposition 218 process is conducted in the City of Morro Bay. In large part, the Resolution memorializes the previous practices of Morro Bay regarding how it has conducted Proposition 218 processes and further conforms with the California Constitution and the Act. As with any Proposition 218 process, the City shall give notice via U.S. mail, no less than 45 days before the public hearing to be scheduled regarding the proposed rate increases subject to Proposition 218, of the fact protests can be submitted in writing any time after the 45-day period commences and up through the close of that public hearing. The Resolution also provides guidance for the following components of the process, some of which are clearly dictated by Proposition 218 or the Act and some of which are not:

1. Information that must be included in the notice of proposed rates and public hearing
2. Delivery and posting of that required notice
3. Method for submittal of a protest
4. Information that must be included with the protest
5. Withdrawal or changing of a protest
6. How many protests will be counted per parcel
7. What will constitute a majority protest
8. The City Clerk’s responsibility to handle, validate, tabulate, report and retain the protests
9. Conformance with confidentiality requirements

The intent of the Resolution is to ensure that all utility customers and property owners, as well as the general public, are aware of the process prior to it being initiated. It mirrors previous practices in Morro Bay including sending the notice not only to subject property owners (as is required by the California Constitution), but also sending the notice to all subject customers of the City’s utilities. The Resolution also establishes that individuals who seek to submit a written protest must do so either: in person at the public hearing before it is completed, in person at City Hall any time after the initiation of the process and no later than close of business on the day of the public hearing, or by the person who signed the protest mailing it to the City Clerk. If mailed, the protest must be received by the Clerk prior to the City Hall closing on the day of the hearing. That will ensure that the individual maintains ownership of her/his protest. In addition, in order to ensure all pertinent information is provided and considered prior to a protest being submitted, no protest shall be signed before the City has issued the formal notice that commences the 45-day protest period.

#### Draft Rate Study

The City engaged Bartle Wells to conduct the rate study. They are a respected firm that provides these services to hundreds of water and sewer agencies. Their representative on the Morro Bay rate study, Alex Handlers, conducted the City’s previous rate study in 2015. In addition to Mr. Handlers, City staff including the City Manager, Finance Director, Public Works Director, Utility Division Manager, and the WRF Program Manager, Eric Casares (Carollo Engineers), assisted in developing the rate study. The other major contributor to the rate study is the City of Morro Bay’s Blue Ribbon Commission. The City Manager appointed the Blue Ribbon Commission in April 2018 to independently evaluate “the

costs of the major components of the WRF program and water and sewer capital project needs and provide a recommendation to the City Manager for equitable and reasonable rates to pay for those needs.” Both the 2015 Rate Study and 2018 Draft Rate Study are included in **Exhibit XIV**.

The Blue Ribbon Commission met with the City team eight times over the past several months. The objective of those meetings has been to gather and analyze information about costs and financing scenarios to determine impacts on water and sewer rates. Commissioners consistently challenged staff on all major components of the cost structure and their analyses and recommendations regarding the proposed rates. Through that process, and other efforts including those by the Water Reclamation Facility Citizens Advisory Committee, staff developed the following assumptions for costs and financing scenarios that inform the proposed new rates:

Key Rate Assumptions

1) WRF Program Costs and Annual Operating and Maintenance Expenses

The WRF program costs are now estimated to be approximately \$126 million. That estimate was reduced from the \$128.5 million figure provided to Council on June 13, 2018 by re-examining what has been spent to date on program management, planning, design engineering, and contingencies, and evaluation of actual contracts. Table D.4 identifies the major costs of the WRF program:

| <b>Table D.4</b>                                      |                          |                     |                         |                      |
|-------------------------------------------------------|--------------------------|---------------------|-------------------------|----------------------|
| <b>Project Component</b>                              | <b>Cost Distribution</b> |                     |                         | <b>Total</b>         |
|                                                       | <b>Construction</b>      | <b>Soft Costs</b>   | <b>Project Reserves</b> |                      |
| General Program Implementation                        | \$-                      | \$5,159,500         | \$-                     | \$5,159,500          |
| Onsite WRF Facilities                                 | \$62,616,335             | \$8,488,729         | \$3,130,817             | \$74,235,880         |
| Conveyance Facilities                                 | \$21,086,013             | \$2,820,403         | \$2,342,890             | \$26,249,305         |
| Offsite Recycled Water Facilities                     | \$8,592,314              | \$2,647,654         | \$859,231               | \$12,099,199         |
| <b>Total</b>                                          | <b>\$92,294,661</b>      | <b>\$19,116,285</b> | <b>\$6,332,938</b>      | <b>\$117,743,885</b> |
| <b>Total Financed Amount</b>                          |                          |                     |                         | <b>\$117,743,885</b> |
| Previous Program Expenditures (March 2013 to Present) |                          |                     |                         | \$5,063,150          |
| <b>Project Total</b>                                  |                          |                     |                         | <b>\$122,807,035</b> |
| Additional Project Reserves held with Cash on Hand    |                          |                     |                         | \$3,130,817          |
| <b>Total Program Costs</b>                            |                          |                     |                         | <b>\$125,937,851</b> |

As noted in the table above, a 5% project reserve is built into the proposed project financing as a matter of best practice. In addition, staff recommends that a 5% additional project reserve be retained with existing available cash on hand. As the project progresses, if this project reserve is not needed for the WRF project, the City Council could reallocate these funds for demolition of the current facility, completion of deferred capital projects and/or leverage them to reduce rates. This option is allowable under the annual rate review and accounting process.

2) Capital Improvements for Water and Sewer System (Non-WRF)

The new rate assumes an annual capital projects program of \$1 million each for water and sewer. Major sewer projects to be accomplished over the next five years are focused on reducing inflow and infiltration. For water infrastructure, the City's major capital project is replacement of the Nutmeg Tank, an undersized water storage tank at risk of failure due to corrosion. Replacement of the tank will improve the reliability of the distribution system and provide adequate flows for fire protection. The water capital improvements include the addition of pipelines and valves necessary to eliminate the Vashon pump station, which is in poor condition and poses operational challenges.

3) WRF Program Financing

In developing the new rate, the City assumed the Water Reclamation Facility will be funded by a low-interest EPA Water Infrastructure Finance and Innovation Act (WIFIA) loan for up to 49% of the program, the Clean Water State Revolving Fund Planning Loan (8%) and a CWSRF construction loan. While the City hopes to obtain CWSRF funding for construction, at this time, a loan is not secured. Therefore, the rate study is based on cash contributions (approximately 14%), conventional bond financing (25%), and prior expenditures made toward the program (4%).

Staff will also continue to pursue grants for the project. If a CWSRF loan is secured, or grants are awarded, the City Council will have the opportunity to review enterprise revenues and expenses, and either reduce water and sewer rates or allocate additional funds for other water and sewer capital needs.

The assumptions discussed above were used to develop the draft proposed rate.

The 2015 approved rate will end in fiscal year 2019/20 and is outlined in Table D.5. The average residential user is defined as using 500 cubic feet of water per month.

| <b>Water Usage per Month (100 cubic feet)</b>                             | <b>Sewer Rate</b> | <b>Water Rate</b> | <b>Usage Charge (Water)</b> | <b>Total</b>    |
|---------------------------------------------------------------------------|-------------------|-------------------|-----------------------------|-----------------|
| 1                                                                         | \$83.00           | \$32.00           | \$6.00                      | \$121.00        |
| 2                                                                         | \$83.00           | \$32.00           | \$12.00                     | \$127.00        |
| 3                                                                         | \$83.00           | \$32.00           | \$18.00                     | \$133.00        |
| 4                                                                         | \$83.00           | \$32.00           | \$26.50                     | \$141.50        |
| <b>5<sup>1</sup></b>                                                      | <b>\$83.00</b>    | <b>\$32.00</b>    | <b>\$35.00</b>              | <b>\$150.00</b> |
| 6                                                                         | \$83.00           | \$32.00           | \$43.50                     | \$158.50        |
| 7                                                                         | \$83.00           | \$32.00           | \$52.00                     | \$167.00        |
| 8                                                                         | \$83.00           | \$32.00           | \$60.50                     | \$175.50        |
| 9                                                                         | \$83.00           | \$32.00           | \$69.00                     | \$184.00        |
| 10                                                                        | \$83.00           | \$32.00           | \$77.50                     | \$192.50        |
| Notes:                                                                    |                   |                   |                             |                 |
| 1. Average residential user is defined as using 500 cubic feet per month. |                   |                   |                             |                 |

Based upon the rate study conducted by Bartle Wells Associates, informed by Blue Ribbon Commission analysis and recommendations, the following 2019 proposed rate increase is proposed:

| Table D.6                                                                 |                |                                    |                |                                    |                      |                 |
|---------------------------------------------------------------------------|----------------|------------------------------------|----------------|------------------------------------|----------------------|-----------------|
| Water Usage per Month (100 cubic feet)                                    | Sewer Rate     | WRF Surcharge (Sewer) <sup>1</sup> | Water Rate     | WRF Surcharge (Water) <sup>1</sup> | Usage Charge (Water) | Total           |
| 1                                                                         | \$83.00        | \$25.00                            | \$32.00        | \$16.00                            | \$6.00               | \$162.00        |

| 8                                                                         | \$83.00        | \$25.00                            | \$32.00        | \$16.00                            | \$60.50              | \$216.50        |
| 9                                                                         | \$83.00        | \$27.00                            | \$32.00        | \$16.00                            | \$69.00              | \$225.00        |
| 10                                                                        | \$83.00        | \$27.00                            | \$32.00        | \$16.00                            | \$77.50              | \$233.50        |
| Notes:                                                                    |                |                                    |                |                                    |                      |                 |
| 1. Total WRF surcharge is \$41.00 (i.e., \$25.00 + \$16.00)               |                |                                    |                |                                    |                      |                 |
| 2. Average residential user is defined as using 500 cubic feet per month. |                |                                    |                |                                    |                      |                 |

The proposed rate for the typical water and sewer customer will be \$191/month beginning in fiscal year 2019/20 (July 1, 2019). That rate represents a 27.3% rate increase over the maximum rate approved in 2015 (\$150/month). Thus, the City has determined there is approximately a \$41/month surcharge to finance the WRF program in its entirety. The Blue Ribbon Commission determined that this rate is reasonable.

10-Year Rate History

The City of Morro Bay did not increase water rates for over 20 years, then in 2015 the City conducted a public process to increase both water and sewer rates. Table D.7 illustrates the history of the sewer rate increases from January 1, 2008, through the approved rate schedule ending in fiscal year 2019/20. Table D.8 shows the water and sewer rates approved in 2015.

## EXHIBIT I. APPLICANT BACKGROUND

The City of Morro Bay was incorporated on July 27, 1964. It is a general law city that was established by a vote of the citizens and subsequently approved by the County of San Luis Obispo Board of Supervisors. Attached is **Exhibit I**, a copy of the original statutory authority under which the City was incorporated.

IN THE BOARD OF SUPERVISORS  
COUNTY OF SAN LUIS OBISPO, STATE OF CALIFORNIA

PRESENT: Supervisors Samuel Borradori, Fred G. Kimball, Lyle Carpenter,  
Uzain Perkins, and Chairman M. Roland Gates

ABSENT: None

RESOLUTION NO. 370-64

RESOLUTION COMMENDING INCORPORATION OF MORRO BAY

WHEREAS, the citizens of Morro Bay have, by an overwhelming vote, approved formation of the City of Morro Bay; and

WHEREAS, the City of Morro Bay now becomes the sixth incorporated city in the County of San Luis Obispo; and

WHEREAS, by this incorporation, newest in the State of California, the citizens of the Morro Bay community have demonstrated and proven their interest in the benefits and advantages of home rule; and

WHEREAS, the County of San Luis Obispo recognizes the advantages to be derived by its citizens through the medium of the municipal form of government:

NOW, THEREFORE, BE IT RESOLVED, that the Board of Supervisors of the County of San Luis Obispo commend and extend their hearty congratulations to the citizens of Morro Bay and to the newly elected city council; and

BE IT FURTHER RESOLVED that the Board of Supervisors go on record directing all County departments to give their fullest cooperation and assistance to the new city during its formative period; and

BE IT FURTHER RESOLVED that the County of San Luis Obispo extends a sincere welcome to the new civic corporation of Morro Bay.

On motion of Supervisor Borradori, seconded by Supervisor Kimball, and on the following roll call vote, to-wit:

AYES: Supervisors Borradori, Kimball, Carpenter, Perkins, Chairman Gates

NOES: None

ABSENT: None

the foregoing resolution is hereby adopted.

RESOLUTION NO. 361-64

RESOLUTION DECLARING THE CITY OF MORRO BAY INCORPORATED  
AND DECLARING THE PERSONS ELECTED TO THE CITY COUNCIL  
OF MORRO BAY

The following resolution is hereby offered and read:

WHEREAS, the Board of Supervisors of the County of San Luis Obispo, State of  
California, met in regular session on the 13th day of July, 1964, at the hour of 1:45  
P.M. of said day, and

WHEREAS, the County Clerk of the County of San Luis Obispo was duly authorized  
by the said Board of Supervisors to canvass the returns of the election held on the 7th day  
of July, 1964, in the matter of the incorporation of the City of Morro Bay in the County of  
San Luis Obispo, State of California, and

WHEREAS, pursuant to law, said County Clerk duly canvassed the returns of said  
election, and

WHEREAS, said County Clerk has this date duly presented to this Board the results  
of his canvass of the returns of said election which is hereby approved and ratified, along  
with affidavits showing due publication of the election notice, and

WHEREAS, from the results of the canvassing of said returns, this Board finds and  
determines that 1505 votes were for the incorporation of the City of Morro Bay and that  
747 votes were against the incorporation of the City of Morro Bay, and

WHEREAS, of the said votes for the incorporation of the City of Morro Bay, ~~2222~~ 1448  
were regular votes and 57 were absentee ballots, and

WHEREAS, of those votes against the incorporation of said City, 716 were  
regular votes and 69 were absentee ballot, and

WHEREAS, a majority of the votes cast were in favor of incorporation, and

WHEREAS, said Board also finds and determines that the number of votes cast in  
said election for each candidate for the office of councilman was as follows:

| NAME              | REGULAR<br>VOTES | ABSENTEE<br>VOTES | TOTAL<br>VOTES |

# CITY OF MORRO BAY ORGANIZATIONAL CHART

For the 2014/15 Fiscal Year

*This page intentionally left blank.*

## INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California

### **Report on Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Morro Bay, California (the "City"), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

!

### ***Opinions***

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Emphasis of Matter**

### *Implementation of GASB Statement No. 68 and 71*

!

As discussed in Note 1 to the basic financial statements, the City implemented Governmental Accounting Standards Board (“GASB”) Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27*) and GASB Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68*. The adoption of these standards required retrospective application of previously reported net position and reclassification of certain accounts as of July 1, 2014 as described in Note 11 to the basic financial statements. In addition, net pension liability is reported in the Statement of Net Position in the amount of \$15,038,904 as of the measurement date. Net pension liability is calculated by actuaries using estimates and actuarial techniques from an actuarial valuation as of June 30, 2013 which was then rolled-forward by the actuaries to June 30, 2014, the measurement date for California Public Employee Retirement System (“CalPERS”) plans. Our opinion is not modified with respect to this matter.

### *Prior Period Adjustments*

As discussed in Note 11 to the basic financial statements, the City has restated the beginning net positions to report corrections of errors. The beginning net position for governmental activities and business-type activities were restated in the amount of \$(736,889) and \$(75,232), respectively. Our opinion is not modified with respect to this manner.

### *Water Revenue Over State Water Payments*

As discussed in Note 10 to the basic financial statements, the City did not meet the Water Revenue over State Water Payments Ratio. For the year ended June 30, 2015, the City’s ratio was at 64%, which is below the required minimum ratio of 125%. Management’s plans regarding this matter is also described in the Note 10 to the basic financial statements. Our opinion is not modified with respect to this manner.

## **Other Matters**

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the Management’s Discussion and Analysis, the Budgetary Comparison Schedule - General Fund, the Schedule of Proportionate Share of the Net Pension Liability and Related Ratios, the Schedule of City’s Contributions, and the Schedules of Funding Progress-Other Postemployment Benefits Plan on pages 5 to 14 and 89 to 98, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California  
Page 3

*Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The Introductory Section and Combining and Individual Nonmajor Fund Financial Statements and Budgetary Comparison Schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements.

*Supplementary Information*

The Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balance - Budget and Actual are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balance - Budget and Actual are fairly stated in all material respects in relation to the basic financial statements as a whole.

The Introductory Sections have not been subject to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated March 30, 2016 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

## Management's Discussion and Analysis

As management of the City of Morro Bay, we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City, for the fiscal year ended June 30, 2015. It should be read in conjunction with the accompanying basic financial statements.

### Financial Highlights

In the 2014/15 fiscal year, the City implemented the two new statements from the Governmental Accounting Standards Board (GASB), related to pension activities:

- Statement No. 68, "Accounting and Financial Reporting for Pensions - an amendment of GASB Statement No. 27," and
- Statement No. 71, "Pension Transition for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No. 68."

GASB Statement No. 68 establishes standards of accounting and financial reporting, but not funding or budgetary standards, for the City's defined benefit pension plans. This Statement replaces the requirements of prior GASB statements, impacting accounting and disclosure of pensions.

The significant impact to the City of implementing GASB Statement No. 68 is the reporting of the City's unfunded pension liability on the full accrual basis of accounting in the government-wide financial statements. There are also new note disclosure requirements and supplementary schedules required by the Statement. The measurement date for the pension liabilities is as of June 30, 2014. This date reflects a one-year lag in the release of actuaries from CalPERS, and was used so that these financial statements could be issued in a timely manner. Activity, such as contributions made by the City, occurring during the 2014/15 fiscal year, are reported as deferred outflows of resources, in accordance with Statement No. 71. The City did not reflect these pension standards in the 2013/14 fiscal year results because the necessary actuarial information from the California Employees' Retirement System was not provided for the prior years presented.

The following outlines financial highlights for the year:

- At June 30, 2015, the City's net position increased \$0.9 million due to recovery of the economy and increase in building fees.
- Total city-wide assets increased by approximately \$866, or 0.53%. In governmental activities, cash and prepaid items increased by \$661K, and receivables by \$981K. In business-type activities, cash and prepaid items decreased by \$728K.
- Total city-wide liabilities, excluding net pension and deferred inflows, increased \$16.6 million. Current liabilities decreased by \$165K, and long-term liabilities increased by \$16.7 million.
- With the application of GASB Statement No. 68, the City restated the 2013-2014 fiscal year beginning net position for both governmental and business-type activities. The significant impact to the City of implementing Statement No. 68 is the reporting of the City's unfunded pension liability on full accrual basis of accounting government-wide financial statements and more directly affecting the 2014-2015 fiscal year' unrestricted net position. These amounts are presented as deferred in-/out- flows of resources, and aggregate net pension liabilities. More information on GASB Statement No. 68 and 71 application can be found in Note 7 and 11. GASB Statement No. 68 does not change CalPERS policies or contribution rates or cash flow.

- The City's governmental funds altogether reported combined ending fund balances of \$8.5 million. Of this amount, \$6.4 million, or 75%, is nonspendable (\$2.8 million), restricted (\$1.8 million) and committed (\$1.8 million).
- The City's General fund balance increased by \$1.4 million. The fund balance includes nonspendable (\$2.67 million) and committed (\$1.28 million) funds. A total of \$3.2 million is held in reserve, per the City's policy of retaining 27.5% of General fund expenditure estimate.

## Overview of the Financial Statements

This discussion and analysis are intended to serve as an introduction to the City of Morro Bay's basic financial statements, which consists of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains required and other supplementary information in addition to the basic financial statements.

### Government-wide financial statements

The *government-wide financial statements* are designed to provide readers with a broad overview of the City of Morro Bay's finances, in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the City's assets, deferred outflows of resources, liabilities, and deferred inflow of resources, with the difference reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of the City's overall financial health.

The *Statement of Activities* presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., earned, but unused, vacation leave).

Both of the government-wide financial statements distinguish functions of the City of Morro Bay that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City include administration, community promotion, finance, fire, housing, police, public services, and parks and recreation. The business-type activities of the City include the Water, Sewer, Harbor, and Local Transportation ("LTF") operations.

The government-wide financial statements include not only the City of Morro Bay itself (known as the *primary government*), but also the Morro Bay-Cayucos Sanitary District Waste Water Treatment Facility, for which the City is financially accountable. Financial information for this *component unit* is reported separately from the financial information presented for the primary government itself.

The government-wide financial statements can be found on pages 18-21 of this report.

### Fund financial statements

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Morro Bay, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. City funds are divided into three categories: governmental, proprietary, and fiduciary.

### ***Governmental funds***

*Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City of Morro Bay maintains eighteen individual governmental funds. Information is presented separately in the governmental fund balance sheet, and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, Community Development Grants Funds, and Capital Improvement Fund, all of which are considered major funds of the government. Data from the other governmental funds are combined into a single, aggregated presentation. Fund data for each of these non-major governmental funds is provided in the form of *combining statements* elsewhere in this report.

The City adopts an annual appropriated budget for all governmental funds. Requirement Supplementary Information - Budgetary Statements for the General Fund have been provided to demonstrate compliance with its budget.

The governmental fund financial statements can be found on pages 27-30 of this report.

### ***Proprietary funds***

The City of Morro Bay maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for the Water, Sewer, Harbor, and LTF operations. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions. Morro Bay uses internal service funds to account for the various types of insurance coverage for the City. Because these services predominantly benefit governmental rather than business-type functions, they have been included within *governmental activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Water, Sewer and Harbor operations, all of which are considered to be major funds of the City. The remaining proprietary fund (LTF) is combined into a single, aggregated presentation in the proprietary fund financial statements.

The proprietary fund financial statements can be found on pages 32-39 of this report.

### ***Fiduciary funds***

Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are *not* available to support the City of Morro Bay's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The fiduciary fund financial statement can be found on pages 43-44 of this report.

## Notes to the financial statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 47-86 of this report.

### Required supplementary information

In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* including Budgetary Comparison Schedule - General Fund, Schedule of Proportionate Share of the Net Pension Liability and Related Ratio, Schedule of Plan Contributions, and Schedule of Funding Progress – Other Postemployment Benefits Plan. Required supplementary information can be found on page 89 - 98 of this report.

### Supplementary information

The combining and individual statements, referred to earlier in connection with the nonmajor governmental funds, are presented immediately following the required supplementary information on pensions. Combining and individual fund statements and schedules can be found on pages 100 - 126 of this report.

### Government-wide Financial Analysis

The City's net position from governmental activities increased from \$114.8 million to \$117.2 million (approximately 3%).

Changes between fiscal years are shown in Table I, and explained in detail below:

Total assets and deferred outflows increased approximately \$1.3 million:

- Governmental:
  - Cash and investments increased \$371K
  - Receivables increased \$981K
  - Prepaid items and inventories increased \$290K
  - Capital assets increased \$1.3 million
  - Deferred outflows of resources increased \$21K
- Business-type:
  - Cash and investments decreased \$202K
  - Receivables decreased \$49K
  - Prepaid items and inventories decreased \$525K
  - Capital assets increased \$997K
  - Deferred outflows of resources increased \$105K

Total liabilities and deferred inflows decreased approximately \$2.7 million:

- Governmental:
  - Accounts payable increased \$811K
  - Payroll payable increased \$69K
  - Deposits and unearned revenue decreased \$866K
  - Long-term liabilities increased \$34K
  - Aggregate net pension liabilities decreased \$3.3 million
  - Deferred inflow of resources increased \$3.3 million

- Business-type:
  - Accounts payable decreased \$277K
  - Payroll payable increased \$11K
  - Deposits and unearned revenues increased \$214K
  - Long-term liabilities decreased \$87K
  - Aggregate net pension liabilities decreased \$926K
  - Deferred inflow of resources increased \$926K

| Total liabilities        | 17,369                  | 19,758     | 4,794                    | 5,928     | 22,163        | 25,686     |
| Deferred inflows         | 3,319                   | -          | 926                      | -         | 4,245         | -          |
| Net position:            |                         |            |                          |           |               |            |
| Net investment in        |                         |            |                          |           |               |            |
| capital assets           | 121,872                 | 122,002    | 17,836                   | 19,629    | 139,708       | 141,631    |
| Restricted               | 1,773                   | 128        | 46                       | -         | 1,819         | 128        |
| Unrestricted (Deficit)   | (6,486)                 | (7,323)    | 5,857                    | 5,550     | (629)         | (1,773)    |
| Total net position       | \$ 117,159              | \$ 114,807 | \$ 23,739                | \$ 25,179 | \$ 140,898    | \$ 139,986 |

Activities in 2014/15, which changed the City's net position, are described in the Table 2, with comparison totals for 2013/14 activities

**Governmental activities.** Governmental activities increased the City of Morro Bay's net position by \$2.35 million. Increased building and increased building fees comprise the greatest reason for change. The economy is stabilizing, and the City is seeing the results in tourism increases, and building. The City completed one major capital project, the Morro Creek Bridge and Bikeway, which was paid mostly from a National Scenic Byways grants, California Department of Transportation (CalTRANS) grants, and Local Transportation funding made available by the San Luis Obispo Council of Governments (SLOCOG).

**TABLE 2: CITY OF MORRO BAY CHANGES IN NET POSITION**

**Business-type activities.**

Business-type activities decreased the City of Morro Bay's net position by \$1.44 million. Cost of personnel and services continues to rise, while revenues have not, particularly in Water Operations. The City is a participant in the California state water project, and the commitment must be paid, whether or not the City's allotment of water is provided. With the drought conditions in California, state water allocations have declined, and the City has been forced to use its desalination facility to clean well water to maintain sufficient supply to its citizens. As a part of the drought situation, restrictions have been imposed on our citizens, and thus, revenues have fallen by \$216. An additional problem is our water rate structure that has not been updated since 1996. In fiscal year 2013/14, the process to update water rates began, with a study conducted by Bartle Wells.

After several public hearings and much public outreach, the City mailed out a protest vote invitation, in accordance with Proposition 218. During the Proposition 218 public hearing, protest votes were received, but the number of protests was insufficient to stop the imposition of the new rates. On May 26, 2015, the City Council adopted the new rate study which will go into effect with July 2015 usage.

In 2014/15, the Harbor Fund used a considerable amount (\$500 thousand) of its accumulated cash to complete repairs to its North T-Pier. The total cost of the project, which began in fiscal year 2013/14, was \$997.

### **Financial Analysis of the Government's Funds**

As noted earlier, the City of Morro Bay uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

**Governmental funds.** The focus of the City's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing Morro Bay's financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2015, the City of Morro Bay's governmental funds reported combined ending fund balances of \$8.5 million, an increase of \$731K in comparison to the prior year. The majority of this total amount (\$6.4 million) constitutes nonspendable (\$2.8 million), restricted (\$1.8 million) and committed (\$1.8 million) fund balances. The amount available for spending at the City's discretion (\$2.1 million) is 25% of the combined fund balances.

The General Fund is the chief operating fund of the City of Morro Bay. At the end of June 30, 2015, total fund balance of the general fund was \$6.1 million, the majority of which is nonspendable (\$2.7 million) and committed (\$1.3 million). As a measure of the general fund's liquidity, it may be useful to compare unreserved fund balance to total fund expenditures. Unreserved fund balance represents 19% of total general fund expenditures.

The General Fund's fund balance increased by \$1.4 million during the current fiscal year. City management has embraced a change in philosophy, leaning towards leveling the playing field for residents and businesses by ensuring those who utilize services pay for those services. Fees for services, with the exception of tiered subsidies for youth recreation programs, have been increased to collect more fully the cost of services provided. Additionally, the City engaged a professional firm to perform an organizational assessment and financial stability model. Some of these recommendations and tools were implemented in fiscal year 2014/15, and the remaining are subject to review for implementation in fiscal years 2015/16 and 2016/17.

**Proprietary funds.** The City of Morro Bay's proprietary funds provide the same type of information in the government-wide financial statements, but in more detail. At June 30, 2015, unrestricted net position in the Water and Sewer Operating Funds amounted to \$2.9 million and \$3.4 million, respectively. Unrestricted net position in the Harbor Operating Funds presented as a deficit \$544K, due to the use of cash for the North T-Pier repair, as previously mentioned. Net position increased in the Sewer fund by \$28K. The Water and Harbor funds decreased by \$1 million and \$438, respectively. Factors concerning those funds have already been addressed in the discussion of the City's business-type activities.

Additional information on the City's capital assets can be found in Note 1-I and Note 4 on page 52 and pages 60-61.

**Long-term debt.**

At the end of the current fiscal year, the City of Morro Bay had total debt outstanding of \$4.3 million. Of this amount, \$2.2 million comprises debt secured solely by specified revenue sources (e.g., notes payable and certificates of participation). The City maintains a double A ("AA") rating from Standard & Poor's.

Additional information on the City's long-term liabilities can be found in Note 5 on pages 62 - 63 of this report.

## **Economic Factors and Next Year's Budget and Rates**

- Home prices, home sales and remodels are booming, and that momentum is anticipated to continue for the fiscal year 2015/16. The median home price in Morro Bay is \$448,500, which is an increase of 13.2% from this time last year. Property taxes continue to grow by approximately 2% annually. Morro Bay is nearly built out, with little vacant land to construct more homes. There are several projects in process right now that could provide 80+ additional homes, and require 10 of those to be affordable.
- Tourism in Morro Bay is flourishing, as demonstrated by the significant increases in Transient Occupancy Tax (TOT). Since the 2010/11 fiscal year, TOT has rocketed, increasing each year over the previous year as follows:
  - 2011/12 – 7.37%
  - 2012/13 – 10.25%
  - 2013/14 – 13.07%
  - 2014/15 – 10.3%

Our Embarcadero and waterfront are bustling with activity on a daily basis, including our normal *off-season*, from January through April. For the fiscal year 2015/16, TOT growth is expected to slow down to 3%, unless our transient stay inventory increases.

- Sales tax revenue is expecting a modest increase (2%), which has been our historical norm. The City has hired a Deputy City Manager, whose responsibilities include economic development and public outreach. Additionally, the City has expanded its marketing through social media, and an updated website. Promoting the City as a tourist destination is a top goal for management.
- In the 2014/15 fiscal year, the City was successful in negotiating two year contracts with its employees that contained a 3% salary increase, along with other incentives.
- In 2015, Dynegy Morro Bay LLC, owners of the Morro Bay power plant, permanently closed operations. The future of this property is unknown.

These factors were considered in preparing the City's budget for the 2015/16 fiscal year.

## **Requests for Information**

This financial report is designed to provide a general overview of the City of Morro Bay's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Department, City of Morro Bay, 595 Harbor Street, Morro Bay, CA 93442.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Balance Sheet to the**  
**Government-wide Statement of Net Position**  
**June 30, 2015**

---

**Total Fund Balances - Total Governmental Funds** \$ 8,509,083

Amounts reported for governmental activities in the Statement of Net Position were reported differently because:

Capital assets used in governmental activities were not current financial resources. Therefore, they were not reported in the Governmental Funds Balance Sheet.

|                  |                   |             |
|------------------|-------------------|-------------|
| Nondepreciable   | \$ 97,379,792     |             |
| Depreciable, net | <u>25,907,707</u> | 123,287,499 |

Internal Service Funds were used by management to charge the costs of certain activities, such as insurance and equipment replacement to individual funds. The assets and liabilities of the Internal Service Funds were included in the governmental activities in the Government-Wide Statement of Net Position.

2,190,356

Long-term liabilities are not due and payable in the current period and accordingly are not reported as fund liabilities. All liabilities, both current and long-term, are reported in the Statement of Net Position:

|                               |                    |             |
|-------------------------------|--------------------|-------------|
| Certificates payable          | \$ (1,416,000)     |             |
| Claims payable                | (229,549)          |             |
| Compensated absences          | (290,150)          |             |
| Other postemployment benefits | (206,590)          |             |
| Pension related debt          | <u>(1,256,234)</u> | (3,398,523) |

Pension contributions made during the year after the measurement date are reported as pension expense in governmental funds and as deferred outflow of resources in the government-wide financial statements.

1,318,092

Deferred amounts relates to pension net available for current expenditures and are not reported in the governmental fund financial statements:

Actual earnings in excess of projected earning on pension plan investments. (3,151,139)

Deferred amounts relates to pension net available for current expenditures and are not reported in the governmental fund financial statements:

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| Employer's actual contributions in excess of employer's proportionate contributions | 118,098   |
| Employer's proportionate contributions in excess of employer's actual contributions | (112,217) |
| Adjustments due to difference in proportions.                                       | 155,199   |

Aggregate net pension liability is not due and payable in the current period and therefore is not reported in the governmental funds.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Statement of Revenues, Expenditures, and Changes**  
**in Fund Balances to the Government-Wide Statement of Activities**  
**For the Year Ended June 30, 2015**

---

**Net Change in Fund Balances - Total Governmental Funds** \$ 730,996

Governmental activities in the Statement of Activities were reported differently because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental funds.

|                                          |                         |
|------------------------------------------|-------------------------|
| Capital outlay                           | 2,427,350               |
| Depreciation                             | (1,065,260)             |
| Net effect on disposal of capital assets | <u>(77,024)</u>         |
| <b>Total</b>                             | <u><b>1,285,066</b></u> |

The issuance of long-term liabilities provides current financial resources to governmental funds, while the repayment of the principal of long-term liabilities consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position.

**City of Morro Bay**  
**Notes to the Basic Financial Statements**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies**

The basic financial statements of the City of Morro Bay, California, (the “City”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) as applied to governmental agencies. The Governmental Accounting Standards Board (“GASB”) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the City’s significant policies:

**A. Financial Reporting Entity**

The City of Morro Bay is a general law city incorporated in 1964. The City operates under a Council-Manager form of government. The mayor and four council members are elected at large. A full range of services is provided, including general government, parks and recreation, police and fire and emergency services, streets and storm drain maintenance, water and sanitary, and transportation. The City also maintains the Morro Bay harbor and manages state-granted tidelands and harbor fee lands within the City limits.

The basic financial statements present the City and its component units, entities for which the City is considered to be financially accountable. The City is considered to be financially accountable for an organization if the City appoints a voting majority of that organization’s governing body and either the City is able to impose its will on that organization or there is a potential for the organization to provide financial benefits to or impose specific financial burdens on the City. The City is also considered to be financially accountable for an organization if that organization is fiscally dependent (i.e., it is unable to adopt its budget, levy taxes, set rates or charges, or issue bonded debt without approval from the City). In certain cases, other organizations are included as component units if the nature and significance of their relationship with the City are such that their exclusion would cause the City’s financial statement to be misleading or incomplete. Blended component units, although legally separate entities, are in substance, part of the City’s operations and data from these units are combined with data of the City.

Management determined that the following entities should be reported discretely presented component units based on the criteria above.

Discretely Presented Component Unit - The Morro Bay/Cayucos Sanitary District Wastewater Treatment Plant Joint Powers Agreement (JPA) provides for the treatment of wastewater for the benefit of the government's residents and those of Cayucos, an unincorporated community in San Luis Obispo County. The JPA's governing board consists of the Morro Bay City Council and the Cayucos Sanitary District Board. The governing board sets user charges and establishes budgets. Additionally, the contribution to the JPA was made by the Sewer Enterprise Fund. The component unit has a June 30 year-end. The separately issued financial statement can be obtained from the finance department of the JPA.

There are no component units for the City that meet the criteria for blended presentation.

The City participates in the California Joint Powers Insurance Authority (the “CJPIA”) for its general liability, workers' compensation, property, vehicle and crime insurance. This organization is financed through premium charges to each member. The CJPIA does not meet the aforementioned reporting criteria, and is therefore, not included in the accompanying financial statements.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus***

The accounts of the City are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for by providing a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. City resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

In accordance with GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*, the statement of net position reports separate sections for Deferred Outflows of Resources and Deferred Inflows of Resources, when applicable.

**Deferred Outflows of Resources** represent outflows of resources (consumption of net position) that apply to future periods and that, therefore, will not be recognized as an expense until that time.

**Deferred Inflows of Resources** represent inflows of resources (acquisition of net position) that apply to future periods and that, therefore, are not recognized as revenue until that time.

**Government-Wide Financial Statements**

The government-wide financial statements are reported using the “*economic resources*” measurement focus and the accrual basis of accounting.

Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include property and sales taxes, grants, entitlements and donations. On an accrual basis, revenues from property taxes are recognized in the fiscal year for which the taxes are levied. Revenues from sales taxes are recognized when the underlying transactions take place. Revenues from grants, entitlements and donations are recognized in the fiscal year in which all eligible requirements have been satisfied.

The government-wide financial statements consist of the statement of net position and the statement of activities that report information on all of the non-fiduciary activities of the primary government and its component unit. Eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the governmental and business-type activities of the City. Governmental activities generally are financed through taxes, intergovernmental revenues and other non-exchange revenues. Business-type activities generally rely, to a significant extent, on fees and charges for services.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Government-Wide Financial Statements (Continued)*

The statement of activities presents a comparison between direct expenses and program revenues for each function of the City's activities. Direct expenses are (1) expenses that are specifically associated with a program or function, and (2) allocated indirect expenses. Program revenues include (1) fees, fines and charges paid by the recipients of goods or services offered by the programs, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented instead as general revenues.

When both restricted and unrestricted net position are available, restricted resources are used only after the unrestricted resources are depleted.

*Fund Financial Statements*

The fund financial statements report detailed information about the City's funds. Separate statements are provided for each fund category- governmental, proprietary and fiduciary- even though the latter are excluded from the government-wide financial statements. The emphasis of the Governmental and Proprietary Fund financial statements is on major individual funds. Each major fund is presented in a single column. All remaining governmental funds are separately aggregated and reported as nonmajor funds.

Governmental Fund Financial Statements include a Balance Sheet and a Statement of Revenues, Expenditures and Changes in Fund Balances for all major governmental funds and non-major funds aggregated. An accompanying schedule is presented to reconcile and explain the differences in Net Position as presented in these statements to the Net Position presented in the Government-Wide Financial Statements. The City has presented all major funds that met the applicable criteria.

All governmental funds are accounted for on a spending or "*current financial resources*" measurement focus and the modified accrual basis of accounting. Accordingly, only current assets and current liabilities are included on the Balance Sheet. The Statement of Revenues, Expenditures and Changes in Fund Balances presents increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the current period.

Revenues are recognized as soon as they are both "measurable" and "available". Revenues are considered to be available when they are collectible within the current period as soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. The primary revenue sources, which have been treated as susceptible to accrual by the City, are property taxes, sales tax, intergovernmental revenues and other taxes. Expenditures are recorded in the accounting period in which the related fund liability is incurred.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Fund Financial Statements (Continued)*

The Reconciliation of the Fund Financial Statements to the Government-Wide Financial Statements is provided to explain the differences created by the integrated approach of GASB Statement No. 34.

The City reports the following major governmental funds:

General Fund - The City's primary operating fund. The General Fund is used to account for all revenues and expenditures necessary to carry out the basic governmental activities of the City that are not accounted for through other funds. For the City, the General Fund includes such activities as public protection, public ways and facilities, health and sanitation, public assistance, education and recreational services.

Community Development Grants Special Revenue Fund - Used to account for financial resources to be used for offering low or no interest-bearing loans to income-qualified homeowners for the acquisition or rehabilitation of owner-occupied site-built or manufactured homes.

Capital Improvement Capital Projects Fund - Used to account for financial resources to be solely used for the construction of capital assets.

Proprietary Fund Financial Statements include a Statement of Net Position, a Statement of Revenues, Expenses and Changes in Fund Net Position, and a Statement of Cash Flows for each major Proprietary Fund.

A separate column representing internal service funds is also presented in these statements. However, internal service balances and activities have been combined with the governmental activities in the Government-Wide Financial Statements.

Proprietary funds are accounted for using the "*economic resources*" measurement focus and the accrual basis of accounting. Accordingly, all assets and liabilities (whether current or noncurrent) are included on the Statement of Net Position. The Statement of Revenues, Expenses and Changes in Fund Net Position presents increases (revenues) and decreases (expenses) in total Net Position. Under the accrual basis of accounting, revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred. In these funds, receivables have been recorded as revenue and provisions have been made for uncollectible amounts.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities.

The City reports the following major proprietary funds:

Water Enterprise Fund - Accounts for revenues received primarily from water service charges, which are expended for maintenance, operations and improvements to the water system.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Fund Financial Statements (Continued)*

The City reports the following major proprietary funds (Continued):

Sewer Enterprise Fund - Accounts for revenues received primarily from sewer service charges, which are expended for maintenance, operations and improvements to the sanitary sewer system.

Harbor Enterprise Fund - Accounts for revenues received from harbor leases, rentals, moorings and other sources, which are expended for maintenance, operation, patrolling, and improvements of the harbor.

Internal Service Funds - Accounts for revenues received primarily from charges to City departments on an estimated basis for insurance coverage, and which are expended for insurance purchase, valid claims and related costs. These funds were opened in 1980-81 to account for workers unemployment compensation and fire insurance costs. They now account for all insurance coverage including health, dental, general liability, and vehicle insurance.

Fiduciary fund financial statements include a Statement of Fiduciary Net Position and a Statement of Changes in Fiduciary Net Position. The City's fiduciary funds represent agency fund and Other Postemployment Benefits (OPEB) trust fund. Both agency fund and the OPEB trust fund are accounted for on the full accrual basis of accounting.

The City reports the following fiduciary funds:

Other Postemployment Benefits (OPEB) Trust Fund – Used to account for assets held by the City as a trustee for pre-funding of OPEB liability.

Agency Fund - Used to account for assets held by the City as an agent for individuals, private organizations, other governments, and/or other funds. Agency Funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

***C. Cash and Investments***

The City's cash and cash equivalents are comprised of cash on hand, demand deposits, and short-term investments with original maturity of three months or less from the date of acquisition. All cash and investments of proprietary funds are held in the City's investment pool. These cash pools have the general characteristics of a demand deposit account; therefore, all cash and investments in the proprietary funds are considered cash and cash equivalents for statement of cash flows purposes.

Investments are stated at fair value (quoted market price or best available estimate thereof).

***D. Receivable and Allowance for Doubtful Accounts***

Customer accounts receivable consist of amounts owed by private individuals and organizations for services rendered in the regular course of business operations. Receivable are shown net of allowances for doubtful accounts. Uncollectable accounts are based on prior experience and management's assessment of the collectability of existing accounts.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***E. Prepaid Items***

Certain payments to vendors applicable to future accounting periods are recorded as prepaid items.

***F. Inventories***

The City maintains an inventory account for fuel. Fuel is valued at June 30 based on the amount of fuel in the storage tanks and the most recent invoices' purchase price. Inventories are valued using first in first out method.

***G. Land Held for Resale***

Land held for resale is carried at the lower of cost or estimated net realizable value.

***H. Property Tax Revenue***

Property taxes attach as an enforceable lien at March 1. Taxes are levied on July 1 and payable in two installments, December 10 and April 10. All general property taxes are then allocated by the County Auditor's Office to the various taxing entities per the legislation implementing Proposition 13. The method of allocation used by the County is subject to review by the State of California. City property tax revenues are recognized when levied and received within 60 days of the year end.

***I. Capital Assets***

Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available. Contributed fixed assets are valued at their estimated fair market value on the date contributed. The City defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Capital assets used in operations are depreciated or amortized (assets under capital leases) using the straight-line method over the lesser of the capital lease period or their estimated useful lives in the government-wide statements and proprietary funds. The estimated useful lives are as follows:

|                           |             |
|---------------------------|-------------|
| Structures & improvements | 15-30 years |
| Equipment                 | 4-10 years  |
| Infrastructure            | 25-75 years |

***J. Interfund Transactions***

Interfund transactions are reflected as loans, services provided, reimbursements or transfers. Loans are reported as receivables and payables, as appropriate, are subject to elimination upon consolidation, and are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds (i.e., the noncurrent portion of interfund loans). Any residual balances outstanding between the governmental activities and the business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not available financial resources. There were no advances between funds during the year.

Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures/expenses. Reimbursements occur when one fund incurs a cost, charges the appropriate benefiting fund and reduces its related cost as a reimbursement. All other interfund transactions are treated as transfers. Transfers between governmental or proprietary funds are netted as part of the reconciliation to the government-wide presentation.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***K. Claims Payable***

The City records a liability to reflect an actuarial estimate of ultimate uninsured losses for both general liability claims (including property damage claims) and workers' compensation claims. The estimated liability for workers' compensation claims and general liability claims includes "incurred but not reported" ("IBNR") claims. There is no fixed payment schedule to pay these liabilities.

***L. Compensated Absences Payable***

City employees have vested interest in varying levels of vacation, sick leave and compensatory time based on their length of employment. It is the policy of the City to pay all accumulated vacation pay and all or a portion of sick pay when an employee retires or terminates. The long-term amount is included as a liability in the governmental activities of the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. All of the liability for compensated absences applicable to proprietary funds is reported in those funds.

***M. Pension***

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the plans and additions to/deductions from the plans' fiduciary net position have been determined on the same basis as they are reported by the plans (Note 7). For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value.

The following timeframes are used for pension reporting:

CalPERS

|                    |                               |
|--------------------|-------------------------------|
| Valuation Date     | June 30, 2013                 |
| Measurement Date   | June 30, 2014                 |
| Measurement Period | July 1, 2013 to June 30, 2014 |

Gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time. The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense. The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized straight-line over 5 years. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive, and retired) as of the beginning of the measurement period.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**N. *Unearned Revenue***

In the government-wide financial statements, unearned revenue is reported for transactions for which revenue has not yet been earned. Typical transactions recorded as unearned revenues in the government-wide financial statements are cell phone site license lease payments received in advance, prepaid charges for services and facility rentals paid in advance.

In the fund financial statements, unearned revenue is recorded when transactions have not yet met the revenue recognition criteria. The City records unearned revenue for transactions for which revenues have not been earned. Typical transactions for which unearned revenue is recorded are lease payments, quarterly encroachment fees and advance registration for recreation classes which were not yet earned.

**O. *Net Position***

In the government-wide financial statements and proprietary fund financial statements, net position is classified as follows:

*Net Investment in Capital Assets* - This component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of debt that are attributable to the acquisition, construction, or improvement of those assets.

*Restricted* - This component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets.

*Unrestricted* - This component of net position is the amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

**P. *Fund Balances***

In the governmental fund financial statements, fund balances are classified as follows:

*Nonspendable* – Nonspendable fund balances include amounts that cannot be spent because they are not in a spendable form, such as inventory, prepaid items, land held for resale and long-term receivable or because resources legally or contractually must remain intact.

*Restricted* – Restricted fund balances are the portion of fund balance that have externally enforceable limitations on their usage through legislation or limitations imposed by creditors, grantor, laws and regulations of other governments or enabling legislation.

*Committed* – Committed fund balances are self-imposed limitations by the highest level of decision-making authority, namely the City Council, prior to the end of the reporting period. City Council adoption of a resolution is required to commit resources or to rescind the commitment.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**P. Fund Balances (Continued)**

*Assigned* – Assigned fund balances are limitations imposed by management based on the intended use of the funds. Modifications or rescissions of the constraints can be removed by the same type of action that limited the use of the funds. Assignment of resources can be done by the highest level of decision making or by a committee or official designated for that purpose. The City Council has authorized the Finance Director for that purpose.

*Unassigned* – Unassigned fund balances represent the residual net resources in excess of the other classifications. The general fund is the only fund that reports a positive unassigned fund balance amount. In other governmental funds, it is not appropriate to report a positive unassigned fund balance amount. However, in governmental fund other than general fund, if expenditures incurred for specific purposes exceed the amounts that are restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance in that fund.

**Q. Use of Estimates**

The preparation of the basic financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

**R. Accounting Changes**

GASB has issued Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27*). This Statement establishes standards for measuring and recognizing liabilities, deferred outflow of resources, deferred inflows of resources, and expense/expenditures for pension plans. This Statement identifies the methods and assumptions that should be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service. This statement became effective for periods beginning after June 15, 2014. See Note 11 for prior period adjustment as a result of implementation.

GASB has issued Statement No. 69, *Government Combinations and Disposals of Government Operation*. This Statement establishes accounting and financial reporting standards related to government combinations and disposals of government operations. As used in this Statement, the term government combinations includes a variety of transactions referred to as mergers, acquisitions, and transfers of operations. This statement became effective for periods beginning after December 15, 2013 and did not have a significant impact on the City's financial statements for year ended June 30, 2015.

GASB has issued Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68*. This statement establishes standards relates to amounts associated with contributions, if any, made by a state or local government employer or nonemployer contributing entity to a defined benefit pension plan after the measurement date of the government's beginning net pension liability. This statement became effective for periods beginning after June 15, 2014. See Note 11 for prior period adjustment as a result of implementation.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

**Note 2 – Cash and Investments**

The City maintains a cash and investment pool, which includes cash balances and authorized investments of all funds.

The City had the following cash and investments at June 30, 2015:

|                      | Primary Government                              |                             |                | Discretely<br>Presented<br>Component<br>Unit | Total         |
|----------------------|-------------------------------------------------|-----------------------------|----------------|----------------------------------------------|---------------|
|                      | Government-Wide<br>Statement of<br>Net Position |                             |                |                                              |               |
|                      | Governmental<br>Activities                      | Business-type<br>Activities | Fiduciary Fund |                                              |               |
| Cash and investments | \$ 6,187,852                                    | \$ 7,827,181                | \$ 1,741,439   | \$ 160,667                                   | \$ 15,917,139 |

The City's cash and investments at June 30, 2015 in more detail:

|                                                 |               |
|-------------------------------------------------|---------------|
| Cash and cash equivalents:                      |               |
| Petty Cash                                      | \$ 1,900      |
| Deposits with financial institutions            | 7,564,319     |
| Total cash and cash equivalents                 | 7,566,219     |
| Investments:                                    |               |
| Local Agency Investment Fund                    | 3,127,955     |
| Mutual Funds                                    | 515,813       |
| Certificates of Deposit                         | 3,710,482     |
| U.S. Government Sponsored Enterprise Securities | 996,670       |
| Total investments                               | 8,350,920     |
| Total cash and investments                      | \$ 15,917,139 |

**A. Deposits**

The carrying amounts of the City's demand deposits were \$7,564,319 at June 30, 2015. Bank balances at that date were \$7,514,478, the total amount of which was collateralized or insured with accounts held by the pledging financial institutions in the City's name as discussed below.

The California Government Code requires California banks and savings and loan associations to secure the City's cash deposits by pledging securities as collateral. This Code states that collateral pledged in this manner shall have the effect of perfecting a security interest in such collateral superior to those of a general creditor. Thus, collateral for cash deposits is considered to be held in the City's name.

The market value of pledged securities must equal at least 110% of the City's cash deposits. California law also allows institutions to secure City deposits by pledging first trust deed mortgage notes having a value of 150% of the City's total cash deposits. The City may waive collateral requirements for cash deposits, which are fully insured up to \$250,000 by the Federal Deposit Insurance Corporation ("FDIC"). The City, however, has not waived the collateralization requirements.

The City follows the practice of pooling cash and investments of all funds, except for funds required to be held by fiscal agents under the provisions of bond indentures, if applicable. Interest income earned on pooled cash and investments is allocated on an accounting period basis to the various funds based on the period-end cash and investment balances, however, interest is not allocated to funds created to advance costs for utility undergrounding districts, reimbursable grant funds or internal service funds.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

**Note 2 – Cash and Investments (Continued)**

**B. Investments**

Under the provisions of the City’s investment policy, the City’s investments are limited to those authorized by the California Government Code, except as follows:

| Authorized Investment Type                            | Maximum Maturity | Maximum Percentage of Portfolio | Maximum Investment in one Issuer |
|-------------------------------------------------------|------------------|---------------------------------|----------------------------------|
| Securities Issued by U.S. Government, or its agencies | 5 years          | None                            | None                             |
| Local Agency Investment Fund (LAIF)                   | N/A              | None                            | None                             |
| Certificates of Deposit                               | 5 years          | None                            | \$250,000                        |
| Bankers Acceptances                                   | 180 days         | 40%                             | None                             |
| Mutual Funds and Money Market Mutual Funds            | 5 years          | None                            | None                             |
| Collateralized Deposit                                | N/A              | None                            | None                             |
| Passbook Savings Accounts                             | 5 years          | None                            | None                             |
| Repurchase Agreements                                 | 5 years          | 25%                             | None                             |

The City is a participant in LAIF, which is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California. The City’s investments with LAIF at June 30, 2015 included a portion of the pool funds invested in Structured Notes and Asset-Backed Securities, which included the following:

*Structured Notes:* debt securities (other than asset-backed securities) whose cash flow characteristics (coupon rate, redemption amount, or stated maturity) depend upon one or more indices and/or that have embedded forwards or options.

*Asset-Backed Securities:* generally mortgage-backed securities that entitle their purchasers to receive a share of the cash flows from a pool of assets such as principal and interest repayments from a pool of mortgages (for example, collateralized mortgage obligations), or credit card receivables.

As of June 30, 2015, the City had \$3,127,955 invested in LAIF, which had invested 2.08% of the pool investment funds in Structured Notes and Asset-Backed Securities.

**C. Risk Disclosures**

*Interest Rate Risk* - As a means of limiting its exposure to fair value losses arising from rising interest rates, the City’s investment policy limits investments to a maximum maturity of five years.

At June 30, 2015, the City had the following investment maturities:

| Investment Type                                 | Fair value          | Investment Maturities (in Years) |                     |                   |                     |                   |
|-------------------------------------------------|---------------------|----------------------------------|---------------------|-------------------|---------------------|-------------------|
|                                                 |                     | Less than 1                      | 1 to 2              | 2 to 3            | 3 to 4              | 4 to 5            |
| Local Agency Investment Fund                    | \$ 3,127,955        | \$ 3,127,955                     | \$ -                | \$ -              | \$ -                | \$ -              |
| Mutual Funds                                    | 515,813             | 515,813                          | -                   | -                 | -                   | -                 |
| Certificates of deposit                         | 3,710,482           | 1,187,361                        | 1,002,828           | -                 | 1,270,293           | 250,000           |
| U.S. Government Sponsored Enterprise Securities | 996,670             | -                                | -                   | 996,670           | -                   | -                 |
| <b>Total</b>                                    | <b>\$ 8,350,920</b> | <b>\$ 4,831,129</b>              | <b>\$ 1,002,828</b> | <b>\$ 996,670</b> | <b>\$ 1,270,293</b> | <b>\$ 250,000</b> |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

**Note 2 – Cash and Investments (Continued)**

**C. Risk Disclosures (Continued)**

Credit Risk – State law limits investments in commercial paper and corporate bonds to the top two ratings issued by nationally recognized statistical rating organizations. It is the City’s policy to limit its investments in these investment types to the top rating issued by Standard & Poor’s and Moody’s Investor Service. At June 30, 2015, the City’s credit risks, expressed on a percentage basis, were as follows:

| Credit Quality Distribution for Securities<br>with Credit Exposure as a Percentage of Total Investments |                             |                           |                                                |
|---------------------------------------------------------------------------------------------------------|-----------------------------|---------------------------|------------------------------------------------|
| Investment Type                                                                                         | Moody's<br>Credit<br>Rating | S&P's<br>Credit<br>Rating | % of Investments<br>with Interest<br>Rate Risk |
| Local Agency Investment Fund (LAIF)                                                                     | Not Rated                   | Not Rated                 | 37.46%                                         |
| Mutual Funds                                                                                            | Not Rated                   | Not Rated                 | 6.18%                                          |
| Certificates of Deposits                                                                                | Not Rated                   | Not Rated                 | 44.43%                                         |
| U.S. Government Sponsored Enterprise Securities                                                         |                             |                           |                                                |
| Federal Farm Credit Banks                                                                               | AAA                         | AA+                       | 5.98%                                          |
| Federal National Mortgage Association                                                                   | AAA                         | AA+                       | 5.95%                                          |
| Total                                                                                                   |                             |                           | 100.00%                                        |

Custodial Risk – For deposits, custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the City will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty (e.g. broker-dealer), the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party.

Concentration of credit risk – The investment policy of the City contains no limitations on the amount that can be invested in any one issuer beyond that stipulated by the California Government Code. There was no investments in any one issuer (other than mutual funds and external investment pools) that represent 5% or more of the City's investments.

**Pension-Related Debt**

As of June 30, 2003, the California Public Employees' Retirement System ("CalPERS") implemented a risk pool for the City's multiple-employer public employee defined benefit pension plan. The City's Miscellaneous and Safety Plans converted from agent multiple-employer plans to cost-sharing multiple employer plans. In addition to the annual required contributions (see Note 7), the City is also required to make annual payments on a Side Fund, which was created when the City entered the risk pool to account for the difference between the funded status of the pool and the funded status of the City's plans. The responsibility for funding the Side Fund is specific to the City and is not shared by all employers in the risk pool. The annual payments on the Side Fund represent principal and interest payments on the pension-related debt, which are included in the retirement expenditures in the City's various functions.

The amount of pension-related debt outstanding at June 30, 2015 totaled \$1,256,234, which includes \$665,974 for the Safety Fire Plan and \$590,260 for the Safety Police Plan.

**Certificates of Participation**

On October 12, 2011, the City entered into an installment sale agreement with the Public Property Financing Corporation of California 2011 Fire Station Financing Project, Series A and B, Certificates of Participation (the “COP”) for \$1,500,000 and \$300,000, respectively. The principal balance of Series A matures commencing from September 2012 to September 1, 2041, interest rates at 3.75%, payable on March 1 and September 1 of each year. Series B was fully paid as of June 30, 2015. Series A had an outstanding balance of \$1,416,000 at June 30, 2015.

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance**

A. Description of Self-Insurance Pool Pursuant to Joint Powers Agreement

The City of Morro Bay is a member of the California Joint Powers Insurance Authority (the “CJPIA”). The CJPIA is composed of 118 California public entities and is organized under a joint powers agreement pursuant to California Government Code §6500 et seq. The purpose of the CJPIA is to arrange and administer programs for the pooling of self-insured losses, to purchase excess insurance or reinsurance, and to arrange for group purchased insurance for property and other lines of coverage. The CJPIA began covering claims of its members in 1978. Each member government has an elected official as its representative on the Board of Directors. The Board operates through a nine-member Executive Committee.

B. Self-Insurance Programs of the CJPIA

Each member pays an annual contribution at the beginning of the coverage period. A retrospective adjustment is then conducted annually thereafter, for coverage years 2012-13 and prior. Retrospective adjustments are scheduled to continue indefinitely on coverage years 2012-13 and prior, until all claims incurred during those coverage years are closed, on a pool-wide basis. This subsequent cost re-allocation among members, based on actual claim development, can result in adjustments of either refunds or additional deposits required. Coverage years 2013-14 and forward are not subject to routine annual retrospective adjustment. At June 30, 2015, the amount of this liability was \$229,549.

The total funding requirement for self-insurance programs is estimated using actuarial models and pre-funded through the annual contribution. Costs are allocated to individual agencies based on exposure (payroll) and experience (claims) relative to other members of the risk-sharing pool. Additional information regarding the cost allocation methodology is provided below.

Liability

In the liability program claims are pooled separately between police and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$30,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$30,000 to \$750,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$750,000 to \$50 million, are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2014-15 the CJPIA’s pooled retention is \$2 million per occurrence, with reinsurance to \$20 million, and excess insurance to \$50 million. The CJPIA’s reinsurance contracts are subject to the following additional pooled retentions: (a) 50% of the \$2.5 million annual aggregate deductible in the \$3 million excess \$2 million layer, (b) 50% quota share of the \$3 million excess \$2 million layer, and (c) \$3 million annual aggregate deductible in the \$5 million excess \$10 million layer.

The overall coverage limit for each member, including all layers of coverage, is \$50 million per occurrence. Costs of covered claims for subsidence losses have a sub-limit of \$30 million per occurrence.

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

Workers’ Compensation

In the workers’ compensation program claims are pooled separately between public safety (police and fire) and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$50,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$50,000 to \$100,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$100,000 to statutory limits are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2014-15 the CJPIA’s pooled retention is \$2 million per occurrence, with reinsurance to statutory limits under California Workers’ Compensation Law.

Employer’s Liability losses are pooled among members to \$2 million. Coverage from \$2 million to \$5 million is purchased as part of a reinsurance policy, and Employer’s Liability losses from \$5 million to \$10 million are pooled among members.

C. Purchased Insurance

Property Insurance

The City of Morro Bay participates in the all-risk property protection program of the CJPIA. This insurance protection is underwritten by several insurance companies. City of Morro Bay property is currently insured according to a schedule of covered property submitted by the City of Morro Bay to the CJPIA. City of Morro Bay property currently has all-risk property insurance protection in the amount of \$91,123,400. There is a \$5,000 deductible per occurrence except for non-emergency vehicle insurance which has a \$1,000 deductible. Premiums for the coverage are paid annually and are not subject to retrospective adjustments.

Earthquake and Flood Insurance

The City of Morro Bay purchases earthquake and flood insurance on a portion of its property. The earthquake insurance is part of the property protection insurance program of the CJPIA. City of Morro Bay property currently has earthquake protection in the amount of \$49,309,584. There is a deductible of 5% per unit of value with a minimum deductible of \$100,000. Premiums for the coverage are paid annually and are not subject to retrospective adjustments.

Crime Insurance

The City of Morro Bay purchases crime insurance coverage in the amount of \$1,000,000 with a \$2,500 deductible. The fidelity coverage is provided through the CJPIA. Premiums are paid annually and are not subject to retrospective adjustments.

**For the Year Ended June 30, 2015**

---

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

Special Event Tenant User Liability Insurance

The City of Morro Bay further protects against liability damages by requiring tenant users of certain property to purchase low-cost tenant user liability insurance for certain activities on agency property. The insurance premium is paid by the tenant user and is paid to the City of Morro Bay according to a schedule. The City of Morro Bay then pays for the insurance. The insurance is arranged by the CJPIA.

D. Adequacy of Protection

During the past three fiscal years, none of the above programs of protection experienced settlements or judgments that exceeded pooled or insured coverage. There were also no significant reductions in pooled or insured liability coverage in 2014-15.

***General Information about the Pension Plan***

*Plan Description*

The City contributes to the California Public Employees’ Retirement System (“CalPERS”), a cost-sharing multiple-employer defined benefit pension plan. CalPERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. CalPERS acts as a common investment and administrative agent for participating public entities within the State of California. Benefit provisions and all other requirements are established by State statute and City ordinance. Copies of the CalPERS annual financial report may be obtained from their Executive Office located at 400 P Street, Sacramento, California 95814.

*Employees Covered by Benefit Terms*

At June 30, 2013, the following employees were covered by the benefit terms:

**Note 7 – Defined Benefit Pension Plans (Continued)**

***General Information about the Pension Plan***

*Benefit Provided*

CalPERS provide retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Following are the benefit provisions for each plan:

- Fire Tier 1: 3% (at age 50) of the highest average final 12 months compensation
- Fire Tier 2: 3% (at age 55) of the highest average final 36 months compensation
- Police Tier 1: 3% (at age 50) of the highest average final 12 months compensation
- Police Tier 2: 3% (at age 55) of the highest average final 36 months compensation
- Miscellaneous Tier 1: 2-2.7% (at age 55) of the highest average final 12 months compensation
- Miscellaneous Tier 2 : 2% (at age 60) of the highest average final 36 months compensation
- PEPRM Miscellaneous : 2% (at age 62) of the highest average final 36 months compensation

Employees may retire from active service once they reach 50 years of age and have five years of CalPERS-credited service.

The City has contracted with CalPERS for pre-retirement death benefits, should an employee die while actively employed, subject to the employee's eligibility to retire. Eligibility is established when an employee reaches 50 years of age, and has a minimum of five years of CalPERS-credited service.

Upon the death of an eligible employee, beneficiary(ies) may choose to receive: 1) the City-contracted CalPERS retirement formula Option 2W, or 2) the basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay. With either choice, the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit, which provides additional allocations to spouses caring for unmarried children, under the age of 22, or incapacitated children, is provided.

If the employee dies prior to attaining retirement eligibility, beneficiary(ies) receive: 1) the lump sum basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay, and 2) the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit.

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retirees designated survivor(s), or to the retiree's estate. Depending on the retirement option chosen, beneficiary(ies) may continue to receive lifetime benefits. The City does not contract for Survivor Continuance. Additionally, the City does not participate in Social Security retirement.

*Contributions*

Section 20814(c) of the California Public Employees' Retirement Law ("PERL") requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through CalPERS' annual actuarial valuation process. The Public agency cost-sharing plans covered by either the Safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

There were no employees covered by Fire PEPRA and Police PEPRA plan at June 30, 2013.

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension***

***Actuarial Methods and Assumptions Used to Determine Total Pension Liability***

For the measurement period ended June 30, 2014 (the measurement date), the total pension liability was determined by rolling forward the June 30, 2013 total pension liability. Both the June 30, 2013 and the June 30, 2014 total pension liabilities were based on the following actuarial methods and assumptions:

***Actuarial Methods and Assumptions Used to Determine Total Pension Liability***

|                                  |                                                                                                                           |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Actuarial Cost Method            | Entry Age Normal in accordance with the requirement of GASB Statement No. 68                                              |
| Actuarial Assumptions:           |                                                                                                                           |
| Discount Rate                    | 7.50%                                                                                                                     |
| Inflation                        | 2.75%                                                                                                                     |
| Salary Increases                 | Varies by Entry Age and Service                                                                                           |
| Investment Rate of Return        | 7.50% Net of Pension Plan Investment and Administrative Expenses; includes Inflation                                      |

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

*Actuarial Methods and Assumptions Used to Determine Total Pension Liability (Continued)*

All other actuarial assumptions used in the June 30, 2013 valuation were based on the results of an actuarial experience study for the period from 1997 to 2011, including updates to salary increase, mortality and retirement rates. The Experience Study report can be obtained at CalPERS' website under Forms and Publications.

*Discount Rate*

The discount rate used to measure the total pension liability was 7.50 percent, which is net of administrative expenses. An investment return excluding administrative expenses would have been 7.65 percent. Management has determined that using the lower discount rate has resulted in a slightly higher total pension liability and net pension liability and the difference was deemed immaterial to the financial statement. The long-term expected rate of return on pension plan investments was determined in which best-estimate ranges of expected future real rates are developed for each major asset class. In determining the long-term expected rate of return, both short-term and long-term market return expectations as well as the expected pension fund cash flows were considered. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major *asset class*.

The table below reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

| Asset Class                   | New Strategic<br>Allocation | Real Return<br>Years 1-10 <sup>1</sup> | Real Return<br>Years 11+ <sup>2</sup> |

The following is the approach established by the plan actuary to allocate the net pension liability and pension expense to the individual employers within the risk pool.

- (1) In determining a cost-sharing plan's proportionate share, total amounts of liabilities and assets are first calculated for the risk pool as a whole on the valuation date (June 30, 2013). The risk pool's fiduciary net position ("FNP") subtracted from its total pension liability ("TPL") determines the net pension liability ("NPL") at the valuation date.
- (2) Using standard actuarial roll forward methods, the risk pool TPL is then computed at the measurement date (June 30, 2014). Risk pool FNP at the measurement date is then subtracted from this number to compute the NPL for the risk pool at the measurement date. For purposes of FNP in this step and any later reference thereto, the risk pool's FNP at the measurement date denotes the aggregate risk pool's FNP at June 30, 2014 less the sum of all additional side fund (or unfunded liability) contributions made by all employers during the measurement period (2013-14).

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

The following is the approach established by the plan actuary to allocate the net pension liability and pension expense to the individual employers within the risk pool (Continued).

- (3) The individual plan's TPL, FNP and NPL are also calculated at the valuation date.
- (4) Two ratios are created by dividing the plan's individual TPL and FNP as of the valuation date from (3) by the amounts in step (1), the risk pool's total TPL and FNP, respectively.
- (5) The plan's TPL as of the Measurement Date is equal to the risk pool TPL generated in (2) multiplied by the TPL ratio generated in (4). The plan's FNP as of the Measurement Date is equal to the FNP generated in (2) multiplied by the FNP ratio generated in (4) plus any additional side fund (or unfunded liability) contributions made by the employer on behalf of the plan during the measurement period.
- (6) The plan's NPL at the Measurement Date is the difference between the TPL and FNP calculated in (5).

The City's proportionate share of the net pension liability was as follows:

|                              | <b>Plans</b>        |                     |                      |                      |

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

For the year ended June 30, 2015, the City recognized pension expense as follows:

| <u>Plans</u>         | <u>Pension Expense</u> |
|----------------------|------------------------|
| Fire Tier 1          | \$ 247,189             |
| Fire Tier 2          | 18,842                 |
| Police Tier 1        | 345,143                |
| Police Tier 2        | 86,840                 |
| Miscellaneous Tier 1 | 488,479                |
| Miscellaneous Tier 2 | 13,452                 |
| Miscellaneous PEPRAs | 5,784                  |
| Total                | <u>\$ 1,205,729</u>    |

The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized over 5-years straight line. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive and retired) as of the beginning of the measurement period.

The expected average remaining service lifetime (“EARSL”) is calculated by dividing the total future service years by the total number of plan participants (active, inactive, and retired) in the risk pool. The EARSL for risk pool for the 2013-14 measurement period is 3.8 years, which was obtained by dividing the total service years of 460,700 (the sum of remaining service lifetimes of the active employees) by 122,789 (the total number of participants: active, inactive, and retired).

At June 30, 2015, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

| <u>Fire Tier 1</u>                                                             |                                           |                                          |
|--------------------------------------------------------------------------------|-------------------------------------------|------------------------------------------|
|                                                                                | <u>Deferred outflows<br/>of Resources</u> | <u>Deferred inflows<br/>of Resources</u> |
| Difference between projected and actual earning on pension plan investments    | \$ -                                      | \$ (653,944)                             |

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

Reported deferred outflows of resources related to pensions resulting from City’s contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

| Year Ended June 30, | <b>Deferred Outflows/ (Inflows) of Resources</b> |                    |                      |                      |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 8 –Other Postemployment Benefits Plan**

***Plan Description***

The City contributes to a multi-employer defined benefit plan to provide post-employment medical benefits. Specifically, the City provides postretirement medical benefits to all employees who retire from the City after attaining age 50 with at least 5 years of service. The plan does not provide a publicly available financial report.

***Funding Policy***

The contribution requirements of plan members and the City are established and may be amended by the City's City Council, and/or the employee associations. The required employer contribution was \$119 per person for months in 2014 and \$122 per person per month in 2015. Retirees pay the differential monthly amount of the premium, which varies depending on the health benefits they select. The City implemented GASB 45 for the fiscal year ended June 30, 2010, establishing a liability in its Risk Management Fund for the value of the annual required contribution (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a closed period not to exceed thirty years. The ARC and contribution total for year ended June 30, 2015 was \$146,411 and \$49,658, respectively.

***Annual OPEB Cost and Net OPEB Asset***

The City's annual OPEB cost is calculated based on the ARC. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excesses) over a period not to exceed thirty years. The following table shows the components of the City's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the City's net OPEB Obligation:

|                                                     |                          |
|-----------------------------------------------------|--------------------------|
| Annual Required Contribution                        | \$ 149,704               |
| Interest Adjustment                                 | (5,298)                  |
| Adjustment to Annual Required Contribution          | <u>2,005</u>             |
| Annual OPEB Cost                                    | 146,411                  |
| Contribution made                                   | <u>(49,658)</u>          |
| Change in Net OPEB Obligation                       | 96,753                   |
| Net OPEB Obligation, Beginning of Year, as Restated | <u>109,837</u>           |
| Net OPEB Obligation, End of Year                    | <u><u>\$ 206,590</u></u> |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

**Note 8 –Other Postemployment Benefits Plan (Continued)**

The City’s annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation (asset) for the year ended June 30, 2015 and the two preceding years were as follows:

| Year Ended    | OPEB Cost  | OPEB Cost<br>Contributed | Percentage of<br>Annual OPEB cost<br>Contributed | Net OPEB<br>Obligation (Asset) |
|---------------|------------|--------------------------|--------------------------------------------------|--------------------------------|
| June 30, 2013 | \$ 145,950 | \$ 47,445                | 32.51%                                           | \$ (4,175)                     |
| June 30, 2014 | 149,704    | 50,425                   | 33.68%                                           | 109,837                        |
| June 30, 2015 | 146,217    | 49,658                   | 33.96%                                           | 206,590                        |

***Funded Status and Funding Progress***

As of August 1, 2015, the latest actuarial valuation date, there were no plan assets on the valuation date. The actuarial accrued liability for benefits was \$1,938,928, and the actuarial value of assets was \$614,048, resulting in an unfunded actuarial accrued liability (UAAL) of \$1,324,880. The covered payroll (annual payroll of active employees covered by the plan) was \$6,509,854 and the ratio of the UAAL to the covered payroll was negative 20.35%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the City are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

In January 2013, the City adopted ICMA-RC’s Vantagecare RHS Employer Investment Program for pre-funding of OPEB liability and established a revocable trust account. The City holds discretion to amend or terminate the program, and appoint program administrator to manage the daily operations of the trust account. This trust account is solely funded with assets from the City. The balance as of June 30, 2015 was \$515,813.

***Actuarial Methods and Assumptions***

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and the plan members at that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets consistent with the long-term perspective of the calculations.

The required contribution for the year ended June 30, 2015 was determined as part of the August 1, 2015 actuarial valuation using the entry age normal actuarial cost method. The actuarial assumptions included a 4.5% investment rate of return (net of administrative expenses), payroll increase of 2.75% per annum, and inflation rate of 2.75% per annum, and the City’s share of premium cost will increase at rates of 4% per annum. The level percentage of payroll method is used to allocate amortization cost by year, closed 30 year amortization period is used for the initial UAAL, and open 25 year amortization period is used for any residual UAAL.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 10 – Water Revenue Over State Water Payments**

The City has contracted with the San Luis Obispo County Flood Control and Water Conservation District to provide water from the state water project. The City has contracted to obtain 1,313 acre feet of water per year with an initial estimated cost of \$750 per acre foot, not including the fixed operating and management costs allocated to the City on a pro rata share basis. The City is obligated to make payments even if the City fails or refuses to accept water deliveries. The City paid a total of \$2,208,691 during the year ended June 30, 2015 for its share of the construction and operating costs.

For the fiscal year ending June 30, 2015, the city had 0.64 in water revenue over State Water Payments ratio which is required to be at minimum ratio of greater than, or equal to 1.25. The City entered into a contract with Bartle Wells for water and sewer rate study services. After many public meetings, a Prop 218 protest vote and public hearing, the new rates were adopted on May 26, 2015.

| Correction of reporting deferred revenue for notes receivable | 881,389                                             |
| <b>Fund Balance at July 1, 2014, as Restated</b>              | <u>\$ 1,010,097</u>                                 |

Prior period adjustment of \$504,079 was made to the Other Postemployment Benefits Trust Fund due to the change of the reporting of the fund type from an agency fund to a trust fund.

**Note 12 – Commitments and Contingencies**

**A. Commitments**

The City had several outstanding or planned constructions as of June 30, 2015. However, those constructions neither were contractual nor carried over in a budget. Open constructions are re-budgeted and adopted in a new fiscal year.

**B. Contingencies**

The City is subject to various legal matters incidental to the ordinary course of City operations. At this time, the outcome of these matters and the potential loss, if any, that might result are uncertain. No provision for any liability that may result has been made in the financial statements for these matters.

**C. Grants**

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies. While no matters of noncompliance were disclosed by the audit of the financial statements or single audit of the Federal grant programs, grantor agencies may subject grant programs to additional compliance tests, which may result in disallowed costs. In the opinion of management, future disallowances of current or prior grant expenditures, if any, would not have a material adverse effect on the financial position of the City.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2015**

---

**Note 13 – Subsequent Events**

Beginning in 2015/16, CalPERS changed its methodology for collecting contributions from employers to cover not only the normal cost of pensions, but to repay the side funds that developed as a result of contracting for enhanced pension benefits. These side funds were created as a result of enhanced benefits, retroactively covering all existing employees without requiring a cash deposit to cover the retroactive cost difference between the enhanced benefit plans and the former plans. Contributions are now based on the normal cost percentage rate by Tier for each payroll plus a flat amount every month for each segment (Miscellaneous plan, Safety Police plan, and Safety Fire plan) to repay these side funds.

**Note 14 – Other Required Disclosure**

Excess of Expenditures over Appropriations

Excess of expenditures over appropriations occurred in individual funds during the year ended June 30, 2015 as follows:

|                                                  | <u>Expenditures</u> | <u>Appropriations</u> | <u>Expenditure<br/>in Excess of<br/>Appropriations</u> |

**Required Supplementary Information (Unaudited) (Continued)**  
**Schedule of Funding Progress**  
**For the Year Ended June 30, 2015**

---

**Note 1 – Budgetary Control and Accounting Policy**

Budgets are annually adopted for all governmental and proprietary fund types on a basis consistent with generally accepted accounting principles. The City is required by its municipal code to adopt an annual budget on or before June 30 for the ensuing fiscal year. From the effective date of the budget, the amounts become the “*annual appropriated budget*.”

The appropriated budget is prepared by fund, department and division. The City Council may amend the budget by motion during the fiscal year. Expenditures may not legally exceed appropriations at the fund level. The City Manager is authorized to transfer budgeted amounts between departments within the same fund; however, any transfers between funds or revisions that alter total appropriations of any fund require City Council approval. The legal level of control is therefore at the fund level.

Supplemental appropriations, which increase appropriations, were made during the fiscal year, therefore, “final” budgeted revenue and appropriation amounts shown in the financial statements represent the original budget, modified for adjustments during the year. Appropriations lapse at the end of the fiscal year.

Budget was not adopted for Community Development Grant Special Revenue Fund and Capital Improvement Grant Special Revenue Fund.

Encumbrances - Under encumbrance accounting, purchase orders, contracts and other commitments for expenditures are recorded to reserve that portion of the applicable appropriation. Encumbrance accounting is employed as an extension of formal budgetary accounting. Unexpended appropriations lapse at year-end.

<sup>1</sup> Historical information is required only for measurement periods for which GASB 68 is applicable. The fiscal year 2015 was the first year of implementation, therefore only one year and the measure period are shown.

<sup>2</sup> Employers are assumed to make contributions equal to the actuarially determined contributions (which is the actuarially determined contribution).

<sup>3</sup> Covered-Employee Payroll represented above is based on pensionable earnings provided by the employer. However, GASB 68 defines covered-

<sup>4</sup> Payroll from 2012-13 was assumed to increase by the 3.00% payroll growth assumption

| Plans                | 2012-13<br>Covered-<br>Employee<br>Payroll |
|----------------------|--------------------------------------------|
| Fire Tier 1          | \$ 638,080                                 |
| Fire Tier 2          | 105,026                                    |
| Police Tier 1        | 1,118,743                                  |
| Police Tier 2        | 482,143                                    |
| Miscellaneous Tier 1 | 3,203,106                                  |
| Miscellaneous Tier 2 | 298,501                                    |
| Miscellaneous PEPRAs | 86,720                                     |

<sup>5</sup> Payroll amounts for Fire and Police PEPRAs plan are from payroll record of the City. No valuation reports were available due to having no covered employee for June 30, 2013 valuation period.

**Notes to Schedule**

Change in Benefit Terms: The figures above do not include any liability impact that may have resulted from plan changes which occurred after June

Changes of Assumptions: There were no changes in assumptions.

# SUPPLEMENTARY INFORMATION

---

## SPECIAL REVENUE FUNDS:

***Morro Bay Tourism Business Improvement District (MBTBID) Special Revenue Fund*** - to account for the marketing activities of the MBTBID and the Visitors Center.

***Gas Tax Special Revenue Fund*** - to account for monies received from gasoline taxes.

***Lower Cost Visitor Special Revenue Fund*** – to accounts for collections in-lieu mitigation fees for lower cost visitor serving overnight accommodations, such as hostels and tent campground units, as required by California Coastal Commission actions on coastal development permits.

***Traffic Safety Special Revenue Fund*** – to account for fines and forfeitures collected from any person charged with a misdemeanor.

***Special Safety Grant Special Revenue Fund*** – To account for the Supplemental Law Enforcement Services Fund (SLESF) grant.

***Parking In-Lieu Special Revenue Fund*** – To account for in-lieu fees charged for parking spaces required to adequately service a new business establishment, or the expansion of an existing one.

***Bike Path Special Revenue Fund*** – To account for two percent of Transportation Development Act funds received by the City that are specifically set aside for bike path.

***Special Assessment District Special Revenue Fund*** – to account for parcel assessments and expenditures associated with certain housing developments within the City limits.

***Governmental Impact Fees Special Revenue Fund*** – to account for fees collected to ensure that new development pays the cost of infrastructure expansion required to meet the needs of that new development, effectively transferring the cost burden of growth from the existing rate and taxpayers.

***State Park Marina Special Revenue Fund*** – To account for marina concessions revenues that are received for the planning and environmental review of the proposed dredging and renovation of the State Park Marina.

***Affordable Housing In-lieu Special Revenue Fund*** – To account for collection of impact fees for affordable housing.

***Cloisters Special Assessment District Special Revenue Fund*** – To account for parcel assessments and expenditures associated with the Cloisters housing developments within the City limits.

***Local Transportation Funds ("LTF") Roads Special Revenue Fund*** – To account for Transportation Development Act (TDA) money for roads projects, under TDA Article 8, 99400(a).

***Park In-Lieu Fees Special Revenue Fund*** – To account for special revenue fees collected under the 1975 Quimby Act (California Government Code §66477).

***District Transaction Tax Special Revenue Fund*** – To account for ½ cent district sales tax, commonly known as “Measure Q”.

# CITY OF MORRO BAY

CITY HALL  
595 Harbor Street  
Morro Bay, CA 93442

December 30, 2016

Honorable Mayor  
Members of the City Council  
Citizens of the City of Morro Bay

## REPORT PURPOSE AND ORGANIZATION

It is our pleasure to present the Comprehensive Annual Financial Report (CAFR) of the City of Morro Bay, California, for the fiscal year ended June 30, 2016. All financial statements were prepared in conformity with U.S. generally accepted accounting principles (GAAP) for each fiscal year end. The 2015/16 fiscal year marks the first CAFR prepared by the City; only basic financial statements have been completed for prior years. The difference between the basic financial statements and a CAFR is the inclusion of a letter of transmittal and a statistical section.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control the City has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the City's financial statements are free of any material misstatements.

### Audited Financial Statements

In 2015, the City issued a Request for Proposals (RFP) for auditing services, and as a result of that RFP, The Pun Group, LLP, a firm of licensed certified public accountants, was engaged to perform auditing services for the fiscal years ending June 30, 2015, 2016 and 2017, with the option to renew for two additional fiscal years (2018 and 2019). The FY 2014/15 audit was completed on March 31, 2016, with audit findings.

Since FY 2013/14, the Department Director, staff, and previous auditors expressed concerns regarding the breadth of responsibilities performed by this very small staff. From FY 2009/10, the Director, one IT manager, two confidential employees, and two account clerks were responsible for General Ledger accounting and reconciliations, budgeting, accounts payable, accounts receivable, utility billing, treasury, Human Resources management, and City-wide Information Technology. The request had been made many times to reinstate the Accountant position, which had been unfilled since July 1, 2010, or add a Budget Analyst; however, more pressing needs in public safety required immediate attention. In 2014, the City contracted with Management Partners for an update to its 2008 organizational study (discussed later in this letter), and in its 2015 report, Management Partners stated:

“The Finance Division is very leanly staffed, yet few related functions are contracted. Because of the lean staffing, the department's ability to provide financial and budgeting information and assistance to operating departments is limited. In addition, the division has limited capacity for innovation and planning, and for example, does not prepare a Comprehensive Annual Financial Report (CAFR), a Government Finance Officers Association best practice.”

“There is inadequate time and funding allowed for training and participation in professional organizations. Even getting routine work done is difficult when in the midst of audit or budget preparation. While this “belt tightening” can work for short periods of time, it is not sustainable over the long run.”

Early in calendar year 2016, management began the process of separating the scope of responsibility of the Administrative Services Department, transferring oversight of Information Technology to the Deputy City Manager. Management additionally offered a retirement incentive to its employees who worked for the City for a minimum of five years as of June 30, 2016, and two key employees in the Administrative Services Department (Director and Senior Accounting Technician) availed themselves of the incentive. As a result, management continued separating the Department’s scope of duties, transferring Human Resources to the City Clerk, and in October 2016, hired a Finance Director, a Budget and Accounting Manager, and a Senior Accounting Technician.

Information on the *audit findings* and management’s responses can be found on the City’s website at this link <http://www.morro-bay.ca.us/DocumentCenter/View/9557> or by contacting the Finance Director.

The City’s FY 2016 financial statements have been audited by The Pun Group, LLP. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City are free of material misstatement. The independent auditor, based upon the audit, rendered an unqualified (“clean”) opinion on the City of Morro Bay’s financial statements for the year ended June 30, 2016. The independent auditor’s report is located at the front of the financial section of this report.

GAAP requires management prepare a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management’s Discussion and Analysis (MD&A). The MD&A complements this letter of transmittal, and should be read in conjunction with it. The City’s MD&A immediately follows the Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards.

## **Report Organization**

This report is organized in three sections: introductory, financial, and statistical.

1. The *Introductory* section includes this transmittal memorandum and other information to familiarize the reader with the City, including a list of principal officials and advisory bodies and organizational chart.
2. The *Financial* section contains the independent auditor’s report on the financial statement audit, the Management Discussion & Analysis (MD&A), basic financial statements, which include the notes to the financial statements, Required Supplementary Information, and combining and individual fund presentation and supplementary information.
3. The *Statistical* section includes selected financial and demographic information.

## **PROFILE OF THE CITY OF MORRO BAY**

The City of Morro Bay, incorporated in 1964, is located on the Central Coast of California, midway between Los Angeles and San Francisco, and is home to about 10,700 residents. The city is visited annually by a substantial number of tourists, seeking to enjoy the area’s moderate climate, ocean views and sunsets, and the relaxing atmosphere unique to coastal communities, as well as outdoor activities of kayaking, surfing, hiking, sailing, fishing and bird watching. Morro Rock, a state historic landmark and one of the most visible landmarks on the Central Coast, sits adjacent to the harbor entrance and the quiet inner bay. Tourism and commercial fishing are the main features of the local economy.

## **Form of Government**

The City operates under the mayor-council form of government. The City Council consists of the Mayor and four members, all of which are elected at large. Council members serve four-year terms, with two members elected every two years. The Mayor is elected for a two-year term.

The City Council is responsible, among other matters, for passing Ordinances, adopting the City budget, appointing committees and their members, and hiring the City Manager. The City Manager is responsible for carrying out the policies and Ordinances of the City Council, for overseeing the daily operations of the City, for appointing other employees, and otherwise managing daily operations of the City.

## **City Services**

The City is a full-service city, which includes police and fire protection, building inspections, licenses and permits, construction and maintenance of streets and other infrastructure, park maintenance, recreational activities, and transit services with seasonal trolleys. Water distribution, sewer collection, and harbor operations are provided through enterprise activities. Wastewater treatment is provided by a joint-powers agreement with the Cayucos Sanitary District, which serves the unincorporated community of Cayucos, located to the north of the City. The City is in the process of building its own Water Reclamation Facility, as is the Cayucos Sanitary District with its Sustainable Water Facility. The jointly-owned treatment facility will continue to be utilized until each party's new facility is operational.

## **Budget Process and Budgetary Control**

The Council is required to adopt an initial budget for the fiscal year, no later than June 30 preceding the beginning of the fiscal year on July 1. This annual budget serves as the foundation for the City's financial planning and control. The budget is prepared by fund, function (e.g., public safety), and department (e.g., police). Department heads may transfer resources within their department(s) as they see fit. Transfers of City Council-approved appropriations between departments require City Manager approval, and transfers between funds need approval from the City Council.

Appropriation requests are submitted to the Finance Department to compile for presentation to the City Manager. Once the budget is balanced, the City Manager presents the budget to the City Council at a public workshop(s). Any changes, as a result of the workshop(s), are made, and the final draft budget is presented to the City Council for approval at an upcoming regular meeting, or special meeting if required. The Adopted Budget is posted on the City's website.

The City Council reviews budget performance in October, January (mid-year budget review), and April. The presentation includes the quarter-to-date financial performance, detailed list of contract expenditures by contractor, and detailed investment portfolio performance. With these presentations and prior City Manager approval, department directors have the opportunity to request needed budget adjustments.

## **ECONOMIC CONDITION**

The City's three largest General Fund revenue sources are property taxes, transient occupancy taxes (TOT), and sales tax. The main driver for the City's economy is tourism and visitor-serving businesses. These businesses include hotels, motels, vacation rentals, and recreation vehicle parks, and contribute TOT, at a rate of 10%, which makes up 25% of the City's General Fund revenues. Property taxes are the largest General Fund revenue generator (29%), and sales tax revenues make up 14%. Other national economic impacts have been felt in the City, but to a lesser degree. When the housing bubble burst, property values declined, but not to the extent felt in other San Luis Obispo County cities. Sales taxes dipped, but not significantly, as there are no "big box" retail stores or auto dealerships that drastically affected other cities.

In May 2009, the Morro Bay Tourism Business Improvement District (TBID) was established by Ordinance No. 546. TBID is composed of hotel establishment within the city limits. At the time of its creation, all hotels, motels, bed and breakfast lodging, and inns were authorized to assess a 3% TBID charge to all transient stays, in addition to the 10% TOT collected; recreational vehicle parks, campgrounds and vacation rentals were excluded from this assessment. In FY 2010/11, the second full fiscal year of TBID operation, promotion efforts plus the dry, warm winters produced positive results: tourism in our City began to flourish, and our TOT revenues increased by 3.12%. Over the past five fiscal years, TOT has increased an average of 11% each fiscal year. Translating this to dollars, taxes have increased, since FY 2010/11, by \$1.2 million (\$1.9 million to \$3.1 million). Prior to the recession, TOT's all-time high was \$2 million in FY 2006/07. TOT revenues dropped during the recession by \$136,000, and recovered to the FY 2006/07 level in FY 2011/12. Since FY 2011/12, the growth seen from each prior fiscal year is 7.37%, 10.25%, 13.07%, 14.3% and 8.58%.

The other significant growth in revenues comes from building permit revenues and impact fees, due to increased development/remodeling around the City. Permit revenues and impact fees increased from \$734,000 in FY 2014/15 to \$1.1 million in FY 2015/16, a \$366,000 (54.6%) increase. The number of building permits jumped by 186 (from 294 to 480) in the same time period.

Other improvements in the City's economy reflect a positive outlook. According to the Bureau of Labor Statistics, the unemployment rate in the San Luis Obispo-Paso Robles-Arroyo Grande Metropolitan Statistical Area is 4.5% for June 2016, which is the same as reported in June 2015. According to the California Department of Finance, the population factor for Morro Bay remained relatively stable from January 1, 2015 to January 1, 2016 (from 10,640 to 10,722).

### **Financial planning and major initiatives**

In 2008, the City contracted with Management Partners for an organizational assessment. At that time, many of the suggested changes were explored, with some implemented. In November 2014, the City contracted with Management Partners to update the 2008 study and prepare a 10-year budget forecast. The forecast was presented to Council in March 2015, and was quite clear in demonstrating while the City is not on the verge of insolvency, some significant medium term (5-year) and long-term (30-year) fiscal challenges are evident. This forecast was updated in December 2015 for use with the FY 2016/17 budget.

### ***Long-Term Challenges***

The financial forecast reinforced significant concerns:

- Capital savings are, in many respects, non-existent. The FY 2015/16 budget committed an initial \$100,000 to a capital replacement savings fund for the future replacement of City facilities, such as City Hall and the Police Station. This savings plan is being continued with the FY 2016/17 budget and beyond.
- Funding for repairs and reconstruction of streets. The Pavement Condition Index (PCI) is the accepted measure of street condition, and an average of PCI-70 is the California State sought-after standard. If the City's streets were currently at PCI-70, then funding in the amount of \$1.5 million per year would be needed to maintain that PCI-70 average condition. Unfortunately, our streets are below the average pavement condition index. The City currently budgets its District Transaction Tax fund, a ½ cent district sales tax, by the established priorities memorialized in Resolution 46-12, which are improving the Fire Department, enhancing public safety, street maintenance, and storm drain maintenance to prevent toxic runoff into the Bay. With each annual budget, approximately \$500,000 of the ½ cent district sales tax is set-aside for street maintenance and reconstruction.

### *Medium-Term Challenges*

The City participates in CalPERS retirement for its employees, and because of the size of the employee base, City employees are in pooled plans. Contributions are continuing to rise, driving labor costs up measurably. For the City, the outlook is better than many California cities, because the side funds in the Police and Fire retirement plans will be paid off in FY 2017/18 (Police) and FY 2019/20 (Fire). Paying off these debts will reduce contribution rates significantly. However, most employees are in the Miscellaneous pool, and while the City's miscellaneous side fund was paid off in FY 2014/15, there is still a large unfunded liability due to the pool's unfunded liabilities, asset losses, and assumption changes. These same issues affect Police and Fire, but not to the degree as the effect on the Miscellaneous pool.

An additional 5-year concern is a potential recession. The Management Partner's 2016 revised 10-year budget forecast projected a moderate recession in 2018. The City is planning and preparing for this recession, as well as the CalPERS' impacts to chart a course to weather the 5-year storm we see coming, and come out the other end with existing services intact. The City identified in the FY 2015/16 budget: 1) cut services to keep the Emergency Reserve above the 27.5% reserve requirement; or 2) base planning on a 10-year budget forecast, and dip gently into our Emergency Reserves to sustain services. The City Council chose option #2, and adopted Resolution No. 33-15, which is discussed under *Relevant financial policies* below.

#### **Relevant financial policies**

The City is in the process of compiling its financial policies into one comprehensive set of financial policies to be adopted in the FY 2016/17 fiscal year.

During the fiscal year and with the adoption of the FY 2015/16 budget, the following key financial policies were adopted:

**Resolution No. 30-15:** Establishing User Rates for Water and Sewer Services. This Resolution updates the water and sewer rates last authorized in 1996. It is designed to ensure recovery for cost of services, ensure costs are allocated fairly to all customers, secure the financial stability of the water and sewer systems, and provide a sound financial plan that meets existing ongoing operations and maintenance, and debt service obligations

**Resolution No. 31-15:** Adoption of the FY 2015/16 fiscal year operating budget, which includes the Investment Policy. In prior years, the Investment Policy was brought to the City Council in January, for a calendar year adoption. In January 2014, the City Council made the decision to have the Investment Policy reviewed and presented as a part of the FY 2014/15 budget and thereafter.

**Resolution No. 32-15:** Establishing the Risk Management Internal Service Fund and Committed Fund Balance. The policy describes the Risk Management ISF as a managing tool for City-wide insurance policies. It additionally defines the minimum reserve balance as \$100,000.

**Resolution No. 33-15:** Establishing the General Fund Emergency Reserve Fund Policy and Accepting Management Partner's Financial Forecast Assumptions. This Resolution sets the Reserve's target balance at 27.5% of the average of the three previous years' actual General fund operating revenues. It also restricts use of Reserve funds to City Council approval. Additionally, it set the assumptions for fund balances based on the Management Partners' financial forecast that included a recession, requiring use of Reserves, and authorized the use of Reserves. These assumptions are listed below, and are subject to annual review:

- 2014/15: \$3.385 million (33.4%)
- 2015/16: \$3.583 million (32.7%)
- 2016/17: \$3.272 million (30.2%)
- 2017/18: \$2.685 million (24.5%)
- 2018/19: \$2.802 million (24.7%)
- 2019/20: \$2.797 million (23.6%)
- 2020/21: \$2.983 million (24.6%)
- 2021/22: \$3.097 million (25%)

**Resolution No. 34-15:** Establishing a Strategic Investment Spending Plan. This plan identified surplus funds in the Risk Management ISF (\$900,000) that were not programmed, committed or assigned for insurance purposes, per the Risk Management Resolution No. 32-15. The Strategic Investment Spending Plan identified a priority spending list based on City Council-approved goals, as follows:

- ADA compliance: \$100,000
- Land Use Plans for the General Plan and Local Coastal Plan: \$300,000
- Economic Development Strategic Plan: \$75,000
- Information Technology Program: \$100,000
- Web-based Planning, Permitting and Licensing Software: \$85,000
- High-Speed Fiber Investment: \$150,000
- Additional Projects approved by City Council (TBD): ~\$90,000

#### **FY 2014/15 & 2015/16 major initiatives**

In FY 2014/15, the City contracted with Management Partners to update the 2008 Management Partners organizational study. Many of the recommendations from the 2008 study had not been implemented and were still considered viable alternatives.

The report was delivered to Council in May 2015, and it was decided that all suggested changes be reviewed for implementation. Management Partners provided the City with an implementation schedule, and management established timeframes for review/implementation through FY 2017/18. City goal 5e below requires staff to research and implement, or bring to City Council for adoption or rejection, all Management Partners recommendations.

The City immediately addressed changes to the City organization for operational effectiveness. These changes to the organization were enacted with the FY 2015/16 budget, which include:

- Moving the Consolidated Maintenance activities from the Recreation Department to the Public Services Department. Maintenance activities performed in this division are streets, storm drains, trees, parks, facilities and vehicles.
- Separating the planning functions from the Public Services Department, and creating a Community Development Department for planning activities, and a Public Works Department for engineering, capital projects and utility management.

- Rearranging oversight in the Recreation Department and establishing an Economic Development Department. A new position, Deputy City Manager, was created to replace the Recreation Director, and was assigned oversight responsibilities for Recreation, Information Technology, Economic Development and Tourism.
- Returning control of the Morro Bay Tourism Business Improvement District to the City (formerly control was vested in a 501C(6) Tourism Bureau, a separate entity from the City).

## **Goals and Goals Accomplished and Projects Completed in FY 2015/16**

### **Goals:**

In Spring 2013, the City Council discussed, developed and adopted a set of goals for action over the next two fiscal years (FY 2013/14 and 2014/15). Management changed in December 2013, and the City Manager was replaced in September 2014. In January and February 2015, the 2013 goals were discussed, modified and reaffirmed. These goals, and their subordinate program objectives, were intended to remain valid and in force through at least FY 2015/16, and are listed below:

#### **Goal #1      Develop a new Water Reclamation Facility (WRF)**

- a. Establish a citizens committee for robust public engagement
- b. Present a recommendation to City Council for governance (ownership) with the Cayucos Sanitary District
- c. Present a draft agreement to City Council, outlining the roles and responsibilities for the City and Cayucos Sanitary District
- d. Complete a *fatal flaws* analysis of the Rancho Colina site
- e. Complete the first phase of the Facility Master Plan
- f. Complete and initial study for preparing an Environmental Review document

#### **Goal #2      Improve streets**

- a. Research and discuss a ballot measure for a streets district transaction tax or other financing product to rebuild or repair Morro Bay streets in 5 years
- b. Present to City Council a traffic management plan, consistent with the State of California "Complete Streets," to include vehicles, bikes and pedestrians
- c. Prepare a database and maintenance plan for all traffic control devices, including signs, signals, feedback devices and pavement markings; for action now – refresh all crosswalks, stop bars, legends, parking stall markings, and bicycle lane markings, and replace non-compliant regulatory signs
- d. Update the Pavement Management System
- e. Evaluate unmet bike needs plus maintenance of existing bike paths

#### **Goal #3      Review and update significant City land use plans**

- a. Complete the *General Plan/Local Coastal Plan* update by December 2017
- b. Complete the revision/update of the City's *Secondary Unit Ordinance*
- c. Complete the revision/update of the City's *Sign Ordinance*
- d. Develop and implement neighborhood design guidelines
- e. Update the *Downtown Specific Plan* to establish the identity and vision of the City's downtown area, to include the *Old Town* designation

**Goal #4      Maintain core public safety services**

- a. Complete four regional Community Emergency Response Team courses for citizens, and enhance the Emergency Operations Center with training for City employees, volunteers and City Council
- b. Complete the *drought annex* to Part II of our City's Multi-Hazard Emergency Response Plan
- c. Create and implement Information Technology solutions to enhance public safety communication to the community
- d. Present a proactive code enforcement program to City Council for decision and immediate implementation
- e. Complete all emergency plan updates
- f. Complete implementation of body-worn camera technology for all police officers
- g. Establish a Police Chief's Advisory Committee; complete a strategic plan to enhance organizational efficiency and community collaboration
- h. Present Ordinance to City Council related to emerging public safety trends
- i. Complete a Fire Department strategic plan update to improve efficiencies

**Goal #5      Ensure fiscal sustainability**

- a. Retool the budget process to improve transparency and simplicity, consider biennial and program-based budgeting, and develop a 5-year strategic forecast
- b. Present a plan to City Council for a financial oversight body
- c. Establish capital replacement accounts for all major capital assets plus minimum contributions
- d. Present a plan to City Council for balance cost recovery for City fees and charges
- e. Research and implement, or bring to City Council for adoption or rejection, all Management Partners recommendations
- f. Research and provide a recommendation on City vehicle leasing vs ownership
- g. Explore renewable energy projects to reduce energy costs

**Goal #6      Support economic development**

- a. Provide staff support and participation in the *Local Economic Action Plan* (LEAP) process, and bring appropriate LEAP proposals to City Council
- b. Present a proposal to City Council to retain a consultant for a 5-year economic development strategic plan
- c. Present a proposal to City Council for public/private partnership options to deliver high-speed fiber connectivity
- d. Present a proposal to City Council for possible incorporation of the Tri-W property, preserving a green belt and dedicated a portion to affordable housing
- e. Present a proposal to City Council on the feasibility or establishment of a marine services facility
- f. Implement or present a proposal to City Council on improving event coordination/support; consider an event coordinator function
- g. Present to City Council alternate modes for partnership's between the City and both the Chamber of Commerce and the Morro Bay Tourism Bureau
- h. Continue momentum on various projects, such as the Maritime Museum, Marine Research Center/Aquarium, Coast Guard facility, and Tidelands Park fish cleaning station

**Goal #7      Improve City infrastructure, facilities and public spaces**

- a. Present to City Council a plan to link the Embarcadero with Old Town at Centennial Parkway
- b. Present to City Council a proposal on the Embarcadero Promenade, widening the west side of Embarcadero, as part of a *Waterfront Master Plan*
- c. Utilize the 2007 *Parking Management Plan* to improve parking management and density with enforcement, paid parking, and center aisle parking
- d. Complete a full American with Disabilities Act (ADA) compliance assessment on all City facilities, to include a plan to address issues and annual spending
- e. Complete a needs assessment for the Harbor and Police Departments
- f. Present to City Council best future use of City-owned properties
- g. Conduct a sidewalk assessment and plan for improvements, with a focus on parks, school zones and business districts
- h. Present to City Council a plan for California Streets and Highways requirements for street frontage maintenance (sidewalk responsibility)
- i. Present to City Council a distinctive design for new street name signs
- j. Update and/or replace 20% of *way-finding* signs

**Goal #8      Enhance quality of life**

- a. Development /implement a plan to operate a community use portion of the new high school pool
- b. Initiate outreach to appropriate healthcare providers to reestablish a health care center in the City
- c. Present to City Council a policy, regulating the use of City funds for non-City events
- d. Present to City Council for approval a list of City-sponsored events
- e. Implement annual community quality of life/customer service surveys
- f. Conduct a community needs assessment regarding resident and visitor recreational priorities
- g. Improve marketing of core recreation programs

**Goal #9      Improve water supply diversification**

- a. Conduct an assessment of long-term requirements for continued participation in State Water Project
- b. Complete permitting process of the City's existing desalination plant
- c. Present to City Council sewer and water rates to ensure fiscal sustainability
- d. Develop a reuse plan for WRF recycle water
- e. If appropriate, present to City Council a public/private partnership regional desalination facility
- f. Continue community education to improve water conservation
- g. Evaluate groundwater improvement options

## **Goal #10 Improve City operations**

- a. Provide opportunities for robust public involvement and input to major decisions
- b. Present to City Council a *Vision, Values and Mission Statement*
- c. Present to City Council a City strategic planning framework
- d. Fundamentally retool Information Technology operations in the City to include an IT Master Plan
- e. Improve public information and public outreach, ensuring less technically-oriented residents have access
- f. Present to City Council a proposal for contracted automated water meter reading and billing
- g. Develop and implement employee customer service standards to include an employee recognition system
- h. Research and apply for all possible grants

### **Goals accomplished by department FY 2014/15 and 2015/16:**

*Administrative Services* – 5a, b, d & e  
*Community Development* – 3a, b & d; 4d; 10h  
*Economic Development* – 6a, b, g & h; 10e  
*Fire* – 4a, b & f; 9b  
*Harbor* – 6e & h; 7c  
*Police* – 4f & h; 7e  
*Public Works* – 1a, b, c & d; 2a; 7b, c & d; 9f  
*Recreation* – 8d, e, & g

### **Projects completed:**

Morro Bay is an active and vibrant community, with a municipal government that is proactive and prepared to respond to changing community needs. Even with a small staff, the City has accomplished many projects in FY 2015/16. The following are the most significant accomplishments in FY 2015/16:

**Morro Creek Bridge and Bike Path:** expenditures for this project mostly occurred in the FY 2014/15, but the grand opening was held on July 4, 2015. This project provides bike, pedestrian and emergency access from the Embarcadero to the other bike paths plus north Morro Bay business and residential district.

**Repurchase of 781 Market Street property and adjacent parking lot.** On December 31, 2015, the City reacquired the above property through a bankruptcy. Currently at the site is an Italian restaurant, DiStasio's on the Bay. The City negotiated a three-year lease, set to terminate no later than December 31, 2018.

**Pickleball Court:** In April 2015, the City entered into a Management Agreement with the Morro Bay Senior Citizens, Inc., for the conversion of the Del Mar Park Hockey Rink into permanent Pickleball Courts, and designates routine maintenance responsibilities to the Seniors and long-term maintenance to the City. The Agreement expires on June 30, 2019, with a three-year extension by mutual agreement. The Seniors provided a \$30,000 donation for the this project that was completed in FY 2015/16 at a cost of \$40,000.

**Underground Storage Tank removal:** The City spent \$65,000 to remove its underground fuel tanks at its corporation yard, due to the lack of cost savings by providing fuel for City vehicles. In 2015, the City entered into a contract with the State of California's Voyager Card Program to purchase gasoline for its vehicles. This program provides participants with a reduced price per gallon by eliminating the federal fees. To provide emergency services with fuel in case of a situation where local fuel stations are inoperable, the City installed an above-ground fuel tank at Fire Station #1, at a cost of \$6,000 for the tank, hose and diesel fuel.

**General Plan Update.** Efforts have begun on this process, via a contract with Michael Baker and Associates. The City spent \$341,000 on the contract: \$185,000 was from a federal grant, and the remaining \$156,000 was from a building permit fee for this specific purpose.

### **Awards and Acknowledgements**

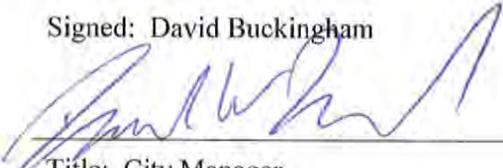

The 2015/16 fiscal year marks the first year the City has prepared a Comprehensive Annual Financial Report. This report will be submitted in future years to the Government Finance Officers Association (GFOA) Certificate of Achievement for Excellence in Financial Reporting program.

The preparation of this report would not have been possible without the skill, effort, and dedication of the entire staff of the Administrative Services Department. We wish to thank all City department directors for their assistance in providing the data necessary to prepare this report.

Credit also is due to the Mayor and the Council for their unfailing support for maintaining the highest standards of professionalism in the management of the City's finances.

Respectfully submitted,

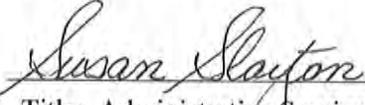

Signed: David Buckingham

# CITY OF MORRO BAY ORGANIZATIONAL CHART

For the 2015/16 Fiscal Year

*This page intentionally left blank*

## INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California

### **Report on Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Morro Bay, California (the "City"), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### ***Opinions***

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Emphasis of Matters**

### *Water Revenue Over State Water Payments*

As discussed in Note 10 to the basic financial statements, the City did not meet the Water Revenue over State Water Payments Ratio. For the year ended June 30, 2016, the City's ratio was at 116%, which is below the required minimum ratio of 125%. Management's plans regarding this matter is also described in the Note 10 to the basic financial statements. Our opinion is not modified with respect to this manner.

### *Financial Condition*

As of June 30, 2016, the City's Governmental Activities and the Harbor Enterprise Fund had unrestricted net position deficits of \$5,767,414 and \$608,390, respectively. Management's plans regarding those matters are also described in the Management's Discussion and Analysis. The basic financial statements do not include any adjustments that might result from the outcome of these uncertainties. Our opinion is not modified with respect to this matter.

## **Other Matters**

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, the Budgetary Comparison Schedule - General Fund, the Schedule of Proportionate Share of the Net Pension Liability and Related Ratios, the Schedule of City's Contributions, and the Schedules of Funding Progress-Other Postemployment Benefits Plan on pages 7 to 16 and 89 to 94, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The Introductory Section and Combining and Individual Nonmajor Fund Financial Statements and Schedule of Revenues, Expenditures, and Changes in Fund Balances – Budget and Actual are presented for purposes of additional analysis and are not a required part of the basic financial statements.

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California  
Page 3

*Supplementary Information*

The Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balances - Budget and Actual are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balances - Budget and Actual are fairly stated in all material respects in relation to the basic financial statements as a whole.

The Introductory Section has not been subject to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated December 30, 2016 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

*The PwC Group, LLP*

Walnut Creek, California  
December 30, 2016

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE  
AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN  
ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

***Independent Auditors' Report***

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Morro Bay, California (the "City"), as of and for the year ended June 30, 2016, and the related notes to the basic financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated December 30, 2016.

**Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting ("internal control") to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying schedule of findings and questioned costs, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies described in the separately issued AU-C Section 265–*Communicating Internal Control Related Matters Identified in an Audit* letter that we consider to be material weaknesses as items 2016-001.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies described in the separately issued AU-C Section 265–*Communicating Internal Control Related Matters Identified in an Audit* letter that we consider to be significant deficiencies as items 2016-002, 2016-003, and 2016-004.

### **Compliance and Other Matters**

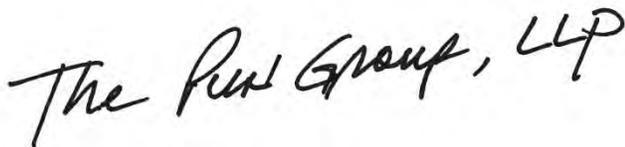

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in separately issued AU-C Section 265–*Communicating Internal Control Related Matters Identified in an Audit* letter as item 2016-004.

### **City's Responses to Finding**

The City's response to the finding identified in our audit is described in the separately issued AU-C Section 265, *Communicating Internal Control Related Matters Identified in an Audit Letter*. The City's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

## Management's Discussion and Analysis

As management of the City of Morro Bay, we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City, for the fiscal year ended June 30, 2016. It should be read in conjunction with the accompanying basic financial statements. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

### Financial Highlights

In the 2014/15 fiscal year, the City implemented the two new statements from the Governmental Accounting Standards Board (GASB), related to pension activities:

- Statement No. 68, "*Accounting and Financial Reporting for Pensions - an amendment of GASB Statement No. 27,*" and
- Statement No. 71, "*Pension Transition for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No. 68.*"

GASB Statement No. 68 establishes standards of accounting and financial reporting, but not funding or budgetary standards, for the City's defined benefit pension plans. This Statement replaces the requirements of prior GASB statements, impacting accounting and disclosure of pensions.

The significant impact to the City of implementing GASB Statement No. 68 is the reporting of the City's unfunded pension liability on the full accrual basis of accounting in the government-wide financial statements and the proprietary fund financial statements. There are also new note disclosure requirements and supplementary schedules required by the Statement.

The measurement date for the 2015/16 pension liabilities is as of June 30, 2015. This date reflects a one-year lag in the release of actuaries from CalPERS and was used so that these financial statements could be issued in a timely manner. Activities, such as contributions made by the City, occurring during the 2015/16 fiscal year, are reported as deferred outflows of resources, in accordance with Statement No. 71. The City reflected these pension standards in the 2014/15 and 2015/16 fiscal years.

The following outlines financial highlights for the year:

- At June 30, 2016, the City's net position increased \$1.9 million due to continued economy recovery, most notably tourism and transient occupancy taxes.
- Total city-wide current assets increased by approximately \$1.2 million, or 5.1%. In governmental activities, cash increased by \$1.4 million, notes receivable decreased by \$1.2 million, land held for resale increased by \$1.4 million, and other items decreased by \$636K. In business-type activities, cash increased by \$1.3 million, receivables increased by \$114K, and other items decreased by \$938K.
- Total city-wide liabilities, excluding aggregate net pension liabilities, decreased \$467K. Current liabilities decreased by \$184K, and long-term liabilities decreased by \$297K.
- The City's governmental funds altogether reported combined ending fund balances of \$10.4 million, an increase of \$1.9 million. Of the 2016 amount, \$3.1 million, or 29%, is nonspendable, \$3.2 million, or 30.2%, is restricted, and \$80K, or 0.7%, is committed, with the remaining 40% unassigned.
- The City's General fund balance increased by \$1.0 million. The fund balance includes nonspendable (\$2.9 million) and committed (\$80K) funds. A total of \$3.6 million is held in reserve, per the City's policy of retaining 27.5% of General Fund three-year average of actual revenues, and Resolution No. 33-15, which established target balances for Fiscal Years 2014/15 – 2021/22 (2015/16 = \$3.6 million).

## **Overview of the Financial Statements**

This discussion and analysis are intended to serve as an introduction to the City of Morro Bay's basic financial statements, which consists of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains required supplementary information and other supplementary information in addition to the basic financial statements.

### **Government-wide financial statements**

The *government-wide financial statements* are designed to provide readers with a broad overview of the City of Morro Bay's finances, in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the City's assets, deferred outflows of resources, liabilities, and deferred inflow of resources, with the difference reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of the City's overall financial health.

The *Statement of Activities* presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., earned, but unused, vacation leave).

Both of the government-wide financial statements distinguish functions of the City of Morro Bay that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City include administration, community promotion, finance, fire, housing, police, public services, and parks and recreation. The business-type activities of the City include the water, sewer, harbor, and local transportation operations.

The government-wide financial statements can be found on pages 20-23 of this report.

### **Fund financial statements**

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Morro Bay, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. City funds are divided into three categories: governmental, proprietary, and fiduciary.

#### ***Governmental funds***

*Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City of Morro Bay maintains eighteen individual governmental funds. Information is presented separately in the governmental fund balance sheet, and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, Community Development Grants Funds, and Capital Improvement Capital Projects Fund, all of which are considered major funds of the government. Data from the other governmental funds are combined into a single, aggregated presentation. Fund data for each of these non-major governmental funds is provided in the form of *combining statements* elsewhere in this report.

The City adopts an annual appropriated budget for all governmental funds. Required Supplementary Information - Budgetary Statements for the General Fund have been provided to demonstrate compliance with its budget.

The basic governmental fund financial statements can be found on pages 29-32 of this report.

### ***Proprietary funds***

The City of Morro Bay maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for the Water, Sewer, Harbor, and LTF operations. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions. Morro Bay uses internal service funds to account for the various types of insurance coverage for the City, and to manage the City's information technology needs. Because these services predominantly benefit governmental rather than business-type functions, they have been included within *governmental activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Water, Sewer and Harbor operations, all of which are considered to be major funds of the City. The remaining proprietary fund (LTF) is combined into a single, aggregated presentation in the proprietary fund financial statements.

The basic proprietary fund financial statements can be found on pages 34-41 of this report.

### ***Fiduciary funds***

Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are *not* available to support the City of Morro Bay's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The basic fiduciary fund financial statement can be found on pages 45-46 of this report.

### **Notes to the financial statements**

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 51-86 of this report.

### **Required supplementary information**

In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* including Budgetary Comparison Schedule – General Fund and Community Development Grant Special Revenue Fund, Schedule of the City's Proportionate Share of the Net Pension Liabilities and Related Ratios, Schedule of the City's Contributions, and Schedule of Funding Progress – Other Postemployment Benefits Plan. Required supplementary information can be found on pages 89 - 94 of this report.

## Supplementary information

The combining and individual statements, referred to earlier in connection with the nonmajor governmental funds, are presented immediately following the required supplementary information on pensions. Combining and individual fund statements and schedules can be found on pages 98 - 120 of this report.

### Government-wide Financial Analysis

The City's net position for governmental activities increased from \$117.2 million to \$117.9 million (approximately 0.6%) and business-type activities increased from \$24.3 million to \$25.5 million (approximately 4.9%).

Changes between fiscal years are shown in Table 1, and explained in detail below:

Total assets and deferred outflows increased approximately \$1.8 million:

- Governmental:
  - Cash and investments increased \$1.4 million
  - Receivables decreased \$1.8 million
  - Prepaid items and inventories decreased \$72K
  - Land held for resale increased \$1.4 million
  - Capital assets decreased \$1.4 million
  - Deferred outflows of resources increased \$705K
- Business-type:
  - Cash and investments increased \$1.1 million
  - Receivables increased \$91K
  - Investments in Joint Powers Agreement increased \$9K
  - Prepaid items and inventories decreased \$878K
  - Capital assets increased \$856K
  - Deferred outflows of resources increased \$209K

Total liabilities and deferred inflows decreased approximately \$136K:

- Governmental:
  - Accounts payable decreased \$800K
  - Payroll payable increased \$128K
  - Deposits and unearned revenue increased \$317K
  - Long-term liabilities decreased \$359K
  - Aggregate net pension liabilities increased \$1.9 million
  - Deferred inflows of resources decreased \$1.8 million
- Business-type:
  - Accounts payable increased \$348K
  - Payroll payable increased \$26K
  - Deposits and unearned revenues decreased \$106K
  - Long-term liabilities decreased \$66K
  - Aggregate net pension liabilities increased \$820K
  - Deferred inflows of resources decreased \$681K

| Total net position                                 | \$ 117,930              | \$ 117,159 | \$ 25,472                | \$ 24,346             | \$ 143,402 | \$ 141,505 |

Activities in 2015/16, which changed the City's net position, are described in the Table 2, with comparison totals for 2014/15 activities

### Governmental activities

Governmental activities increased the City of Morro Bay's net position by \$771K. Increased transient occupancy tax due to strong tourism (which also increased sales taxes), the unanticipated receipt of cash from old state-mandated cost claims and a 2010 grant closeout for the construction of the City Fire Department's Apparatus Bay, cash received in December 2015 from the San Luis Obispo Council of Governments for the Morro Creek Bridge project and reduced expenses comprise the greatest reasons for change.

The largest governmental capital projects were the General Plan Update (\$340K), which is funded by building fees, improvements to the parking lot located on the Embarcadero (\$83K), the completion of the Morro Creek Bridge project (\$66K), and the removal of the City's underground fuel storage tanks (\$65K).

**TABLE 2: CITY OF MORRO BAY CHANGES IN NET POSITION**

|                                                       | Governmental<br>activites |                   | Business-type<br>activites |                  | Total             |                   |
|-------------------------------------------------------|---------------------------|-------------------|----------------------------|------------------|-------------------|-------------------|

**Business-type activities.**

Business-type activities increased the City of Morro Bay's net position by \$1.1 million. The water and sewer rate increase, adopted by the City Council in May 2015, went into effect with July 2015 usage (September 2015 billing), plus lower expenses, accounts for this increase. Rates will continue to increase for the next five years to ensure compliance with bond coverage ratios required for the City's participation in the state water project. This is discussed in further detail in Note 10 on page 84.

The most significant capital expense is present in the Sewer Fund. Since 1953, the City and the Cayucos Sanitary District have been partners in a jointly-owned wastewater treatment plant. The treatment plant is operated under a Joint Powers Agreement (JPA). In 2003, the City and the Cayucos Sanitary District began work efforts to replace the existing Facility, agreeing to share in the costs of studying, planning and designing a new facility to be constructed at the existing site. Activities continued until January 2013, when the California Coastal Commission voted to deny the Coastal Development Permit for the Facility at its existing location. The entities attempted to work together to build a jointly-owned facility at a different site, but since April 2015, both entities have taken steps to build separate facilities serving each entity's own community.

The City has been actively exploring options to build a new water reclamation facility, which will produce water that may be reused for groundwater injection (recharge) and agricultural or other irrigation. The City has reviewed three potential sites for locating the new facility, but has not made a final site selection at this time.

There were no major capital expenses in the Water or Harbor Funds.

### **Financial Analysis of the Government's Funds**

As noted earlier, the City of Morro Bay uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

**Governmental funds.** The focus of the City's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing Morro Bay's financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2016, the City of Morro Bay's governmental funds reported combined ending fund balances of \$10.4 million, an increase of \$1.9 million in comparison to the prior year. The majority of this total amount (\$6.3 million) constitutes nonspendable (\$3.1 million), restricted (\$3.2 million) and committed (\$80K). The amount available for spending at the City's discretion (\$4.1 million) is 40% of the combined fund balances.

The General Fund is the chief operating fund of the City of Morro Bay. At the end of June 30, 2016, total fund balance of the general fund was \$7.1 million, the majority of which is unassigned (\$4.1 million). As a measure of the general fund's liquidity, it may be useful to compare unreserved fund balance to total fund expenditures. Unreserved fund balance represents 34% of total general fund expenditures.

The General Fund's fund balance increased by \$1.0 million during the current fiscal year. City management has embraced a change in philosophy, leaning towards leveling the playing field for residents and businesses by ensuring those who utilize services pay for those services. Fees for services, with the exception of tiered subsidies for youth recreation programs, have been increased to collect more fully the cost of services provided. Additionally, the City engaged a professional firm to perform an organizational assessment and financial stability model. Some of these recommendations and tools were implemented in fiscal year 2015/16, and the remaining are subject to review for implementation in fiscal year 2016/17. Additionally, the City collected \$280K in additional transient occupancy taxes and \$200K in sales taxes from significantly increased tourism.

**Proprietary funds.** The City of Morro Bay's proprietary funds provide the same type of information in the government-wide financial statements, but in more detail. At June 30, 2016, unrestricted net position in the Water, Sewer and Harbor Operating Funds amounted to \$2.9 million, \$3.6 million and \$(608K), respectively. Net position changes in the three funds are decrease of \$275K (Water), increase of \$1.6 million (Sewer), and decrease of 133K (Harbor). Factors concerning those funds have already been addressed in the discussion of the City's business-type activities.

**General Fund Budgetary Highlights**

Differences between the original budget and the final amended budget (\$530K in expenditures and \$1 million in revenues) are briefly summarized below:

**TABLE 3: CITY OF MORRO BAY GENERAL FUND

**Capital Asset and Debt Administration**

**Capital assets.**

The City of Morro Bay’s net investment in capital assets for its governmental and business-type activities as of June 30, 2016, amounts to \$142.0 million. This investment in capital assets includes land, distribution and collection systems, buildings and equipment, improvements, works of art and historical collections, and current year infrastructure.

The major capital asset event that occurred during the current fiscal year was the increase to the Sewer Operating Fund’s construction in progress for costs incurred for planning related to the City-owned water reclamation facility.

Additional information on the City's capital assets can be found in Note 4 on pages 65-66.

**Long-term debt.** At the end of the current fiscal year, the City of Morro Bay had total debt outstanding of \$3.8 million. Of this amount, \$2.1 million comprises debt secured solely by specified revenue sources (e.g., notes payable and certificates of participation). The City maintains a double A ("AA") rating from Standard & Poor's.

Additional information on the City's long-term liabilities can be found in Note 5 on pages 67 - 68 of this report.

## **Economic Factors and Next Year's Budget and Rates**

- Tourism in Morro Bay continues to flourish, as demonstrated by the significant increases in Transient Occupancy Tax (TOT). Since the 2011/12 fiscal year, TOT has increased measurably as shown below:
  - 2011/12 – 7.37%
  - 2012/13 – 10.25%
  - 2013/14 – 13.07%
  - 2014/15 – 14.30%
  - 2015/16 - 8.58%

Our Embarcadero and waterfront are bustling with activity and the normal *off-season* period, from January through April, is seeing some strength. For the fiscal year 2016/17, TOT growth is projected in our budget at 5%, and to date we are beating that estimate.

- Sales tax revenue experienced an increase of 9% in 2015/16, and is projected to realize a 17% increase in 2016/17. It is important to note, however, that a significant part of the projected increase is due to the complete unwind of the state imposed “triple flip” and sales tax restoration. We anticipate real sales tax revenue and associated “triple flip” will increase at a similar rate as last year.
- Like many cities in the County, Morro Bay is now managing all tourism efforts in house, and we expect revenue from tourism to continue to increase in the near term. While occupancy this year is somewhat flat, average daily rate is up, meaning lodging establishments are selling around the same number of rooms, but at increased revenue levels resulting in the TOT increases noted above.
- In the 2015/16 fiscal year, the City was successful in negotiating one year contracts with its employees that contained a 2.25% cost of living increase and an additional 1.75% equity increase for Police. Management contracted for a salary survey in 2016, and the City Council is considering a compensation policy in 2017.
- The City continues to encourage appropriate revitalization efforts that may have moderate positive effect on City revenues in the years ahead. This likely includes new construction on two Tidelands Trust lease sites and the opening of a new Aquarium on the waterfront, all in 2018-2020.

These factors were considered in preparing the City's budget for the 2016/17 fiscal year.

### **Requests for Information**

This financial report is designed to provide a general overview of the City of Morro Bay's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Department, City of Morro Bay, 595 Harbor Street, Morro Bay, CA 93442.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Balance Sheet to the**  
**Government-wide Statement of Net Position**  
**June 30, 2016**

---

**Total Fund Balances - Total Governmental Funds** \$ 10,421,916

Amounts reported for governmental activities in the Statement of Net Position were reported differently because:

Capital assets used in governmental activities were not current financial resources. Therefore, they were not reported in the Governmental Funds Balance Sheet.

|                  |                   |             |
|------------------|-------------------|-------------|
| Nondepreciable   | \$ 95,505,138     |             |
| Depreciable, net | <u>26,430,564</u> | 121,935,702 |

Internal Service Funds were used by management to charge the costs of certain activities, such as insurance and equipment replacement to individual funds. The assets and liabilities of the Internal Service Funds were included in the governmental activities in the Government-Wide Statement of Net Position.

1,476,480

Long-term liabilities are not due and payable in the current period and accordingly are not reported as fund liabilities. All liabilities, both current and long-term, are reported in the Statement of Net Position:

|                               |                  |             |
|-------------------------------|------------------|-------------|
| Certificates payable          | \$ (1,386,000)   |             |
| Compensated absences          | (279,654)        |             |
| Other postemployment benefits | (347,607)        |             |
| Pension related debt          | <u>(974,151)</u> | (2,987,412) |

Deferred amounts relates to pension net available for current expenditures and are not reported in the governmental fund financial statements:

|                                |             |
|--------------------------------|-------------|
| Deferred outflows of resources | 2,351,503   |
| Deferred inflows of resources  | (1,563,012) |

Aggregate net pension liability is not due and payable in the current period and therefore is not reported in the governmental funds.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Statement of Revenues, Expenditures, and Changes**  
**in Fund Balances to the Government-Wide Statement of Activities**  
**For the Year Ended June 30, 2016**

---

**Net Change in Fund Balances - Total Governmental Funds** \$ 1,912,833

Governmental activities in the Statement of Activities were reported differently because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental funds.

|                                              |                    |
|----------------------------------------------|--------------------|
| Capital outlay, net of internal service fund | 8,666              |
| Depreciation                                 | (1,317,149)        |
| Net effect on disposal of capital assets     | <u>(43,314)</u>    |
| Total                                        | <u>(1,351,797)</u> |

The issuance of long-term liabilities provides current financial resources to governmental funds, while the repayment of the principal of long-term liabilities consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position.

|                                         |                |
|-----------------------------------------|----------------|
| Change in compensated absences          | 10,496         |
| Pension expense                         | 512,765        |
| Change in pension related liabilities   | 282,083        |
| Change in other postemployment benefits | (141,017)      |
| Change in claims payable                | 229,549        |
| Payment of certificates payable         | <u>30,000</u>  |
| Total                                   | <u>923,876</u> |

Internal Service Funds are used by management to charge the costs of certain activities, such as insurance and equipment replacement, to individual funds. The net revenue of the Internal Service Funds is reported in governmental activities.

**Change in Net Position of Governmental Activities** \$ 771,037

**City of Morro Bay**  
**Notes to the Basic Financial Statements**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies**

The basic financial statements of the City of Morro Bay, California, (the “City”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) as applied to governmental agencies. The Governmental Accounting Standards Board (“GASB”) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the City’s significant policies:

**A. Financial Reporting Entity**

The City of Morro Bay is a general law city incorporated in 1964. The City operates under a Council-Manager form of government. The mayor and four council members are elected at large. A full range of services is provided, including general government, parks and recreation, police and fire and emergency services, streets and storm drain maintenance, water and sanitary, and transportation. The City also maintains the Morro Bay harbor and manages state-granted tidelands and harbor fee lands within the City limits.

The basic financial statements present the City and its component units, entities for which the City is considered to be financially accountable. The City is considered to be financially accountable for an organization if the City appoints a voting majority of that organization’s governing body and either the City is able to impose its will on that organization or there is a potential for the organization to provide financial benefits to or impose specific financial burdens on the City. The City is also considered to be financially accountable for an organization if that organization is fiscally dependent (i.e., it is unable to adopt its budget, levy taxes, set rates or charges, or issue bonded debt without approval from the City). In certain cases, other organizations are included as component units if the nature and significance of their relationship with the City are such that their exclusion would cause the City’s financial statement to be misleading or incomplete. Blended component units, although legally separate entities, are in substance, part of the City’s operations and data from these units are combined with data of the City. Management determined there are no entities that should be reported discretely presented component units based on the criteria above.

There are no component units for the City that meet the criteria for blended presentation.

The City participates in the California Joint Powers Insurance Authority (the “CJPIA”) for its general liability, workers' compensation, property, vehicle and crime insurance. This organization is financed through premium charges to each member. The CJPIA does not meet the aforementioned reporting criteria, and is therefore, not included in the accompanying financial statements.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus***

The accounts of the City are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for by providing a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. City resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

In accordance with GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*, the statement of net position reports separate sections for Deferred Outflows of Resources and Deferred Inflows of Resources, when applicable.

**Deferred Outflows of Resources** represent outflows of resources (consumption of net position) that apply to future periods and that, therefore, will not be recognized as an expense until that time.

**Deferred Inflows of Resources** represent inflows of resources (acquisition of net position) that apply to future periods and that, therefore, are not recognized as revenue until that time.

**Government-Wide Financial Statements**

The government-wide financial statements are reported using the “*economic resources*” measurement focus and the accrual basis of accounting.

Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include property and sales taxes, grants, entitlements and donations. On an accrual basis, revenues from property taxes are recognized in the fiscal year for which the taxes are levied. Revenues from sales taxes are recognized when the underlying transactions take place. Revenues from grants, entitlements and donations are recognized in the fiscal year in which all eligible requirements have been satisfied.

The government-wide financial statements consist of the statement of net position and the statement of activities that report information on all of the non-fiduciary activities of the primary government and its component unit. Eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the governmental and business-type activities of the City. Governmental activities generally are financed through taxes, intergovernmental revenues and other non-exchange revenues. Business-type activities generally rely, to a significant extent, on fees and charges for services.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Government-Wide Financial Statements (Continued)*

The statement of activities presents a comparison between direct expenses and program revenues for each function of the City's activities. Direct expenses are (1) expenses that are specifically associated with a program or function, and (2) allocated indirect expenses. Program revenues include (1) fees, fines and charges paid by the recipients of goods or services offered by the programs, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented instead as general revenues.

When both restricted and unrestricted net position are available, restricted resources are used only after the unrestricted resources are depleted.

*Fund Financial Statements*

The fund financial statements report detailed information about the City's funds. Separate statements are provided for each fund category- governmental, proprietary and fiduciary- even though the latter are excluded from the government-wide financial statements. The emphasis of the Governmental and Proprietary Fund financial statements is on major individual funds. Each major fund is presented in a single column. All remaining governmental funds are separately aggregated and reported as nonmajor funds.

Governmental Fund Financial Statements include a Balance Sheet and a Statement of Revenues, Expenditures and Changes in Fund Balances for all major governmental funds and non-major funds aggregated. An accompanying schedule is presented to reconcile and explain the differences in Net Position as presented in these statements to the Net Position presented in the Government-Wide Financial Statements. The City has presented all major funds that met the applicable criteria.

All governmental funds are accounted for on a spending or "*current financial resources*" measurement focus and the modified accrual basis of accounting. Accordingly, only current assets and current liabilities are included on the Balance Sheet. The Statement of Revenues, Expenditures and Changes in Fund Balances presents increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the current period.

Revenues are recognized as soon as they are both "measurable" and "available". Revenues are considered to be available when they are collectible within the current period as soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. The primary revenue sources, which have been treated as susceptible to accrual by the City, are property taxes, sales tax, intergovernmental revenues and other taxes. Expenditures are recorded in the accounting period in which the related fund liability is incurred.

**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Fund Financial Statements (Continued)*

The Reconciliation of the Fund Financial Statements to the Government-Wide Financial Statements is provided to explain the differences created by the integrated approach of GASB Statement No. 34.

The City reports the following major governmental funds:

General Fund - The City's primary operating fund. The General Fund is used to account for all revenues and expenditures necessary to carry out the basic governmental activities of the City that are not accounted for through other funds. For the City, the General Fund includes such activities as public protection, public ways and facilities, health and sanitation, public assistance, education and recreational services.

Community Development Grants Special Revenue Fund - Used to account for financial resources to be used for offering low or no interest-bearing loans to income-qualified homeowners for the acquisition or rehabilitation of owner-occupied site-built or manufactured homes.

Capital Improvement Capital Projects Fund - Used to account for financial resources to be solely used for the construction of capital assets.

Proprietary Fund Financial Statements include a Statement of Net Position, a Statement of Revenues, Expenses and Changes in Fund Net Position, and a Statement of Cash Flows for each major Proprietary Fund.

Proprietary funds are accounted for using the "*economic resources*" measurement focus and the accrual basis of accounting. Accordingly, all assets and liabilities (whether current or noncurrent) are included on the Statement of Net Position. The Statement of Revenues, Expenses and Changes in Fund Net Position presents increases (revenues) and decreases (expenses) in total Net Position. Under the accrual basis of accounting, revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred. In these funds, receivables have been recorded as revenue and provisions have been made for uncollectible amounts.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities.

The City reports the following major proprietary funds:

Water Enterprise Fund - Accounts for revenues received primarily from water service charges, which are expended for maintenance, operations and improvements to the water system.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Fund Financial Statements (Continued)*

The City reports the following major proprietary funds (Continued):

Sewer Enterprise Fund - Accounts for revenues received primarily from sewer service charges, which are expended for maintenance, operations and improvements to the sanitary sewer system.

Harbor Enterprise Fund - Accounts for revenues received from harbor leases, rentals, moorings and other sources, which are expended for maintenance, operation, patrolling, and improvements of the harbor.

A separate column representing internal service funds is also presented in these statements. However, internal service balances and activities have been combined with the governmental activities in the Government-Wide Financial Statements.

Internal Service Funds - Accounts for revenues received primarily from charges to City departments on an estimated basis for insurance coverage, and which are expended for insurance purchase, valid claims and related costs. These funds were opened in 1980-81 to account for workers unemployment compensation and fire insurance costs. They now account for all insurance coverage including health, dental, general liability, and vehicle insurance.

Fiduciary fund financial statements include a Statement of Fiduciary Net Position and a Statement of Changes in Fiduciary Net Position. The City's fiduciary funds represent agency fund and Other Postemployment Benefits (OPEB) trust fund. Both agency fund and the OPEB trust fund are accounted for on the full accrual basis of accounting.

The City reports the following fiduciary funds:

Other Postemployment Benefits (OPEB) Trust Fund – Used to account for assets held by the City as a trustee for pre-funding of OPEB liability.

Agency Fund - Used to account for assets held by the City as an agent for individuals, private organizations, other governments, and/or other funds. Agency Funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

***C. Cash and Investments***

Investments are reported in the accompanying balance sheet at fair value, except for certain certificates of deposit and investment contracts that are reported at cost because they are not transferable and they have terms that are not affected by changes in market interest rates.

Changes in fair value that occur during a fiscal year are recognized as investment income reported for that fiscal year. Investment income includes interest earnings, changes in fair value, and any gains or losses realized upon the liquidation, maturity, or sale of investments.

The City pools cash and investments of all funds, except for assets held by fiscal agents. Each fund's share in this pool is displayed in the accompanying financial statements as cash and investments. Investment income earned from pooled investments is allocated to those various funds based on each fund's average cash and investment balance.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**C. Cash and Investments (Continued)**

For purposes of the statement of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash or were purchased so near their maturity that they present insignificant risk of change in value because of changes in interest rates. Cash and cash equivalents in the accompanying statements include the proprietary funds' share of the cash and investment pool of the City of Hemet.

Certain disclosure requirements, if applicable, for Deposits and Investment Risks in the following areas:

- Interest Rate Risk
- Credit Risk
  - Overall
  - Custodial Credit Risk
  - Concentration of Credit Risk
- Foreign Currency Risk

In addition, other disclosures are specified including use of certain methods to present deposits and investments, highly sensitive investments, credit quality at year-end and other disclosures.

**D. Fair Value Measurement**

In accordance with GASB Statement No. 72, *Fair Value Measurement and Applications*, this statement defines fair value, establishes a framework for measuring fair value and establishes disclosures about fair value measurement. Investments, unless otherwise specified, recorded at fair value in the financial statements, are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Levels of inputs are as follows:

The three levels of the fair value measurement hierarchy are described below:

- Level 1 - Inputs are unadjusted, quoted prices for identical assets and liabilities in active markets at the measurement date.
- Level 2 – Inputs, other than quoted prices included in Level 1, that are observable for the assets and liabilities through corroboration with market data at the measurement date.
- Level 3 – Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the assets and liabilities at the measurement date.

**E. Receivable and Allowance for Doubtful Accounts**

Customer accounts receivable consist of amounts owed by private individuals and organizations for services rendered in the regular course of business operations. Receivable are shown net of allowances for doubtful accounts. Uncollectable accounts are based on prior experience and management's assessment of the collectability of existing accounts.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***F. Prepaid Items***

Certain payments to vendors applicable to future accounting periods are recorded as prepaid items.

***G. Inventories***

The City maintains an inventory account for fuel. Fuel is valued at June 30 based on the amount of fuel in the storage tanks and the most recent invoices' purchase price. Inventories are valued using first in first out method.

***H. Land Held for Resale***

Land held for resale is carried at the lower of cost or estimated net realizable value.

***I. Property Tax Revenue***

Property taxes attach as an enforceable lien at March 1. Taxes are levied on July 1 and payable in two installments, December 10 and April 10. All general property taxes are then allocated by the County Auditor's Office to the various taxing entities per the legislation implementing Proposition 13. The method of allocation used by the County is subject to review by the State of California. City property tax revenues are recognized when levied and received within 60 days of the year end.

***J. Capital Assets***

Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available. Contributed fixed assets are valued at their estimated fair market value on the date contributed. The City defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Capital assets used in operations are depreciated or amortized (assets under capital leases) using the straight-line method over the lesser of the capital lease period or their estimated useful lives in the government-wide statements and proprietary funds. The estimated useful lives are as follows:

|                           |             |
|---------------------------|-------------|
| Structures & improvements | 15-30 years |
| Equipment                 | 4-10 years  |
| Infrastructure            | 25-75 years |

***K. Interfund Transactions***

Interfund transactions are reflected as loans, services provided, reimbursements or transfers. Loans are reported as receivables and payables, as appropriate, are subject to elimination upon consolidation, and are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds (i.e., the noncurrent portion of interfund loans). Any residual balances outstanding between the governmental activities and the business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not available financial resources. There were no advances between funds during the year.

Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures/expenses. Reimbursements occur when one fund incurs a cost, charges the appropriate benefiting fund and reduces its related cost as a reimbursement. All other interfund transactions are treated as transfers. Transfers between governmental or proprietary funds are netted as part of the reconciliation to the government-wide presentation.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**L. Claims Payable**

The City records a liability to reflect an actuarial estimate of ultimate uninsured losses for both general liability claims (including property damage claims) and workers' compensation claims. The estimated liability for workers' compensation claims and general liability claims includes "incurred but not reported" ("IBNR") claims. There is no fixed payment schedule to pay these liabilities.

**M. Compensated Absences Payable**

City employees have vested interest in varying levels of vacation, sick leave and compensatory time based on their length of employment. It is the policy of the City to pay all accumulated vacation pay and all or a portion of sick pay when an employee retires or terminates. The long-term amount is included as a liability in the governmental activities of the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. All of the liability for compensated absences applicable to proprietary funds is reported in those funds.

**N. Pension**

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the plans and additions to/deductions from the plans' fiduciary net position have been determined on the same basis as they are reported by the plans (Note 7). For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value.

The following timeframes are used for pension reporting:

CalPERS

|                    |                               |
|--------------------|-------------------------------|
| Valuation Date     | June 30, 2014                 |
| Measurement Date   | June 30, 2015                 |
| Measurement Period | July 1, 2014 to June 30, 2015 |

Gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time. The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense. The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized straight-line over 5 years. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive, and retired) as of the beginning of the measurement period.

**O. Unearned Revenue**

In the government-wide financial statements, unearned revenue is reported for transactions for which revenue has not yet been earned. Typical transactions recorded as unearned revenues in the government-wide financial statements are cell phone site license lease payments received in advance, prepaid charges for services and facility rentals paid in advance.

In the fund financial statements, unearned revenue is recorded when transactions have not yet met the revenue recognition criteria. The City records unearned revenue for transactions for which revenues have not been earned. Typical transactions for which unearned revenue is recorded are lease payments, quarterly encroachment fees and advance registration for recreation classes which were not yet earned.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***P. Net Position***

In the government-wide financial statements and proprietary fund financial statements, net position is classified as follows:

*Net Investment in Capital Assets* - This component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of debt that are attributable to the acquisition, construction, or improvement of those assets.

*Restricted* - This component of net position consists of restricted assets and deferred outflows of resources reduced by liabilities and deferred inflows of resources related to those assets.

*Unrestricted* - This component of net position is the amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

***Q. Fund Balances***

In the governmental fund financial statements, fund balances are classified as follows:

*Nonspendable* – Nonspendable fund balances include amounts that cannot be spent because they are not in a spendable form, such as inventory, prepaid items, land held for resale and long-term receivable or because resources legally or contractually must remain intact.

*Restricted* – Restricted fund balances are the portion of fund balance that have externally enforceable limitations on their usage through legislation or limitations imposed by creditors, grantor, laws and regulations of other governments or enabling legislation.

*Committed* – Committed fund balances are self-imposed limitations by the highest level of decision-making authority, namely the City Council, prior to the end of the reporting period. City Council adoption of a resolution is required to commit resources or to rescind the commitment.

*Assigned* – Assigned fund balances are limitations imposed by management based on the intended use of the funds. Modifications or rescissions of the constraints can be removed by the same type of action that limited the use of the funds. Assignment of resources can be done by the highest level of decision making or by a committee or official designated for that purpose. The City Council has authorized the Finance Director for that purpose.

*Unassigned* – Unassigned fund balances represent the residual net resources in excess of the other classifications. The general fund is the only fund that reports a positive unassigned fund balance amount. In other governmental funds, it is not appropriate to report a positive unassigned fund balance amount. However, in governmental fund other than general fund, if expenditures incurred for specific purposes exceed the amounts that are restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance in that fund.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**R. Use of Estimates**

The preparation of the basic financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

**S. Accounting Changes**

GASB has issued Statement No. 72, *Fair Value Measurement and Application*. This Statement addresses accounting and financial reporting issues related to fair value measurements. This Statement provides guidance for determining a fair value measurement for financial reporting purposes and also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. This Statement became effective for periods beginning after June 15, 2015 and did not have any measurement impact on the City's investment portfolio, except for the additional disclosure regarding to measurement input as discussed in Note 2C of the City's financial statements for the year ended June 30, 2016.

GASB has issued Statement No. 73, *Accounting and Financial reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*. This Statement establishes requirements for defined benefit pensions that are not within the scope of Statement No. 68, Accounting and Financial Reporting for Pensions, as well as for the assets accumulated for purposes of providing those pensions. In addition, it establishes requirements for defined contribution pensions that are not within the scope of Statement 68. It also amends certain provisions of Statement No. 67, Financial Reporting for Pension Plans, and Statement 68 for pension plans and pensions that are within their respective scopes. This statement became effective for periods beginning after June 15, 2015 and did not have a significant impact on the City's financial statements for the year ended June 30, 2016.

GASB has issued Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*. This statement establishes standards relating to the hierarchy of generally accepted accounting principles (GAAP). The "GAAP hierarchy" consists of the sources of accounting principles used to prepare financial statements of state and local governmental entities in conformity with GAAP and the framework for selecting those principles. This Statement reduces the GAAP hierarchy to two categories of authoritative GAAP and addresses the use of authoritative and nonauthoritative literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. This statement became effective for periods beginning after June 15, 2015, and should be applied retroactively. This statement did not have a significant impact on the City's financial statements for the year ended June 30, 2016.

GASB has issued Statement No. 79, *Certain External Investment Pools and Pool Participants*. This statement establishes standards relating accounting and financial reporting for certain external investment pools and pool participants. This statement became effective for periods beginning after June 15, 2015, except for certain provisions on portfolio quality, custodial credit risk, and shadow pricing. Those provisions are effective for reporting periods beginning after December 15, 2015. This statement did not have a significant impact on the City's financial statements for the year ended June 30, 2016.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

**Note 2 – Cash and Investments**

At June 30, 2016, cash and investments are classified in the accompanying financial statements as follows:

|                      | Government-Wide<br>Statement of<br>Net Position |               |                |               |
|----------------------|-------------------------------------------------|---------------|----------------|---------------|
|                      | Governmental                                    | Business-type | Fiduciary Fund | Total         |
|                      | Activities                                      | Activities    |                |               |
| Cash and investments | \$ 7,553,824                                    | \$ 9,088,839  | \$ 2,101,265   | \$ 18,743,928 |

At June 30, 2016, cash and investments consisted of the following:

|                                                 |                      |
|-------------------------------------------------|----------------------|
| Cash:                                           |                      |
| Petty Cash                                      | \$ 1,950             |
| Deposits with financial institutions            | 8,590,510            |
| Total cash and cash equivalents                 | <u>8,592,460</u>     |
| Investments:                                    |                      |
| Local Agency Investment Fund                    | 5,145,628            |
| Mutual Funds                                    | 504,704              |
| Non-negotiable Certificates of Deposit          | 3,499,451            |
| U.S. Government Sponsored Enterprise Securities | 1,001,685            |

| Total cash and investments                      | <u>\$ 18,743,928</u> |

**A. Deposits**

The carrying amounts of the City's demand deposits were \$8,590,510 at June 30, 2016. Bank balances at that date were \$8,290,066, the total amount of which was collateralized or insured with accounts held by the pledging financial institutions in the City's name as discussed below.

The California Government Code requires California banks and savings and loan associations to secure the City's cash deposits by pledging securities as collateral. This Code states that collateral pledged in this manner shall have the effect of perfecting a security interest in such collateral superior to those of a general creditor. Thus, collateral for cash deposits is considered to be held in the City's name.

The market value of pledged securities must equal at least 110% of the City's cash deposits. California law also allows institutions to secure City deposits by pledging first trust deed mortgage notes having a value of 150% of the City's total cash deposits. The City may waive collateral requirements for cash deposits, which are fully insured up to \$250,000 by the Federal Deposit Insurance Corporation ("FDIC"). The City, however, has not waived the collateralization requirements.

The City follows the practice of pooling cash and investments of all funds, except for funds required to be held by fiscal agents under the provisions of bond indentures, if applicable. Interest income earned on pooled cash and investments is allocated on an accounting period basis to the various funds based on the period-end cash and investment balances, however, interest is not allocated to funds created to advance costs for utility undergrounding districts, reimbursable grant funds or internal service funds.

**For the Year Ended June 30, 2016**

**Note 2 – Cash and Investments (Continued)**

**B. Investments**

Under the provisions of the City’s investment policy, the City’s investments are limited to those authorized by the California Government Code, except as follows:

| Authorized Investment Type                            | Maximum Maturity | Maximum Percentage of Portfolio | Maximum Investment in one Issuer |
|-------------------------------------------------------|------------------|---------------------------------|----------------------------------|
| Securities Issued by U.S. Government, or its agencies | 5 years          | None                            | None                             |
| Local Agency Investment Fund (LAIF)                   | N/A              | None                            | None                             |
| Certificates of Deposit                               | 5 years          | None                            | \$250,000                        |
| Bankers Acceptances                                   | 180 days         | 40%                             | None                             |
| Mutual Funds and Money Market Mutual Funds            | 5 years          | None                            | None                             |
| Collateralized Deposit                                | N/A              | None                            | None                             |
| Passbook Savings Accounts                             | 5 years          | None                            | None                             |
| Repurchase Agreements                                 | 5 years          | 25%                             | None                             |

The City is a participant in LAIF, which is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California. The City’s investments with LAIF at June 30, 2016 included a portion of the pool funds invested in Structured Notes and Asset-Backed Securities, which included the following:

*Structured Notes:* debt securities (other than asset-backed securities) whose cash flow characteristics (coupon rate, redemption amount, or stated maturity) depend upon one or more indices and/or that have embedded forwards or options.

*Asset-Backed Securities:* generally mortgage-backed securities that entitle their purchasers to receive a share of the cash flows from a pool of assets such as principal and interest repayments from a pool of mortgages (for example, collateralized mortgage obligations), or credit card receivables.

As of June 30, 2016, the City had \$5,145,628 invested in LAIF, which had invested 2.81% of the pool investment funds in Structured Notes and Asset-Backed Securities.

**C. Fair Value Measurement**

At June 30, 2016, investments are reported at fair value. The following table presents the fair value measurement of investments on a recurring basis and the levels within GASB 72 fair value hierarchy in which the fair value measurements fall at June 30, 2016:

| Investment Type                                 | Level 1     | Level 2             | Level 3     | N/A               |
|-------------------------------------------------|-------------|---------------------|-------------|-------------------|
| Local Agency Investment Fund                    | \$ -        | \$ 5,145,628        | \$ -        | \$ -              |
| Mutual Funds                                    |             | -                   |             | 504,704           |
| Certificates of deposit                         | -           | 3,499,451           | -           | -                 |
| U.S. Government Sponsored Enterprise Securities | -           | 1,001,685           | -           | -                 |
| <b>Total</b>                                    | <b>\$ -</b> | <b>\$ 9,646,764</b> | <b>\$ -</b> | <b>\$ 504,704</b> |

**D. Risk Disclosures**

Interest Rate Risk - As a means of limiting its exposure to fair value losses arising from rising interest rates, the City's investment policy limits investments to a maximum maturity of five years.

At June 30, 2016, the City had the following investment maturities:

| Investment Type                                 | Fair value           | Investment Maturities (in Years) |                     |                     |             |             |
|-------------------------------------------------|----------------------|----------------------------------|---------------------|---------------------|-------------|-------------|
|                                                 |                      | Less than 1                      | 1 to 2              | 2 to 3              | 3 to 4      | 4 to 5      |
| Local Agency Investment Fund                    | \$ 5,145,628         | \$ 5,145,628                     | \$ -                | \$ -                | \$ -        | \$ -        |
| Mutual Funds                                    | 504,704              | 504,704                          | -                   | -                   | -           | -           |
| Certificates of deposit                         | 3,499,451            | 999,008                          | 1,000,000           | 1,500,443           | -           | -           |
| U.S. Government Sponsored Enterprise Securities | 1,001,685            | -                                | 1,001,685           | -                   | -           | -           |
| <b>Total</b>                                    | <b>\$ 10,151,468</b> | <b>\$ 6,649,340</b>              | <b>\$ 2,001,685</b> | <b>\$ 1,500,443</b> | <b>\$ -</b> | <b>\$ -</b> |

Credit Risk – State law limits investments in commercial paper and corporate bonds to the top two ratings issued by nationally recognized statistical rating organizations. It is the City's policy to limit its investments in these investment types to the top rating issued by Standard & Poor's and Moody's Investor Service. At June 30, 2016, the City's credit risks, expressed on a percentage basis, were as follows:

| Credit Quality Distribution for Securities<br>with Credit Exposure as a Percentage of Total Investments |                             |                           |                                                |
|---------------------------------------------------------------------------------------------------------|-----------------------------|---------------------------|------------------------------------------------|
| Investment Type                                                                                         | Moody's<br>Credit<br>Rating | S&P's<br>Credit<br>Rating | % of Investments<br>with Interest<br>Rate Risk |
| Local Agency Investment Fund (LAIF)                                                                     | Not Rated                   | Not Rated                 | 50.69%                                         |
| Mutual Funds                                                                                            | Not Rated                   | Not Rated                 | 4.97%                                          |
| Certificates of Deposits                                                                                | Not Rated                   | Not Rated                 | 34.47%                                         |
| U.S. Government Sponsored Enterprise Securities                                                         |                             |                           |                                                |
| Federal Home Loan Mortgage Corporation                                                                  | AAA                         | AA+                       | 4.94%                                          |
| Federal National Mortgage Association                                                                   | AAA                         | AA+                       | 4.93%                                          |
| <b>Total</b>                                                                                            |                             |                           | <b>100.00%</b>                                 |

Custodial Risk – For deposits, custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the City will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty (e.g. broker-dealer), the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party.

Concentration of credit risk – The investment policy of the City contains no limitations on the amount that can be invested in any one issuer beyond that stipulated by the California Government Code. There was no investments in any one issuer (other than mutual funds and external investment pools) that represent 5% or more of the City's investments.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

**Note 3 – Interfund Transactions**

**Due From/To Other Funds** – At June 30, 2016, the City had the following due from/to other funds:

| Due To Other Funds  | Due From Other Funds |                          |              | Total             |
|---------------------|----------------------|--------------------------|--------------|-------------------|
|                     | General Fund         | Capital Improvement Fund | Harbor Fund  |                   |
| Governmental Funds: |                      |                          |              |                   |
| General Fund        | \$ -                 | \$ 226,776               | \$ 96        | \$ 226,872        |
| Nonmajor Funds      | 68,589               | -                        | -            | 68,589            |
| <b>Total</b>        | <u>\$ 68,589</u>     | <u>\$ 226,776</u>        | <u>\$ 96</u> | <u>\$ 295,461</u> |

The above amount resulted from the time lag between the dates that reimbursable expenditures occur and payments are received from other agencies.

**Transfers**

For the year ended June 30, 2016, the City had the following transfers:

| Transfers out             | Transfers in        |                          |                             |                        | Total               |
|---------------------------|---------------------|--------------------------|-----------------------------|------------------------|---------------------|

**Pension-Related Debt**

As of June 30, 2003, the California Public Employees' Retirement System ("CalPERS") implemented a risk pool for the City's multiple-employer public employee defined benefit pension plan. The City's Miscellaneous and Safety Plans converted from agent multiple-employer plans to cost-sharing multiple employer plans. In addition to the annual required contributions (see Note 7), the City is also required to make annual payments on a Side Fund, which was created when the City entered the risk pool to account for the difference between the funded status of the pool and the funded status of the City's plans. The responsibility for funding the Side Fund is specific to the City and is not shared by all employers in the risk pool. The annual payments on the Side Fund represent principal and interest payments on the pension-related debt, which are included in the retirement expenditures in the City's various functions.

The amount of pension-related debt outstanding at June 30, 2016 totaled \$974,151, which includes \$560,238 for the Safety Fire Plan and \$413,913 for the Safety Police Plan.

**Certificates of Participation**

On October 12, 2011, the City entered into an installment sale agreement with the Public Property Financing Corporation of California 2011 Fire Station Financing Project, Series A and B, Certificates of Participation (the “COP”) for \$1,500,000 and \$300,000, respectively. The principal balance of Series A matures commencing from September 2012 to September 1, 2041, interest rates at 3.75%, payable on March 1 and September 1 of each year. Series B was fully paid as of June 30, 2016. Series A had an outstanding balance of \$1,386,000 at June 30, 2016.

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance**

**A. Description of Self-Insurance Pool Pursuant to Joint Powers Agreement**

The City of Morro Bay is a member of the California Joint Powers Insurance Authority (the “CJPIA”). The CJPIA is composed of 116 California public entities and is organized under a joint powers agreement pursuant to California Government Code §6500 et seq. The purpose of the CJPIA is to arrange and administer programs for the pooling of self-insured losses, to purchase excess insurance or reinsurance, and to arrange for group purchased insurance for property and other lines of coverage. The CJPIA began covering claims of its members in 1978. Each member government has an elected official as its representative on the Board of Directors. The Board operates through a nine-member Executive Committee.

**B. Self-Insurance Programs of the CJPIA**

Each member pays an annual contribution at the beginning of the coverage period. A retrospective adjustment is then conducted annually thereafter, for coverage years 2012-13 and prior. Retrospective adjustments are scheduled to continue indefinitely on coverage years 2012-13 and prior, until all claims incurred during those coverage years are closed, on a pool-wide basis. This subsequent cost re-allocation among members, based on actual claim development, can result in adjustments of either refunds or additional deposits required. Coverage years 2013-14 and forward are not subject to routine annual retrospective adjustment.

The total funding requirement for self-insurance programs is estimated using actuarial models and pre-funded through the annual contribution. Costs are allocated to individual agencies based on exposure (payroll) and experience (claims) relative to other members of the risk-sharing pool. Additional information regarding the cost allocation methodology is provided below.

Liability

In the liability program claims are pooled separately between police and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$30,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$30,000 to \$750,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$750,000 to \$50 million, are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2015-16 the CJPIA’s pooled retention is \$2 million per occurrence, with reinsurance to \$20 million, and excess insurance to \$50 million. The CJPIA’s reinsurance contracts are subject to the following additional pooled retentions: (a) \$2.5 million annual aggregate deductible in the \$3 million excess \$2 million layer, (b) \$3 million annual aggregate deductible in the 5 million excess \$10 million layer. There is a third annual aggregate deductible in the amount of \$2.5 million in the \$5 million excess \$5 million layer, however it is fully covered under a separate policy and therefore not retained by the Authority.

The overall coverage limit for each member, including all layers of coverage, is \$50 million per occurrence. Costs of covered claims for subsidence losses have a sub-limit of \$30 million per occurrence.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

Workers’ Compensation

In the workers’ compensation program claims are pooled separately between public safety (police and fire) and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$50,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$50,000 to \$100,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$100,000 to statutory limits are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2015-16 the CJPIA’s pooled retention is \$2 million per occurrence, with reinsurance to statutory limits under California Workers’ Compensation Law.

Employer’s Liability losses are pooled among members to \$2 million. Coverage from \$2 million to \$5 million is purchased as part of a reinsurance policy, and Employer’s Liability losses from \$5 million to \$10 million are pooled among members.

**C. Purchased Insurance**

Property Insurance

The City participates in the all-risk property protection program of the CJPIA. This insurance protection is underwritten by several insurance companies. The City property is currently insured according to a schedule of covered property submitted by the City to the CJPIA. The City property currently has all-risk property insurance protection in the amount of \$93,108,215. There is a \$5,000 deductible per occurrence except for non-emergency vehicle insurance which has a \$1,000 deductible. Premiums for the coverage are paid annually and are not subject to retrospective adjustments.

Earthquake and Flood Insurance

The City purchases earthquake and flood insurance on a portion of its property. The earthquake insurance is part of the property protection insurance program of the CJPIA. The City property currently has earthquake protection in the amount of \$50,433,208. There is a deductible of 5% per unit of value with a minimum deductible of \$100,000. Premiums for the coverage are paid annually and are not subject to retrospective adjustments.

Crime Insurance

The City purchases crime insurance coverage in the amount of \$1,000,000 with a \$2,500 deductible. The fidelity coverage is provided through the CJPIA. Premiums are paid annually and are not subject to retrospective adjustments.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

**Note 6 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

**C. Purchased Insurance (Continued)**

Special Event Tenant User Liability Insurance

The City of Morro Bay further protects against liability damages by requiring tenant users of certain property to purchase low-cost tenant user liability insurance for certain activities on agency property. The insurance premium is paid by the tenant user and is paid to the City of Morro Bay according to a schedule. The City of Morro Bay then pays for the insurance. The insurance is arranged by the Authority.

**D. Adequacy of Protection**

During the past three fiscal years, none of the above programs of protection experienced settlements or judgments that exceeded pooled or insured coverage. There were also no significant reductions in pooled or insured liability coverage in 2015-16.

**Note 7 – Defined Benefit Pension Plans**

The following is a summary of changes in net pension liability, and the related deferred outflows and inflows of resources for the year ended June 30, 2016:

|                                                                          | Governmental<br>Activities | Business-type Activities |                     |                     | Total               |

**Note 7 – Defined Benefit Pension Plans (Continued)**

***General Information about the Pension Plan***

*Plan Description*

The City contributes to the California Public Employees’ Retirement System (“CalPERS”), a cost-sharing multiple-employer defined benefit pension plan. CalPERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. CalPERS acts as a common investment and administrative agent for participating public entities within the State of California. Benefit provisions and all other requirements are established by State statute and City ordinance. Copies of the CalPERS annual financial report may be obtained from their Executive Office located at 400 P Street, Sacramento, California 95814.

*Employees Covered by Benefit Terms*

At June 30, 2014, the following employees were covered by the benefit terms:

**Note 7 – Defined Benefit Pension Plans (Continued)**

***General Information about the Pension Plan (Continued)***

*Benefit Provided*

CalPERS provide retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Following are the benefit provisions for each plan:

- Fire Tier 1: 3% (at age 50) of the highest average final 12 months compensation
- Fire Tier 2: 3% (at age 55) of the highest average final 36 months compensation
- Police Tier 1: 3% (at age 50) of the highest average final 12 months compensation
- Police Tier 2: 3% (at age 55) of the highest average final 36 months compensation
- Miscellaneous Tier 1: 2-2.7% (at age 55) of the highest average final 12 months compensation
- Miscellaneous Tier 2 : 2% (at age 60) of the highest average final 36 months compensation
- PEPRM Miscellaneous : 2% (at age 62) of the highest average final 36 months compensation

Employees may retire from active service once they reach 50 years of age and have five years of CalPERS-credited service.

The City has contracted with CalPERS for pre-retirement death benefits, should an employee die while actively employed, subject to the employee's eligibility to retire. Eligibility is established when an employee reaches 50 years of age, and has a minimum of five years of CalPERS-credited service.

Upon the death of an eligible employee, beneficiary(ies) may choose to receive: 1) the City-contracted CalPERS retirement formula Option 2W, or 2) the basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay. With either choice, the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit, which provides additional allocations to spouses caring for unmarried children, under the age of 22, or incapacitated children, is provided.

If the employee dies prior to attaining retirement eligibility, beneficiary(ies) receive: 1) the lump sum basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay, and 2) the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit.

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retirees designated survivor(s), or to the retiree's estate. Depending on the retirement option chosen, beneficiary(ies) may continue to receive lifetime benefits. The City does not contract for Survivor Continuance. Additionally, the City does not participate in Social Security retirement.

*Contributions*

Section 20814(c) of the California Public Employees' Retirement Law ("PERL") requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through CalPERS' annual actuarial valuation process. The Public agency cost-sharing plans covered by either the Safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

***General Information about the Pension Plan (Continued)***

For the measurement period ended June 30, 2015 (the measurement date), the active employee contribution rate were as follows:

| <u>Plans</u>  | <u>Active Employee<br/>Contribution Rate</u> | <u>Employer<br/>Contribution Rate</u> |
|---------------|----------------------------------------------|---------------------------------------|
| Fire Tier 1   | 9.000%                                       | 45.264%                               |
| Fire Tier 2   | 9.000%                                       | 21.367%                               |
| Fire PEPRA    | 8.000%                                       | 11.500%                               |
| Police Tier 1 | 9.000%                                       | 41.001%                               |
| Police Tier 2 | 9.000%                                       | 21.367%                               |
| Police PEPRA  | 8.000%                                       | 11.500%                               |
| Misc. Tier 1  | 7.000%                                       | 25.441%                               |
| Misc. Tier 2  | 7.000%                                       | 8.005%                                |
| Misc. PEPRA   | 6.250%                                       | 6.250%                                |

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension***

**Actuarial Methods and Assumptions Used to Determine Total Pension Liability**

For the measurement period ended June 30, 2015 (the measurement date), the total pension liability was determined by rolling forward the June 30, 2014 total pension liability. The June 30, 2015 total pension liabilities were based on the following actuarial methods and assumptions:

|                                  |                                                                                                                           |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Actuarial Cost Method            | Entry Age Normal in accordance with the requirement of GASB Statement No. 68                                              |
| Actuarial Assumptions:           |                                                                                                                           |
| Discount Rate                    | 7.65%                                                                                                                     |
| Inflation                        | 2.75%                                                                                                                     |
| Salary Increases                 | Varies by Entry Age and Service                                                                                           |
| Investment Rate of Return        | 7.65% Net of Pension Plan Investment; includes Inflation                                                                  |
| Mortality Rate Table             | Derived using CalPERS' Membership Data for all Funds.                                                                     |
| Post Retirement Benefit Increase | Contract COLA up to 2.75% until Purchasing Power Protection Allowance Floor on Purchasing Power applies, 2.75% thereafter |

---

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

*Actuarial Methods and Assumptions Used to Determine Total Pension Liability (Continued)*

All other actuarial assumptions used in the June 30, 2014 valuation were based on the results of an actuarial experience study for the period from 1997 to 2011, including updates to salary increase, mortality and retirement rates. The Experience Study report can be obtained at CalPERS' website under Forms and Publications.

*Change of Assumption*

In accordance with GASB 68, the long-term expected rate of return should be determined net of pension plan investment expense but without reduction for pension plan administrative expense. The discount rate was changed from 7.5 % (net of administrative expense in 2014) to 7.65% as of the June, 30, 2015 measurement date to correct the adjustment which previously reduced the discount rate for administrative expense.

*Discount Rate*

The discount rate used to measure the total pension liability was 7.65 percent. To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress tested plans that would most likely result in a discount rate that would be different from the actuarially assumed discount rate. Based on the testing of the plans, the tests revealed the assets would not run out. Therefore, the current 7.65 percent discount rate is appropriate and the use of the municipal bond rate calculation is not deemed necessary. The long-term expected discount rate of 7.65 percent is applied to all plans in the Public Employees Retirement Fund. The stress test results are presented in a detailed report called "GASB Crossover Testing Report" that can be obtained at CalPERS' website under the GASB 68 section.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, staff took into account both short-term and long-term market return expectations as well as the expected pension fund (Public Employees' Retirement Fund) cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11-60 years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

**For the Year Ended June 30, 2016**

---

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

The following is the approach established by the plan actuary to allocate the net pension liability and pension expense to the individual employers within the risk pool.

- (1) In determining a cost-sharing plan’s proportionate share, total amounts of liabilities and assets are first calculated for the risk pool as a whole on the valuation date (June 30, 2013). The risk pool’s fiduciary net position (“FNP”) subtracted from its total pension liability (“TPL”) determines the net pension liability (“NPL”) at the valuation date.
- (2) Using standard actuarial roll forward methods, the risk pool TPL is then computed at the measurement date (June 30, 2014). Risk pool FNP at the measurement date is then subtracted from this number to compute the NPL for the risk pool at the measurement date. For purposes of FNP in this step and any later reference thereto, the risk pool’s FNP at the measurement date denotes the aggregate risk pool’s FNP at June 30, 2014 less the sum of all additional side fund (or unfunded liability) contributions made by all employers during the measurement period (2013-14).
- (3) The individual plan’s TPL, FNP and NPL are also calculated at the valuation date. TPL is allocated based on the rate plan’s share of the actuarial accrued liability. FNP is allocated based on the rate plan’s share of the market value assets.
- (4) Two ratios are created by dividing the plan’s individual TPL and FNP as of the valuation date from (3) by the amounts in step (1), the risk pool’s total TPL and FNP, respectively.
- (5) The plan’s TPL as of the Measurement Date is equal to the risk pool TPL generated in (2) multiplied by the TPL ratio generated in (4). The plan’s FNP as of the Measurement Date is equal to the FNP generated in (2) multiplied by the FNP ratio generated in (4) plus any additional side fund (or unfunded liability) contributions made by the employer on behalf of the plan during the measurement period.
- (6) The plan’s NPL at the Measurement Date is the difference between the TPL and FNP calculated in (5).

Deferred outflows of resources, deferred inflows of resources, and pension expense is allocate based on the City’s share of contributions during measurement period.

The City’s proportionate share of the net pension liability was as follows:

|                              | Plans    |          |
|------------------------------|----------|----------|
|                              | Safety   | Misc.    |
| June 30, 2014                | 0.11990% | 0.12179% |
| June 30, 2015                | 0.12071% | 0.13871% |
| Change - Increase (Decrease) | 0.00081% | 0.01692% |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

**Note 7 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

For the year ended June 30, 2016, the City recognized pension expense as follows:

|        |    |                  |
|--------|----|------------------|
| Safety | \$ | 496,325          |
| Misc.  |    | 840,646          |
|        | \$ | <u>1,336,971</u> |

The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized over 5-years straight line. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive and retired) as of the beginning of the measurement period.

The expected average remaining service lifetime (“EARSL”) is calculated by dividing the total future service years by the total number of plan participants (active, inactive, and retired) in the risk pool. The EARSL for risk pool for the 2014-15 measurement period is 3.8 years, which was obtained by dividing the total service years of 467,023 (the sum of remaining service lifetimes of the active employees) by 122,410 (the total number of participants: active, inactive, and retired).

At June 30, 2016, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|                                                                                   | Safety                            |                                  | Misc.                             |                                  | Totals                            |                                  |
|-----------------------------------------------------------------------------------|-----------------------------------|----------------------------------|-----------------------------------|----------------------------------|-----------------------------------|----------------------------------|
|                                                                                   | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources |
| Pension contribution after measurement date                                       | \$ 1,116,272                      | \$ -                             | \$ 804,513                        | \$ -                             | \$ 1,920,785                      | \$ -                             |
| Difference between expected and actual experience                                 | -                                 | (120,342)                        | -                                 | 49,427                           | -                                 | (70,915)                         |
| Changes of assumptions                                                            | -                                 | (553,493)                        | -                                 | (467,630)                        | -                                 | (1,021,123)                      |
| Difference between projected and actual earning on<br>pension plan investments    | -                                 | (280,514)                        | -                                 | (234,429)                        | -                                 | (514,943)                        |

**Note 8 –Other Postemployment Benefits Plan**

***Plan Description***

The City contributes to a multi-employer defined benefit plan to provide post-employment medical benefits. Specifically, the City provides postretirement medical benefits to all employees who retire from the City after attaining age 50 with at least 5 years of service. The plan does not provide a publicly available financial report.

***Funding Policy***

The contribution requirements of plan members and the City are established and may be amended by the City's City Council, and/or the employee associations. The required employer contribution was \$119 per person for months in 2014 and \$122 per person per month in 2016. Retirees pay the differential monthly amount of the premium, which varies depending on the health benefits they select. The City implemented GASB 45 for the fiscal year ended June 30, 2010, establishing a liability in its Risk Management Fund for the value of the annual required contribution (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a closed period not to exceed thirty years. The ARC and contribution total for year ended June 30, 2016 was \$193,497 and \$52,480, respectively.

***Annual OPEB Cost and Net OPEB Asset***

The City's annual OPEB cost is calculated based on the ARC. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excesses) over a period not to exceed thirty years. The following table shows the components of the City's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the City's net OPEB Obligation:

|                                            |                          |
|--------------------------------------------|--------------------------|
| Annual Required Contribution               | \$ 191,821               |
| Interest Adjustment                        | 14,978                   |
| Adjustment to Annual Required Contribution | <u>(13,302)</u>          |
| Annual OPEB Cost                           | 193,497                  |
| Contribution made                          | <u>(52,480)</u>          |
| Change in Net OPEB Obligation              | 141,017                  |
| Net OPEB Obligation, Beginning of Year     | <u>206,590</u>           |
| Net OPEB Obligation, End of Year           | <u><u>\$ 347,607</u></u> |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

**Note 8 –Other Postemployment Benefits Plan (Continued)**

***Annual OPEB Cost and Net OPEB Asset (Continued)***

The City’s annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation (asset) for the year ended June 30, 2016 and the two preceding years were as follows:

| <u>Year Ended</u> | <u>OPEB Cost</u> | <u>OPEB Cost<br/>Contributed</u> | <u>Percentage of<br/>Annual OPEB cost<br/>Contributed</u> | <u>Net OPEB<br/>Obligation (Asset)</u> |
|-------------------|------------------|----------------------------------|-----------------------------------------------------------|----------------------------------------|
| June 30, 2014     | \$ 149,704       | \$ 50,425                        | 33.68%                                                    | \$ 109,837                             |
| June 30, 2015     | 146,217          | 49,658                           | 33.96%                                                    | 206,590                                |
| June 30, 2016     | 193,497          | 52,480                           | 27.12%                                                    | 347,607                                |

***Funded Status and Funding Progress***

As of August 1, 2015, the latest actuarial valuation date, there were no plan assets on the valuation date. The actuarial accrued liability for benefits was \$1,938,928, and the actuarial value of assets was \$614,048, resulting in an unfunded actuarial accrued liability (UAAL) of \$1,324,880. The covered payroll (annual payroll of active employees covered by the plan) was \$6,509,854 and the ratio of the UAAL to the covered payroll was negative 20.35%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the City are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

In January 2013, the City adopted ICMA-RC’s Vantagecare RHS Employer Investment Program for pre-funding of OPEB liability and established a revocable trust account. The City holds discretion to amend or terminate the program, and appoint program administrator to manage the daily operations of the trust account. This trust account is solely funded with assets from the City. The balance as of June 30, 2016 was \$697,635.

***Actuarial Methods and Assumptions***

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and the plan members at that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets consistent with the long-term perspective of the calculations.

The required contribution for the year ended June 30, 2016 was determined as part of the August 1, 2015 actuarial valuation using the entry age normal actuarial cost method. The actuarial assumptions included a 4.5% investment rate of return (net of administrative expenses), payroll increase of 2.75% per annum, and inflation rate of 2.75% per annum, and the City’s share of premium cost will increase at rates of 4% per annum. The level percentage of payroll method is used to allocate amortization cost by year, closed 30 year amortization period is used for the initial UAAL, and open 25 year amortization period is used for any residual UAAL.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 10 – Water Revenue Over State Water Payments**

The City has contracted with the San Luis Obispo County Flood Control and Water Conservation District to provide water from the state water project. The City has contracted to obtain 1,313 acre feet of water per year with an initial estimated cost of \$750 per acre foot, not including the fixed operating and management costs allocated to the City on a pro rata share basis. The City is obligated to make payments even if the City fails or refuses to accept water deliveries. The City paid a total of \$2,166,523 during the year ended June 30, 2016 for its share of the construction and operating costs. For the fiscal year ended June 30, 2016, the City had 1.16, an increase from 0.64 for the fiscal year ended June 30, 2015, in water revenue over State Water Payments ratio which is required to be at minimum ratio of greater than, or equal to 1.25.

**Note 11 – Commitments and Contingencies**

**A. Commitments**

The City had several outstanding or planned constructions as of June 30, 2016. However, those constructions neither were contractual nor carried over in a budget. Open constructions are re-budgeted and adopted in a new fiscal year.

**B. Contingencies**

The City is subject to various legal matters incidental to the ordinary course of City operations. At this time, the outcome of these matters and the potential loss, if any, that might result are uncertain. No provision for any liability that may result has been made in the financial statements for these matters.

**C. Grants**

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies. While no matters of noncompliance were disclosed by the audit of the financial statements or single audit of the Federal grant programs, grantor agencies may subject grant programs to additional compliance tests, which may result in disallowed costs. In the opinion of management, future disallowances of current or prior grant expenditures, if any, would not have a material adverse effect on the financial position of the City.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2016**

---

**Note 12 – Investment in Joint Powers Agreement**

On October 25, 1982, the City entered into Morro Bay/Cayucos Sanitary District Wastewater Treatment Plant Joint Powers Agreement (JPA) for the treatment of wastewater for the benefit of the government's residents and those of Cayucos, an unincorporated community in San Luis Obispo County. The contributions to the JPA were made by the Sewer Enterprise Fund.

During April 2016, Cayucos Sanitary District made a decision to pursue alternatives for wastewater treatment and reclamation of water independently. Because of this reason, construction in progress that was fully funded by the City were reclassified to be reported as part of the Sewer Enterprise Fund. The impact to the prior period net position is presented in Note 14.

Investment in joint powers agreement as of June 30, 2016 was \$8,674

**Note 13 – Other Required Disclosure**

Excess of Expenditures over Appropriations

Excess of expenditures over appropriations occurred in individual funds during the year ended June 30, 2016 as follows:

|                                        | <u>Expenditures</u> | <u>Appropriations</u> | <u>Expenditure<br/>in Excess of<br/>Appropriations</u> |

---

**Note 14 – Prior Period Adjustments**

During April 2016, Cayucos Sanitary District made a decision to pursue alternatives for wastewater treatment and reclamation of water independently. Because of this reason, construction in progress that was fully funded by the City were reclassified to be reported as part of the Sewer Enterprise Fund. Net positions as of July 1, 2015 were restated as follows:”

|                                                        | <u>Sewer</u>         | <u>Business-type<br/>Activities</u> |
|--------------------------------------------------------|----------------------|-------------------------------------|
| <b>Net Position at July 1, 2015</b>                    | \$ 13,172,252        | \$ 23,739,352                       |
| Understatement of capital assets                       | 589,963              | 589,963                             |
| Understatement of investment in Joint Powers Agreement | 16,400               | 16,400                              |

**Budgetary Information**

Budgets are annually adopted for all governmental and proprietary fund types on a basis consistent with generally accepted accounting principles. The City is required by its municipal code to adopt an annual budget on or before June 30 for the ensuing fiscal year. From the effective date of the budget, the amounts become the “*annual appropriated budget*.”

The appropriated budget is prepared by fund, department and division. The City Council may amend the budget by motion during the fiscal year. Expenditures may not legally exceed appropriations at the fund level. The City Manager is authorized to transfer budgeted amounts between departments within the same fund; however, any transfers between funds or revisions that alter total appropriations of any fund require City Council approval. The legal level of control is therefore at the fund level.

Supplemental appropriations, which increase appropriations, were made during the fiscal year, therefore, “final” budgeted revenue and appropriation amounts shown in the financial statements represent the original budget, modified for adjustments during the year. Appropriations lapse at the end of the fiscal year.

Encumbrances - Under encumbrance accounting, purchase orders, contracts and other commitments for expenditures are recorded to reserve that portion of the applicable appropriation. Encumbrance accounting is employed as an extension of formal budgetary accounting. Unexpended appropriations lapse at year-end.

# **SUPPLEMENTARY INFORMATION**

---

*This page intentionally left blank*

---

# NONMAJOR SPECIAL REVENUE FUNDS

---

***Morro Bay Tourism Business Improvement District (MBTBID) Special Revenue Fund*** - to account for the marketing activities of the MBTBID and the Visitors Center.

***Gas Tax Special Revenue Fund*** - to account for monies received from gasoline taxes.

***Lower Cost Visitor Accommodation Special Revenue Fund*** – to accounts for collections in-lieu mitigation fees for lower cost visitor serving overnight accommodations, such as hostels and tent campground units, as required by California Coastal Commission actions on coastal development permits.

***Traffic Safety Grant Special Revenue Fund*** – to account for fines and forfeitures collected from any person charged with a misdemeanor.

***Special Safety Grant Special Revenue Fund*** – To account for the Supplemental Law Enforcement Services Fund (SLESF) grant.

***Parking In-Lieu Special Revenue Fund*** – To account for in-lieu fees charged for parking spaces required to adequately service a new business establishment, or the expansion of an existing one.

***Bike Path Special Revenue Fund*** – To account for two percent of Transportation Development Act funds received by the City that are specifically set aside for bike path.

***Special Assessment District Special Revenue Fund*** – to account for parcel assessments and expenditures associated with certain housing developments within the City limits.

***Governmental Impact Fees Special Revenue Fund*** – to account for fees collected to ensure that new development pays the cost of infrastructure expansion required to meet the needs of that new development, effectively transferring the cost burden of growth from the existing rate and taxpayers.

***State Park Marina Special Revenue Fund*** – To account for marina concessions revenues that are received for the planning and environmental review of the proposed dredging and renovation of the State Park Marina.

***Affordable Housing In-lieu Special Revenue Fund*** – To account for collection of impact fees for affordable housing.

***Cloisters Special Assessment District Special Revenue Fund*** – To account for parcel assessments and expenditures associated with the Cloisters housing developments within the City limits.

***Local Transportation Funds ("LTF") Roads Special Revenue Fund*** – To account for Transportation Development Act (TDA) money for roads projects, under TDA Article 8, 99400(a).

***Park In-Lieu Fees Special Revenue Fund*** – To account for special revenue fees collected under the 1975 Quimby Act (California Government Code §66477).

***District Transaction Tax Special Revenue Fund*** – To account for ½ cent district sales tax, commonly known as “Measure Q”.

# STATISTICAL SECTION

# OVERVIEW

---

This part of the City’s comprehensive annual financial report is not covered by the Independent Auditor’s Report, but presents supplemental detailed information for the benefit of readers in understanding what the information in the financial statements, note disclosures, and required supplementary information says about the government’s overall financial health.

## **Contents**

### **Financial Trends (pages 128-146)**

These schedules contain trend information to help the reader understand how the City’s financial performance and well-being have changed over time.

### **Revenue Capacity (pages 147-158)**

These schedules contain information to help the reader assess the City’s most significant local revenue sources, transient occupancy tax (“TOT”) and property taxes.

### **Debt Capacity (pages 159-162)**

These schedules present information to help the reader assess the affordability of the City’s current levels of outstanding debt and the City’s ability to issue additional debt in the future.

### **Demographic and Economic Information (page 163)**

These schedules offer demographic and economic indicators to help the reader understand the environment with which the City’s financial activities take place.

### **Operating Information (pages 164-174)**

These schedules contain service and infrastructure data to help the reader understand how the information in the City’s financial report relates to the services the government provides and the activities it performs.

(Concluded)

Notes:

In FY 2012, City employees, except sworn Police, either paid an additional percentage of the employee contribution to CalPERS or had their salaries reduced. All City employees are now paying 100% of the CalPERS employee-paid contribution.

Note: In 1978, the voters of the State of California pass Proposition 13, which limited the property taxes to a total maximum rate of 1% based upon the assessed value of the property being taxed. Each year, the assessed value of property may be increased by an "inflation factor," which is limited to a maximum increase of 2%. With few exceptions, property is only re-assessed at the time it is sold to a new owner. At that point, the new assessed value is re-assessed at the purchase price of the property sold.

The assessed valuation data, shown above, represents the only data currently available with respect to the actual market value of taxable property, and is subject to the limitations described above.

Notes:

1. The secured property tax roll is composed of ad valorem taxes, as well as special assessments, and is calculated by the San Luis Obispo County Auditor-Controller. The San Luis Obispo County Tax collector is responsible for all property tax roll collections within the City of Morro Bay. The amount reported is before the SB2557 County administrative fees of approximately 3% of total property tax revenues.
2. The secured levy does not include supplemental assessments, unsecured tax revenues or prior year adjustments. In 2012/13, a one-time refund of \$104,903 was received from the County Auditor-Controller, for prior year overcharges of the SB2557 fee.
3. The City has elected the Teeter Plan-method of property tax collection, whereby the County remits 100% of taxes levied to the City, pursues collection of unpaid/delinquent taxes, and retains the taxes collected, as well as related penalties and interest.

<sup>1</sup> May 2008 was the beginning of the Morro Bay Tourism Business Improvement District (TBID). The assessment was set by Ordinance to be 2%, but the City Council took action to increase the collection rate to 3% for one year.

<sup>2</sup> TBID's first full year of operation; assessment rate was 3%, until May 2010, when it returned to 2%, per the Ordinance.

<sup>3</sup> TBID collected assessments at 2% through October; Council action set the rate at 3% for November and until further Council action was taken to change it.

Notes:

- 1 The Bradley-Burns Uniform Local Sales and Use Tax Law was enacted in 1955. The law authorizes cities and counties to impose a sales and use tax.
- 2 In March 2004, a State ballot measure was passed, issuing deficit reduction bonds for State purposes. Funding was provided, effective July 1, 2004, by repealing 25% of the local 1% sales tax, and adopting a new 1/4 cent sales tax, dedicated to repayment of the deficit reduction bonds. Cities and counties would be made whole by the state from increased property tax allocations, via reduced contributions to ERAF. This *triple flip* is theoretically revenue-neutral, and as such, the effective rate, for revenue purposes, remains at 1%.
- 3 In November 2006, voters in Morro Bay approved a local sales tax measure (Measure Q), increasing the City rate by 1/2%, which became effective April 1, 2007.

Notable changes:

2015/16: Deputy City Manager position established for economic development; one additional firefighter was hired; City dispatch services were transferred to the SLO County Sheriff and County Fire, reducing Police non-sworn personnel to support services/records only.

# CITY OF MORRO BAY

CITY HALL

595 Harbor Street  
Morro Bay, CA 93442

March 13, 2018

Honorable Mayor  
Members of the City Council  
Citizens of the City of Morro Bay

## REPORT PURPOSE AND ORGANIZATION

It is our pleasure to present the Comprehensive Annual Financial Report (CAFR) of the City of Morro Bay, California, for the fiscal year ended June 30, 2017. All financial statements were prepared in conformity with U.S. generally accepted accounting principles (GAAP) for each fiscal year end. The 2016/17 fiscal year marks the second CAFR prepared by the City; only basic financial statements have been completed for prior years. The difference between the basic financial statements and a CAFR is the inclusion of a letter of transmittal and a statistical section.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control the City has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the City's financial statements are free of any material misstatements.

### Audited Financial Statements

In 2015, the City issued a Request for Proposals (RFP) for auditing services, and as a result of that RFP, The Pun Group, LLP, a firm of licensed certified public accountants, was engaged to perform auditing services for the fiscal years ending June 30, 2015, 2016, 2017, and 2018 with the option to renew for two additional fiscal years (2019 and 2020). The FY 2014/15 audit was completed on March 31, 2016, with audit findings.

Since FY 2013/14, the Department Director, staff, and previous auditors expressed concerns regarding the breadth of responsibilities performed by this very small staff. From FY 2009/10, the Director, one IT manager, two confidential employees, and two account clerks were responsible for General Ledger accounting and reconciliations, budgeting, accounts payable, accounts receivable, utility billing, treasury, Human Resources management, and City-wide Information Technology. The request had been made many times to reinstate the Accountant position, which had been unfilled since July 1, 2010, or add a Budget Analyst; however, more pressing needs in public safety required immediate attention. In 2014, the City contracted with Management Partners for an update to its 2008 organizational study (discussed later in this letter), and in its 2015 report, Management Partners stated:

“The Finance Division is very leanly staffed, yet few related functions are contracted. Because of the lean staffing, the department's ability to provide financial and budgeting information and assistance to operating departments is limited. In addition, the division has limited capacity for innovation and planning, and for example, does not prepare a Comprehensive Annual Financial Report (CAFR), a Government Finance Officers Association best practice.”

---

“There is inadequate time and funding allowed for training and participation in professional organizations. Even getting routine work done is difficult when in the midst of audit or budget preparation. While this “belt tightening” can work for short periods of time, it is not sustainable over the long run.”

Early in calendar year 2016, management began the process of separating the scope of responsibility of the Administrative Services Department, transferring oversight of Information Technology to the Deputy City Manager. Management additionally offered a retirement incentive to its employees who worked for the City for a minimum of five years as of June 30, 2016, and two key employees in the Administrative Services Department (Director and Senior Accounting Technician) availed themselves of the incentive. As a result, management continued separating the Department’s scope of duties, transferring Human Resources to the City Clerk, and in October 2016, hired a Finance Director, a Budget and Accounting Manager, and a Senior Accounting Technician.

Information on the *audit findings* and management’s responses can be found on the City’s website at this link <http://www.morro-bay.ca.us/DocumentCenter/View/9557> or by contacting the Finance Director.

The City’s FY 2017 financial statements have been audited by The Pun Group, LLP. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City are free of material misstatement. The independent auditor, based upon the audit, rendered an unqualified (“clean”) opinion on the City of Morro Bay’s financial statements for the year ended June 30, 2017. The independent auditor’s report is located at the front of the financial section of this report.

GAAP requires management prepare a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management’s Discussion and Analysis (MD&A). The MD&A complements this letter of transmittal and should be read in conjunction with it. The City’s MD&A immediately follows the Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards.

## **Report Organization**

This report is organized in three sections: introductory, financial, and statistical.

1. The *Introductory* section includes this transmittal memorandum and other information to familiarize the reader with the City, including a list of principal officials and advisory bodies and organizational chart.
2. The *Financial* section contains the independent auditor’s report on the financial statement audit, the Management Discussion & Analysis (MD&A), basic financial statements, which include the notes to the financial statements, Required Supplementary Information, and combining and individual fund presentation and supplementary information.
3. The *Statistical* section includes selected financial and demographic information.

## **PROFILE OF THE CITY OF MORRO BAY**

The City of Morro Bay, incorporated in 1964, is located on the Central Coast of California, midway between Los Angeles and San Francisco, and is home to about 10,700 residents. The city is visited annually by a substantial number of tourists, seeking to enjoy the area’s moderate climate, ocean views and sunsets, and the relaxing atmosphere unique to coastal communities, as well as outdoor activities of kayaking, surfing, hiking, sailing, fishing and bird watching. Morro Rock, a state historic landmark and one of the most visible landmarks on the Central Coast, sits adjacent to the harbor entrance and the quiet inner bay. Tourism and commercial fishing are the main features of the local economy.

## **Form of Government**

The City operates under the mayor-council form of government. The City Council consists of the Mayor and four members, all of which are elected at large. Council members serve four-year terms, with two members elected every two years. The Mayor is elected for a two-year term.

The City Council is responsible, among other matters, for passing Ordinances, adopting the City budget, appointing committees and their members, and hiring the City Manager. The City Manager is responsible for carrying out the policies and Ordinances of the City Council, for overseeing the daily operations of the City, for appointing other employees, and otherwise managing daily operations of the City.

## **City Services**

The City is a full-service city, which includes police and fire protection, building inspections, licenses and permits, construction and maintenance of streets and other infrastructure, park maintenance, recreational activities, and transit services with seasonal trolleys. Water distribution, sewer collection, and harbor operations are provided through enterprise activities. Wastewater treatment is provided by a joint-powers agreement with the Cayucos Sanitary District, which serves the unincorporated community of Cayucos, located to the north of the City. The City is in the process of building its own Water Reclamation Facility, as is the Cayucos Sanitary District with its Sustainable Water Facility. The jointly-owned treatment facility will continue to be utilized until each party's new facility is operational.

## **Budget Process and Budgetary Control**

The Council is required to adopt an initial budget for the fiscal year, no later than June 30 preceding the beginning of the fiscal year on July 1. This annual budget serves as the foundation for the City's financial planning and control. The budget is prepared by fund, function (e.g., public safety), and department (e.g., police). Department heads may transfer resources within their department(s) as they see fit. Transfers of City Council-approved appropriations between departments require City Manager approval, and transfers between funds need approval from the City Council.

Appropriation requests are submitted to the Finance Department to compile for presentation to the City Manager. Once the budget is balanced, the City Manager presents the budget to the City Council at a public workshop(s). Any changes, as a result of the workshop(s), are made, and the final draft budget is presented to the City Council for approval at an upcoming regular meeting, or special meeting if required. The Adopted Budget is posted on the City's website.

The City Council reviews budget performance in October, January (mid-year budget review), and April. The presentation includes the quarter-to-date financial performance, detailed list of contract expenditures by contractor, and detailed investment portfolio performance. With these presentations and prior City Manager approval, department directors have the opportunity to request needed budget adjustments.

## **ECONOMIC CONDITION**

The City's three largest General Fund revenue sources are property taxes, transient occupancy taxes (TOT), and sales tax. The main driver for the City's economy is tourism and visitor-serving businesses. These businesses include hotels, motels, vacation rentals, and recreation vehicle parks, and contribute TOT, at a rate of 10%, which makes up 23% of the City's General Fund revenues. Property taxes are the largest General Fund revenue generator (27%), and sales tax revenues make up 13%. Other national economic impacts have been felt in the City, but to a lesser degree. When the housing bubble burst, property values declined, but not to the extent felt in other San Luis Obispo County cities. Sales taxes dipped, but not significantly, as there are no "big box" retail stores or auto dealerships that drastically affected other cities.

In May 2009, the Morro Bay Tourism Business Improvement District (TBID) was established by Ordinance No. 546. TBID is composed of hotel establishment within the city limits. At the time of its creation, all hotels, motels, bed and breakfast lodging, and inns were authorized to assess a 3% TBID charge to all transient stays, in addition to the 10% TOT collected; recreational vehicle parks, campgrounds and vacation rentals were excluded from this assessment. In FY 2010/11, the second full fiscal year of TBID operation, promotion efforts plus the dry, warm winters produced positive results: tourism in our City began to flourish, and our TOT revenues increased by 3.12%. Over the past five fiscal years, TOT has increased an average of 11% each fiscal year. Translating this to dollars, taxes have increased, since FY 2010/11, by \$1.2 million (\$1.9 million to \$3.1 million). Prior to the recession, TOT's all-time high was \$2 million in FY 2006/07. TOT revenues dropped during the recession by \$136,000, and recovered to the FY 2006/07 level in FY 2011/12. Since FY 2011/12, the growth seen from each prior fiscal year is 7.37%, 10.25%, 13.07%, 14.3%, 8.58% and 6.08%.

Other improvements in the City's economy reflect a positive outlook. According to the Bureau of Labor Statistics, the unemployment rate in the San Luis Obispo-Paso Robles-Arroyo Grande Metropolitan Statistical Area is 3.0% for December 2017. According to the California Department of Finance, the population factor for Morro Bay remained relatively stable from January 1, 2016 to January 1, 2017 (from 10,714 to 10,762).

### **Financial planning and major initiatives**

In 2008, the City contracted with Management Partners for an organizational assessment. At that time, many of the suggested changes were explored, with some implemented. In November 2014, the City contracted with Management Partners to update the 2008 study and prepare a 10-year budget forecast. The forecast was presented to Council in March 2015 and was quite clear in demonstrating while the City is not on the verge of insolvency, some significant medium term (5-year) and long-term (30-year) fiscal challenges are evident. This forecast was updated in 2016 for use with the FY 2017/18 budget.

### ***Long-Term Challenges***

The financial forecast reinforced significant concerns:

- Capital savings are, in many respects, non-existent. The FY 2015/16 budget committed an initial \$100,000 to a capital replacement savings fund for the future replacement of City facilities, such as City Hall and the Police Station. This savings plan was continued with the FY 2016/17 budget with an additional \$100,000 deposited into the fund. The savings plan was not continued into the FY 17/18 budget due to needed cutbacks to balance the budget.
- Funding for repairs and reconstruction of streets. The Pavement Condition Index (PCI) is the accepted measure of street condition, and an average of PCI-70 is the California State sought-after standard. If the City's streets were currently at PCI-70, then funding in the amount of \$1.5 million per year would be needed to maintain that PCI-70 average condition. Unfortunately, our streets are below the average pavement condition index. The City currently budgets its District Transaction Tax fund, a ½ cent district sales tax, by the established priorities memorialized in Resolution 46-12, which are improving the Fire Department, enhancing public safety, street maintenance, and storm drain maintenance to prevent toxic runoff into the Bay. With each annual budget, approximately \$500,000 of the ½ cent district sales tax is set-aside for street maintenance and reconstruction.

### ***Medium-Term Challenges***

The City participates in CalPERS retirement for its employees, and because of the size of the employee base, City employees are in pooled plans. Contributions are continuing to rise, driving labor costs up measurably. For the City, the outlook is better than many California cities, because the side funds in the Police and Fire retirement plans will be paid off in FY 2017/18 (Police) and FY 2019/20 (Fire). Paying off these debts will reduce contribution rates significantly. However, most employees are in the Miscellaneous pool, and while the City's miscellaneous side fund was paid off in FY 2014/15, there is still a large unfunded liability due to the pool's unfunded liabilities, asset losses, and assumption changes. These same issues affect Police and Fire, but not to the degree as the effect on the Miscellaneous pool.

An additional 5-year concern is a potential recession. The Management Partner's 2016 revised 10-year budget forecast projected a moderate recession in 2018. The City is planning and preparing for this recession, as well as the CalPERS' impacts to chart a course to weather the 5-year storm we see coming and come out the other end with existing services intact. The City identified in the FY 2015/16 budget: 1) cut services to keep the Emergency Reserve above the 27.5% reserve requirement; or 2) base planning on a 10-year budget forecast, and dip gently into our Emergency Reserves to sustain services. The City Council chose option #2, and adopted Resolution No. 33-15, which is discussed under *Relevant financial policies* below.

### **Relevant financial policies**

The City is in the process of compiling its financial policies into one comprehensive set of financial policies to be adopted in the FY 2017/18 fiscal year.

During the fiscal year 2015/16 a series of Resolutions were adopted with the annual budget, and an additional resolution related to tourism within the City was adopted in FY 2016/17. Following is a summary of these key financial policies:

**Resolution No. 30-15:** Establishing User Rates for Water and Sewer Services. This Resolution updates the water and sewer rates last authorized in 1996. It is designed to ensure recovery for cost of services, ensure costs are allocated fairly to all customers, secure the financial stability of the water and sewer systems, and provide a sound financial plan that meets existing ongoing operations and maintenance, and debt service obligations

**Resolution No. 31-15:** Adoption of the FY 2015/16 fiscal year operating budget, which includes the Investment Policy. In prior years, the Investment Policy was brought to the City Council in January, for a calendar year adoption. In January 2014, the City Council made the decision to have the Investment Policy reviewed and presented as a part of the FY 2014/15 budget and thereafter.

**Resolution No. 32-15:** Establishing the Risk Management Internal Service Fund and Committed Fund Balance. The policy describes the Risk Management ISF as a managing tool for City-wide insurance policies. It additionally defines the minimum reserve balance as \$100,000.

**Resolution No. 33-15:** Establishing the General Fund Emergency Reserve Fund Policy and Accepting Management Partner's Financial Forecast Assumptions. This Resolution sets the Reserve's target balance at 27.5% of the average of the three previous years' actual General fund operating revenues. It also restricts use of Reserve funds to City Council approval. Additionally, it set the assumptions for fund balances based on the Management Partners' financial forecast that included a recession, requiring use of Reserves, and authorized the use of Reserves. These assumptions are listed below, and are subject to annual review:

- 2014/15: \$3.385 million (33.4%)
- 2015/16: \$3.583 million (32.7%)
- 2016/17: \$3.272 million (30.2%)
- 2017/18: \$2.685 million (24.5%)
- 2018/19: \$2.802 million (24.7%)
- 2019/20: \$2.797 million (23.6%)
- 2020/21: \$2.983 million (24.6%)
- 2021/22: \$3.097 million (25%)

**Resolution No. 34-15:** Establishing a Strategic Investment Spending Plan. This plan identified surplus funds in the Risk Management ISF (\$900,000) that were not programmed, committed or assigned for insurance purposes, per the Risk Management Resolution No. 32-15. The Strategic Investment Spending Plan identified a priority spending list based on City Council-approved goals, as follows:

- ADA compliance: \$100,000
- Land Use Plans for the General Plan and Local Coastal Plan: \$300,000
- Economic Development Strategic Plan: \$75,000
- Information Technology Program: \$100,000
- Web-based Planning, Permitting and Licensing Software: \$85,000
- High-Speed Fiber Investment: \$150,000
- Additional Projects approved by City Council (TBD): ~\$90,000

**Resolution No. 03-16:** Defines the management of tourism promotions and marketing. The City began to manage its tourism promotions and marketing directly. The following structure for management of the Tourism Business Improvement District Assessment (TBID) is as follows:

- Manage tourism promotions and marketing, including expenditures of the community's TBID assessment funds.
- Expert tourism professionals will manage the tourism promotions and marketing.
- The TBID Advisory Board shall participate in the annual review of the City's tourism manager and assist in setting goals and metrics to measure the success of the community's tourism promotions and marketing.
- The TBID Advisory Board shall have enhanced duties to include enhancing the destination of Morro Bay as it relates to Tourism.
- The City shall commit \$300,000 in Transient Occupancy Tax (TOT) to the City's tourism operations.
- City shall provide office space, accounting, legal advice, and IT support.

## **Major Initiatives**

In FY 2014/15, the City contracted with Management Partners to update the 2008 Management Partners organizational study. Many of the recommendations from the 2008 study had not been implemented and were still considered viable alternatives.

The report was delivered to Council in May 2015, and it was decided that all suggested changes be reviewed for implementation. Management Partners provided the City with an implementation schedule, and management established timeframes for review/implementation through FY 2017/18.

The City immediately addressed changes to the City organization for operational effectiveness. These changes to the organization were enacted with the FY 2015/16 budget, which include:

- Moving the Consolidated Maintenance activities from the Recreation Department to the Public Services Department. Maintenance activities performed in this division are streets, storm drains, trees, parks, facilities, and vehicles.
- Separating the planning functions from the Public Services Department, and creating a Community Development Department for planning activities, and a Public Works Department for engineering, capital projects, and utility management.
- Rearranging oversight in the Recreation Department and establishing an Economic Development Department. A new position, Deputy City Manager, was created to replace the Recreation Director, and was assigned oversight responsibilities for Recreation, Information Technology, Economic Development, and Tourism.
- Returning control of the Morro Bay Tourism Business Improvement District to the City (formerly control was vested in a 501C(6) Tourism Bureau, a separate entity from the City).

## **Goals to be Completed in FY 2017/18**

### **Goals:**

In Spring 2013, the City Council discussed, developed and adopted a set of goals for action over the next two fiscal years (FY 2013/14 and 2014/15). Management changed in December 2013, and the City Manager was replaced in September 2014. In April 2017 the City Manager and City Council identified goals and objectives to be completed in FY 2017/18. These goals are described below:

#### **Goal #1 (Essential Goal) – Achieve Economic and Fiscal Sustainability**

**Description:** This essential goal recognizes the City has been living within our means but is not currently able to fund all basic services and requirements at the level appropriate for a community of our size. It also recognizes the importance of strengthening and maintaining strong financial management practices. Due both to our previous inability to fund important services such as street paving and replacement of key facilities, and the lack of an adequate General Fund capital budget, plus the impact of recent cost concerns – especially escalating CalPERS costs – we are unable to continue living as we have in the past. This goal centers around economic development and fiscal actions (revenue enhancement, public funding measures, cost control, and sound fiscal management practices) that target a 25% increase in projected revenues from the end of FY17 to the end of FY25.

**Duration:** This is an 8-year goal – the City intends to achieve fiscal sustainability by 2025.

**Goal #2 (Essential Goal) – Complete WRF Project and “OneWater” Program**

**Description:** This essential City goal centers around completion of the City’s Water Reclamation Facility (WRF) and includes implementation of a fiscally conservative, comprehensive water resource policy, program and infrastructure to ensure a sustainable water future. Key items include building the WRF and associated reclamation system, developing a “OneWater” policy, and diversifying our water supply toward achieving water independence.

**Duration:** This is a 6-year goal that is intended to be completed by 2023.

**Goal #3 (Important Goal) – Improve Infrastructure and Public Spaces**

**Description:** This important goal centers around substantially improving the City’s streets, multi-modal transportation infrastructure, facilities and public spaces. The City does not currently have sufficient revenues to fund the capital improvement program required to make substantial and necessary infrastructure improvements and, therefore, this goal is contingent on making significant progress on Goal #1 – Achieve Fiscal Sustainability.

**Duration:** This is, at a minimum, an 8-year goal.

**Goal #4 (Important Goal) – Review and Update Significant City Land Use Plans**

**Description:** This important goal centers around completion of the City’s General Plan (GP)/Local Coastal Program (LCP) rewrite, and update of other essential land use document. While the GP is the important task, update of other essential land use plans and mater plans is also a priority.

**Duration:** This is a 2-year goal that should be complete by summer 2019.

**Awards and Acknowledgements**

The 2016/17 fiscal year marks the second year the City has prepared a Comprehensive Annual Financial Report. This report will be submitted in future years to the Government Finance Officers Association (GFOA) Certificate of Achievement for Excellence in Financial Reporting program.

The preparation of this report would not have been possible without the skill, effort, and dedication of the entire staff of the Finance Department, included the retired Director, Susan Slayton. We wish to thank all City department directors for their assistance in providing the data necessary to prepare this report.

Credit also is due to the Mayor and the Council for their unfailing support for maintaining the highest standards of professionalism in the management of the City's finances.

Respectfully submitted,

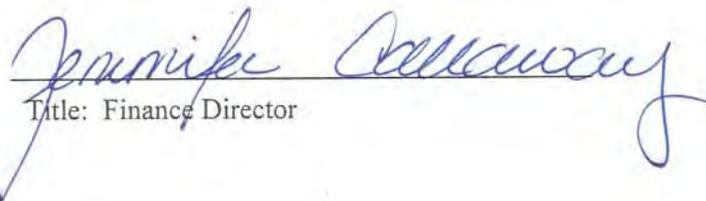

Signed: Scott Collins

# CITY OF MORRO BAY ORGANIZATIONAL CHART

For the 2016/17 Fiscal Year

*This page intentionally left blank.*

## INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California

### **Report on Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Morro Bay, California (the "City"), as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### ***Opinions***

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City as of June 30, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

**Tel: 925-974-3394 • Fax: 949-777-8850**

## **Other Matters**

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, the Budgetary Comparison Schedule - General Fund, the Schedule of Proportionate Share of the Net Pension Liability and Related Ratios, the Schedule of City's Contributions, and the Schedules of Funding Progress-Other Postemployment Benefits Plan on pages 5 to 14 and 90 to 93, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The Introductory Section and Combining and Individual Nonmajor Fund Financial Statements and Schedule of Revenues, Expenditures, and Changes in Fund Balances – Budget and Actual are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balances - Budget and Actual are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Combining and Individual Nonmajor Fund Financial Statements and Statement of Revenue, Expenditures, and Changes in Fund Balances - Budget and Actual are fairly stated in all material respects in relation to the basic financial statements as a whole.

The Introductory and Statistical Sections have not been subject to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

To the Honorable Mayor and Members of the City Council  
of the City of Morro Bay  
Morro Bay, California  
Page 3

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated March 13, 2018 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

## Management's Discussion and Analysis

As management of the City of Morro Bay, we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City, for the fiscal year ended June 30, 2017. It should be read in conjunction with the accompanying basic financial statements. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

### Financial Highlights

In the 2014/15 fiscal year, the City implemented the two new statements from the Governmental Accounting Standards Board (GASB), related to pension activities:

- Statement No. 68, "*Accounting and Financial Reporting for Pensions - an amendment of GASB Statement No. 27,*" and
- Statement No. 71, "*Pension Transition for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No. 68.*"

GASB Statement No. 68 establishes standards of accounting and financial reporting, but not funding or budgetary standards, for the City's defined benefit pension plans. This Statement replaces the requirements of prior GASB statements, impacting accounting and disclosure of pensions.

The significant impact to the City of implementing GASB Statement No. 68 is the reporting of the City's unfunded pension liability on the full accrual basis of accounting in the government-wide financial statements and the proprietary fund financial statements. There are also new note disclosure requirements and supplementary schedules required by the Statement.

The following outlines financial highlights for the year:

- At June 30, 2017, the City's net position increased \$3.7 million due to continued economy recovery, most notably tourism and transient occupancy taxes and water/sewer revenue increases.
- Total city-wide current assets increased by approximately \$3.6 million, or 15%. In governmental activities, cash decreased by \$670K, notes receivable increased by \$686K, land held for resale increased by \$350K. In business-type activities, cash increased by \$2.1 million, and receivables increased by \$276K.
- Total city-wide liabilities, excluding aggregate net pension liabilities, decreased \$77K. Current liabilities decreased by \$665K, and long-term liabilities increased by \$588K.
- The City's governmental funds altogether reported combined ending fund balances of \$10.7 million, an increase of \$300,000. Of the 2017 amount, \$3.4 million, or 31%, is nonspendable, \$3.8 million, or 36%, is restricted, and \$109K, or 1%, is committed, with the remaining 32% unassigned.
- The City's General fund balance increased by \$396K. The fund balance includes nonspendable (\$3.2 million, or 43%) and committed (\$109K, or 1.5%) funds. A total of \$3.6 million is held in reserve, per the City's policy of retaining 27.5% of General Fund three-year average of actual revenues, and Resolution No. 33-15, which established target balances for Fiscal Years 2014/15 – 2021/22 (2016/17 = \$3.272 million).

## **Overview of the Financial Statements**

This discussion and analysis are intended to serve as an introduction to the City of Morro Bay's basic financial statements, which consists of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains required supplementary information and other supplementary information in addition to the basic financial statements.

### **Government-wide financial statements**

The *government-wide financial statements* are designed to provide readers with a broad overview of the City of Morro Bay's finances, in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the City's assets, deferred outflows of resources, liabilities, and deferred inflow of resources, with the difference reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of the City's overall financial health.

The *Statement of Activities* presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., earned, but unused, vacation leave).

Both of the government-wide financial statements distinguish functions of the City of Morro Bay that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City include administration, community promotion, finance, fire, housing, police, public services, and parks and recreation. The business-type activities of the City include the water, sewer, harbor, and local transportation operations.

The government-wide financial statements can be found on pages 18-21 of this report.

### **Fund financial statements**

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Morro Bay, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. City funds are divided into three categories: governmental, proprietary, and fiduciary.

#### ***Governmental funds***

*Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City of Morro Bay maintains eighteen individual governmental funds. Information is presented separately in the governmental fund balance sheet, and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund which is considered major fund of the government. Data from the other governmental funds are combined into a single, aggregated presentation. Fund data for each of these non-major governmental funds is provided in the form of *combining statements* elsewhere in this report.

The City adopts an annual appropriated budget for all governmental funds. Required Supplementary Information - Budgetary Statements for the General Fund have been provided to demonstrate compliance with its budget.

The basic governmental fund financial statements can be found on pages 27-30 of this report.

### ***Proprietary funds***

The City of Morro Bay maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for the Water, Sewer, Harbor, and Local Transportation Fund (LTF) operations. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions. Morro Bay uses internal service funds to account for the various types of insurance coverage for the City, and to manage the City's information technology needs. Because these services predominantly benefit governmental rather than business-type functions, they have been included within *governmental activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Water, Sewer, and Harbor operations, all of which are considered to be major funds of the City. The remaining proprietary fund (LTF) is combined into a single, aggregated presentation in the proprietary fund financial statements.

The basic proprietary fund financial statements can be found on pages 32-39 of this report.

### ***Fiduciary funds***

Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are *not* available to support the City of Morro Bay's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The basic fiduciary fund financial statement can be found on pages 43-44 of this report.

### **Notes to the financial statements**

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 49-85 of this report.

### **Required supplementary information**

In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* including Budgetary Comparison Schedule – General Fund, Schedule of the City's Proportionate Share of the Net Pension Liabilities and Related Ratios, Schedule of the City's Contributions, and Schedule of Funding Progress – Other Postemployment Benefits Plan. Required supplementary information can be found on pages 89-93 of this report.

## Supplementary information

The combining and individual statements, referred to earlier in connection with the nonmajor governmental funds, are presented immediately following the required supplementary information on pensions. Combining and individual fund statements and schedules can be found on pages 98-107 of this report.

### Government-wide Financial Analysis

The City's net position for governmental activities increased from \$117.9 million to \$118.6 million (approximately 0.6%) and business-type activities increased from \$25.5 million to \$28.5 million (approximately 11.9%).

Changes between fiscal years are shown in Table 1, and explained in detail below:

Total assets and deferred outflows increased approximately \$7.0 million:

- Governmental:
  - Cash and investments decreased by \$670K
  - Receivables increased by \$674K
  - Prepaid items and inventories increased by \$148K
  - Land held for resale increased \$350K
  - Capital assets decreased \$484K
  - Deferred outflows of resources increased by \$2.4 million
- Business-type:
  - Cash and investments increased \$2.0 million
  - Receivables increased \$276K
  - Investments in Joint Powers Agreement decreased \$5K
  - Prepaid items and inventories increased \$817K
  - Capital assets increased \$566K
  - Deferred outflows of resources increased \$868K

Total liabilities and deferred inflows increased approximately \$3.2 million:

- Governmental:
  - Accounts payable increased \$205K
  - Payroll payable decreased \$548K
  - Deposits and unearned revenue decreased \$117K
  - Long-term liabilities increased \$648K
  - Aggregate net pension liabilities increased \$2.2 million
  - Deferred inflows of resources decreased \$690K
- Business-type:
  - Accounts payable decreased \$144K
  - Payroll payable decreased \$118K
  - Deposits and unearned revenues increased \$57K
  - Long-term liabilities decreased \$60K
  - Aggregate net pension liabilities increased \$1.7 million
  - Deferred inflows of resources increased \$96K

Activities in 2016/17, which changed the City's net position, are described in the Table 2, with comparison totals for 2015/16 activities

**Governmental activities**

Governmental activities increased the City of Morro Bay's net position by \$667K. Increased transient occupancy tax due to strong tourism (which also increased sales taxes), and enhanced investment earnings comprise the greatest reasons for change.

**Business-type activities.**

Business-type activities increased the City of Morro Bay's net position by \$3 million. The water and sewer rate increase, adopted by the City Council in May 2015, went into effect with July 2015 usage (September 2015 billing), plus lower expenses, accounts for this increase. Rates will continue to increase for the next four years to ensure compliance with bond coverage ratios required for the City's participation in the state water project.

The most significant capital expense is present in the Sewer Fund. Since 1953, the City and the Cayucos Sanitary District have been partners in a jointly-owned wastewater treatment plant. The treatment plant is operated under a Joint Powers Agreement (JPA). In 2003, the City and the Cayucos Sanitary District began work efforts to replace the existing Facility, agreeing to share in the costs of studying, planning and designing a new facility to be constructed at the existing site. Activities continued until January 2013, when the California Coastal Commission voted to deny the Coastal Development Permit for the Facility at its existing location. The entities attempted to work together to build a jointly-owned facility at a different site, but since April 2015, both entities have taken steps to build separate facilities serving each entity's own community.

The City has been actively exploring options to build a new water reclamation facility, which will produce water that may be reused for groundwater injection (recharge) and agricultural or other irrigation. The City has reviewed three potential sites for locating the new facility but has not made a final site selection at this time.

There were no major capital expenses in the Water or Harbor Funds.

### **Financial Analysis of the Government's Funds**

As noted earlier, the City of Morro Bay uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

**Governmental funds.** The focus of the City's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing Morro Bay's financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of June 30, 2017, the City of Morro Bay's governmental funds reported combined ending fund balances of \$10.7 million, an increase of \$300K in comparison to the prior year. The majority of this total amount (\$7.3 million) constitutes nonspendable (\$3.4 million), restricted (\$3.8 million) and committed (\$109K). The amount available for spending at the City's discretion (\$3.4 million) is 32% of the combined fund balances.

The General Fund is the chief operating fund of the City of Morro Bay. At the end of June 30, 2017, total fund balance of the general fund was \$7.5 million, of which \$3.4 million is unassigned. As a measure of the general fund's liquidity, it may be useful to compare unreserved fund balance to total fund expenditures. Unreserved fund balance represents 25% of total general fund expenditures.

The General Fund's fund balance increased by \$396K during the current fiscal year. City management has embraced a change in philosophy, leaning towards leveling the playing field for residents and businesses by ensuring those who utilize services pay for those services. Fees for services, with the exception of tiered subsidies for youth recreation programs, have been increased to collect more fully the cost of services provided. Additionally, in 2015 the City engaged a professional firm to perform an organizational assessment and financial stability model. Some of these recommendations and tools were implemented in fiscal year 2015/16, and the remaining are subject to review for implementation in future years. Additionally, the City collected \$191K in additional transient occupancy taxes and \$400K in sales taxes from significantly increased tourism.

**Proprietary funds.** The City of Morro Bay's proprietary funds provide the same type of information in the government-wide financial statements, but in more detail. At June 30, 2017, unrestricted net position in the Water, Sewer and Harbor Operating Funds amounted to \$4.3 million, \$4.9 million and \$(1 million), respectively. Net position changes in the three funds are an increase of \$1.2 million (Water), increase of \$2.2 million (Sewer), and decrease of \$439K (Harbor). Factors concerning those funds have already been addressed in the discussion of the City's business-type activities.

## General Fund Budgetary Highlights

Differences between the original budget and the final amended budget (\$1.4 million in expenditures and \$1.3 million in revenues) are briefly summarized below:

**Table 3: City of Morro Bay General Fund  
Departmental Changes to Original Adopted Budget**

| <b>Revenues</b> |                            | <b>Expenditures</b> |                             |

|                 |                            |                     | 517 Transfers Out           |
| \$              | 1,260                      | \$                  | 1,444                       |

## Capital Asset and Debt Administration

### Capital assets.

The City of Morro Bay's net investment in capital assets for its governmental and business-type activities as of June 30, 2017, amounts to \$142.1 million. This investment in capital assets includes land, distribution and collection systems, buildings and equipment, improvements, works of art and historical collections, and current year infrastructure.

The major capital asset event that occurred during the current fiscal year was the increase to the Sewer Operating Fund's construction in progress for costs incurred for planning related to the City-owned water reclamation facility.

Additional information on the City's capital assets can be found in Note 6 on pages 63-64.

**Long-term debt.** At the end of the current fiscal year, the City of Morro Bay had total debt outstanding of \$4.4 million. Of this amount, \$2.5 million comprises debt secured solely by specified revenue sources (e.g., notes payable and certificates of participation). The City maintains a double A ("AA") rating from Standard & Poor's.

Additional information on the City's long-term liabilities can be found in Note 7 on pages 65-67 of this report.

## Economic Factors and Next Year's Budget and Rates

- Tourism in Morro Bay continues to flourish, as demonstrated by the significant increases in Transient Occupancy Tax (TOT). Since the 2011/12 fiscal year, TOT has increased measurably as shown below:
  - 2011/12 – 7.37%
  - 2012/13 – 10.25%
  - 2013/14 – 13.07%
  - 2014/15 – 14.30%
  - 2015/16 - 8.58%
  - 2016/17 - 6.08%

Our Embarcadero and waterfront are bustling with activity and the normal *off-season* period, from January through April, is seeing some strength. For the fiscal year 2017/18, TOT growth was projected in our budget at 5%, however due to the continued closure of Highway 1 to the north and the devastation that closed Highway 101 to the south during December, a mid-year budget adjustment was authorized to reduce TOT estimates to prior year actuals.

- Sales tax revenue experienced an increase of 26.6% in 2016/17. It is important to note, however, that a significant part of the projected increase is due to the complete unwind of the state imposed “triple flip” and sales tax restoration. We anticipate real sales tax revenue and associated “triple flip” will remain steady in the FY 2017/18.
- Like many cities in the County, Morro Bay is now managing all tourism efforts in house, and we expect revenue from tourism to continue to increase in the near term. While occupancy this year is somewhat flat, average daily rate is up, meaning lodging establishments are selling around the same number of rooms, but at increased revenue levels resulting in the TOT increases noted above.
- Effective in the 2017/18, the City was successful in negotiating three year contracts with the City's Firefighters Association, Service Employees International Union, Confidential Group and unrepresented management designated employees which provided for a 2% cost of living increase effective July 1, 2017 and 2% cost of living adjustment for FY 2018/19 and FY 2019/20 conditioned on revenue and expenditure triggers.
- The City continues to encourage appropriate revitalization efforts that may have moderate positive effect on City revenues in the years ahead. This likely includes new construction on two Tidelands Trust lease sites and reconstruction of Off The Hook and Rose's Landing on the waterfront, all in 2018-2020.

These factors were considered in preparing the City's budget for the 2017/18 fiscal year.

## Requests for Information

This financial report is designed to provide a general overview of the City of Morro Bay's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Department, City of Morro Bay, 595 Harbor Street, Morro Bay, CA 93442.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Balance Sheet to the**  
**Government-wide Statement of Net Position**  
**June 30, 2017**

---

**Total Fund Balances - Total Governmental Funds** \$ 10,734,845

Amounts reported for governmental activities in the Statement of Net Position were reported differently because:

Capital assets used in governmental activities were not current financial resources. Therefore, they were not reported in the Governmental Funds Balance Sheet.

|                  |    |            |             |
|------------------|----|------------|-------------|
| Nondepreciable   | \$ | 95,424,110 |             |
| Depreciable, net |    | 26,027,363 | 121,451,473 |

Internal Service Funds were used by management to charge the costs of certain activities, such as insurance and equipment replacement to individual funds. The assets and liabilities of the Internal Service Funds were included in the governmental activities in the Government-Wide Statement of Net Position.

1,719,321

Long-term liabilities are not due and payable in the current period and accordingly are not reported as fund liabilities. All liabilities, both current and long-term, are reported in the Statement of Net Position:

|                               |    |             |             |
|-------------------------------|----|-------------|-------------|
| Certificates payable          | \$ | (1,355,000) |             |
| Compensated absences          |    | (185,833)   |             |
| Other postemployment benefits |    | (482,089)   |             |
| Loan Payable                  |    | (546,750)   |             |
| Pension related debt          |    | (658,631)   | (3,228,303) |

Deferred amounts relates to pension net available for current expenditures and are not reported in the governmental fund financial statements:

|                                |           |
|--------------------------------|-----------|
| Deferred outflows of resources | 4,723,228 |
| Deferred inflows of resources  | (872,643) |

Aggregate net pension liability is not due and payable in the current period and therefore is not reported in the governmental funds.

**City of Morro Bay**  
**Reconciliation of the Governmental Funds Statement of Revenues, Expenditures, and Changes**  
**in Fund Balances to the Government-Wide Statement of Activities**  
**For the Year Ended June 30, 2017**

---

**Net Change in Fund Balances - Total Governmental Funds** \$ 312,929

Governmental activities in the Statement of Activities were reported differently because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental funds.

|                                                                                      |                  |
|--------------------------------------------------------------------------------------|------------------|
| Capital outlay, net of \$39,215 repairs and maintenance reported as program expenses | 1,189,082        |
| Depreciation                                                                         | (1,297,862)      |
| Net effect on disposal of capital assets                                             | (375,449)        |
| Total                                                                                | <u>(484,229)</u> |

The issuance of long-term liabilities provides current financial resources to governmental funds, while the repayment of the principal of long-term liabilities consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position.

|                                         |                |
|-----------------------------------------|----------------|
| Change in compensated absences          | 93,821         |
| Change in loan payable                  | (546,750)      |
| Pension expense                         | 835,999        |
| Change in pension related liabilities   | 315,520        |
| Change in other postemployment benefits | (134,482)      |
| Payment of certificates payable         | 31,000         |
| Total                                   | <u>595,108</u> |

Internal Service Funds are used by management to charge the costs of certain activities, such as insurance and equipment replacement, to individual funds. The net revenue of the Internal Service Funds is reported in governmental activities.

|                                                          |                          |

**City of Morro Bay**  
**Notes to the Basic Financial Statements**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies**

The basic financial statements of the City of Morro Bay, California, (the “City”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) as applied to governmental agencies. The Governmental Accounting Standards Board (“GASB”) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the City’s significant policies:

**A. Financial Reporting Entity**

The City of Morro Bay is a general law city incorporated in 1964. The City operates under a Council-Manager form of government. The mayor and four council members are elected at large. A full range of services is provided, including general government, parks and recreation, police and fire and emergency services, streets and storm drain maintenance, water and sanitary, and transportation. The City also maintains the Morro Bay harbor and manages state-granted tidelands and harbor fee lands within the City limits.

In evaluating how to define the City for financial reporting purposes, management has considered all potential component units. The primary criteria for including a potential component unit within the reporting entity are the governing body’s financial accountability and a financial benefit or burden relationship and whether it is misleading to exclude. A primary government is financially accountable and shares a financial benefit or burden relationship, if it appoints a voting majority of an organization’s governing body and it is able to impose its will on the organization, or if there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the primary government. A primary government may also be financially accountable if an organization is fiscally dependent on the primary government regardless of whether the organization has a separately elected governing board, a governing board appointed by a higher level of government, or a jointly appointed board, and there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the primary government.

There are no component units for the City that meet the criteria for blended presentation.

The City participates in the California Joint Powers Insurance Authority (the “CJPIA”) for its general liability, workers' compensation, property, vehicle and crime insurance. This organization is financed through premium charges to each member. The CJPIA does not meet the aforementioned reporting criteria, and is therefore, not included in the accompanying financial statements.

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus***

The accounts of the City are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for by providing a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, and fund balances or net position, revenues and expenditures or expenses, as appropriate. City resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

The statement of net position reports separate sections for Deferred Outflows of Resources and Deferred Inflows of Resources, when applicable.

*Deferred Outflows of Resources* represent outflows of resources (consumption of net position) that apply to future periods and that, therefore, will not be recognized as an expense until that time.

*Deferred Inflows of Resources* represent inflows of resources (acquisition of net position) that apply to future periods and that, therefore, are not recognized as revenue until that time.

*Government-Wide Financial Statements*

The government-wide financial statements are reported using the “*economic resources*” measurement focus and the accrual basis of accounting.

Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include property and sales taxes, grants, entitlements and donations. On an accrual basis, revenues from property taxes are recognized in the fiscal year for which the taxes are levied. Revenues from sales taxes are recognized when the underlying transactions take place. Revenues from grants, entitlements and donations are recognized in the fiscal year in which all eligible requirements have been satisfied.

The government-wide financial statements consist of the statement of net position and the statement of activities that report information on all of the non-fiduciary activities of the primary government. Eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the governmental and business-type activities of the City. Governmental activities generally are financed through taxes, intergovernmental revenues and other non-exchange revenues. Business-type activities generally rely, to a significant extent, on fees and charges for services.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Government-Wide Financial Statements (Continued)*

The statement of activities presents a comparison between direct expenses and program revenues for each function of the City's activities. Direct expenses are (1) expenses that are specifically associated with a program or function, and (2) allocated indirect expenses. Program revenues include (1) fees, fines and charges paid by the recipients of goods or services offered by the programs, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented instead as general revenues.

When both restricted and unrestricted net position are available, restricted resources are used only after the unrestricted resources are depleted.

*Fund Financial Statements*

The fund financial statements report detailed information about the City's funds. Separate statements are provided for each fund category- governmental, proprietary and fiduciary- even though the latter are excluded from the government-wide financial statements. The emphasis of the Governmental and Proprietary Fund financial statements is on major individual funds. Each major fund is presented in a single column. All remaining governmental funds are separately aggregated and reported as nonmajor funds.

Governmental Fund Financial Statements include a Balance Sheet and a Statement of Revenues, Expenditures and Changes in Fund Balances for all major governmental funds and non-major funds aggregated. An accompanying schedule is presented to reconcile and explain the differences in Net Position as presented in these statements to the Net Position presented in the Government-Wide Financial Statements. The City has presented all major funds that met the applicable criteria.

All governmental funds are accounted for on a spending or "*current financial resources*" measurement focus and the modified accrual basis of accounting. Accordingly, only current assets and current liabilities are included on the Balance Sheet. The Statement of Revenues, Expenditures and Changes in Fund Balances presents increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the current period.

Revenues are recognized as soon as they are both "measurable" and "available". Revenues are considered to be available when they are collectible within the current period as soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. The primary revenue sources, which have been treated as susceptible to accrual by the City, are property taxes, sales tax, intergovernmental revenues and other taxes. Expenditures are recorded in the accounting period in which the related fund liability is incurred.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***B. Basis of Accounting and Measurement Focus (Continued)***

*Fund Financial Statements (Continued)*

The Reconciliation of the Fund Financial Statements to the Government-Wide Financial Statements is provided to explain the differences created by the integrated approach of GASB Statement No. 34.

The City reports the following major governmental fund:

General Fund - The City's primary operating fund. The General Fund is used to account for all revenues and expenditures necessary to carry out the basic governmental activities of the City that are not accounted for through other funds. For the City, the General Fund includes such activities as public protection, public ways and facilities, health and sanitation, public assistance, education and recreational services.

Proprietary Fund Financial Statements include a Statement of Net Position, a Statement of Revenues, Expenses and Changes in Fund Net Position, and a Statement of Cash Flows for each major Proprietary Fund.

Proprietary funds are accounted for using the "*economic resources*" measurement focus and the accrual basis of accounting. Accordingly, all assets, deferred outflows of resources, liabilities, and deferred inflows of resources (whether current or noncurrent) are included on the Statement of Net Position. The Statement of Revenues, Expenses and Changes in Fund Net Position presents increases (revenues) and decreases (expenses) in total Net Position. Under the accrual basis of accounting, revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred. In these funds, receivables have been recorded as revenue and provisions have been made for uncollectible amounts.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Non-operating revenues, such as subsidies and investment earnings, result from non-exchange transactions or ancillary activities.

The City reports the following major proprietary funds:

Water Enterprise Fund - Accounts for revenues received primarily from water service charges, which are expended for maintenance, operations and improvements to the water system.

Sewer Enterprise Fund - Accounts for revenues received primarily from sewer service charges, which are expended for maintenance, operations and improvements to the sanitary sewer system.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**B. Basis of Accounting and Measurement Focus (Continued)**

Fund Financial Statements (Continued)

The City reports the following major proprietary funds (Continued):

Harbor Enterprise Fund - Accounts for revenues received from harbor leases, rentals, moorings and other sources, which are expended for maintenance, operation, patrolling, and improvements of the harbor.

A separate column representing internal service funds is also presented in these statements. However, internal service balances and activities have been combined with the governmental activities in the Government-Wide Financial Statements.

Internal Service Fund - Accounts for revenues received primarily from charges to City departments on an estimated basis for insurance coverage, and which are expended for insurance purchase, valid claims and related costs. These funds were opened in 1980-81 to account for workers' unemployment compensation and fire insurance costs. They now account for all insurance coverage including health, dental, general liability, and vehicle insurance.

Fiduciary fund financial statements include a Statement of Fiduciary Net Position and a Statement of Changes in Fiduciary Net Position. The City's fiduciary funds represent agency fund and Other Postemployment Benefits (OPEB) trust fund. Both agency fund and the OPEB trust fund are accounted for on the full accrual basis of accounting.

The City reports the following fiduciary funds:

Other Postemployment Benefits (OPEB) Trust Fund – Used to account for assets held by the City as a trustee for pre-funding of OPEB liability.

Agency Funds - Used to account for assets held by the City as an agent for individuals, private organizations, other governments, and/or other funds. Agency Funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

**C. Cash and Investments**

Investments are reported in the accompanying balance sheet at fair value, except for certain certificates of deposit and investment contracts that are reported at cost because they are not transferable and they have terms that are not affected by changes in market interest rates.

Changes in fair value that occur during a fiscal year are recognized as investment income reported for that fiscal year. Investment income includes interest earnings, changes in fair value, and any gains or losses realized upon the liquidation, maturity, or sale of investments.

The City pools cash and investments of all funds, except for assets held by fiscal agents. Each fund's share in this pool is displayed in the accompanying financial statements as cash and investments. Investment income earned from pooled investments is allocated to those various funds based on each fund's average cash and investment balance.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**C. Cash and Investments (Continued)**

For purposes of the statement of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash or were purchased so near their maturity that they present insignificant risk of change in value because of changes in interest rates. Cash and cash equivalents in the accompanying statements include the proprietary funds' share of the cash and investment pool of the City of Morro Bay.

Certain disclosure requirements, if applicable, for Deposits and Investment Risks in the following areas:

- Interest Rate Risk
- Credit Risk
  - Overall
  - Custodial Credit Risk
  - Concentration of Credit Risk
- Foreign Currency Risk

In addition, other disclosures are specified including use of certain methods to present deposits and investments, highly sensitive investments, credit quality at year-end and other disclosures.

**D. Fair Value Measurement**

U.S. GAAP defines fair value, establishes a framework for measuring fair value and establishes disclosures about fair value measurement. Investments, unless otherwise specified, recorded at fair value in the financial statements, are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Levels of inputs are as follows:

The three levels of the fair value measurement hierarchy are described below:

- Level 1 - Inputs are unadjusted, quoted prices for identical assets and liabilities in active markets at the measurement date.
- Level 2 – Inputs, other than quoted prices included in Level 1, that are observable for the assets and liabilities through corroboration with market data at the measurement date.
- Level 3 – Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the assets and liabilities at the measurement date.

**E. Receivable and Allowance for Doubtful Accounts**

Customer accounts receivable consist of amounts owed by private individuals and organizations for services rendered in the regular course of business operations. Receivable are shown net of allowances for doubtful accounts. Uncollectable accounts are based on prior experience and management's assessment of the collectability of existing accounts.

**F. Prepaid Items**

Certain payments to vendors applicable to future accounting periods are recorded as prepaid items.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**G. Inventories**

The City maintains an inventory account for fuel. Fuel is valued at June 30 based on the amount of fuel in the storage tanks and the most recent invoices' purchase price. Inventories are valued using first in first out method.

**H. Land Held for Resale**

Land held for resale is carried at the lower of cost or estimated net realizable value.

**I. Property Tax Revenue**

Property taxes attach as an enforceable lien at March 1. Taxes are levied on July 1 and payable in two installments, December 10 and April 10. All general property taxes are then allocated by the County Auditor's Office to the various taxing entities per the legislation implementing Proposition 13. The method of allocation used by the County is subject to review by the State of California. City property tax revenues are recognized when levied and received within 60 days of the year end.

**J. Capital Assets**

Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available. Contributed fixed assets are valued at their estimated fair market value on the date contributed. The City defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Capital assets used in operations are depreciated or amortized (assets under capital leases) using the straight-line method over the lesser of the capital lease period or their estimated useful lives in the government-wide statements and proprietary funds. Donated capital assets are valued at their estimated acquisition value on the date donated. The estimated useful lives are as follows:

|                           |             |
|---------------------------|-------------|
| Structures & improvements | 15-30 years |
| Equipment                 | 4-10 years  |
| Infrastructure            | 25-75 years |

**K. Interfund Transactions**

Interfund transactions are reflected as loans, services provided, reimbursements or transfers. Loans are reported as receivables and payables, as appropriate, are subject to elimination upon consolidation, and are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds (i.e., the noncurrent portion of interfund loans). Any residual balances outstanding between the governmental activities and the business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not available financial resources. There were no advances between funds during the year.

Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures/expenses. Reimbursements occur when one fund incurs a cost, charges the appropriate benefiting fund and reduces its related cost as a reimbursement. All other interfund transactions are treated as transfers. Transfers between governmental or proprietary funds are netted as part of the reconciliation to the government-wide presentation.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

***L. Compensated Absences Payable***

City employees have vested interest in varying levels of vacation, sick leave and compensatory time based on their length of employment. It is the policy of the City to pay all accumulated vacation pay and all or a portion of sick pay when an employee retires or terminates. The long-term amount is included as a liability in the governmental activities of the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. All of the liability for compensated absences applicable to proprietary funds is reported in those funds.

***M. Pension***

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the plans and additions to/deductions from the plans' fiduciary net position have been determined on the same basis as they are reported by the plans (Note 8). For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value.

The following timeframes are used for pension reporting:

CalPERS

|                    |                                |
|--------------------|--------------------------------|
| Valuation Date     | June 30, 2015                  |
| Measurement Date   | June 30, 2016                  |
| Measurement Period | June 30, 2015 to June 30, 2016 |

Gains and losses related to changes in total pension liability and fiduciary net position are recognized in pension expense systematically over time. The first amortized amounts are recognized in pension expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to pensions and are to be recognized in future pension expense. The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized straight-line over 5 years. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive, and retired) as of the beginning of the measurement period.

***N. Unearned Revenue***

In the government-wide financial statements, unearned revenue is reported for transactions for which revenue has not yet been earned. Typical transactions recorded as unearned revenues in the government-wide financial statements are cell phone site license lease payments received in advance, prepaid charges for services and facility rentals paid in advance.

In the fund financial statements, unearned revenue is recorded when transactions have not yet met the revenue recognition criteria. The City records unearned revenue for transactions for which revenues have not been earned. Typical transactions for which unearned revenue is recorded are lease payments, quarterly encroachment fees and advance registration for recreation classes which were not yet earned.

**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**O. Net Position**

In the government-wide financial statements and proprietary fund financial statements, net position is classified as follows:

Net Investment in Capital Assets - This component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of debt that are attributable to the acquisition, construction, or improvement of those assets.

Restricted - This component of net position consists of restricted assets and deferred outflows of resources reduced by liabilities and deferred inflows of resources related to those assets.

Unrestricted - This component of net position is the amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

**P. Fund Balances**

In the governmental fund financial statements, fund balances are classified as follows:

Nonspendable – Nonspendable fund balances include amounts that cannot be spent because they are not in a spendable form, such as inventory, prepaid items, land held for resale and long-term receivable or because resources legally or contractually must remain intact.

Restricted – Restricted fund balances are the portion of fund balance that have externally enforceable limitations on their usage through legislation or limitations imposed by creditors, grantor, laws and regulations of other governments or enabling legislation.

Committed – Committed fund balances are self-imposed limitations by the highest level of decision-making authority, namely the City Council, prior to the end of the reporting period. City Council adoption of a resolution is required to commit resources or to rescind the commitment.

Assigned – Assigned fund balances are limitations imposed by management based on the intended use of the funds. Modifications or rescissions of the constraints can be removed by the same type of action that limited the use of the funds. Assignment of resources can be done by the highest level of decision making or by a committee or official designated for that purpose. The City Council has authorized the Finance Director for that purpose.

Unassigned – Unassigned fund balances represent the residual net resources in excess of the other classifications. The general fund is the only fund that reports a positive unassigned fund balance amount. In other governmental funds, it is not appropriate to report a positive unassigned fund balance amount. However, in governmental fund other than general fund, if expenditures incurred for specific purposes exceed the amounts that are restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance in that fund.

**Q. Use of Estimates**

The preparation of the basic financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

**Note 1 – Summary of Significant Accounting Policies (Continued)**

**R. Accounting Changes**

GASB has issued Statement No. 77, *Tax Abatement Disclosure*. This Statement requires governments that enter into tax abatement agreements to disclose the following information about the agreements: 1) Brief descriptive information, such as the tax being abated, the authority under which tax abatements are provided, eligibility criteria, the mechanism by which taxes are abated, provisions for recapturing abated taxes, and the types of commitments made by tax abatement recipients. 2) The gross dollar amount of taxes abated during the period 3) Commitments made by a government, other than to abate taxes, as part of a tax abatement agreement. This statement became effective for periods beginning after June 15, 2016 and did not have a significant impact on the City's financial statements for the year ended June 30, 2017.

GASB has issued Statement No. 78, *Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans*. This Statement amends the scope and applicability of Statement 68 to exclude pensions provided to employees of state or local governmental employers through a cost-sharing multiple-employer defined benefit pension plan that (1) is not a state or local governmental pension plan, (2) is used to provide defined benefit pensions both to employees of state or local governmental employers and to employees of employers that are not state or local governmental employers, and (3) has no predominant state or local governmental employer (either individually or collectively with other state or local governmental employers that provide pensions through the pension plan). This Statement establishes requirements for recognition and measurement of pension expense, expenditures, and liabilities; note disclosures; and required supplementary information for pensions that have the characteristics described above. This statement became effective for periods beginning after June 15, 2016 and did not have a significant impact on the City's financial statements for the year ended June 30, 2017.

GASB has issued Statement No. 80, *Blending Requirements for Certain Component Units*. The objective of this Statement is to improve financial reporting by clarifying the financial statement presentation requirements for certain component units. This Statement amends the blending requirements for the financial statement presentation of component units of all state and local governments. The additional criterion requires blending of a component unit incorporated as a not-for-profit corporation in which the primary government is the sole corporate member. The additional criterion does not apply to component units included in the financial reporting entity pursuant to the provisions of Statement No. 39, *Determining Whether Certain Organizations Are Component Units*. This statement became effective for periods beginning after June 15, 2016, and should be applied retroactively. This statement did not have a significant impact on the City's financial statements for the year ended June 30, 2017.

GASB has issued Statement No. 82, *Pension Issues*. The objective of this Statement is to address certain issues that have been raised with respect to Statements No. 67, *Financial Reporting for Pension Plans*, No. 68, *Accounting and Financial Reporting for Pensions*, and No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68*, and Amendments to Certain Provisions of GASB Statements 67 and 68. Specifically, this Statement addresses issues regarding (1) the presentation of payroll-related measures in required supplementary information, (2) the selection of assumptions and the treatment of deviations from the guidance in an Actuarial Standard of Practice for financial reporting purposes, and (3) the classification of payments made by employers to satisfy employee (plan member) contribution requirements. This statement became effective for periods beginning after June 15, 2016, and should be applied retroactively. This statement did not have a significant impact on the City's financial statements for the year ended June 30, 2017.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 2 – Cash and Investments**

At June 30, 2017, cash and investments are classified in the accompanying financial statements as follows:

|                      | Government-Wide<br>Statement of<br>Net Position |               |                |               |
|----------------------|-------------------------------------------------|---------------|----------------|---------------|
|                      | Governmental                                    | Business-type | Fiduciary Fund | Total         |
|                      | Activities                                      | Activities    |                |               |
| Cash and investments | \$ 6,883,558                                    | \$ 11,140,139 | \$ 2,061,180   | \$ 20,084,877 |

At June 30, 2017, cash and investments consisted of the following:

|                                                 |                      |
|-------------------------------------------------|----------------------|
| Cash:                                           |                      |
| Petty Cash                                      | \$ 1,650             |
| Deposits with financial institutions            | 7,906,152            |
| Total cash and cash equivalents                 | <u>7,907,802</u>     |
| Investments:                                    |                      |
| Local Agency Investment Fund                    | 7,177,443            |
| Mutual Funds                                    | 749,810              |
| Non-negotiable Certificates of Deposit          | 3,253,147            |
| U.S. Government Sponsored Enterprise Securities | 996,675              |
| Total investments                               | <u>12,177,075</u>    |
| Total cash and investments                      | <u>\$ 20,084,877</u> |

**A. Deposits**

The carrying amounts of the City's demand deposits were \$7,906,152 at June 30, 2017. Bank balances at that date were \$8,747,012, the total amount of which was collateralized or insured with accounts held by the pledging financial institutions in the City's name as discussed below.

The California Government Code requires California banks and savings and loan associations to secure the City's cash deposits by pledging securities as collateral. This Code states that collateral pledged in this manner shall have the effect of perfecting a security interest in such collateral superior to those of a general creditor. Thus, collateral for cash deposits is considered to be held in the City's name.

The market value of pledged securities must equal at least 110% of the City's cash deposits. California law also allows institutions to secure City deposits by pledging first trust deed mortgage notes having a value of 150% of the City's total cash deposits. The City may waive collateral requirements for cash deposits, which are fully insured up to \$250,000 by the Federal Deposit Insurance Corporation ("FDIC"). The City, however, has not waived the collateralization requirements.

The City follows the practice of pooling cash and investments of all funds, except for funds required to be held by fiscal agents under the provisions of bond indentures, if applicable. Interest income earned on pooled cash and investments is allocated on an accounting period basis to the various funds based on the period-end cash and investment balances, however, interest is not allocated to funds created to advance costs for utility undergrounding districts, reimbursable grant funds or internal service funds.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

**Note 2 – Cash and Investments (Continued)**

**B. Investments**

Under the provisions of the City’s investment policy, the City’s investments are limited to those authorized by the California Government Code, except as follows:

| Authorized Investment Type                            | Maximum Maturity | Maximum Percentage of Portfolio | Maximum Investment in one Issuer |
|-------------------------------------------------------|------------------|---------------------------------|----------------------------------|
| Securities Issued by U.S. Government, or its agencies | 5 years          | None                            | None                             |
| Local Agency Investment Fund (LAIF)                   | N/A              | None                            | None                             |
| Certificates of Deposit                               | 5 years          | None                            | \$250,000                        |
| Bankers Acceptances                                   | 180 days         | 40%                             | None                             |
| Mutual Funds and Money Market Mutual Funds            | 5 years          | None                            | None                             |
| Collateralized Deposit                                | N/A              | None                            | None                             |
| Passbook Savings Accounts                             | 5 years          | None                            | None                             |
| Repurchase Agreements                                 | 5 years          | 25%                             | None                             |

The City is a participant in LAIF, which is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California. The City’s investments with LAIF at June 30, 2017 included a portion of the pool funds invested in Structured Notes and Asset-Backed Securities, which included the following:

*Structured Notes:* debt securities (other than asset-backed securities) whose cash flow characteristics (coupon rate, redemption amount, or stated maturity) depend upon one or more indices and/or that have embedded forwards or options.

*Asset-Backed Securities:* generally, mortgage-backed securities that entitle their purchasers to receive a share of the cash flows from a pool of assets such as principal and interest repayments from a pool of mortgages (for example, collateralized mortgage obligations), or credit card receivables.

As of June 30, 2017, the City had \$7,177,443 invested in LAIF, which had invested 2.89% of the pool investment funds in Structured Notes and Asset-Backed Securities.

**C. Fair Value Measurement**

At June 30, 2017, investments are reported at fair value. The following table presents the fair value measurement of investments on a recurring basis and the levels within GASB 72 fair value hierarchy in which the fair value measurements fall at June 30, 2017:

| Investment Type                                    | Significant<br>Observable Input<br>(Level 2) | Other<br>Uncategorized |
|----------------------------------------------------|----------------------------------------------|------------------------|
| Local Agency Investment Fund                       | \$ -                                         | \$7,177,443            |
| Mutual Funds                                       | -                                            | 749,810                |
| Certificates of deposit                            | 3,253,147 (1)                                | -                      |
| U.S. Government Sponsored<br>Enterprise Securities | 996,675 (2)                                  | -                      |
| <b>Total</b>                                       | <b>\$ 4,249,822</b>                          | <b>\$7,927,253</b>     |

**For the Year Ended June 30, 2017**

**Note 2 – Cash and Investments (Continued)**

**D. Risk Disclosures**

Interest Rate Risk - As a means of limiting its exposure to fair value losses arising from rising interest rates, the City's investment policy limits investments to a maximum maturity of five years.

At June 30, 2017, the City had the following investment maturities:

| Investment Type                                 | Fair value           | Investment Maturities (in Years) |                     |                   |             |                   |
|-------------------------------------------------|----------------------|----------------------------------|---------------------|-------------------|-------------|-------------------|
|                                                 |                      | Less than 1                      | 1 to 2              | 2 to 3            | 3 to 4      | 4 to 5            |
| Local Agency Investment Fund                    | \$ 7,177,443         | \$ 7,177,443                     | \$ -                | \$ -              | \$ -        | \$ -              |
| Mutual Funds                                    | 749,810              | 749,810                          | -                   | -                 | -           | -                 |
| Certificates of deposit                         | 3,253,147            | 999,806                          | 1,756,383           | -                 | -           | 496,958           |
| U.S. Government Sponsored Enterprise Securities | 996,675              | -                                | 498,700             | 497,975           | -           | -                 |
| <b>Total</b>                                    | <b>\$ 12,177,075</b> | <b>\$ 8,927,059</b>              | <b>\$ 2,255,083</b> | <b>\$ 497,975</b> | <b>\$ -</b> | <b>\$ 496,958</b> |

Credit Risk – State law limits investments in commercial paper and corporate bonds to the top two ratings issued by nationally recognized statistical rating organizations. It is the City's policy to limit its investments in these investment types to the top rating issued by Standard & Poor's, Fitch Rating's and Moody's Investor Service. At June 30, 2017, the City's credit risks, expressed on a percentage basis, were as follows:

| Credit Quality Distribution for Securities<br>with Credit Exposure as a Percentage of Total Investments |                             |                           |                                                |
|---------------------------------------------------------------------------------------------------------|-----------------------------|---------------------------|------------------------------------------------|
| Investment Type                                                                                         | Moody's<br>Credit<br>Rating | S&P's<br>Credit<br>Rating | % of Investments<br>with Interest<br>Rate Risk |
| Local Agency Investment Fund (LAIF)                                                                     | Not Rated                   | Not Rated                 | 58.94%                                         |
| Mutual Funds                                                                                            | Not Rated                   | Not Rated                 | 6.16%                                          |
| Certificates of Deposits                                                                                | Not Rated                   | Not Rated                 | 26.72%                                         |

Custodial Risk – For deposits, custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the City will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty (e.g. broker-dealer), the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party.

Concentration of credit risk – The investment policy of the City contains no limitations on the amount that can be invested in any one issuer beyond that stipulated by the California Government Code. There were no investments in any one issuer (other than mutual funds and external investment pools) that represent 5% or more of the City's investments.

In general, transfers are used to 1) use unrestricted revenues collected in one fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, and 2) to reimburse the General Fund for administration services provided to other funds.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

**Note 4 – Notes Receivable**

On September 30, 2016, the City sold a parcel of land to Morro Bay Ventures, Inc. The City opted to finance the sale as a seller financed sale. The transaction resulted in a note receivable agreement for the amount of \$749,000. The interest on the note is 5% and the City will receive monthly payments consisting of interest only. The note matures at the earlier of October 6, 2019, or 30 days following the buyers receipt of all necessary and final land use entitlements. This note is long-term in nature and are recorded as notes receivable in the Statement of Net Position and the governmental Funds Balance Sheet in the governmental funds.

**Note 5 – Investment in Joint Powers Agreement**

On October 25, 1982, the City entered into Morro Bay/Cayucos Sanitary District Wastewater Treatment Plant Joint Powers Agreement (JPA) for the treatment of wastewater for the benefit of the government's residents and those of Cayucos, an unincorporated community in San Luis Obispo County. The contributions to the JPA were made by the Sewer Enterprise Fund in amount of \$2,110,458.

Investment in joint powers agreement as of June 30, 2017 was \$3,333.

**Note 6 – Capital Assets**

The following is a summary of changes in capital assets for the governmental activities for the year ended June 30, 2017:

***Pension-Related Debt***

As of June 30, 2003, the California Public Employees’ Retirement System (“CalPERS”) implemented a risk pool for the City’s multiple-employer public employee defined benefit pension plan. The City’s Miscellaneous and Safety Plans converted from agent multiple-employer plans to cost-sharing multiple employer plans. In addition to the annual required contributions (see Note 7), the City is also required to make annual payments on a Side Fund, which was created when the City entered the risk pool to account for the difference between the funded status of the pool and the funded status of the City’s plans. The responsibility for funding the Side Fund is specific to the City and is not shared by all employers in the risk pool. The annual payments on the Side Fund represent principal and interest payments on the pension-related debt, which are included in the retirement expenditures in the City’s various functions.

The amount of pension-related debt outstanding at June 30, 2017 totaled \$658,631, which includes \$441,294 for the Safety Fire Plan and \$217,337 for the Safety Police Plan.

***Certificates of Participation***

On October 12, 2011, the City entered into an installment sale agreement with the Public Property Financing Corporation of California 2011 Fire Station Financing Project, Series A and B, Certificates of Participation (the “COP”) for \$1,500,000 and \$300,000, respectively. The principal balance of Series A matures commencing from September 2012 to September 1, 2041, interest rates at 3.75%, payable on March 1 and September 1 of each year. Series B was fully paid as of June 30, 2016. Series A had an outstanding balance of \$1,355,000 at June 30, 2017.

***General Information about the Pension Plan***

*Plan Description*

The City contributes to the California Public Employees’ Retirement System (“CalPERS”), a cost-sharing multiple-employer defined benefit pension plan. CalPERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. CalPERS acts as a common investment and administrative agent for participating public entities within the State of California. Benefit provisions and all other requirements are established by State statute and City ordinance. Copies of the CalPERS annual financial report may be obtained from their Executive Office located at 400 P Street, Sacramento, California 95814.

*Employees Covered by Benefit Terms*

At June 30, 2015, the following employees were covered by the benefit terms:

|                                      | <u>Misc. Tier 1</u>  | <u>Misc. Tier 2</u>  | <u>Misc. PEPR</u>  |

**Note 8 – Defined Benefit Pension Plans (Continued)**

***General Information about the Pension Plan (Continued)***

*Benefit Provided*

CalPERS provide retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Following are the benefit provisions for each plan:

- Fire Tier 1: 3% (at age 50) of the highest average final 12 months' compensation
- Fire Tier 2: 3% (at age 55) of the highest average final 36 months' compensation
- Police Tier 1: 3% (at age 50) of the highest average final 12 months' compensation
- Police Tier 2: 3% (at age 55) of the highest average final 36 months' compensation
- Miscellaneous Tier 1: 2-2.7% (at age 55) of the highest average final 12 months' compensation
- Miscellaneous Tier 2: 2% (at age 60) of the highest average final 36 months' compensation
- PEPRA Miscellaneous: 2% (at age 62) of the highest average final 36 months' compensation

Employees may retire from active service once they reach 50 years of age and have five years of CalPERS-credited service.

The City has contracted with CalPERS for pre-retirement death benefits, should an employee die while actively employed, subject to the employee's eligibility to retire. Eligibility is established when an employee reaches 50 years of age, and has a minimum of five years of CalPERS-credited service.

Upon the death of an eligible employee, beneficiary(ies) may choose to receive: 1) the City-contracted CalPERS retirement formula Option 2W, or 2) the basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay. With either choice, the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit, which provides additional allocations to spouses caring for unmarried children, under the age of 22, or incapacitated children, is provided.

If the employee dies prior to attaining retirement eligibility, beneficiary(ies) receive: 1) the lump sum basic death benefit (employee contributions plus interest) and one month's salary for each year of current services, up to six months' pay, and 2) the City-contracted 4<sup>th</sup> Level 1959 Survivor Benefit.

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retirees designated survivor(s), or to the retiree's estate. Depending on the retirement option chosen, beneficiary(ies) may continue to receive lifetime benefits. The City does not contract for Survivor Continuance. Additionally, the City does not participate in Social Security retirement.

*Contributions*

Section 20814(c) of the California Public Employees' Retirement Law ("PERL") requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through CalPERS' annual actuarial valuation process. The Public agency cost-sharing plans covered by either the Safety risk pools, the Plan's actuarially determined rate is based on the estimated amount necessary to pay the Plan's allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees.

*Contributions (Continued)*

For the measurement period ended June 30, 2016 (the measurement date), the active employee contribution rates were as follows:

| <u>Plans</u>  | <u>Active Employee<br/>Contribution Rate</u> | <u>Employer<br/>Contribution Rate</u> |
|---------------|----------------------------------------------|---------------------------------------|
| Misc. Tier 1  | 8.000%                                       | 28.775%                               |
| Misc. Tier 2  | 7.000%                                       | 7.159%                                |
| Misc. PEPRRA  | 6.250%                                       | 6.616%                                |
| Fire Tier 1   | 9.000%                                       | 58.693%                               |
| Fire Tier 2   | 9.000%                                       | 16.656%                               |
| Fire PEPRRA   | 11.500%                                      | 12.120%                               |
| Police Tier 1 | 9.000%                                       | 58.573%                               |
| Police Tier 2 | 9.000%                                       | 16.656%                               |
| Police PEPRRA | 11.500%                                      | 12.117%                               |

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension***

*Actuarial Methods and Assumptions Used to Determine Total Pension Liability*

For the measurement period ended June 30, 2016 (the measurement date), the total pension liability was determined by rolling forward the June 30, 2015 total pension liability. The June 30, 2016 total pension liabilities were based on the following actuarial methods and assumptions:

|                                  |                                                                                                                           |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------|

*Actuarial Methods and Assumptions Used to Determine Total Pension Liability (Continued)*

All other actuarial assumptions used in the June 30, 2015 valuation were based on the results of an actuarial experience study for the period from 1997 to 2011, including updates to salary increase, mortality and retirement rates. The Experience Study report can be obtained at CalPERS' website under Forms and Publications.

*Change of Assumption*

There were no changes in assumptions for the June 30, 2016 measurement date.

*Discount Rate*

The discount rate used to measure the total pension liability was 7.65 percent. To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress tested plans that would most likely result in a discount rate that would be different from the actuarially assumed discount rate. Based on the testing of the plans, the tests revealed the assets would not run out. Therefore, the current 7.65 percent discount rate is appropriate and the use of the municipal bond rate calculation is not deemed necessary. The long-term expected discount rate of 7.65 percent is applied to all plans in the Public Employees Retirement Fund. The stress test results are presented in a detailed report called "GASB Crossover Testing Report" that can be obtained at CalPERS' website under the GASB 68 section.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, staff took into account both short-term and long-term market return expectations as well as the expected pension fund (Public Employees' Retirement Fund) cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11-60 years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

**Note 8 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

*Proportionate Share of Net Pension Liability and Pension Expense (Continued)*

The following is the approach established by the plan actuary to allocate the net pension liability and pension expense to the individual employers within the risk pool.

- (1) In determining a cost-sharing plan’s proportionate share, total amounts of liabilities and assets are first calculated for the risk pool as a whole on the valuation date (June 30, 2015). The risk pool’s fiduciary net position (“FNP”) subtracted from its total pension liability (“TPL”) determines the net pension liability (“NPL”) at the valuation date.
- (2) Using standard actuarial roll forward methods, the risk pool TPL is then computed at the measurement date (June 30, 2016). Risk pool FNP at the measurement date is then subtracted from this number to compute the NPL for the risk pool at the measurement date. For purposes of FNP in this step and any later reference thereto, the risk pool’s FNP at the measurement date denotes the aggregate risk pool’s FNP at June 30, 2016 less the sum of all additional side fund (or unfunded liability) contributions made by all employers during the measurement period (2014-15).
- (3) The individual plan’s TPL, FNP and NPL are also calculated at the valuation date. TPL is allocated based on the rate plan’s share of the actuarial accrued liability. FNP is allocated based on the rate plan’s share of the market value assets.
- (4) Two ratios are created by dividing the plan’s individual TPL and FNP as of the valuation date from (3) by the amounts in step (1), the risk pool’s total TPL and FNP, respectively.
- (5) The plan’s TPL as of the Measurement Date is equal to the risk pool TPL generated in (2) multiplied by the TPL ratio generated in (4). The plan’s FNP as of the Measurement Date is equal to the FNP generated in (2) multiplied by the FNP ratio generated in (4) plus any additional side fund (or unfunded liability) contributions made by the employer on behalf of the plan during the measurement period.
- (6) The plan’s NPL at the Measurement Date is the difference between the TPL and FNP calculated in (5).

Deferred outflows of resources, deferred inflows of resources, and pension expense is allocate based on the City’s share of contributions during measurement period.

The City’s proportionate share of the net pension liability was as follows:

|                              | Plans     |           |
|------------------------------|-----------|-----------|
|                              | Safety    | Misc.     |
| June 30, 2015                | 0.12071%  | 0.13871%  |
| June 30, 2016                | 0.11579%  | 0.13546%  |
| Change - Increase (Decrease) | -0.00492% | -0.00324% |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

**Note 8 – Defined Benefit Pension Plans (Continued)**

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

*Proportionate Share of Net Pension Liability and Pension Expense (Continued)*

For the year ended June 30, 2017, the City recognized pension expense as follows:

|        |    |                |
|--------|----|----------------|
| Misc.  | \$ | 238,886        |
| Safety |    | 96,863         |
|        | \$ | <u>335,749</u> |

The amortization period differs depending on the source of the gain or loss. The difference between projected and actual earnings is amortized over 5-years straight line. All other amounts are amortized straight-line over the average expected remaining service lives of all members that are provided with benefits (active, inactive and retired) as of the beginning of the measurement period.

The expected average remaining service lifetime (“EARSLS”) is calculated by dividing the total future service years by the total number of plan participants (active, inactive, and retired) in the risk pool. The EARSLS for risk pool for the 2015-16 measurement period is 3.7 years, which was obtained by dividing the total service years of 475,689 (the sum of remaining service lifetimes of the active employees) by 127,009 (the total number of participants: active, inactive, and retired).

At June 30, 2017, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|                                                                                   | Misc.                             |                                  | Safety                            |                                  | Totals                            |                                  |
|-----------------------------------------------------------------------------------|-----------------------------------|----------------------------------|-----------------------------------|----------------------------------|-----------------------------------|----------------------------------|
|                                                                                   | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources | Deferred outflows<br>of Resources | Deferred inflows<br>of Resources |
| Pension contribution after measurement date                                       | \$ 905,129                        | \$ -                             | \$ 1,214,312                      | \$ -                             | \$ 2,119,441                      | \$ -                             |

***Pension Liabilities, Pension Expenses, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pension (Continued)***

***Proportionate Share of Net Pension Liability and Pension Expense (Continued)***

Reported deferred outflows of resources related to pensions resulting from City’s contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

| Year Ended June 30, | Deferred Outflows/ (Inflows) of Resources |                     |                     |
|---------------------|-------------------------------------------|---------------------|---------------------|
|                     | Misc                                      | Safety              | Total               |
| 2018                | \$ 57,610                                 | \$ 273,905          | \$ 331,515          |
| 2019                | 40,801                                    | 256,016             | 296,817             |

**Note 9 – Other Postemployment Benefits Plan**

**Defined Benefit Plan**

***Plan Description***

The City contributes to a multi-employer cost-sharing defined benefit plan to provide post-employment medical benefits. Specifically, the City provides postretirement medical benefits to all employees who retire from the City after attaining age 50 with at least 5 years of service. The plan does not provide a publicly available financial report.

***Funding Policy***

The contribution requirements of plan members and the City are established and may be amended by the City’s City Council, and/or the employee associations. The required employer contribution was \$128 per person for months in 2016 and \$125 per person per month in 2017. Retirees pay the differential monthly amount of the premium, which varies depending on the health benefits they select. The City implemented GASB 45 for the fiscal year ended June 30, 2010, establishing a liability in its Risk Management Fund for the value of the annual required contribution (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a closed period not to exceed thirty years. The ARC and contribution total for year ended June 30, 2017 was \$194,209 and \$59,727, respectively.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 9 –Other Postemployment Benefits Plan (Continued)**

**Defined Benefit Plan (Continued)**

***Annual OPEB Cost and Net OPEB Asset***

The City’s annual OPEB cost is calculated based on the ARC. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excesses) over a period not to exceed thirty years. The following table shows the components of the City’s annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the City’s net OPEB Obligation:

|                                            |    |                       |
|--------------------------------------------|----|-----------------------|
| Annual Required Contribution               | \$ | 191,821               |
| Interest Adjustment                        |    | 25,201                |
| Adjustment to Annual Required Contribution |    | <u>(22,813)</u>       |
| Annual OPEB Cost                           |    | 194,209               |
| Contribution made                          |    | <u>(59,727)</u>       |
| Change in Net OPEB Obligation              |    | 134,482               |
| Net OPEB Obligation, Beginning of Year     |    | <u>347,607</u>        |
| Net OPEB Obligation, End of Year           | \$ | <u><u>482,089</u></u> |

The City’s annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the year ended June 30, 2017 and the two preceding years were as follows:

| <u>Year Ended</u> | <u>OPEB Cost</u> | <u>OPEB Cost<br/>Contributed</u> | <u>Percentage of<br/>Annual OPEB cost<br/>Contributed</u> | <u>Net OPEB<br/>Obligation</u> |
|-------------------|------------------|----------------------------------|-----------------------------------------------------------|--------------------------------|
| June 30, 2015     | \$ 146,217       | \$ 49,658                        | 33.96%                                                    | \$ 206,590                     |
| June 30, 2016     | 193,497          | 52,480                           | 27.12%                                                    | 347,607                        |
| June 30, 2017     | 194,209          | 59,727                           | 30.75%                                                    | 482,089                        |

***Funded Status and Funding Progress***

As of August 1, 2015, the latest actuarial valuation date, there were no plan assets on the valuation date. The actuarial accrued liability for benefits was \$1,938,928, and the actuarial value of assets was \$614,048, resulting in an unfunded actuarial accrued liability (UAAL) of \$1,324,880. The covered payroll (annual payroll of active employees covered by the plan) was \$6,509,854 and the ratio of the UAAL to the covered payroll was negative 20.35%.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 9 –Other Postemployment Benefits Plan (Continued)**

**Defined Benefit Plan (Continued)**

***Funded Status and Funding Progress (Continued)***

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the City are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

***Actuarial Methods and Assumptions***

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and the plan members at that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets consistent with the long-term perspective of the calculations.

The required contribution for the year ended June 30, 2017 was determined as part of the August 1, 2015 actuarial valuation using the entry age normal actuarial cost method. The actuarial assumptions included a 4.5% investment rate of return (net of administrative expenses), payroll increase of 2.75% per annum, and inflation rate of 2.75% per annum, and the City's share of premium cost will increase at rates of 4% per annum. The level percentage of payroll method is used to allocate amortization cost by year, closed 30-year amortization period is used for the initial UAAL, and open 24-year amortization period is used for any residual UAAL.

**Defined Contribution Plan**

The City participates in a defined contribution benefit plan with Vantagecare RHS plan through ICMA-RC. The City has substantial control, meaning the City has authority to establish, amend, or terminate. All classes of full time employees are eligible to participate. During fiscal year ending June 30, 2017, there were 41 participants in the City's plan.

**Note 10 – Liability, Workers' Compensation, and Purchased Insurance**

***A. Description of Self-Insurance Pool Pursuant to Joint Powers Agreement***

The City of Morro Bay is a member of the CALIFORNIA JOINT POWERS INSURANCE AUTHORITY (Authority). The Authority is composed of 117 California public entities and is organized under a joint powers agreement pursuant to California Government Code §6500 et seq. The purpose of the Authority is to arrange and administer programs for the pooling of self-insured losses, to purchase excess insurance or reinsurance, and to arrange for group purchased insurance for property and other lines of coverage. The California JPIA began covering claims of its members in 1978. Each member government has an elected official as its representative on the Board of Directors. The Board operates through a nine-member Executive Committee.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 10 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

***B. Self-Insurance Programs of the CJPIA***

Each member pays an annual contribution at the beginning of the coverage period. A retrospective adjustment is then conducted annually thereafter, for coverage years 2012-13 and prior. Coverage years 2013-14 and forward are not subject to routine annual retrospective adjustment. The total funding requirement for self-insurance programs is based on an actuarial analysis. Costs are allocated to individual agencies based on payroll and claims history, relative to other members of the risk-sharing pool.

Liability

Claims are pooled separately between police and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$30,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$30,000 to \$750,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$750,000 to \$50 million, are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2016-17 the Authority’s pooled retention is \$2 million per occurrence, with reinsurance to \$20 million, and excess insurance to \$50 million. The Authority’s reinsurance contracts are subject to the following additional pooled retentions: (a) \$2.5 million annual aggregate deductible in the \$3 million in excess of \$2 million layer, and (b) \$3 million annual aggregate deductible in the \$5 million in excess of \$10 million layer. There is a third annual aggregate deductible in the amount of \$2.5 million in the \$5 million in excess of \$5 million layer, however it is fully covered under a separate policy and therefore not retained by the Authority. The overall coverage limit for each member, including all layers of coverage, is \$50 million per occurrence. Costs of covered claims for subsidence losses have a sub-limit of \$30 million per occurrence.

Workers’ Compensation

Claims are pooled separately between public safety (police and fire) and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula. (2) The first layer of losses includes incurred costs up to \$50,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the first layer. (3) The second layer of losses includes incurred costs from \$50,000 to \$100,000 for each occurrence and is evaluated as a percentage of the pool’s total incurred costs within the second layer. (4) Incurred costs from \$100,000 to statutory limits are distributed based on the outcome of cost allocation within the first and second loss layers.

For 2016-17 the Authority’s pooled retention is \$2 million per occurrence, with reinsurance to statutory limits under California Workers’ Compensation Law. Employer’s Liability losses are pooled among members to \$2 million. Coverage from \$2 million to \$5 million is purchased as part of a reinsurance policy, and Employer’s Liability losses from \$5 million to \$10 million are pooled among members.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 10 – Liability, Workers’ Compensation, and Purchased Insurance (Continued)**

**C. *Purchased Insurance***

Property Insurance

The City of Morro Bay participates in the all-risk property protection program of the Authority. This insurance protection is underwritten by several insurance companies. City of Morro Bay property is currently insured according to a schedule of covered property submitted by the City of Morro Bay to the Authority. City of Morro Bay property currently has all-risk property insurance protection in the amount of \$95,122,372. There is a \$5,000 deductible per occurrence except for non-emergency vehicle insurance which has a \$2,500 deductible.

Earthquake and Flood Insurance

The City of Morro Bay purchases earthquake and flood insurance on a portion of its property. The earthquake insurance is part of the property protection insurance program of the Authority. City of Morro Bay property currently has earthquake protection in the amount of \$50,661,461. There is a deductible of 5% per unit of value with a minimum deductible of \$100,000.

Crime Insurance

The City of Morro Bay purchases crime insurance coverage in the amount of \$1,000,000 with a \$2,500 deductible. The fidelity coverage is provided through the Authority.

Special Event Tenant User Liability Insurance

The City of Morro Bay further protects against liability damages by requiring tenant users of certain property to purchase low-cost tenant user liability insurance for certain activities on agency property. The insurance premium is paid by the tenant user and is paid to the City of Morro Bay according to a schedule. The City of Morro Bay then pays for the insurance. The insurance is facilitated by the Authority.

**D. *Adequacy of Protection***

During the past three fiscal years, none of the above programs of protection experienced settlements or judgments that exceeded pooled or insured coverage. There were also no significant reductions in pooled or insured liability coverage in 2016-17.

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 11 – Lease Revenues**

In September of 2008 the City entered into a lease agreement to lease the property located at 1700 Embarcadero. The lease term is from the commencement date, September 1, 2008 to August 30, 2028. In consideration for the lease the JPA between the City and District will received minimum annual lease payments of \$175,000 that is payable in equal semiannual installments. The parties agreed that at the start of each fiscal year the annual minimum lease payments will be increased in direct proportion to any upward movement in the Consumer Price Index. These lease revenues are recorded in the General Fund of the City.

In January 2014 the City entered into a 49-year lease, terminating in 2062, for lease site 82-85. Annual minimum rent was originally set at \$58,587. The lease agreement included a clause for the CPI adjustment of the annual minimum rent each July 1. Annual minimum rent for fiscal year 2018 is \$118,434.

In January 1993 the City entered into a 40-year lease, terminating in 2032, for lease site 78-81. Annual minimum rent was originally set as \$30,062 with a CPI adjustment every July 1 and an initial adjustment to six percent of the fair market value of the property during fiscal year 2014. Annual minimum rent for fiscal year 2018 is \$125,942.

In January 2006 the City entered into a 46-year lease, terminating in 2052, for lease site 91-92. Annual minimum rent was originally set at \$30,000 with a CPI adjustment every July 1. Annual minimum rent for fiscal year 2018 is \$114,520.

In July 1998 the City entered into a 20-year lease, terminating in 2018, for lease site 122-123. Annual minimum rent was originally set at \$30,000 with a CPI adjustment every July 1. In 2009 the City and tenant agreed to extend the lease until June 30, 2023. Annual minimum rent for fiscal year 2018 is \$100,359.

All of the above leases are accounted for as operating leases by the City.

The future minimum rental revenues under these leases are as follows:

| Year ending<br>June 30, | Amounts              |
|-------------------------|----------------------|
| 2018                    | \$ 1,941,181         |
| 2019                    | 1,843,151            |
| 2020                    | 1,728,115            |
| 2021                    | 1,692,148            |
| 2022                    | 1,692,048            |
| 2023-2027               | 8,332,467            |
| 2028-2032               | 17,503,594           |
| <b>Total</b>            | <b>\$ 34,732,704</b> |

**City of Morro Bay**  
**Notes to the Basic Financial Statements (Continued)**  
**For the Year Ended June 30, 2017**

---

**Note 13 – Commitments and Contingencies**

**A. Commitments**

The City had several outstanding or planned constructions as of June 30, 2017. However, those constructions neither were contractual nor carried over in a budget. Open constructions are re-budgeted and adopted in a new fiscal year.

**B. Contingencies**

The City is subject to various legal matters incidental to the ordinary course of City operations. At this time, the outcome of these matters and the potential loss, if any, that might result are uncertain. No provision for any liability that may result has been made in the financial statements for these matters.

**C. Grants**

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies. While no matters of noncompliance were disclosed by the audit of the financial statements or single audit of the Federal grant programs, grantor agencies may subject grant programs to additional compliance tests, which may result in disallowed costs. In the opinion of management, future disallowances of current or prior grant expenditures, if any, would not have a material adverse effect on the financial position of the City.

---

**Budgetary Information**

Budgets are annually adopted for all governmental and proprietary fund types on a basis consistent with generally accepted accounting principles. The City is required by its municipal code to adopt an annual budget on or before June 30 for the ensuing fiscal year. From the effective date of the budget, the amounts become the “*annual appropriated budget*.”

The appropriated budget is prepared by fund, department and division. The City Council may amend the budget by motion during the fiscal year. Expenditures may not legally exceed appropriations at the fund level. The City Manager is authorized to transfer budgeted amounts between departments within the same fund; however, any transfers between funds or revisions that alter total appropriations of any fund require City Council approval. The legal level of control is therefore at the fund level.

Supplemental appropriations, which increase appropriations, were made during the fiscal year, therefore, “final” budgeted revenue and appropriation amounts shown in the financial statements represent the original budget, modified for adjustments during the year. Appropriations lapse at the end of the fiscal year.

Encumbrances - Under encumbrance accounting, purchase orders, contracts and other commitments for expenditures are recorded to reserve that portion of the applicable appropriation. Encumbrance accounting is employed as an extension of formal budgetary accounting. Unexpended appropriations lapse at year-end.

No budgets were adopted for the Lower Cost Visitor Accommodation, Parking In-Lieu and Park Fees Special Revenue Funds.

# NONMAJOR SPECIAL REVENUE FUNDS

---

***Morro Bay Tourism Business Improvement District (MTBID) Special Revenue Fund*** - to account for the marketing activities of the MTBID and the Visitors Center.

***Gas Tax Special Revenue Fund*** - to account for monies received from gasoline taxes.

***Lower Cost Visitor Accommodation Special Revenue Fund*** – to accounts for collections in-lieu mitigation fees for lower cost visitor serving overnight accommodations, such as hostels and tent campground units, as required by California Coastal Commission actions on coastal development permits.

***Traffic Safety Grant Special Revenue Fund*** – to account for fines and forfeitures collected from any person charged with a misdemeanor.

***Special Safety Grant Special Revenue Fund*** – To account for the Supplemental Law Enforcement Services Fund (SLESF) grant.

***Parking In-Lieu Special Revenue Fund*** – To account for in-lieu fees charged for parking spaces required to adequately service a new business establishment, or the expansion of an existing one.

***Bike Path Special Revenue Fund*** – To account for two percent of Transportation Development Act funds received by the City that are specifically set aside for bike path.

***Special Assessment District Special Revenue Fund*** – to account for parcel assessments and expenditures associated with certain housing developments within the City limits.

***Governmental Impact Fees Special Revenue Fund*** – to account for fees collected to ensure that new development pays the cost of infrastructure expansion required to meet the needs of that new development, effectively transferring the cost burden of growth from the existing rate and taxpayers.

***State Park Marina Special Revenue Fund*** – To account for marina concessions revenues that are received for the planning and environmental review of the proposed dredging and renovation of the State Park Marina.

***Affordable Housing In-lieu Special Revenue Fund*** – To account for collection of impact fees for affordable housing.

***Cloisters Special Assessment District Special Revenue Fund*** – To account for parcel assessments and expenditures associated with the Cloisters housing developments within the City limits.

***Local Transportation Funds ("LTF") Roads Special Revenue Fund*** – To account for Transportation Development Act (TDA) money for roads projects, under TDA Article 8, 99400(a).

***Park Fees Special Revenue Fund*** – To account for special revenue fees collected under the 1975 Quimby Act (California Government Code §66477).

***District Transaction Tax Special Revenue Fund*** – To account for ½ cent district sales tax, commonly known as “Measure Q”.

***Community Development Grants Special Revenue Fund*** – To account for financial resources to be used for offering low or no interest-bearing loans to income-qualifies homeowners for the acquisition or rehabilitation of owner-occupied site built or manufactured homes.

***Capital Improvement Capital Projects Fund*** - To account for financial resources to be solely used for the construction of capital assets.

# STATISTICAL SECTION

# OVERVIEW

---

This part of the City’s comprehensive annual financial report is not covered by the Independent Auditor’s Report, but presents supplemental detailed information for the benefit of readers in understanding what the information in the financial statements, note disclosures, and required supplementary information says about the government’s overall financial health.

## **Contents**

### **Financial Trends (pages 130-142)**

These schedules contain trend information to help the reader understand how the City’s financial performance and well-being have changed over time.

### **Revenue Capacity (pages 148-160)**

These schedules contain information to help the reader assess the City’s most significant local revenue sources, transient occupancy tax (“TOT”) and property taxes.

### **Debt Capacity (pages 162-164)**

These schedules present information to help the reader assess the affordability of the City’s current levels of outstanding debt and the City’s ability to issue additional debt in the future.

### **Demographic and Economic Information (page 166)**

These schedules offer demographic and economic indicators to help the reader understand the environment with which the City’s financial activities take place.

### **Operating Information (pages 167-170)**

These schedules contain service and infrastructure data to help the reader understand how the information in the City’s financial report relates to the services the government provides and the activities it performs.

(Concluded)

Notes:

In FY 2012, City employees, except sworn Police, either paid an additional percentage of the employee contribution to CalPERS or had their salaries reduced. All City employees are now paying 100% of the CalPERS employee-paid contribution.

Note: In 1978, the voters of the State of California pass Proposition 13, which limited the property taxes to a total maximum rate of 1% based upon the assessed value of the property being taxed. Each year, the assessed value of property may be increased by an "inflation factor," which is limited to a maximum increase of 2%. With few exceptions, property is only re-assessed at the time it is sold to a new owner. At that point, the new assessed value is re-assessed at the purchase price of the property sold.

The assessed valuation data, shown above, represents the only data currently available with respect to the actual market value of taxable property, and is subject to the limitations described above.

Notes:

1. The secured property tax roll is composed of ad valorem taxes, as well as special assessments, and is calculated by the San Luis Obispo County Auditor-Controller. The San Luis Obispo County Tax collector is responsible for all property tax roll collections within the City of Morro Bay. The amount reported is before the SB2557 County administrative fees of approximately 3% of total property tax revenues.
2. The secured levy does not include supplemental assessments, unsecured tax revenues or prior year adjustments. In 2012/13, a one-time refund of \$104,903 was received from the County Auditor-Controller, for prior year overcharges of the SB2557 fee.
3. The City has elected the Teeter Plan-method of property tax collection, whereby the County remits 100% of taxes levied to the City, pursues collection of unpaid/delinquent taxes, and retains the taxes collected, as well as related penalties and interest.

<sup>1</sup> May 2008 was the beginning of the Morro Bay Tourism Business Improvement District (TBID). The assessment was set by Ordinance to be 2%, but the City Council took action to increase the collection rate to 3% for one year.

<sup>2</sup> TBID's first full year of operation; assessment rate was 3%, until May 2010, when it returned to 2%, per the Ordinance.

<sup>3</sup> TBID collected assessments at 2% through October; Council action set the rate at 3% for November and until further Council action was taken to change it.

Source: City of Morro Bay Finance Department - Transient Occupancy Reports; these reports may vary from fiscal year-to-year to the TOT reported in the financials, due to reporting method differences. Financials accrue the entire month of July, and may pick up small amounts that apply to the future period. Additionally, net TOT audit results are included in the financial statement amount, and not recorded in these reports.

Notes:

- 1 The Bradley-Burns Uniform Local Sales and Use Tax Law was enacted in 1955. The law authorizes cities and counties to impose a sales and use tax.
- 2 In March 2004, a State ballot measure was passed, issuing deficit reduction bonds for State purposes. Funding was provided, effective July 1, 2004, by repealing 25% of the local 1% sales tax, and adopting a new 1/4 cent sales tax, dedicated to repayment of the deficit reduction bonds. Cities and counties would be made whole by the state from increased property tax allocations, via reduced contributions to ERAF. This *triple flip* is theoretically revenue-neutral, and as such, the effective rate, for revenue purposes, remains at 1%.
- 3 In November 2006, voters in Morro Bay approved a local sales tax measure (Measure Q), increasing the City rate by 1/2%, which became effective April 1, 2007.

Notable changes:

2015/16: Deputy City Manager position established for economic development; one additional firefighter was hired; City dispatch services were transferred to the SLO County Sheriff and County Fire, reducing Police non-sworn personnel to support services/records only.

## EXHIBIT V. CONSTRUCTION PLANS AND SPECIFICATIONS

The City will use a design-build project delivery method for this project. The Design-Build Contractor will be responsible for preparing construction plans and specifications, and the City will submit these as soon as they are available. The Request for Proposals, selected proposal, and rationale for selection of the design-build contractor are included as **Exhibit V**.

# Request for Proposals

The Owner has selected three teams from the interested teams who submitted SOQs for the Project described below to submit Proposals pursuant to this **REQUEST FOR PROPOSALS** ("RFP"). By submitting a Proposal, the Proposer represents that it has carefully read the terms and conditions of this RFP, including all attachments and addenda, and agrees to be bound by them. Only those teams selected by the Owner (shortlisted) are eligible to submit Proposals for this RFP. Submissions by others or non-shortlisted teams will not be considered.

**OWNER:** City of Morro Bay  
**MAILING ADDRESS:** 595 Harbor Street  
**PHYSICAL ADDRESS:** 955 Shasta Avenue  
Morro Bay, CA 93442

**PROJECT:** Water Reclamation Facility (WRF) Onsite Improvements  
Morro Bay, CA

**OWNER CONTACT PERSON:** Rob Livick, PE/PLS  
Public Works Director/City Engineer  
955 Shasta Avenue  
Morro Bay, CA 93442

## PROPOSAL DUE DATE AND TIME:

Proposals shall be submitted no later than: April 24, 2018 at 2:00 PM

All Proposals must be submitted pursuant to the instructions below. It is the Proposer's sole responsibility to ensure that the Proposal is delivered in the manner required in this RFP by the Due Date and Time. Owner has the right to reject any Proposals not properly delivered.

## **SECTION 1 GENERAL INFORMATION**

### **1.1 General**

The City of Morro Bay is soliciting proposals from previously qualified design-build entities for the design-build of the Water Reclamation facility Project Onsite Improvements at the South Bay Boulevard site ("Project").

The Proposal requirements are detailed in this RFP. This RFP process is the second step in the two-step procurement process for the Project. This RFP incorporates the terms, definitions, and schedules set forth in the Request for Qualifications ("RFQ") and any Addenda issued thereto; however, to the extent that the RFP conflicts with the RFQ and any Addenda thereto, the RFP shall prevail and shall be considered an addendum to previously published information. Proposers must submit their Proposals pursuant to the schedule set forth in this RFP. This RFP is not an offer to enter into a contract, but is merely a solicitation of entities interested in submitting a Proposal to the Owner for the Project.

### **1.2 Pre-Proposal Conference**

A pre-proposal conference will be held at 10:00 a.m., on Tuesday February 6, 2018 in the Studio Room at Morro Bay Community Center, 1001 Kennedy Way, Morro Bay, California 93442. Prospective Proposers are required to attend since City Staff will be present to answer any questions regarding the Proposal Specifications; there will also be a project site tour.

### **1.3 Proposal Submission and Deadline**

Proposals shall be submitted with all documents required in this RFP properly signed by the Proposer, delivered under sealed cover, and plainly marked:

**DESIGN-BUILD OF THE WATER RECLAMATION FACILITY ONSITE IMPROVEMENTS  
FOR THE CITY OF MORRO BAY**

**DESIGN-BUILD ENTITY'S NAME**

**SUBMITTAL DEADLINE: APRIL 24, 2018, AT 2:00 PM**

The Proposals shall be submitted to the Public Works Director/City Engineer electronically through the City's Procure system and at the addresses below for the hard copies prior to the date and time specified in the Procurement Schedule in Section 1.4 of this RFP. At that time all proposals will be publicly opened and recorded. Proposals received after the deadline will not be accepted.

**CITY OF MORRO BAY**

**ATTN: ROB LIVICK, PUBLIC WORKS DIRECTOR**

**Mailing Address: 595 Harbor Street, Morro Bay, California 93442**

**Physical Address: 955 Shasta Avenue, Morro Bay, California 93442**

Each Proposer shall carefully examine each term of this Request for Proposal; and each Proposer shall judge all the circumstances and conditions affecting his/her proposal. Failure on the part of any Proposer to make such examination and to investigate thoroughly shall not be grounds for any declaration that the Proposer did not understand the conditions of this Request for Proposal.

The Proposer shall comply with all federal, state or local laws which apply to the services and products herein specified.

Proposers will submit eight (8) printed copies of their technical proposal and cost proposal, including life cycle costs marked clearly with “PROPOSAL FOR WRF ONSITE IMPROVEMENTS OFFERED BY” and the Proposer’s name to the City’s address provide; and one electronic copy of the technical proposal and cost proposal, including life cycle costs, in fully searchable pdf format through the City’s Procore System. Each proposal must contain the sections as detailed in this RFP.

This solicitation for proposals does not commit the City of Morro Bay to enter into a Contract. The City of Morro Bay reserves the right to accept or reject any proposals, and to negotiate with any qualified source, or to cancel in part or in its entirety this Request for Proposals. It may accept the proposal that it considers to be in the interest of the City of Morro Bay, with or without negotiation.

The City reserves the right to waive any informality or minor irregularity when it is in the best interest of the City to do so, to negotiate for the modification of any proposal with mutual consent of the Proposer, to re-advertise for proposals if desired, and to accept the proposal which in the judgment of the City, even though it does not offer the lowest cost, is nevertheless deemed to offer the best value for the public and City. Any proposal which is incomplete, conditional, obscure, or which contains irregularities of any kind, may be cause for rejection.

#### **1.4 Procurement Schedule**

The following is the anticipated Procurement Schedule for the City. The Owner reserves the right to modify the schedule via Addenda.

| <b>Task</b>                                  | <b>Date</b>                  |
|----------------------------------------------|------------------------------|
| <b>Issue RFP</b>                             | January 24, 2018             |
| <b>Pre-Proposal Conference and Site Walk</b> | February 6, 2018 at 10:00 AM |
| <b>Last Day for Formal Questions</b>         | March 23, 2018 at 5:00 PM    |
| <b>Proposals Due/Opening</b>                 | April 24, 2018 at 2:00 PM    |
| <b>Proposal Review Process</b>               | April 24 – June 18, 2018     |
| <b>Interviews</b>                            | May 2018                     |
| <b>EIR Certification</b>                     | June 2018                    |
| <b>Contract Negotiations</b>                 | June-July 2018               |
| <b>Contract Award</b>                        | August 2018                  |
| <b>Construction Complete</b>                 | Fall 2021                    |
| <b>Commissioning Complete</b>                | Spring 2022                  |

## **1.5 Owner's Program**

- 1.5.1** Attachment A to this RFP is the Performance Criteria Report. The Performance Criteria Report describes the Project scope and contains the City Project goals and objectives as well as the performance criteria for the Project. The Performance Criteria Report will become part of the Performance Requirements, which are defined in Article 1 Paragraph 1.21 of the attached Design Build Contract (Attachment B). All submittals from Proposers must be consistent with and designed to achieve the goals and objects set forth in the Performance Criteria Report.
- 1.5.2** Proposers shall be entitled to reasonably rely on the accuracy of the information represented in the design or prescriptive specifications set forth in the RFP and their compatibility with other information set forth in Performance Criteria Report for the purposes of developing the Proposer's Technical and Price Proposals. However, the selected Design Build Entity (DB) will be required to perform an independent evaluation of all information provided by the Owner, including but not limited to such design or prescriptive specifications to validate the information provided by the Owner. Further, regardless of the inclusion of design or prescriptive specifications, the selected DB shall remain responsible for meeting the performance requirements of the Project, including but not limited to the requirements described in the Performance Criteria Report as well as all applicable Legal Requirements. Provided the selected DB complies with all requirements set forth in the Contract, including but not limited to those regarding notice of claims to the Owner and identification of differing site conditions, and only to the extent that the Contract allows the selected DB to an adjustment in the Contract Price and Project Schedule, the selected DB will be entitled to an adjustment in the Contract Price and Project Schedule. Such adjustment shall be limited to the extent DB's actual documented costs or the critical path of the Project Schedule have been adversely impacted by materially inaccurate design or prescriptive specifications that are inconsistent with meeting the Project's performance requirements.
- 1.5.3** The Owner assumes no responsibility for conclusions or interpretations made by the Proposer based on the information provided by the Owner. Oral statements made by the Owner representatives are not binding on the Owner unless the Owner confirms the statements and changes by written Addendum to the RFP. In the event of a conflict between codes, industry standards and the Performance Criteria Report, the most stringent requirements shall apply and Proposers shall submit their Proposals based on the most stringent requirements.

## **1.6 Sample Contract Documents**

Attachment B to this RFP is the proposed form of Contract between the Owner and DB. The Contract Documents will also include at a minimum the Attachments to the RFP, all Appendices to the Performance Criteria Report, and the finalized proposals submitted by the DB.

## **1.7 Expenses of the Proposers and Payment of an Honorarium**

The City will pay an honorarium equal to \$75,000 to each Proposer who provides a responsive, but unsuccessful, Proposal. If the City does not award the Design Build Contract following receipt of Proposals, all responsive Proposers will receive the honorarium amount.

The City will pay the honorarium to each eligible Proposer within 90 days after the award of the Design Build Contract or the decision not to award the Design Build Contract. Acceptance of the honorarium shall constitute a full, final, and complete release of all rights, claims, and demands of the Proposer against the City arising out of or pertaining to the Project. In consideration for paying the honorarium, the City may use any of the ideas or information contained in the Proposals in connection with any contract awarded for the

Project, or in connection with any subsequent procurement, without any obligation to pay any additional compensation to the unsuccessful Proposers.

A Proposer may elect to waive payment of the honorarium within 30 days after the award of the Design Build Contract, in which case the City will be precluded from using any ideas or information contained in its Proposal. The City will not be precluded, however, from using any idea or information that is common to a Proposal received from another Proposer accepting the honorarium, or otherwise is publicly available.

With the exception of payment of the honorarium as described in the subsequent paragraph, if applicable, the City accepts no liability for the costs and expenses incurred by the Proposers in responding to this RFP, responding to clarification requests and discussion meetings, preparing resubmittals and any other activities included as part of this procurement process. In addition, if a Proposer performs any additional investigations as part of the Proposal preparation activities, these costs shall be at the sole cost and expense of the Proposer. Each Proposer that enters into the procurement process shall prepare the required materials and submittals at its own expense and with the express understanding that they cannot make any claims whatsoever for reimbursement from the City for the costs and expenses associated with the process.

## SECTION 2 RFP PROCUREMENT PROCESS

To be responsive to the RFP and obtain the stipend/honorarium set forth in the RFP, Proposers must submit responsive Proposals and participate fully in the following RFP Procurement Process.

### **2.1 Pre-Proposal Conference**

A pre-proposal conference will be held at 10:00 a.m., on Tuesday February 6, 2018 in the Studio Room at the Morro Bay Community Center at 1001 Kennedy Way, Morro Bay, California 93442. Short-listed Proposers are required to attend. City Staff will be present to provide an overview of the Proposal Specifications; there will also be a project site walk. Any questions presented at this mandatory meeting will be recorded and responded to via Addendum. Proposers must follow the City safety procedures while attending the Site Walk. City safety procedures require that PPE including work boots and high visibility vests be worn during this site tour.

### **2.2 Proposed Changes in the Design-Build Contract Documents**

**2.2.1** Submission of a Proposal pursuant to this procurement is a representation by the Proposer that it has reviewed the Contract Documents, including but not limited to the Performance Criteria Report (including Appendices) and all attachments to this RFP, and the Proposer is willing to perform any and all work necessary including such technical, construction and any other work necessary to provide a fully operational facility that meets or exceeds those criteria detailed in the Performance Criteria Report for the terms set forth in the Contract Documents.

**2.2.2** Prior to the date set forth in the schedule, Proposers may propose changes to the Contract Documents, including but not limited to the insurance requirements, bonding requirements, Performance Criteria Report, and Design-Build Contract. The Owner's goals in requesting such proposed changes are: i) to discover provisions in the Contract Documents that unnecessarily increase the cost of the Project or complicate the performance of the Work, and ii) to identify contract provisions and commercial terms the DB intends to negotiate if selected. Therefore, with every proposed change, Proposers must include the following information:

- The document and section number
- Proposed alternate language
- An explanation for the requested change
- Any impact the requested change has on any commercial term in the Contract Documents or Performance Criteria Report

**2.2.3** The Owner may discuss any proposed changes at any point during the interview or negotiation process. The Owner reserves the right to reject any and all proposed changes and to accept any proposed change to the Contract Documents via Addendum to the RFP. The Owner also reserves the right to negotiate such provisions with the selected Proposer.

## **2.3 Alternative Technical or Management Concepts**

- 2.3.1** Prior to the date set forth in the schedule, Proposers may submit Alternative Technical or Management Concepts (“Alternative Concepts” or “ATCs”) that may offer alternative means in achieving the required performance criteria. The Owner’s goal in requesting Alternative Concepts is to encourage innovation by Proposers to better meet the Owner’s Project Objectives set forth in Section 2.B of the RFQ.
- 2.3.2** ATCs should meet or exceed the performance requirements set forth in the Performance Criteria Report; however, Proposers may submit ATCs that contain solutions that are substantially equal to the performance requirements set forth in the Performance Criteria Report if the solution provides a guaranteed cost savings for the Project. ATCs that merely cut a portion of the scope of Work or provide a lesser standard of performance or materials will not be considered.
- 2.3.3** Proposers must identify the portion of the Performance Criteria Report that is inconsistent with the solution presented in the ATC. By identifying any cost savings because of the Owner’s acceptance of the ATC, the Proposer guarantees both performance and cost savings to the Owner if the ATC is accepted.
- 2.3.4** The City will respond in writing to each ATC to let the proposer know if the ATC is rejected or if it may be submitted as an acceptable alternative to the Performance Criteria. The Owner reserves the right to consider Alternative Concepts and accept or reject such Alternative Concepts in whole or in part. If the Owner accepts an Alternative Concept that is contrary to the Performance Criteria Report, the Owner shall issue an Addendum to this RFP altering that portion of the RFP that is inconsistent with the accepted Alternative Concept. Such Addenda will be issued prior to the date set forth in the schedule.
- 2.3.5** The Owner will make an independent determination with respect to the extent to which the Alternative Concept is consistent with the Performance Criteria Report as well as any changes necessary to the Performance Criteria Report to allow the Owner to accept the Alternative Concept. Notwithstanding any consideration, acceptance, or rejection of an Alternative Concept as part of the procurement, the Owner reserves the right to consider such Alternative Concepts during the performance of the Project and amend the Performance Criteria Report to include the Alternative Concept.
- 2.3.6** If an Proposer claims that any portion of a submitted Alternative Concept is proprietary or confidential information, the Proposer shall identify that portion of the Alternative Concept that it considers to be proprietary. The Owner will consider the request to keep such information proprietary but reserves the right to make its own determination regarding the proprietary nature of the Alternative Concept. If the Owner disagrees with the Proposer’s designation of the information as proprietary, the Owner will provide written notice to the Proposer and an opportunity to withdraw or modify the proprietary information prior to disclosure.

## **2.4 Confidential Individual Meetings with the Owner**

### **2.4.1 Proprietary Meetings**

- The Owner will conduct up to two (2) Proprietary Meetings with each Proposer individually. The Proprietary Meetings will provide an opportunity for the Proposer to ask the Owner questions regarding the Proposal, Alternative Technical Concepts, and/or proposed changes in the form of contract. The Proprietary Meeting(s) will last no more than two (2) hour(s) and will occur before the submission of the Technical Proposal.

- The Short Listed Proposers will have an opportunity to describe their Proposal and any Alternative Technical Concepts or proposed changes in the Contract Documents. Proposers are encouraged to focus on how their proposed approach for the Project will distinguish themselves from other Proposers, meet the Owner's needs and objectives as well as achieve Design Excellence. The Owner will have an opportunity to ask questions regarding the submitted Proposals and/or proposed changes in the Contract Documents.
- Proposers may not rely on any oral statement to accept an ATC or Proposal in the Proprietary Meeting unless such oral statement is contained in a written Addendum to the RFP issued by the Owner.
- Any presentations at the Proprietary Meetings should be in Microsoft PowerPoint with paper handouts of the presentation.
- The intent of the Proprietary Meeting is to discuss the Proposal, Alternative Technical Concepts, and proposed changes to the Contract; therefore, the Proposers will not be scored with respect to the Proprietary Meeting itself. However, the Owner reserves the right to evaluate the interaction of the proposed Design-Build Team with the Owner with respect to the Proposer's ability to collaborate with the Owner.

#### **2.4.2 Interview**

- The Owner shall conduct an individual Interview with each Short-Listed Proposer. The Interview shall be approximately 2 hours and will occur after the submission of the Technical Proposal. The Proposers will be allowed 1 hour and 15 minutes for a project management and technical proposal presentation, followed by 45 minutes for questions from the Owner.
- Proposers should include in the presentation an explanation of the design solution and how the design solution meets or exceeds the Owner's Project Goals and the definition of Design Excellence for this Project. The presentation should include the project management approaches that will ensure the project is completed within the scheduled duration and within the project budget.
- The Owner reserves the right to ask questions of the Proposer, including but not limited to questions regarding the Proposer's SOQ and/or Technical Proposal.
- Any presentations at the Proprietary Meetings should be in in Microsoft PowerPoint with paper handouts of the presentation.
- Proposers will have access to the following equipment for their presentations: A laptop computer and a large monitor connected to the laptop.

#### **2.5 Technical Proposal**

Proposers shall submit the Technical Proposal pursuant to the instructions set forth herein (refer to section 3) at or before the time set forth in the schedule. Proposers are encouraged to focus on the concerns of the Owner as set forth below in submitting their Proposal.

#### **2.6 Price Proposal**

- 2.6.1** Proposers will submit Price Proposals (per section 1.3 above) with the other proposal documents pursuant to the Schedule and in compliance with the instructions set forth in Attachment C. Price Proposals shall be based on the RFP and Contract Documents as amended by Addenda. The prices submitted in the Price Proposals will be inserted into the appropriate sections of the Design-Build

Agreement with the selected Proposer. Proposers shall keep their Price Proposals open for 1 year after submission of their Price Proposal. Proposers shall be entitled to rely on the written information provided by the Owner in the RFP and any Addenda in developing their Price Proposal; however, the selected DB will be required to validate all Project information as set forth in the Contract Documents. By submitting a Price Proposal, the Proposer represents and warrants that it will enter into the Agreement set forth in Attachment B for the amount set forth in the Price Proposal, subject only to changes as allowed under the Agreement.

**2.6.2** The Proposer has carefully examined the RFP and the Performance Criteria Report and ascertained the nature, scope, and location of the Work. The Proposer has investigated and assured itself as to the general and local conditions that can affect the Work or its cost, all geotechnical and existing site conditions data, and all Plans, Specifications, Addenda, and Contract forms. The submittal of the Technical and Price Proposals shall be conclusive evidence that the Proposer has made such examinations and understands all the requirements for the performance of the completed Work. Failure of the Proposer to take these actions will not relieve it of responsibility for properly estimating the difficulty and cost of successfully completing the Work, or for proceeding to successfully complete the Work without additional cost to the Owner. The Proposer shall determine the methods, materials, labor, and equipment required to perform the completed Work and shall reflect their cost in the Price Proposal.

**2.7 Selection of Preferred Proposer**

The Owner will evaluate each Proposer pursuant to the selection criteria and weights established herein. The Owner will determine the Preferred Proposer and notify all Proposers in writing of its determination. The “Preferred Proposer” is the Proposer that the Owner determines achieves the apparent best value to the City.

| Criterion                                         | Possible Score |
|---------------------------------------------------|----------------|
| <b>Technical Proposal</b>                         |                |
| <b>Management Approach</b>                        | 3              |
| <b>Quality Assurance and Quality Control</b>      | 3              |
| <b>Schedule and Cost Controls</b>                 | 4              |
| <b>Team/City Collaboration and Integration</b>    | 3              |
| <b>Design Development and Management</b>          | 3              |
| <b>Project Sequencing and Scheduling</b>          | 4              |
| <b>Proposed Design and Performance Guarantees</b> | 20             |
| <b>Price Proposal and Life-Cycle Cost</b>         | 60             |
| <b>Total</b>                                      | 100            |

**2.7.1** At the Owner’s discretion, the Owner will initiate negotiations with the highest ranked Proposer. If the Owner cannot reach agreement with the highest ranked Proposer, the Owner may cease negotiations with the highest ranked Proposer and provided that such negotiations are terminated in writing, shall initiate negotiations with the next highest ranked Proposer. The Owner shall continue with this process with each such Proposer until it reaches agreement or cancels the procurement. Negotiations are at the Owner’s sole discretion. Proposers should not anticipate that any portion of the proposed Contract will be changed or modified. By submitting a Proposal pursuant to the RFP, the Proposer represents and warrants that it will enter into the contract provided by the Owner subject to the terms set forth in its Proposal.

## **2.8 Selection DeBriefing**

All Proposers may request a debriefing from the Owner with respect to the Procurement; however, Owner shall conduct no such debriefings until it has either reached an agreement on the Project or canceled the Procurement.

## **2.9 Public Records**

All records, documents, drawings, plans, specifications and other material relating to the Project including materials submitted by the Proposer in its Proposal and if selected during the course of performing under the Contract shall become the exclusive property of City and shall be deemed public records. Said materials are subject to the provisions of the California Public Records Act (Government Code sections 6250 et. Seq.). City’s use and disclosure of its records are governed by this Act.

City will not advise as to the nature or content of documents entitled to protection from disclosure under the California Public Records Act, including interpretations of the Act or the definitions of “TRADE SECRET” or “CONFIDENTIAL” or “PROPRIETARY” as determined by the Proposer. City will endeavor to notify Proposer of any request of the disclosure of such materials.

Under no circumstances, however, will City be liable or responsible for the disclosure of any such labeled materials whether the disclosure is required by law or a court order or occurs through inadvertence, mistakes or negligence on the part of City, its officials, officers, employees, agents, contractors or volunteers.

In the event of litigation concerning the disclosure of any material submitted by Proposer, City’s sole involvement will be as a stake holder, retaining the material until otherwise ordered by a court.

Proposer, at its sole expense and risk, shall be responsible for prosecuting or defending any action concerning the materials, and shall indemnify and hold City harmless from all costs and expenses including attorneys’ fees, in connection with such action.

## **2.10 Questions, Clarifications, and Concerns**

The Proposal Performance Criteria Report describing this project has been carefully prepared. Any questions or concerns relating to these requirements shall be directed in writing to the Public Works Director (see cover page) and shall be sent by email. A Proposal Question form for this purpose has been included as Attachment D.

Questions will be accepted only up to March 23, 2018 by 5:00 PM, to allow the City, if necessary, to issue an addendum to all proposers stating revisions, deletions, or additions to be made to the Proposal requirements as a result of any questions. If questions arise after the deadline, please contact the Public Works Director, Rob Livick, at [rlivick@morrobayca.gov](mailto:rlivick@morrobayca.gov), but the City will not guarantee a response.

Any communications initiated by a Design-Build Team with the City, City's representatives, and/or project stakeholders other than via email with Mr. Livick about the Water Reclamation Facility may result in disqualification. All communications shall be directed to Rob Livick. If a community member or group, or any other entity reportedly representing the City other than Rob Livick, initiates communications with a Design-Build Team regarding the project during the proposal period, the Design-Build Team shall note the day, time, and entity's information if provided, decline to discuss the project, and request that they contact Mr. Livick. DB Team shall also inform Mr. Livick about the communication.

The City will not be responsible for verbal responses made by City staff.

### **2.11 Notification of Staff Determination**

Once the City has reviewed and evaluated the proposals received and has determined for award the responsible proposal that provides the best value to the City, that determination will be posted on the City's website, **morrobaywrf.com**. It is the sole responsibility of interested Proposers to seek this information.

Any protests shall be received by the City Clerk at 595 Harbor Street, Morro Bay, California 93442, by 5:00 PM PT on the 10th day following the City's written notice of the selected Design-Build Teams. The protest shall be a letter correspondence submitted via US Mail or hand-delivery (not email or fax) and state the specific grounds for the protest, including facts supporting those specific grounds. Protests received after the stated deadline will not be considered.

Protests will be reviewed by the Public Works Director/City Engineer, and the City's response to protests will be issued within 20 business days from receipt of the protest. The Public Works Director/City Engineer will make the final determination, and no further appeals will be allowed.

## SECTION 3 DOCUMENTATION REQUIREMENTS

### 3.1 Submittal Process

**3.1.1** Proposers must submit eight hard copies of the Proposal documents and two copies of the Price Proposal. In addition to the hard copies of the Proposal documents and Price Proposal the Proposer must submit one copy electronically on a USB memory device.

- The submittal shall be sealed and include on the outside of the package the Request for Proposal number, title, Proposer's Name and due date and time. The Price Proposals must be included in the package an enclosed separate envelope in compliance with sections 1.3 and 2.6 above.
- The Owner will stamp the submittals with a date and time stamp to record timeliness.
- Proposers are responsible for ensuring timely delivery of submittals. The Owner is not responsible for late submittals.
- The electronic version must be submitted in a searchable .pdf format.

### 3.2 Submittal Format Requirements

All submittals shall comply with the following format requirements:

**3.2.1** Organized in accordance with the RFP.

**3.2.2** When printed, shall be limited to the page limitation set forth in the instructions for each section.

- The **only** documentation that is **not** included in the page count is the following:
  - Cover Letter
  - Appendices (provided that each Appendix meets the page count set forth in the requirement for the Appendix)
  - Table of contents or tabs will not be counted against the page count as long as these items are used exclusively for organization and contain no substantive written or graphic content
  - Attachment E Proposal Forms
  - Design proposal plans or drawings
- In the event that the page limit is exceeded, the Owner, at its sole discretion, reserves the right to remove pages from the sections of any non-conforming submittals to bring each non-conforming submittal within the page count requirement.
- A "page" shall be defined as one single-sided piece of paper that has words, charts, tables, pictures, or graphics. Pages shall be 8.5 x 11 inches, with the exception of 15 total pages, which may be presented in 11 x 17-inch format; however, larger pages may only contain graphics and/or designs and may not be used for a Proposer's narrative.
- The font on any portion of the submittal, including graphics, should be no smaller than 11 point.

### 3.3 Cover Letter

Proposers must include a cover letter that includes the following: (1) name, address, telephone number, and e-mail address for each Proposed Design-Build Team Member that has been added to the Proposed Design-

Build Team since submission of the SOQ and (2) any requested changes to the Proposed Design-Build Team since submission of the SOQ. Note that changes to the Proposed Design-Build Team continue to be subject to the RFQ, and Proposers should include an explanation justifying the changes to the Proposed Design-Build Team. The cover letter shall be a maximum of two (2) pages.

### **3.4 Technical Proposal**

The Technical Proposal may not be longer than 60 pages. Proposers should focus their discussions in the Technical Proposal on their approach to the Project.

#### **3.4.1 Overall Management Approach**

- Describe the Proposer’s overall management approach to the Project. In responding to this evaluation factor, Proposers should address the following:
  - Based on the information provided in the RFQ, RFP, and Proprietary Meetings, what is the Proposer’s current understanding of the goals and objectives of this Project?
  - What strategies will the Proposed Design-Build Team employ to achieve a thorough and clear understanding of the Owner’s goals and objectives?
  - Identify three (3) key challenges to the Project, and for each challenge identified, propose a strategy to mitigate the potential negative impacts of the challenge.
- Provide a Risk Register including mitigation strategies for the Top 5 Risks to the Owner’s Goals and Objectives identified by the Proposer.
- Identify any unique approaches, strengths, and/or differentiating resources (including specific Key Team Members) that will assist the Proposed Design-Build Team to implement the strategy and assist the Owner in achieving its goals.
- The Owner recognizes the importance of the entire design-build team, including specialty design-build subcontractors. For those subcontractors and subconsultants not proposed as part of the Design-Build Team,
  - Describe the Design-Build Team’s overall approach to subcontractor and subconsultant procurement for the Project.
  - Identify the challenges in the selection of subcontractors and subconsultants for the Project and how the Design-Build Team will address those challenges.
  - Identify how the Proposer will ensure compliance with DBE, MBE, WBE, and SBE requirements as well as any other procurement requirements as referenced in the Draft Design Build Agreement.
  - If applicable, describe in detail the Design-Build Team’s approach to early subcontractor involvement, including proposed design-build and design-assist subcontractors, and identify which scopes of Work are candidates for design-build or design-assist subcontracts.

#### **3.4.2 Quality Assurance/Quality Control (“QA/QC”)**

- Provide the following information regarding the Proposed Design-Build Team’s approach on QA/QC. Proposer will present QA/QC approach for both design and construction, since the approaches for each stage of project development may differ significantly. Include the following information:

- The overall approach to both design and construction QA/QC
- The Proposed Design-Build Team's processes and tools to facilitate QA/QC
- The reporting and functional relationship(s) between the Quality Management personnel and the Proposed Design-Build Team as a whole
- Description of the Design-Build Team's commitment to safety and what innovations the Team will bring to the Project to enhance safety.
- Description of the different safety plans for the proposed project for the Design-Build staff, City Staff, and public

The information provided in response to this Section of the RFP will be scored based on the following:

- The Proposed Design-Build Team's understanding of the delivery method
- The Proposer's technical approach to providing a project which meets all the project objectives
- The degree to which the Proposed Design-Build Team understands the Owner's goals and objectives with respect to the Project
- The strength of the Proposed Design-Build Team's management plan for the Project, including not only the specific topics and specialized components outlined in the RFP or discussed in the Confidential Individual Meetings, but also any other component or element that the Proposed Design-Build Team deems essential to the success of the Project
- The approach to overall project safety
- The approach to project staffing and potential benefits to co-location of Proposed Design-Build Team with Owner's management team

### **3.4.3 Project Controls, Cost Tracking**

Describe the DB's processes and tools for monitoring, reporting, and managing cost, including but not limited to:

- Design to budget control and reporting processes
- Scope, cost, and schedule baseline development
- Management/change control processes and the participation and interaction among the scheduling and estimating teams, project, design, construction, and operations management teams to execute these processes
- Risk management processes and how quantified risk cost and schedule values are factored into the cost and schedule baseline, projected cost and schedule performance, and cash flow reporting
- Cash flow reporting processes and basis for monthly cash flow estimated values
- Process to plan, track, and manage Disadvantaged, Minority, Small, and Woman owned businesses
- Process to plan, track, cash flow, and correctly bill Federal and State Grant and Loan eligible and ineligible work in place
- Document control system integration with work breakdown structure and responsibility assignment matrix or organizational structure
- Ensuring compatibility with City's Procore Project Management System

- Providing payroll and other cost information necessary for State and Federal regulatory compliance and funding agency requirements

The information provided in response to this Section of the RFP will be evaluated based on the following considerations:

- The robust nature of the Proposed Design-Build Team’s plan for tracking and measuring the metrics for the Project, including but not limited to costs and schedule
- The Proposed Design-Build Team’s plan to collaborate in the development and communication of budget, costs, and schedule to the Owner
- The differentiating resources that the Proposed Design-Build Team provides for the Project

#### **3.4.4 Collaboration and Integration**

One of the primary goals for the Project is to create a highly functioning, collaborative, and integrated team as early as possible and to incorporate the Owner’s staff and consultants as part of that team.

- Explain the Design-Build Team’s approach to creating a collaborative environment for the Project
- Describe how the Design-Build Team will engage City Staff and program management support team and incorporate their input into the Project
- Provide the DB’s approach to conflict resolution between the Owner and the DB and among members of the Design-Build Team

The information provided in response to this Section of the RFP to will be evaluated based on the following considerations:

- The strength and viability of the Design-Build Team’s plan to communicate and collaborate with the Owner, including not only the specific topics on which the Owner has requested discussion but any other topics that the Proposed Design-Build Team deems essential to the success of the Project
- The ideas and innovations submitted by the Design-Build Team that will enhance and foster collaboration and integration
- The differentiating resources that the Design-Build Team will bring to the Project and how those differentiating resources will enhance the Project

#### **3.4.5 Design Development and Management**

In developing the design for the Project, the DB will be required to seamlessly incorporate the new buildings and facilities; coordinate and integrate Owner information systems; obtain and incorporate design input from multiple external stakeholders as well as multiple stakeholders within the Owner; and satisfy the safety, regulatory, and security requirements of multiple governmental entities, all while satisfying the Performance Criteria Report requirements.

- Describe the Design-Build Team’s overall approach to Design Excellence, design commitment, design development, and management for the Project. Include a description of the design management process and the communications between the Owner and the DB during this process
- Identify the challenges in developing the design for the Project and how the Design-Build Team will address those challenges

- Provide details regarding the tools used in the design process, including any modeling, and how those tools will assist the DB in achieving those goals
- Describe the Proposed Design-Build Team’s approach to value engineering for the Project
- Describe the Proposed Design-Build Team’s process for managing quality assurance and quality control during the design process and identify the Key Team Members who will be tasked with the review and coordination of all phases of design documents
- Describe the Proposed Design-Build Team’s approach for managing the permitting process. (for those permits under responsibility of Design-Build Team)

The information provided in response to this Section of the RFP will be evaluated based on the following considerations:

- The strength and viability of the Proposed Design-Build Team’s design management plan, including not only the specific topics on which the Owner has requested discussion but any other topics that the Proposed Design-Build Team deems essential to the success of the Project
- The quality of the Proposed Design-Build Team’s approach to design excellence for the Project and the ideas and innovations proposed to achieve design excellence
- The differentiating resources that the Proposed Design-Build Team will bring to the Project and how those differentiating resources will enhance the Project

### **3.4.6 Project Sequencing and Scheduling**

Provide a project schedule showing all key project milestones and include a list of all assumptions used in developing the schedule for the services presented in Section 3 and other potentially driving factors including but not limited to the following:

- |                           |                                       |
|---------------------------|---------------------------------------|
| • Project Meetings        | • Controls Installation               |
| • Design Phase            | • Controls System Integration         |
| • Submittal Review        | • Training                            |
| • Equipment Procurement   | • Submission of O&M Manuals           |
| • Civil Construction      | • Point of Substantial Completion     |
| • Equipment Erection      | • As Built Drawings                   |
| • Mechanical Construction | • Point of Final Completion           |
| • Electrical Construction | • Performance and Operational Testing |

The construction schedule should meet the Owner’s estimated completion date, promote efficiency, and have the least amount of impact on Owner operations and the Project stakeholders as possible. Primavera P6 shall be used for scheduling.

- Describe the Proposed Design-Build Team’s overall approach to scheduling and construction sequencing for the Project, in addition to the overall approach, include a description as to how the Design-Build Team will address regulatory and stakeholder approvals for the permitting process

- Identify the challenges in scheduling the construction for the Project and how the Design-Build Team will address those challenges
- Provide details regarding the tools used in developing optimal sequencing and coordination of the Work and how those tools will assist the DB in achieving those goals including but not limited to administration of the consultants, subconsultants, suppliers, UV validation testing, and subcontractors
- Describe the assumptions and constraints under which the proposed schedule was based, including proposed durations, sequencing and logic, and skilled labor availability for determining manpower projections

The information provided in response to this Section of the RFP will be evaluated based on the following considerations:

- The strength and viability of the Design-Build Team’s project sequencing and scheduling plan, including not only the specific topics on which the Owner has requested discussion but any other topics that the Design-Build Team deems essential to the success of the Project
- The differentiating resources that the Design-Build Team will bring to the Project and how those differentiating resources will enhance the Project

### **3.4.7 Proposed Design**

Proposers shall submit a Design Proposal that meets or exceeds the criteria set forth in the Performance Criteria Report. The Design Proposal shall be submitted as follows:

- The Design Proposal shall include a written description of the facility design, a description of the operation strategies, and drawings
- The Design Proposal must be included in the format detailed in 3.2.2 above

The Proposed Design should be developed to the schematic phase and specifically include the following elements:

- Process flow diagram
- Hydraulic profile for the facility from influent through pump stations
- Facility, process, and equipment unit capacities including:
  - Influent characteristics with flow rates and constituent loading limits
  - Effluent characteristics with flow rates and constituent loading limits
- Major equipment to be purchased (over \$75K)
- Preliminary facility site plan
- Preliminary equipment layouts
- Complete a proposal form for each system (refer to Attachment E – Sample Proposal Forms). The proposal form should at minimum include the following: system description, types and number of major equipment items; size including volume, height, and footprint; manufacturer and model number; and other information necessary to provide the City with sufficient information to understand the proposed systems

- Projected power consumption requirements
- Single line electrical drawings
- Projected Operational and Maintenance costs
- Projected Lifecycle costs

The Owner, in its sole discretion, will determine whether the Proposed Design:

- Meets the Owner’s goals and objectives and is consistent with the Performance Criteria Report
- Describes an achievable strategy to meet the Owner’s Budget and Schedule

### **3.4.8 Performance Guarantee**

The Proposer shall include with the proposal a performance guarantee for the WRF systems which provides a detailed description of their performance. The performance guarantee is to be provided for City review and will be included in the final contract documents. These guarantees must be applicable for all flow rates and loadings included in the performance requirements. All assumptions and constraints must be included with each guarantee. The guarantees must include a stated quantifiable performance level and tolerances for the following:

- WRF Wastewater Influent Maximum/minimum process inputs – This guarantee is intended to provide the City and DB the ability to ensure the processes are compatible with the upstream processes enabling the WRF to effectively treat wastewater. The guarantee shall include all applicable inputs to the WRF and each treatment unit process.
- WRF Wastewater Effluent Maximum/minimum process outputs - This guarantee is intended to provide the City and DB the ability to ensure the processes will complement downstream processes enabling the WRF to effectively treat wastewater. This guarantee shall include all applicable process (max/min) outputs for the WRF and each treatment unit process.
- Power consumption and efficiencies (for all equipment over 10 hp) – This guarantee is intended to provide the City a guaranteed contractual benchmark to gage the efficient operation of the WRF. The power consumption (kWh) shall be stated per each piece of equipment with the WRF at steady state operation at both anticipated initial and future average day design flows.
- Consumables use rates – This guarantee is intended to provide the City with a guaranteed benchmark to ensure efficient use of consumables and operation of the WRF treatment systems. All consumable guarantees should be standardized to a base of per hour/mgd/etc. with the WRF at steady state operation at both anticipated initial and future average day design flows.
- Major Equipment availability (including at minimum rough and fine screening with conveyance and dewatering, membranes, blowers, UV system trains, advanced oxidation system, biosolids dewatering, and chemical systems). The purpose of this guarantee it to provide the City a guarantee of equipment availability to continuously treat wastewater. Equipment availability is the amount of time equipment is guaranteed to be in “Auto” operational mode. The amount of time necessary for maintenance, component rebuild, breakdowns and similar are not included in the time available.

## **SECTION 4 ATTACHMENTS TO THIS RFP**

Attachment A: Performance Criteria Report

Attachment B: Proposed Contract Documents (Design-Build Agreement)

Attachment C: Price Proposal and Life-Cycle Instructions

Table of Contents

SECTION 1 Introduction .....1-1

1.1 Background and Project Goals ..... 1-1

1.2 Overview ..... 1-2

1.3 Design-Build Entity & City Responsibilities ..... 1-6

1.4 Influent Flows and Water Quality ..... 1-9

1.5 General Requirements ..... 1-11

1.6 Effluent Quality Requirements ..... 1-12

1.7 Treatment Capacity..... 1-13

1.8 Plant Production Requirements..... 1-13

1.9 Durability Requirements..... 1-14

1.10 Anticipated Environmental Mitigation Measures..... 1-15

SECTION 2 Treatment Process Criteria .....2-1

2.1 General..... 2-1

2.2 Influent (Coarse) Screening..... 2-3

2.3 Grit Removal ..... 2-4

2.4 Flow Equalization Basin..... 2-5

2.5 Fine Screening ..... 2-6

2.6 Membrane Bioreactor..... 2-7

2.7 Aerobic Sludge Digester ..... 2-9

2.8 Sludge Dewatering ..... 2-9

2.9 Reverse Osmosis ..... 2-10

2.10 Ultraviolet Advanced Oxidation Process (UVAOP)..... 2-14

2.11 Chemical Storage and Feed Facilities..... 2-15

2.12 Odor Control ..... 2-20

2.13 Effluent Pump Station ..... 2-21

2.14 Recycled Water Pump Station ..... 2-22

2.15 Recycled Water Storage Tank ..... 2-23

2.16 On-site Reclaimed Water System ..... 2-24

2.17 Vactor Receiving Station ..... 2-25

SECTION 3 Architectural and Landscaping Criteria.....3-1

3.1 General..... 3-1

3.2 Applicable Codes..... 3-1

3.3 Buildings..... 3-1

3.4 Aesthetic Design ..... 3-1

3.5 Exterior Materials ..... 3-2

3.6 Interior Materials and Building Elements ..... 3-4

3.7 Plantings..... 3-13

3.8 Irrigation ..... 3-15

3.9 Decorative Fences and Gates..... 3-16

3.10 Space Needs..... 3-16

3.11 Building Schematics ..... 3-16

3.12 Space Needs Identification Forms ..... 3-16

3.13 Equipment and Furniture List ..... 3-16

3.14 Landscape Plan..... 3-16

SECTION 4 Structural Criteria.....4-1

4.1 General..... 4-1

4.2 Load and Deflection ..... 4-1

4.3 Building Structure Types ..... 4-2

4.4 Tanks and Basins ..... 4-4

4.5 Non-Building and Miscellaneous Structural Elements..... 4-5

4.6 Foundations ..... 4-6

4.7 Structural Materials ..... 4-7

SECTION 5 Civil Criteria .....5-1

- 5.1 General..... 5-1
- 5.2 Site Improvements..... 5-1
- 5.3 Site Layout ..... 5-2
- 5.4 Site Access Road ..... 5-2
- 5.5 Offsite Pipeline Coordination..... 5-5
- 5.6 Potable Water ..... 5-5
- 5.7 Fire Protection ..... 5-9
- 5.8 Grading and Drainage ..... 5-10
- 5.9 Pavement/Roadways ..... 5-12
- 5.10 Construction Dust Control and SWPPP Stormwater Management ..... 5-14
- 5.11 Facility Stormwater Management Post-Construction Requirements ..... 5-16
- 5.12 Noise Control ..... 5-16

SECTION 6 Geotechnical Criteria .....6-1

SECTION 7 Mechanical Piping Criteria .....7-1

- 7.1 General..... 7-1
- 7.2 Piping ..... 7-2
- 7.3 Valves..... 7-4
- 7.4 Valve Actuators ..... 7-7
- 7.5 Pumps ..... 7-8
- 7.6 Nuts and Bolts..... 7-10

SECTION 8 Electrical System Criteria .....8-1

- 8.1 Utility Electrical Service..... 8-1
- 8.2 Data Service ..... 8-1
- 8.3 Alternative Solar Power ..... 8-1
- 8.4 Electrical Distribution..... 8-1
- 8.5 Basic Electrical Work..... 8-1

8.6 Distribution Equipment..... 8-4

8.7 Lighting Equipment ..... 8-9

8.8 Fire Alarm System ..... 8-10

8.9 Hazardous and Environmental Locations..... 8-10

8.10 Electrical System Studies ..... 8-11

8.11 Electrical Testing ..... 8-12

SECTION 9 Instrumentation and Controls.....9-1

9.1 General..... 9-1

9.2 System Description ..... 9-1

9.3 Cyber Security ..... 9-6

9.4 Control System Hardware ..... 9-8

9.5 Monitoring and Control ..... 9-14

SECTION 10 Mechanical HVAC Criteria .....10-1

10.1 General..... 10-1

10.2 Basic Mechanical HVAC Work..... 10-4

10.3 Fuel Storage for Emergency Generator ..... 10-4

10.4 Mechanical HVAC Equipment ..... 10-5

10.5 Ductwork and Appurtenances ..... 10-7

10.6 Mechanical Controls and Monitoring ..... 10-8

10.7 Startup, Commissioning, and Testing ..... 10-8

SECTION 11 Demolition and Removal of Existing WWTP .....11-1

11.1 General..... 11-1

11.2 Decommissioning and Demolition ..... 11-1

11.3 Disposal..... 11-1

SECTION 12 Facility Startup and Commissioning and Transfer of Operations .....12-1

12.1 General..... 12-1

12.2 Definitions..... 12-1

12.3 Facility Testing Plan..... 12-1

12.4 Functional Testing..... 12-2

12.5 Acceptance Testing ..... 12-2

12.6 Performance and Operation Testing..... 12-3

SECTION 13 Security .....13-1

13.1 General..... 13-1

**SECTION 1 INTRODUCTION**

This Performance Criteria Report (PCR) is Attachment A of the Request for Proposals (RFP) for the City of Morro Bay Water Reclamation Facility (WRF) Onsite Improvements Project.

**1.1 Background and Project Goals**

The existing WWTP was originally constructed in 1953, and the WWTP was upgraded in 1964, 1982, and 1984. The WWTP is jointly owned and operated by the City of Morro Bay and Cayucos Sanitary District (CSD) under a Joint Powers Agreement, and currently serves approximately 14,000 people between the two communities. The WWTP has been operated under National Pollutant Discharge Elimination System (NPDES) Permit No. CA007881 and a 301(h) modified discharge permit since its last upgrade in 1984. The Central Coast Regional Water Quality Control Board (RWQCB) recently renewed the NPDES permit, which includes removal of the 301(h) waiver, meaning compliance with the California Ocean Plan and Federal Clean Water Act (including full secondary treatment) will be required. The permit indicates a time schedule order will be developed, with a time limit not to exceed 5 years.

After the California Coastal Commission denied a Coastal Development Permit (CDP) for construction to upgrade the wastewater treatment plant at its existing location in 2013, the City of Morro Bay began planning a new WRF. During 2013 and the beginning of 2014, the community defined goals to guide the planning and design process for the new WRF. From 2014 through 2016, the City evaluated many potential locations for the new WRF, before choosing the South Bay Boulevard site near Highway 1, based on detailed technical analysis and broad communitywide input. A draft Water Reclamation Facility Master Plan (FMP) that addressed adopted community goals was prepared for that site based on a series of technical workshops, and released in November 2016. A draft Master Water Reclamation Plan (MWRP) that addressed the most effective approach to water reuse was released in March 2017.

Following the release of these documents, the WRF program management team presented how the resulting cost estimates contained in those documents could translate into increased user rates. Both the City Council and many members of the general public expressed concern about the high project costs and their potential effect on user rates.

On April 25, 2017, the City Council explored this issue, seeking ways to reduce project costs, before committing to moving forward on the project described in the draft FMP and MWRP, including its analysis in the required Environmental Impact Report (EIR). As a result, the Council directed City staff to work with other local public works departments and convene a study session with key public works officials for the purpose of reviewing the assumptions contained in the City's draft master planning documents. The effort was to provide an outside professional perspective on the City's project, its inherent assumptions, and methodologies used in developing the cost estimates. The intent was for such a review to be a candid assessment, based on the experience of these public works professionals. The review workshop, consisting of a panel of four public works officials from around the County with relevant wastewater project experience occurred on June 7, 2017. The panel drew some key conclusions and findings and provided recommendations for potential cost cutting measures to consider for the project at the South Bay Boulevard. These recommendations, coupled with City Council's direction, resulted in revisions to the conceptualized project and reduced the engineer's opinion of the total program cost by approximately \$17M. The main revisions from the project described in the Draft FMP are summarized as follows:

- a. Minimize odor control from extensive to moderate, focusing on raw wastewater locations.
- b. Locate the WRF on the portion of the site that requires less grading, where space for the corporation yard was proposed, and do not save space for potential future public facilities.

- c. Remove the septage receiving station and remote operations building, and reduce the size of fire pump facility.

These changes are incorporated in the Project described in this RFP.

The WRF will be solely owned and operated by the City of Morro Bay, and will serve residents of the City as well as any customers under contract with the City. The CSD is pursuing their own wastewater treatment project.

The project goals were developed and revised throughout the planning process. The original project goals were adopted in December 2013 and were most recently amended on October 24, 2017 to emphasize the need to reduce impacts to ratepayers. These amended goals are below:

- All aspects of the WRF project shall be completed ensuring economic value with a special emphasis on minimizing rate payer and City expense
- Communicate WRF project progress including general project status, milestones, and budget/cost information to our community members regularly
- Produce tertiary disinfected wastewater in accordance with the California Code of Regulations (CCR) Title 22 requirements for unrestricted urban irrigation
- Design to produce reclaimed wastewater to augment the City's water supply, by either direct or indirect means, as described in a master water reclamation plan and to maximize funding opportunities
- Include features in the WRF project to maximize the City's opportunities to secure funding and maximize efficiencies, including energy generation and recovery.
- Design to minimize the impacts from contaminants of emerging concern in the future
- Ensure compatibility with neighboring land uses

## **1.2 Overview**

The City of Morro Bay WRF will be designed to treat an annual average flow of 0.97 million gallons per day (MGD) of wastewater through full advanced treatment (FAT). The WRF will provide primary, secondary, tertiary, and advanced treatment, and will produce recycled water meeting standards for a groundwater replenishment reuse project (GRRP) using subsurface application, as defined in California Code of Regulations (CCR) Title 22 recycled water requirements. The WRF will be located at the South Bay Boulevard (SBB) site (Figure 1-1). Flow equalization may be required to handle high summer and winter wastewater peaks. FAT recycled water will be conveyed to injection wells in the Morro Valley. An effluent pipeline will convey advanced treatment waste streams, including brine, to the existing Morro Bay Cayucos Sanitary District (MBCSD) jointly-owned ocean outfall at the site of the existing wastewater treatment plant (WWTP).

A new lift station near the existing wastewater treatment plant (WWTP) will convey raw wastewater through a force main to the WRF. The lift station and offsite pipelines will be designed and constructed by others under different contracts, provided in Appendix A for reference. At this time, preliminary design of the offsite improvements has begun, but the construction contract will not be advertised for bidding until 2019. Additionally, the City is pursuing development of a SCADA Master Plan for the water and sewer utilities, including the WRF. The SCADA Master Plan RFP is provided in Appendix B. The WRF, access road to the WRF, and all design and construction within the SBB site and adjacent area north of Highway 1 right-of-way (ROW) are collectively referred to herein as the WRF Onsite Improvements Project (Project).

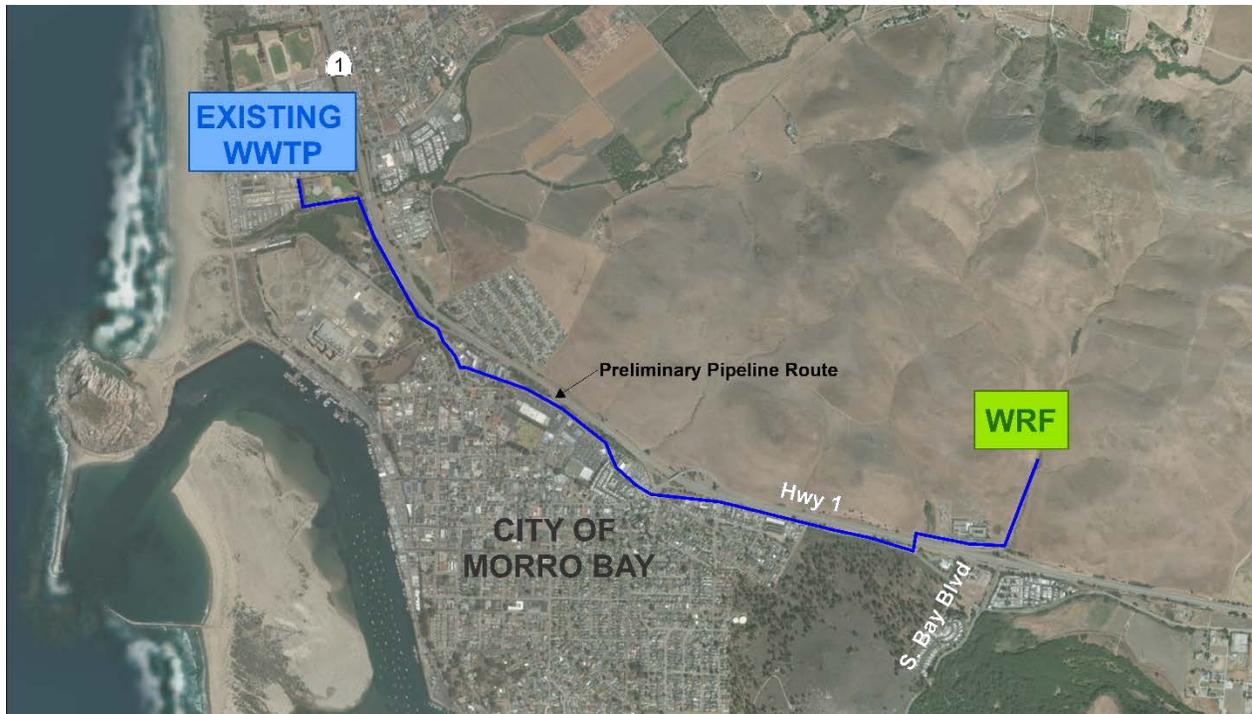

Figure 1-1: South Bay Boulevard WRF Site

The following table summarizes the current and anticipated WRF Project efforts and coordination of work. Additional details on the division of responsibilities are provided in the following Sections of this Report.

| Work Effort                                                                                                 | Responsible Party                      | Comments                                                                   |

| WRF Lift Station and Offsite Pipelines Construction                                                         | TBD                                    |                                                                            |
| Injection Well Pilot Study, Design, and Construction                                                        | TBD                                    |                                                                            |
| Land Use Permitting and Planning Agency Coordination                                                        | City and City’s Consultants            |                                                                            |

The WRF Onsite Improvements will consist of the following main components within the SBB site and adjacent access easement:

- Influent Screening
- Grit Removal
- Flow Equalization
- Fine Screening
- Membrane Bioreactor (or comparable activated sludge and membrane filtration)
- Aerobic Sludge Digester
- Sludge Dewatering
- Reverse Osmosis
- Ultraviolet Advanced Oxidation Process
- Odor Control
- Effluent Pump Station and Connection
- Recycled Water Tank, Pump Station, and Connection
- Influent Force Main Connection
- Operations and Maintenance Buildings
- Access Road and Site Access
- Utility Extension Through Site

The City plans to provide is full onsite WRF staffing 40 hours per week with remote and on-call operations on nights and weekends. A preliminary site layout showing property lines, planned easements, and preferred adjacency of the components is provided in Figure 1-2.

This WRF Performance Criteria Report includes the City's minimum design requirements. The City welcomes creativity in alternative solutions that provide capital or life cycle cost savings without sacrificing level of quality or performance during this proposal process and throughout design. The Report is not inclusive of all design requirements and does not relieve the Design Build Entity (DB) from its responsibility to execute the work according to the Contract Documents, reasonable engineering practices applicable to WRFs for GRRPs, and in full compliance with all regulations and laws including the NPDES Permit, WDRs, and Title 22 requirements. The DB is expected to complement these criteria with all needed facilities for a complete and operable WRF meeting the objectives of the Project and Contract.

- ㉓ Chemical Building
- ㉔ Vector Receiving Station

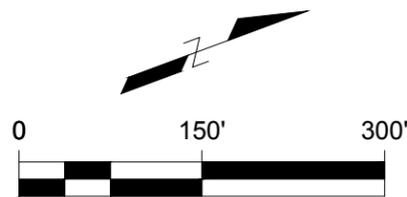

**Notes:**

1. Access for maintenance, repairs, and major equipment replacement will be provided around all processes and facilities.
2. Providing a functional layout is the responsibility of design build entity (DB).
3. City will approve final layout before building permit planset is developed and before issuing Notice to Proceed for Construction.
4. Consider offsite drainage in site design.
5. Maintain setback of 25' from top of creek banks.
6. Drainage easements may be required to convey site flows from detention or stormwater quality facilities to existing swales. Easements to be identified by DB and negotiated by City with property owner.
7. Refer to Figure 5-1 for Preliminary Access Road Alignment and Typical Road Section.
8. Site plan to include space planning for future solar panels by others.

**1.3 Design-Build Entity & City Responsibilities**

The table below identifies responsibilities for main components of the Project. This list may not represent all responsibilities, since the DB is responsible for designing and constructing a complete and operable WRF meeting the objectives of the Project and Contract. Specific requirements for additional studies, reports, plans, and design submittals are identified in the RFP, contract documents, and PCR. DB will submit written results from all testing, analyses, and studies required in this PCR or in Contract Documents.

**1.4 Influent Flows and Water Quality**

Influent flows and loading have long been studied for the existing MBCSD WWTP. Table 1-1 and 1-2 summarize the most recent basis of design for start-up and build-out flows and loads, which have been provided as a reference. Historical WWTP influent water quality information is included as Appendix C. Flow and loading analyses were performed as part of the City's Draft Water Reclamation Facility Master Plan

(Black & Veatch, November 2016), as part of the 2007 Wastewater Treatment Plant Facility Master Plan Report (Carollo, September 2007), the 2009 Wastewater Treatment Plant Facility Master Plan Amendment 1 (Carollo, August 2009), and 2010 Wastewater Treatment Plant Facility Master Plan Amendment 2 (MWH, July 2010), and a flow analysis was performed in the 2006 Sewer Collection System Master Plan Update (Wallace Group, May 2006). Additional, more recent flow information is available in the 2017 Sewer Flow Monitoring and Inflow/Infiltration Study (V&A, September 2017), which will be provided to the proposers. The DB will be responsible for reviewing, and verifying or revising the WRF basis of design for flows and loads.

| <b>Table 1-1: Example Start-up Flow and Load Basis of Design Summary</b>                                                                                                                          |             |                       |                       |                    |                      |                   |                  |

| 8 | PG&E Savings by Design Incentives        | Incorporate PG&E Savings by Design into design and coordinate with City to optimize its incentives                                                                                                                                                                                                                                                                      |  |
| 9 | Access for Haulers and Chemical Delivery | Design and construct access for routine maintenance (including but limited to sludge hauling, chemical deliveries, screenings hauling, and other routine activities) to minimize reversing and back and forth movements by vehicles.                                                                                                                                    |  |

**1.6 Effluent Quality Requirements**

This section summarizes existing available information for the effluent quality requirements for the WRF. The effluent quality requirements will be set by the Department of Drinking Water (DDW) and the RWQCB as part of the permit (WDR/NPDES) for the WRF. The DB will work with the City, DDW, and RWQCB to determine the effluent water quality requirements for the Project.

The existing MBCSD WWTP operates under WDR Order No. R3-2017-0050, NPDES No. CA0047881 (Appendix D). However, a new permit will be developed for the WRF. At this time, the existing WDR/NPDES permit for the existing WWTP represents the best available information on anticipated permit requirements for the new

WRF with respect to ocean discharges through the existing ocean outfall. However, the City has established a goal of tertiary treatment for water discharged to the ocean.

**Table 1-3: Effluent Limits for Ocean Discharge for Selected Pollutants (WDR for Existing MBCSD WWTP Discharge to the Ocean, Order No. R3-2017-050)**

| Parameter                                                                                                                                                                                                      | Units                  | Effluent Limitations   |                |               |

| Turbidity                                                                                                                                                                                                      | NTU                    | 75                     | 100            | 225           |
| [1] The average monthly percent removal for BOD <sub>5</sub> and TSS shall not be less than 85 percent.                                                                                                        |                        |                        |                |               |
| [2] Mass based effluent limitations were calculated using the following formula:<br>$\text{lbs/day} = \text{pollutant concentration (mg/L)} * \text{Design flow (2.06 MGD)} * \text{conversion factor (8.34)}$ |                        |                        |                |               |

In addition to the effluent limitations summarized in the table above, effluent limitations are included for metals, cyanide, phenolic compounds, endosulfan, endrin, hexachlorocyclohexane (HCH) and radioactivity for the protection of marine aquatic life. Limitations on levels of carcinogens and non-carcinogens regulated for the protection of human health are also specified in the NPDES permit.

The ultimate permit for the WRF will include recycled water requirements. The minimum requirements can be anticipated to be defined by CCR Title 22, Division 4, Chapter 3 Water Recycling Criteria, as applicable for Indirect Potable Reuse: Groundwater Replenishment – Subsurface Application (injection wells).

### 1.7 Treatment Capacity

The WRF shall be designed to receive, store (as needed to equalize), and treat the full influent wastewater flows from the City of Morro Bay in accordance with the effluent requirements described above. Available information on the anticipated influent wastewater flows and water quality characteristics is provided in Section 1.3. DB shall be responsible for reviewing and confirming design influent wastewater flows and water quality.

### 1.8 Plant Production Requirements

The WRF shall be designed and constructed to produce a volume of recycled water for indirect potable reuse groundwater injection equal to 76% of the influent flow. This is estimated to be approximately 723 AFY at startup and 825 AFY at buildout; however, the DB shall determine design influent flows. The Lower Morro Valley Basin Screening-Level Groundwater Modeling for Injection Feasibility, prepared by GSI Water Solutions and dated May 16, 2017, is available on the project website (morrobaywrf.com).

**1.9 Durability Requirements**

The minimum design life requirements for the different project components are listed below. The DB shall consider the location of the project in the coastal environment when selecting materials, coatings and equipment. The DB may consider the project components and facilities will be operated and maintained by qualified staff. The necessary maintenance, repair and replacement will also occur in accordance with warranty requirements and other procedures specified by the DB and equipment manufacturers.

| Item | Parameter               | Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Notes                                                                                                                                                                                                                                                                                                                                                                                                                     |

**1.10 Anticipated Environmental Mitigation Measures**

The environmental analysis and CEQA documents are currently being prepared. The Draft Environmental Impact Report (EIR) is anticipated to be available in March 2018, with certification of the final EIR expected in June 2018. Refer to Appendix M for additional information and anticipated mitigation measures.

## SECTION 2 TREATMENT PROCESS CRITERIA

### 2.1 General

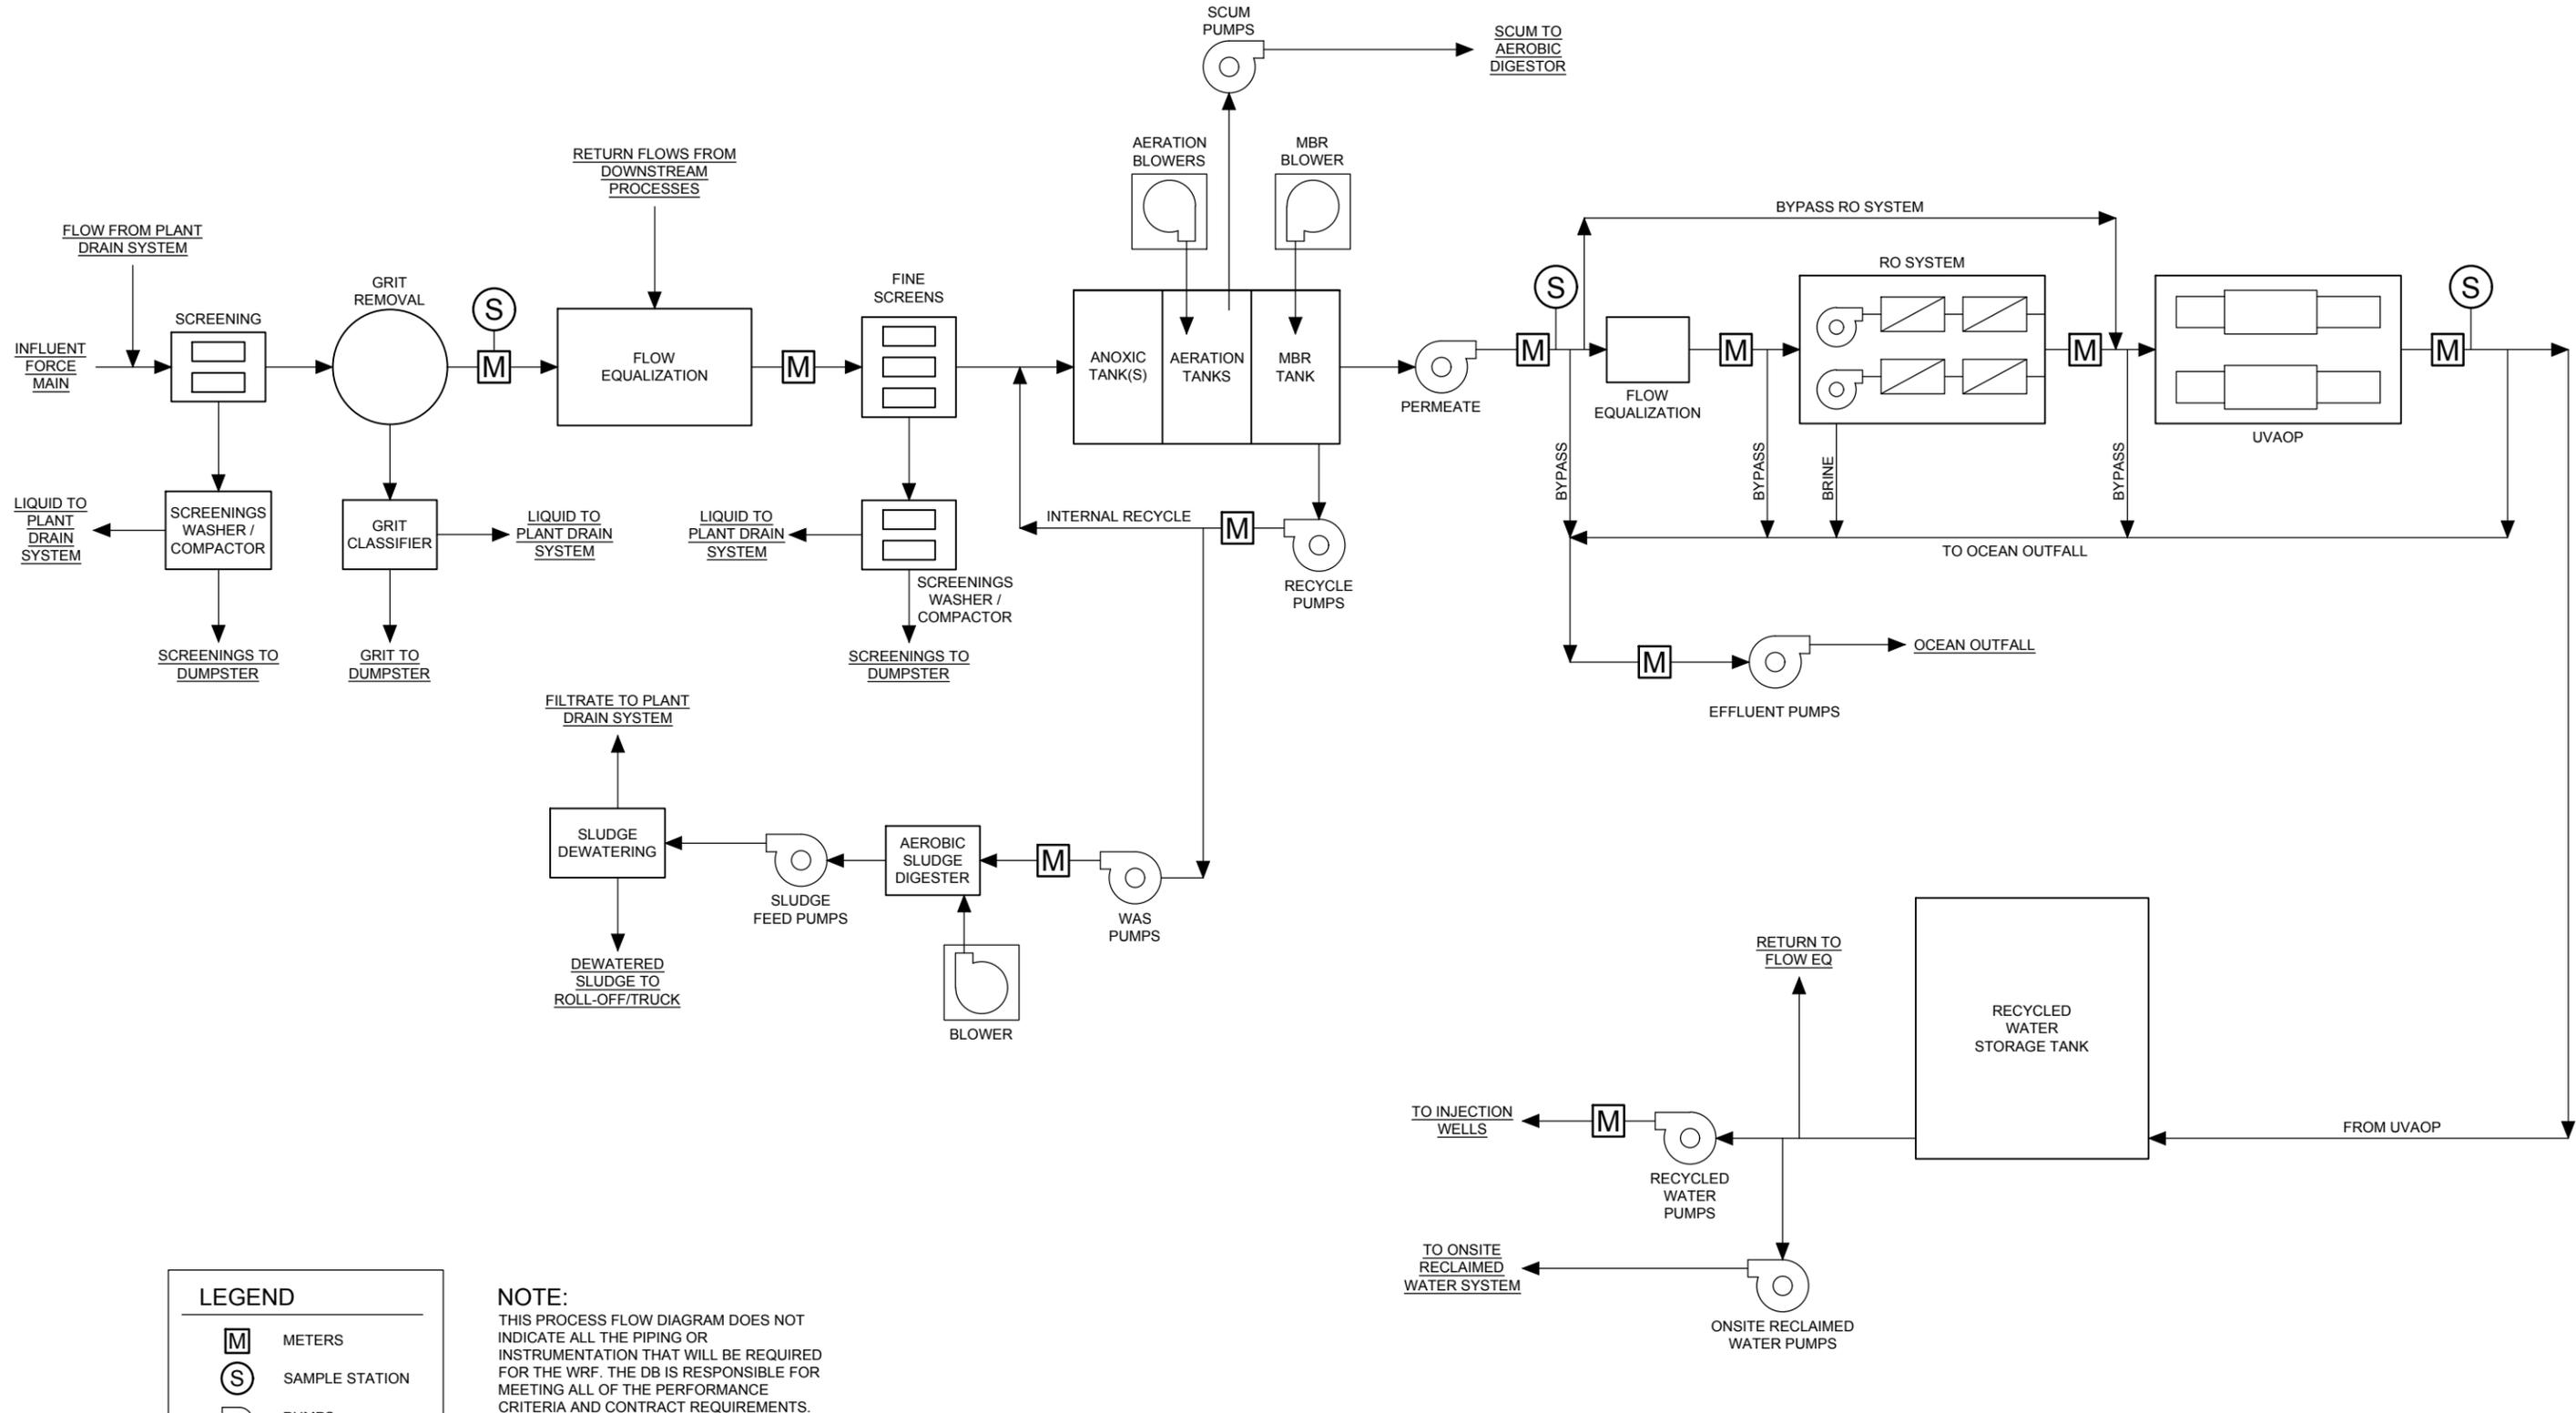

The WRF shall provide primary, secondary, tertiary, and full advanced treatment, with processes integrated to work as a whole and with operational flexibility to provide efficient treatment. The main treatment processes are summarized in the table below. Ancillary support facilities will also be required. A basic process flow diagram (PFD) is included as Figure 2-1.

| Item | Process                                        | Alternative                              | Notes |
|------|------------------------------------------------|------------------------------------------|-------|
| 1    | Influent (Coarse) Screening                    |                                          |       |
| 2    | Grit Removal                                   |                                          |       |
| 3    | Flow Equalization                              |                                          |       |
| 4    | Fine Screening                                 |                                          |       |
| 5    | Membrane Bioreactor (MBR)                      | Activated sludge and membrane filtration |       |
| 6    | Aerobic Sludge Digester                        |                                          |       |
| 7    | Sludge Dewatering                              |                                          |       |
| 8    | Reverse Osmosis (RO)                           |                                          |       |
| 9    | Ultraviolet Advanced Oxidation Process (UVAOP) |                                          |       |
| 10   | Chemical Storage and Feed Facilities           |                                          |       |
| 11   | Odor Control                                   |                                          |       |

The WRF treatment processes shall be integrated to work as a whole. Control systems throughout the WRF Treatment Processes shall be compatible with the overall site control system. Process monitoring shall be provided to allow for full regulatory compliance, monitoring, and recording of water quality and flow trends, evaluation of unit process performance, and evaluation of equipment condition.

**2.2 Influent (Coarse) Screening**

The Influent (Coarse) Screening System shall collect, wash, dewater, compress, convey, bag, and discharge solids to a rolling dumpster. Discharge area is to be paved with curbs and drainage to the WRF plant drain system. Conveyance, compaction, dewatering, and screening systems shall be provided by the same manufacturer. Minimize the distance and lift from screens to dumpsters to prevent conveyance system failures. Protect the screenings from wind, rain, and wet weather.

**2.3 Grit Removal**

The Grit Removal System shall remove grit from influent wastewater and discharge collected grit via automated valve(s) to a grit dewatering and conveyance system. Grit discharge area is to be paved with curbs and drainage to the WRF plant drain system. Conveyance, dewatering, and grit removal systems to be provided by the same manufacturer. Minimize the distance from grit removal system to dumpsters to minimize conveyance system failures.

| Item | Parameter                       | Criteria                                                                                                                                                                              | Notes                                                                                                  |

**2.4 Flow Equalization Basin**

The Flow Equalization Basin will receive primary influent and is intended to buffer flows to the treatment processes to promote steady flows through the treatment process. DB shall provide evaluation of the cost/benefit of reducing the capacity of downstream processes (MBR, RO, UV, and AOP) by balancing equalization, recycled water production, and controlled release of treated effluent to the outfall during peak flows.

Provide floor slopes, sumps, and spray systems to allow operators from a catwalk to remove solids and clean the equalization bays when they are not in use. Solids and washdown water shall run to the Aerobic Sludge Digester. Provide above ground electric actuators on all control gates. The Flow Equalization Basin will be provided as part of the full WRF treatment process.

|------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| 1    | Geometry        | <ul style="list-style-type: none"> <li>Rectangular with at least 4 equivalent sized bays and optimal length-to-width ratio to promote mixing and reduce settling</li> <li>The primary EQ bay shall be covered</li> </ul> | At least one bay will be in service at all times to receive return/recycle flows and to buffer daily peaks to the MBR |
| 2    | Materials       | Portland Cement Concrete with sulfide-resistant coating (wet areas only); 316 SS gates; aluminum or fiberglass for grating, hatches, and support                                                                         |                                                                                                                       |
| 3    | Mixing System   | Pump mix or coarse air                                                                                                                                                                                                   |                                                                                                                       |
| 4    | Size            | To be determined by DB                                                                                                                                                                                                   |                                                                                                                       |
| 5    | Design Capacity | 100% of influent flow into the basin; provide constant outflow to coordinate with downstream processes and production requirements                                                                                       | Provide steady flow to MBR                                                                                            |
| 6    | Pumps           | Provide one pump per bay and one redundant pump                                                                                                                                                                          |                                                                                                                       |
| 7    | Freeboard       | Provide two feet freeboard; allow flow above two feet of freeboard in one bay to overflow into the next bay, such that all bays will be filled before an overflow occurs                                                 |                                                                                                                       |
| 8    | Odor Control    | Provide odor control on primary EQ bay                                                                                                                                                                                   | Provide cover to contain odorous air, and ductwork and fans to transport air to                                       |

|   |                         |                                                                                                                                                                                                     |                                                                                                         |
|---|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
|   |                         |                                                                                                                                                                                                     | treatment. Include provisions in cover to allow sufficient access for cleaning of bay.                  |
| 9 | Operational Flexibility | Provide valves and/or gates and piping to allow operators to direct flows to different and/or multiple bays. Provide flexibility to direct return flows from downstream processes to different bays | Provide optional flow path to return flows back to the equalization basin from each downstream process. |

**2.5 Fine Screening**

The Fine Screening System shall collect, wash, dewater, compress, convey, and discharge solids to a rolling dumpster. Discharge area is to be paved with curbs and drainage to the WRF plant drain system. Conveyance, compaction, dewatering, and screening systems to be provided by the same manufacturer. Minimize the distance and lift from screens to dumpsters to prevent conveyance system failures. Protect the screenings from wind, rain, and wet weather.

| Item | Parameter                       | Criteria                                                                                                                                                              | Notes                                                                                                      |

|----------|------------|---------------------------------------------------------------------|--|

**2.6 Membrane Bioreactor**

The Membrane Bioreactor (MBR) System will receive equalized flows from the Flow Equalization Basin and provide biological treatment and filtration. Pumps, control valves, compressors, blowers, instrumentation, controls, and other equipment necessary for operation shall be furnished as part of a single MBR manufacturer’s package. Provide the following as part of the MBR System:

- Scum and foam control measures
